DIRECTIVE NO. 4-1992

The detection of ecgonine methyl ester (a cocaine metabolite) alone in the post race urine sample of any horse shall not be construed as a post race positive under the medication rules of the New Jersey Racing Commission. However, the detection and confirmation of benzyolecgonine alone or in combination with any other metabolites associated with cocaine will be considered a post race positive and reported under the normal post race reporting procedures.

Frank Zanzuccki
Executive Director

Dated: June 1, 1992
