## Windows 7: Internet Explorer Compatibility View - Turn On or Off

# How to Turn Internet Explorer Compatibility View On or Off for a Website

Websites that were designed for earlier versions of **Internet Explorer** might not display correctly in **IE8**, **IE9**, or **IE10**. When you turn on **Compatibility View**, the webpage you're viewing, as well as any other web pages within the website's domain, will be displayed as if you were using an earlier version of Internet Explorer.

This tutorial will show you how to add (turn on) and remove (turn off) websites to be displayed in Compatibility View.

🤍 Note

Not all website display problems are caused by browser incompatibility. Interrupted Internet connections, heavy traffic, or website bugs can also affect how a webpage is displayed.

# Soption one

# **Through the Internet Explorer Address Bar**

**NOTE:** If Internet Explorer recognizes a webpage that is not compatible, you will see the Compatibility View icon button B on the Address bar.

#### 1. To Turn On Compatibily View for a Website in Internet Explorer

A) Click/tap on the unhighlighted Compatibility View icon button. (See screenshot below) **NOTE:** The webpage will now reload with Compatibility View turned on for it, and the website will be added to the list in compatibility view settings (Option Three below).

#### 2. To Turn Off Compatibily View for a Website in Internet Explorer

A) Click/tap on the highlighted (blue) Compatibility View icon button. (See screenshot below) **NOTE:** The webpage will now reload with Compatibility View turned off for it, and the website will be removed from the list in compatibility view settings (Option Three below).

# Through the Tools Menu

**NOTE:** *This will let you turn on or off Compatibility View for the current webpage.* **1.** Click/tap on the **Tools Menu Bar** (ALT+T) item. (See screenshot below)

**NOTE:** If **CompatibilityView** is grayed out, then the webpage has no compatibility issues and does not need to have Compatibility View turned on for it. You can still use **METHOD THREE** below to turn on Compatibility View for it though if you like.
