

## Need Help with the CPS Technician Re-Certification process?

The certification cycle for both technicians and instructors is two years. In order to retain your certification, you must meet all of the requirements and successfully complete the re-certification process.

There are two general steps to successful re-certification:

1. Meet all pre-registration requirements, including:
  - Verified seat check activity (5 types)
  - Community event (one check up or community workshop)
  - Continuing Education Units (CEU) 6 hours required.
2. Register and pay for re-certification (this may be done up to four months prior to your certification cycle end date).

PLEASE NOTE: The re-certification process cannot be completed in a single day. Depending upon the choices you make, the process could take as few as five days to as many as 60 days. For more details see the Safekids Certification page at the following address - <http://www.cert.safekids.org> And select Re-Certification from the available choices.
