Atlantic City Expressway Interchange 17 - Route 50

DB # 08340 UPC 083400 MILEPOST(S)
 COUNTY: Atlantic MUNICIPALITY: Hamilton Twp.

The South Jersey Transportation Authority (SJTA) has proposed improvements to Interchange 17 of the Atlantic City Expressway (ACE). Interchange 17 is located in the Rural Development Zone of Hamilton Township, Atlantic County and connects the east and westbound ACE with the north and southbound Route 50. Int. 17 is a partial interchange and presently consists of only an eastbound exit ramp from the ACE to Rt. 50 and a westbound entrance ramp from Rt. 50 to the ACE. The proposed improvements would complete the interchange by constructing a new eastbound entrance ramp to the ACE towards Atlantic City and a new westbound exit ramp from the Atlantic City area. Both of the proposed new movements will include ramp toll plazas. As part of the proposed improvements, Route 50 will be widened in the southbound direction in the area of the bridge that passes over the ACE, to accommodate the new acceleration and deceleration lane along Route 50 for the proposed ramps.

Atlantic City International Airport, Apron Expansion

DB # 08350

UPC 083500

MILEPOST(S)

COUNTY: Atlantic

MUNICIPALITY: Atlantic City

The apron expansion project consists of the expansion of the ramp space available for Remote Overnight Parking (RON) of aircraft. The current Remote Overnight Parking area restricts traffic to and from a nearby taxiway, restricting aircraft operation and capacity. The additional ramp space for RON parking will allow more efficient use of the terminal gates, improve ramp operations, and provide added parking positions that can be utilized when aircraft are diverted from other airports. Project includes all costs associated with the design, engineering, construction and construction management for the apron expansion. This project is also funded through an appropriation of \$500,000 from the FY 08 Omnibus Appropriations Bill.

A design and construction contract is required to repair, and to slow the rate of deterioration to this structure. Several elements of this bridge exhibit severe deterioration and if no significant repairs are initiated, the useful service life of this structure will be compromised. Since the complete replacement of this structure is considered unfeasible, it is recommended that this rehabilitation effort be undertaken. The rehabilitation design may likely result in more than one construction contract; however, at this time, only one construction project is shown.
