Waiting List for Community Care Waiver Eligibility Determination*

1. Number of eligible individuals removed from the waiting list
 - a. Reason for each individual's removal from the list
 - b. Length of time each individual had been waiting for services or supports prior to removal from the waiting list

Persons Classified as an Emergency*

**Data is currently being compiled*

Data Report FY 2015: Appendix

1. On July 1, 2014 there were 304 individuals living at the operating Developmental Centers who were in agreement for a move to the community.
 - a. Of the 304, 222 had a behavioral level of three or four. This behavioral level can be correlated with the need for behavioral supports.
 - b. Of the 304, 109 had a medical level of two, four or six medical which correlates to requiring some level of assistance with ambulation.
2. There have been no admissions to any developmental centers during the reporting period.
3. Admissions to developmental centers are governed by the Settlement Agreement contained in DRNJ II and III. This calls for a Pre-Admission Review to be completed by an Independent Admissions Review Officer who is not to be an employee of the New Jersey Department of Human Services.
4. Determination of placement of an eligible individual on a Division-maintained waiting list, including (a) criteria for determining waiting list priority level and priority-level ranking, and (b) protocol for identifying who will receive services, are outlined in [N.J.A.C. 10:46](#).
5. The Division does not maintain any county-based waiting list. The Division maintains a waiting list for Community Care Waiver eligibility determination. An individual who, based on ranking, reaches the top of the Community Care Waiver eligibility determination waiting list and is enrolled on the Community Care Waiver can access any required waiver service.
6. The historical trend indicates approximately 1,200 eligible individuals transition out of receiving services from a school district each year ("age out"). Of those eligible individuals, approximately 50% (600) proceed to receiving services through the Division.
7. Federal guidelines require that any person with a suspected developmental disability or related condition undergo a Pre-Admission Screening and Resident Review (PASRR) Level II before being admitted to a nursing facility. Individuals with a developmental disability are only admitted to a nursing facility if they are diagnosed with the below and cannot benefit from specialized services offered by the Division:
 - a. Terminal Illness with six months or less life expectancy
 - b. Dementia
 - c. Severe physical illness (Ex. Dependent on ventilator, etc...)
