

Proposed
FY 2004 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects

ROUTE/PROGRAM	Project ID Number
Sparta Stanhope Road Bridge (AKA Bridge K-07) over Lackawanna Cutoff	L001

A new bridge on new alignment will replace the existing one-lane bridge. The new structure will have a 12-foot travel lane and 10-foot shoulder in each direction. The bridge will be a precast concrete arch with a minimum 5 foot of earth fill between the top of the bridge and the bottom of the roadway pavement. This type of bridge was selected because of its similarity to the look and type of construction of the existing structure. The existing historic bridge will remain in place for use as a bicycle/pedestrian crossing of the rail corridor. The 10-foot shoulders within the project limits could also be used for bicycle/pedestrian purposes. Crosswalks and signage will also be included.

FY 2004 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects

ROUTE/PROGRAM	Project ID Number
West Mountain Road Bridge (AKA Bridge Q-25)	L090

The primary scope of this project is to replace the existing timber bridge over the NYS&W Railroad that is structurally obsolete. The existing bridge and approach roadways will be replaced on a new alignment. The inadequate and substandard width of the existing approach roadway and bridge will be increased to a 28-foot uniform width. The new bridge will provide two 11-foot travel lanes and two 3-foot shoulders. The existing 33-foot right of way will be widened to a maximum 53 feet within the project limits. The existing bridge will be replaced with a 120-foot, one-span continuous beam structure. The vertical underclearance will be increased.

ROUTE/PROGRAM		Project ID Number
206	Cat Swamp Mountain	9001

The improvements to the first section of this project (MP 99.7 - 100.3) include the design of operational and safety improvements by widening of the roadway, extension of the northbound climbing lane, reconstruction of the horizontal and vertical curvature and removal of rock face to facilitate sight distance. Work in the second section (MP 101.15 - 101.35) is limited to mitigation of a high hazard rockfall area, which include a substantial rock outcrop hazard and a substandard berm in the northbound direction. This project will be designed to be bicycle/pedestrian compatible.
