

To All VFC Providers

The New Jersey Vaccines For Children Program is now accepting orders for seasonal flu vaccine. Tier ordering does not apply when placing a flu order. Sites which order on-line can check for flu vaccine availability on-line. Check your on-line order after 48 hours to confirm the number of doses allocated to your office. Order the number of doses you **expect to use in a 30 day period**. The program receives its' flu vaccine supply in increments delivered in September, October and November. The program will enter as much of your order as there is supply available. Order again if you have additional children to vaccinate. NJVFC supplied vaccine is to be used for VFC eligible children only (0 - 18 years of age).
