Crash Zone – Crash Scene Diagrams and Collision Animation Class
June 2-6, 2014
The class times are 0830-1630.

To register for this training, **fax or e-mail this form** to the attention Lt. Bill Pauli (ret.), Somerset County Prosecutor's Office, **908-253-6325 or Pauli@co.somerset.nj.us**

The following information is required to register.

Attendee Name:_____

Attendee Agency:_____

Contact Phone # for Attendee:_____

Contact e-mail for attendee:_____

Agency Administrator's Approval:_____

Course Description:
This course will instruct you in the proper techniques for creating comprehensive scale diagrams using the Crash Zone computer software (sold by CadZone) currently owned by your agency.

The new Version 9 of The Crash Zone is the drawing program of choice for Accident Reconstructionists and Law Enforcement Officers who need to accurately map crash scenes. With The Crash Zone you can easily turn your measurements of a crash scene into an accurate, 2D diagram and then into a realistic 3D model with animation

Crash Zone is an in-depth, "hands-on" course where you will construct scale diagrams of various crash scenarios including the final resting positions of vehicles and road surface evidence. Crush damage and the direction of impact will also be covered. Completed diagrams will then be produced on a plotter or laser printer.
In addition, you will learn how to utilize data collected with laser mapping systems, such as LTI and Total Station, to create accurate, professional-looking diagrams suitable for courtroom presentation. For further info on the class content, go to
http://www.iptm.org/index.php/registration/2014-01-24-20-25-58

A licensed copy of the CadZone software **IS NOT ISSUED** with the class. The student will be trained to use the software however the student or your agency will have to provide your own licensed copy going forward.

CadZone is willing to offer a $100 discount off the price of new licenses to students that take this class. Regular price $895, so student price is $795. To purchase the software, you must deal directly with

Prices for Upgrades to latest version 9:
- from version 8 are $299 each
- from version 7 or 6 are $399
- from earlier versions $599
- Upgrade DVDs are full installs so there are no worries if you cannot locate your old disks. As long as you/agency are listed in the CadZone database as having previously purchased.

VERY IMPORTANT NOTE

This class is fully funded by the NJ Division of Highway Traffic Safety at no cost to your agency. However, a reduced training budget for Crash Investigation classes allows for fewer classes to be offered.

Accordingly, it is imperative that these classes are run as close to student capacity as possible.

It is respectfully requested that if your agency has officer(s) registered to attend this class that, absent an absolute emergency, every effort be made to have a representative from your department fill the(se) positions.

We will maintain a waiting list once the class fills and *given adequate time*, other officers can be given the opportunity to attend. Withdrawing your officer the week before the class beings is seldom enough time to fill that vacancy.

***Your department's commitment to this training is greatly appreciated*.**
