

**FY 2004 TRANSPORTATION CAPITAL PROGRAM  
New Jersey Department of Transportation Projects**

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
<b>Alexander Road Bridge over Amtrak</b>	99414

This project will address the proposed replacement of this structure. The bridge is structurally deficient with a sufficiency rating of 3.3. The proposed new structure will be located to the south of the present structure and allow stage construction to minimize the duration and length of traffic detours. In addition to the bridge replacement will be roadway work to connect the structure to existing roadways as well as improvement to the North Post Road intersection immediately adjacent to the bridge. This project will be bicycle/pedestrian compatible.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
<b>Eden Lane Bridge over Whippany River</b>	<b>NS9908</b>

The existing structure was built in 1972 as a temporary single-span structure. The bridge consists of simply supported steel acrow panel trusses and is supported on concrete abutments. The bridge has inadequate deck geometry and substandard lane widths. The existing metal bridge deck components are overstressed (under-designed). This bridge is considered structurally deficient and functionally obsolete and hence is in need of replacement. The new structure will provide two 3.65 meter lanes, adequate shoulders on both sides, one sidewalk and will be constructed on an improved alignment.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
Helen Street, Antonett Street to Metuchen Road	NS9610

Helen Street is a stub street in a section of South Plainfield that is zoned commercially. It is near Interstate 287 and connects to Durham Avenue, a major truck route, at its western terminus. The northern segment of Durham Avenue in South Plainfield is primarily residential and carries a large volume of truck traffic heading toward Route 22. This truck traffic causes safety and congestion problems for residents. South Plainfield wants to create a bypass that will divert trucks from its residential areas. It proposes to extend Helen Street by 3200 feet to the intersection of Metuchen Road. This would create an alternate route for trucks currently using Durham Avenue. The extension would cross the Dismal Swamp, Bound Brook, and adjoining wetlands. An analysis of the projects environmental impacts will be required. Alternatives such as extending Helen Street, extending Helen Street on a modified alignment, transportation demand management, and the "no build" option will be studied.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
<b>Inamere Road Bridge over Whippany River</b>	<b>NS0007</b>

Improvements will include replacement of the existing Structure No. 1400790 and the widening of Structure No. 1400791 on the north side, realignment of the approach roadways in the immediate vicinity of the structures and resurfacing the existing roadway. This project includes improvements approximately 550 feet north of the center of the bridge. The road will be widened to two 12-foot lanes, two 6-foot shoulders, one 6-foot sidewalk on the eastern side and two parapet walls, 2 feet wide on either side, making a total roadway width of 46 feet. The Morris County Park Commission requested a sidewalk be included in this project to provide pedestrian access from the existing sidewalk at the Township of Morris Municipal Swimming Pool to Patriot's Path, approximately 800 feet north of the swimming pool as an enhancement to their park property.

**FY 2004 TRANSPORTATION CAPITAL PROGRAM  
New Jersey Department of Transportation Projects**

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
Kapkowski Road, North Avenue and Trumbull Street	9324

The county of Union recognizes that a Comprehensive Transportation Planning Study of the Kapkowski Road, North Avenue and Trumbull Street area is needed to examine and evaluate existing and proposed transportation improvements. It is critical that new and proposed developments in the area, as well as existing land uses, have specific transportation infrastructure improvements outlined prior to further construction. It is also important that an overall plan be put in place to ensure that the transportation system (which includes highway, transit and pedestrian elements) functions effectively. This effort will encompass an evaluation of current conditions, an analysis of proposed developments and transportation improvements, the preparation of an overall circulation plan and a Comprehensive Transportation Planning Study. This comprehensive study will recommend a phased series of transportation improvements needed for the area and provide concept/feasibility design on key projects so that they can become part of the NJDOT and NJTPA project pipeline. This comprehensive planning study will provide a much needed transportation planning framework which is now a major focal point in the Union County TDD.

The federal Transportation Equity Act for the 21st Century (TEA-21) provided funding for this project under Section 1601, High Priority Projects Program. The Act allocated \$2.0 M for this project. FY 2000 and FY2001 RABAs have increased the total authorization amount to \$2,052,669.

<i>ROUTE/PROGRAM</i>		<i>Project ID Number</i>
<b>CR 528</b>	<b>Mantoloking Bridge over Barnegat Bay</b>	<b>NS9309</b>

The Mantoloking Bridge carries CR 528 over Barnegat Bay; the project will extend from 600 feet west of the westerly shoreline to 400 feet east of the easterly shoreline. The bridge provides access to northern Ocean County beach communities and is an escape route in the event of coastal storms. The structure will be replaced; the movable span will be replaced with a double-leaf bascule structure with a vertical clearance in the closed position of 29 feet and a horizontal clearance of 80 feet. The roadway width will be 40 feet from curb to curb. The total project length is approximately 2200 feet; the new bridge length is approximately 1200 feet.

This is a multi-year funded project under the provisions of Section 13 of P.L. 1995, c.108.

The Federal FY 2003 Bridge Discretionary Program provided funding in the amount of \$1,500,000.

