(a) If a casino licensee chooses to have the cards dealt from a manual dealing shoe, the dealing shoe shall meet the requirements of N.J.A.C. 13:69E-1.19. Once the procedures required by N.J.A.C. 13:69F-42.4 have been completed, the stacked deck of cards shall be

(b) Prior to dealing any cards and once all blind bonus wagers and flop wagers and, if applicable, 3 card bonus wagers and 6 card bonus wagers, have been placed, the dealer shall announce "No more bets."

(c) In dealing the cards, each card shall be removed from the dealing shoe with the hand of the dealer that is closest to the dealing shoe and placed on the appropriate area of the layout with the opposite hand. The dealer shall, starting with the player farthest to his or her left and continuing around the table in a clockwise manner, deal the cards as follows:

1. Three consecutive cards face down to each player;
2. Three consecutive cards face down to the dealer in a stack; and
3. Four consecutive cards face down in an area designated for the placement of the community cards, provided, however, that a casino licensee may elect to burn a card prior to dealing the first two community cards and burn a second card prior to dealing the third and fourth community cards.

(d) After three cards have been dealt to each player and the dealer, and four cards have been dealt to the area designated for the placement of the community cards, the dealer shall remove the stub from the manual dealing shoe and, except as provided in (e) below, place the stub in the discard rack without exposing the cards.

(e) The dealer shall be required to count the stub at least once every five rounds of play in order to determine that the correct numbers of cards are still present in the deck. The dealer shall determine the number of cards in the stub by counting the cards face down on the layout.

1. If the count of the stub indicates that 52 cards are in the deck, the dealer shall place the stub in the discard rack without exposing the cards.

2. If the count of the stub indicates that the number of cards in the deck is incorrect, the dealer shall determine if the cards were misdealt. If the cards have been misdealt (a player or the area designated for the placement of the dealer's cards has more or less than two cards, or the area designated for the community cards has more or less than five cards), but 52 cards remain in the deck, all hands shall be void pursuant to N.J.A.C. 13:69F-42.12. (f) Notwithstanding the provisions of (e) above, the counting of the stub shall not be required if an automated card shuffling device is used that counts the number of cards in the deck after the completion of each shuffle and indicates whether 52 cards are still present. If the automated card shuffling device reveals that an incorrect number of cards are present, the deck shall be removed from the table in accordance with the provisions of N.J.A.C. 13:69E-1.18.

13:69F-42.8 Procedures for dealing the cards from the hand

(a) Notwithstanding any other provisions of N.J.A.C. 13:69E or this chapter, a casino licensee may, in its discretion, permit a dealer to deal the cards used to play hold 'em 3 bonus from his or her hand.

(b) If a casino licensee chooses to have the cards dealt from the dealer's hand, the following requirements shall be observed.

1. The casino licensee shall use an automated shuffling device to shuffle the cards.

2. Once the procedures required by N.J.A.C. 13:69F-42.4 have been completed, the dealer shall place the stacked deck of cards in either hand.

i. Once the dealer has chosen the hand in which he or she will hold the cards, the dealer shall use that hand whenever holding the cards during that round of play.

ii. The cards held by the dealer shall at all times be kept in front of the dealer and over the table inventory container.

3. The dealer shall then announce "No more bets" prior to dealing any cards.

(c) The dealer shall deal each card by holding the deck of cards in the chosen hand and using the other hand to remove the top card of the deck and place it face down on the appropriate area of the layout. The dealer shall, starting with the player farthest to his or her left and continuing around the table in a clockwise manner, deal the cards as follows:

1. Three consecutive cards face down to each player;

2. Three consecutive cards face down to the dealer in a stack; and

3. Four consecutive cards face down to the area designated for the placement of community cards, provided, however, that a casino licensee may elect to burn a card prior to dealing the first two community cards and burn a second card prior to dealing the third and fourth community cards.

(d) After three cards have been dealt to each player and the dealer, and four cards have been dealt to the area designated for the placement of the community cards, the dealer shall, except as provided in (e) below, place the stub in the discard rack without exposing the cards.

(e) The dealer shall be required to count the stub at least once every five rounds of play in order to determine that the correct numbers of cards are still present in the deck. The dealer shall count the stub in accordance with the provisions of N.J.A.C. 13:69F-42.7(e).

13:69F-42.9 Procedures for dealing the cards from an automated dealing shoe

(a) Notwithstanding any other provision of N.J.A.C. 13:69E or this chapter, a casino licensee may, in its discretion, choose to have the cards used to play hold 'em 3 bonus dealt from an automated dealing shoe, which dispenses cards in stacks of three cards.

