PARTIAL CARE SERVICES

Comprehensive, facility-based, structured, non-residential day treatment mental health services that may reduce the risk of hospitalization and that may include structured support, rehabilitation, relapse prevention, and/or the development of community living skills. Services may include counseling, psychoeducation, medication monitoring and other psychiatric care, prevocational training, direct skills teaching, and recreation and social events, available on a half-day or full-day basis for no fewer than five days per week.

UNITS OF SERVICE: Refers to the total count of units of service provided to all partial care clients. The definition of a unit of service is 1 hour = 1 unit; e.g. client attends for 2 hours of partial care services = 2 units of service.

PHYSICAL CLIENT CAPACITY: Refers to the space in which the PC/PH is located as limited by legal constraints such as fire codes, as well as what capacity the provider would feel comfortable serving, were resources made available to fund this capacity.
