

I. Major Capital Projects

Fall 2009 marked the completion of MCCC's One-Stop Student Center and Library renovation project. Undertaken with the goal of improving student services and accessibility, the project brought two of the college's major buildings, constructed in the early 1970s, up to current code standards. Many energy-saving elements were included.

Designed by the Spiegle Architectural Group, the construction added 7,000 square feet to the previous structures, with the total renovated space equaling 70,000 square feet. A new Reception Center connecting the Student Center and Library creates a visible entrance. A new second floor, added to the existing Library, houses the Bookstore, while the Learning Center, Academic Testing Center and Office of Special Services received major renovation. New short-term parking adds convenience.