(b) If a casino licensee chooses to have the cards dealt from an automated dealing shoe, the following requirements shall be observed.

1. Once the procedures required by N.J.A.C. 13:69F-42.4 have been completed, the cards shall be placed in the automated dealing shoe.

2. Prior to the shoe dispensing any stacks of cards, the dealer shall then announce "No more bets."

(c) The dealer shall deliver the first stack of cards dispensed by the automated dealing shoe face down to the player farthest to his or her left who has placed a blind bonus wager and a flop wager in accordance with N.J.A.C. 13:69F-42. As the remaining stacks are dispensed to the dealer by the automated dealing shoe, the dealer shall, moving clockwise around the table, deliver a stack face down to each of the other players who has placed a blind bonus wager and a flop wager in accordance with N.J.A.C. 13:69F-42.6. The dealer shall then deliver a stack of three cards face down to an area designated for the dealer's hand. The dealer's three cards may remain in a stack with one on top of the other face down until each player has elected to fold or made a turn/river wager, or the three cards may be spread on the layout. The dealer shall then remove the remaining cards from the automated dealing shoe and deal from his or her hand four consecutive community cards face down to the area designated for the placement of community cards, provided, however, that a casino licensee may elect to burn a card prior to dealing the first two community cards and burn a community card prior to dealing the third and fourth community cards.

After all cards have been dispensed, delivered and dealt in accordance with this section, the dealer shall place the stub in the discard rack without exposing the cards.

(d) The dealer shall be required to count the stub at least once every five rounds of play in order to determine that the correct numbers of cards are still present in the deck. The dealer shall count the stub in accordance with the provisions of N.J.A.C. 13:69F-42.7(e).

13:69F-42.10 Procedure for completion of each round of play

(a) After the dealing procedures required by N.J.A.C. 13:69F-42.7, 42.8, or 42.9 have been completed but before any community cards are revealed, any player who has placed a 3 card bonus wager may elect to expose those cards in order to qualify for a payout in accordance with N.J.A.C. 13:69F-42.11(d). The dealer shall collect all losing 3 card bonus wagers from players who elect not to expose three-card hands or from players who elect to expose three-card hands that do not qualify for a 3 card bonus wager payout. The dealer shall then pay all winning 3 card bonus wagers in accordance with N.J.A.C. 13:69F-42.11(d).

(b) The dealer shall turn over two of the community cards, after which each player shall make a decision as to whether to fold his or her hand or continue the round of play by placing an additional wager (turn/river wager). The dealer shall, beginning with the player to the dealer's left and moving clockwise around the table, ask each

player if he or she wishes to fold or to continue to play his or her hand.

1. If a player folds and has not placed a 6 card bonus wager, the player shall lose his or her blind bonus wager and flop wager. After the dealer collects the player's blind bonus wager and flop wager and places them in the table inventory container, the dealer shall then immediately collect the player's cards and place them face down in the discard rack. If, however, a folding player has placed a 6 card bonus wager, the dealer shall place the player's folded cards face down underneath the player's 6 card bonus wager, the resolution of which shall occur at the conclusion of the round of play.

2. If a player elects to continue play, the player shall verbally inform the dealer that he or she intends to continue the round of play and place an additional wager (turn/river wager) in the area designated for the placement of such wager. Depending upon the version of the game offered by the casino licensee, the turn/river wager shall be:

- i. In an equal amount of the flop wager (Version 1); or
- ii. At the option of the player, either in an equal amount of the flop wager or twice the amount of the flop wager (Version 2), provided that if a player elects to place a turn/river wager in twice the amount of the flop wager, the dealer shall verbally confirm the amount of the player's turn/river wager.

(c) After the player farthest to the dealer's right has made his or her decision, the dealer shall then turn over the remaining two community cards.

(d) After the dealer turns over the remaining two community cards, the dealer shall then turn over the dealer's three cards.

(e) Starting with the remaining player farthest to the dealer's right and proceeding in a counterclockwise manner around the table, the dealer shall turn face up the three cards of each player and announce the best possible five-card poker hand that can be formed using the three player cards and the four community cards. The wagers of each player shall be resolved one player at a time regardless of outcome. Unless a player has placed a bonus wager and the bonus wager has not been settled, the hand of the player shall then be immediately collected by the dealer and placed in the discard rack.

1. If the player's five-card poker hand has a lower rank than the dealer's five-card poker hand and the player's hand does not qualify for a blind bonus wager payout, the player shall lose and the dealer shall immediately collect any blind bonus wager, flop wager and turn/river wager made by the player and place the wagers in the table inventory container.

2.
