Introduction:

Grow NJ Kids is New Jersey's program to raise the quality of early care and education (children from birth through pre-school) across the state. New Jersey's Departments of Children and Families, Education, Health and Human Services, have collaborated to create a program with two goals: to help all types of early care and education to continuously improve and to provide parents with information to help them select a high quality program.

Programs interested in participating in Grow NJ Kids will be required to complete the following self-assessment, but you won't be doing it alone. A Quality Improvement Specialist will provide an overview of the process and then will help you complete the self-assessment.

To learn more about the self-assessment process and Grow NJ Kids, visit www.GrowNJKids.com.

Early Care and Education Programs are defined as center-based, school-based, district-funded, as well as private schools for Special Education students.

Category 1: Safe, Healthy Learning Environments

A high quality learning experience can only be facilitated in a safe and healthy environment. An enriching environment must use appropriate classroom furnishings, maintain sanitary conditions, promote a healthy lifestyle, and have a teaching/caregiving team that works from a meaningful plan based on the developmental abilities and capacities of the children.

Category 2: Curriculum and Learning Environment

A research-based curriculum, when used with fidelity, provides a road map for teachers/caregivers to use in their rooms/classrooms. Teachers/Caregivers need to be formally trained in the program's chosen curriculum to ensure that the components are effectively being implemented. Training teachers/caregivers in appropriate assessment, whether through observation or using an assessment tool, is equally as important. Quality programs that implement a chosen curriculum with fidelity typically have the child outcome data to support it.

Category 3: Family and Community Engagement

Children develop in the context of their families. For some children, the term "family" includes a large number of people and for other children; family consists of just a parent or grandparent. In either scenario, family and community have significant influences on young children through cultural background and local values. Each community is unique and filled with many different cultures, religions, and languages. In order to support infants and young children to the fullest extent, their family and community need to be involved in the program design and implementation. Programs can provide children with quality learning experiences by connecting local values in their program design. The support that families rely upon must be considered as a vital piece in the effort to provide quality experiences to infants and young children.
