Baseline Document Change Announcement

**Design Manual-Roadway
6" Traffic Stripes**

BDC07MR-03

September 14, 2007

SUBJECT: Revision to Section 14-06, Traffic Stripes and Traffic Markings, Pages 14-5 thru 14-7 of the 2001 Design Manual Roadway.

REFERENCE: BDC07S-04 dated 9/13/07 revisions to Subsections 618.04, 618.06, 618.10 and 618.15 of the 2001 Standard Specifications and Subsection 912.12 of the 2001 Standard Inputs for both the English and Metric Units.

Section 14-06 is revised to provide for the requirement for the use of permanent six inch wide lane lines, longitudinal edge lines and edge lines on ramps on all interstate highways.

CAN066, Marking of Gore Areas, dated 7/19/07 is incorporated into this document and hereby superseded.

Attached are the revised pages 14-5, 14-6 and 14-7.

These revisions must be utilized in conjunction with the referenced BDC Announcement dated 9/13/07.

For the sake of not redeveloping and printing pages 14-8 thru 14-35, it is noted that Section 14-07 thru Section 14-16 have not changed and that some of the text on the current page 14-7 does not appear on the revised page 14-7 due to the inclusion of the new text into Section 14-06. Therefore, all the text beginning with Section 14-07 forward is valid and the page progression will be developed accordingly during the redevelopment of the Roadway Design Manual.

Implementation Code R (Routine)

Changes must be implemented in all applicable Department projects scheduled for Final Design Submission at least one month after the date of the BDC announcement. This will allow designers to make necessary plan, specifications, and estimate/proposal changes without requiring the need for an addenda or postponement of advertisement or receipt of bids.