<b>Newark Circulation Improvements</b>	<b>02380</b>

This project will provide for improvements to Lafayette Street from McCarter Highway to Mulberry Street that include the construction of a new uniform north curb line with four traffic lanes and one turning lane. In addition, improvements will be made on Lafayette Street from Mulberry Street to Broad Street by creating a new roadway alignment for efficient westbound traffic movement between McCarter Highway and William Street and providing for higher traffic capacity eastbound between Broad Street and McCarter Highway. This segment shall provide sufficient roadway width to accommodate four travel lanes, one turning lane and potential extension of the Newark-Elizabeth Rail Link. The project shall also provide improvements to and realignment of Mulberry Street from Market Street to Lafayette Street, including an extension of the current two-way segment from Edison Place to Lafayette Street, which shall provide sufficient roadway width to accommodate four travel lanes, turning lanes and drop-off areas. Improvements will be made to Edison Place between McCarter Highway and Mulberry Street. This segment shall maintain four travel lanes with turning lanes for ingress and egress to parking facilities.

This is a multi-year funded project under the provisions of Section 13 of P.L. 1995, c.108.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
Passaic Street, Ward Street to Rochelle Avenue	NS9601

Passaic Street is a two-lane roadway that crosses Route 17 in Rochelle Park. It is the municipality's major commercial street, connects with heavily congested Route 17, and provides access to the Garden State Plaza Mall. As a result, Passaic Street experiences high traffic volumes and a deteriorating level of service. Westbound traffic is negatively impacted by left-turn movements to and from the Route 17 ramps. During peak periods, the queues from vehicles turning left onto the Route 17 south ramp extend for over 500 feet and impact the Passaic Street/Rochelle Avenue intersection. Possible improvements such as the widening of Passaic Street, traffic signalization, and realignment of the Route 17 off-ramp will be studied.

<b>CR 530 South Pemberton Road</b>	<b>D9912</b>

This project will provide for the reconstruction of CR 530 from Route 206 to CR 644 to improve safety, reduce accidents, facilitate left-turn movements with a continuous center left-turn lane, and add shoulders. Alternatives being considered include possible intersection relocation.

The federal Transportation Equity Act for the 21st Century (TEA-21) provided funding for this project under Section 1601, High Priority Projects Program. The Act allocated \$6.0 M for this project. FY 2000 and FY2001 RABAs have increased the total authorization amount to \$6,158,006.

New Jersey Department of Transportation Projects**

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
<b>Southard Street Bridge over Route 1 and Conrail</b>	<b>L067</b>

The new bridge will be constructed on the same alignment and will consist of three continuous spans. The new structure will consist of two 3.6 meter lanes with 2.4 meter shoulders and two 1.8 meter sidewalks. A temporary pedestrian bridge walkway will be constructed prior to the main bridge demolition to allow pedestrian traffic to continue along Southard Street during construction of the new bridge. Upon completion of the new structure, the temporary pedestrian walkway will be demolished. The new structure will be bicycle/pedestrian compatible.

This is a multi-year funded project under the provisions of Section 13 of P.L. 1995, c.108.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
<b>Sparta Stanhope Road Bridge (AKA Bridge K-07) over Lackawanna Cutoff</b>	L001

A new bridge on new alignment will replace the existing one-lane bridge. The new structure will have a 12-foot travel lane and 10-foot shoulder in each direction. The bridge will be a precast concrete arch with a minimum 5 foot of earth fill between the top of the bridge and the bottom of the roadway pavement. This type of bridge was selected because of its similarity to the look and type of construction of the existing structure. The existing historic bridge will remain in place for use as a bicycle/pedestrian crossing of the rail corridor. The 10-foot shoulders within the project limits could also be used for bicycle/pedestrian purposes. Crosswalks and signage will also be included.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
<b>CR 607 Tomlin Station Road Bridges over Nehonsey Brook and White Sluice Race</b>	<b>D038</b>

This project will provide for the complete removal and replacement of two structurally deficient bridges (Structure Nos. 0803E01 and 0803E09). Both bridges are currently weight restricted due to their substandard design and/or structural condition. The replacement structures are anticipated to be precast/prestressed concrete beam construction with pile supported abutments and wingwalls. The new structures, approach roadways, and roadside safety facilities will meet all applicable AASHTO and NJDOT requirements. The clear roadway width of each bridge shall be 36 feet.

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
CR 631      Tuckahoe Road, Upper Township	S0325

This project will provide for the proposed reconstruction of Tuckahoe Road from Dennisville-Petersburg Road to Butter Road in Upper Township (1.6 miles). The proposed work would consist of raising the roadway above the 100-year flood elevation, resurfacing the roadway and repairing the bridge over Cedar Swamp Creek. The bridge was constructed in 1968, and its deck condition should be reviewed. The guiderail along this section of Tuckahoe Road, particularly approaching the bridge, does not meet current standards. The guiderail will be updated as part of the project. At the intersection with Tyler Road, Tyler Road has limited sight distance in looking to the left along Tuckahoe Road and should be adjusted as part of the improvements.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
Wilson Road Bridge	L165

This two-lane bridge over a tributary from Bell's Lake to the South Branch of Timber Creek carries an AADT of about 8,400 vehicles. The bridge is on an off-system local road. The current sufficiency rating of the bridge is 2.0. The improvements include replacing the existing bridge over Bells Lake Branch and realigning Wilson Road to lessen its curvature to the bridge approach. Improvements will extend from the Woodbury-Turnersville Road at the eastern end of the project, to a point about 130 feet west of the existing bridge. 1 improvements are being developed through the Local Scoping process.
