

Garden State Economic Forum: The Road Ahead

Loretta J. Mester

Executive Vice President and Director of Research

November 14, 2011

The views expressed in this presentation are those of the author and do not necessarily represent the views of the Federal Reserve Bank of Philadelphia, the Federal Reserve System, or the Federal Open Market Committee.

**FEDERAL RESERVE BANK
OF PHILADELPHIA**

Continue with “operation twist,” reinvesting in MBS, and forward guidance

November 2, 2011 FOMC Statement:

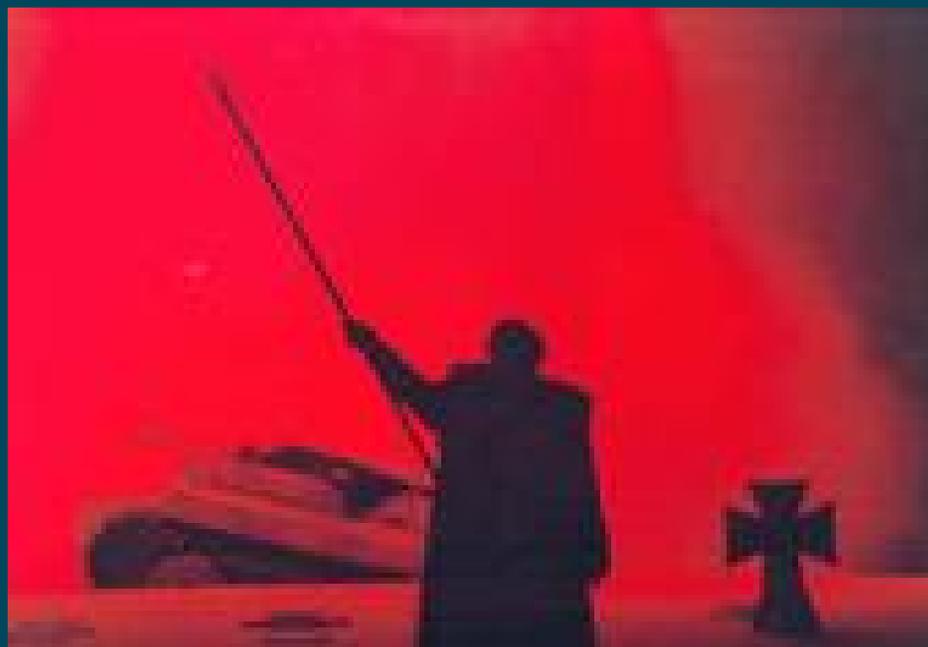

- To promote a stronger pace of economic recovery and to help ensure that inflation, over time, is at levels consistent with the dual mandate ... the Committee decided today to continue its program to extend the average maturity of its securities...The Committee is ... reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities.
- The Committee will maintain the target range for the federal funds rate at 0 to 1/4 percent and currently anticipates that economic conditions – including low rates of resource utilization and a subdued outlook for inflation over the medium run – are likely to warrant exceptionally low levels for the federal funds rate for at least through mid-2013.

FEDERAL RESERVE BANK
OF PHILADELPHIA

During and after the crisis, the Fed has taken unprecedented policy actions to ease short-term funding pressures, contain systemic fallout, and support economic recovery

Standing Facilities

- Longer maturity Discount Window loans
- Primary Dealer Credit Facility

Term Lending Facilities

- Term Auction Facility (TAF)
- FX Swaps with other central banks

Targeted Credit Facilities

- Asset-Backed Commercial Paper Money Market Mutual Fund Lending Facility (AMLF)
- Commercial Paper Funding Facility (CPFF)
- Money Market Investor Funding Facility (MMIFF)
- Term Asset-Backed Securities Loan Facility (TALF)

Programs to Individual Firms to Contain Systemic Fallout

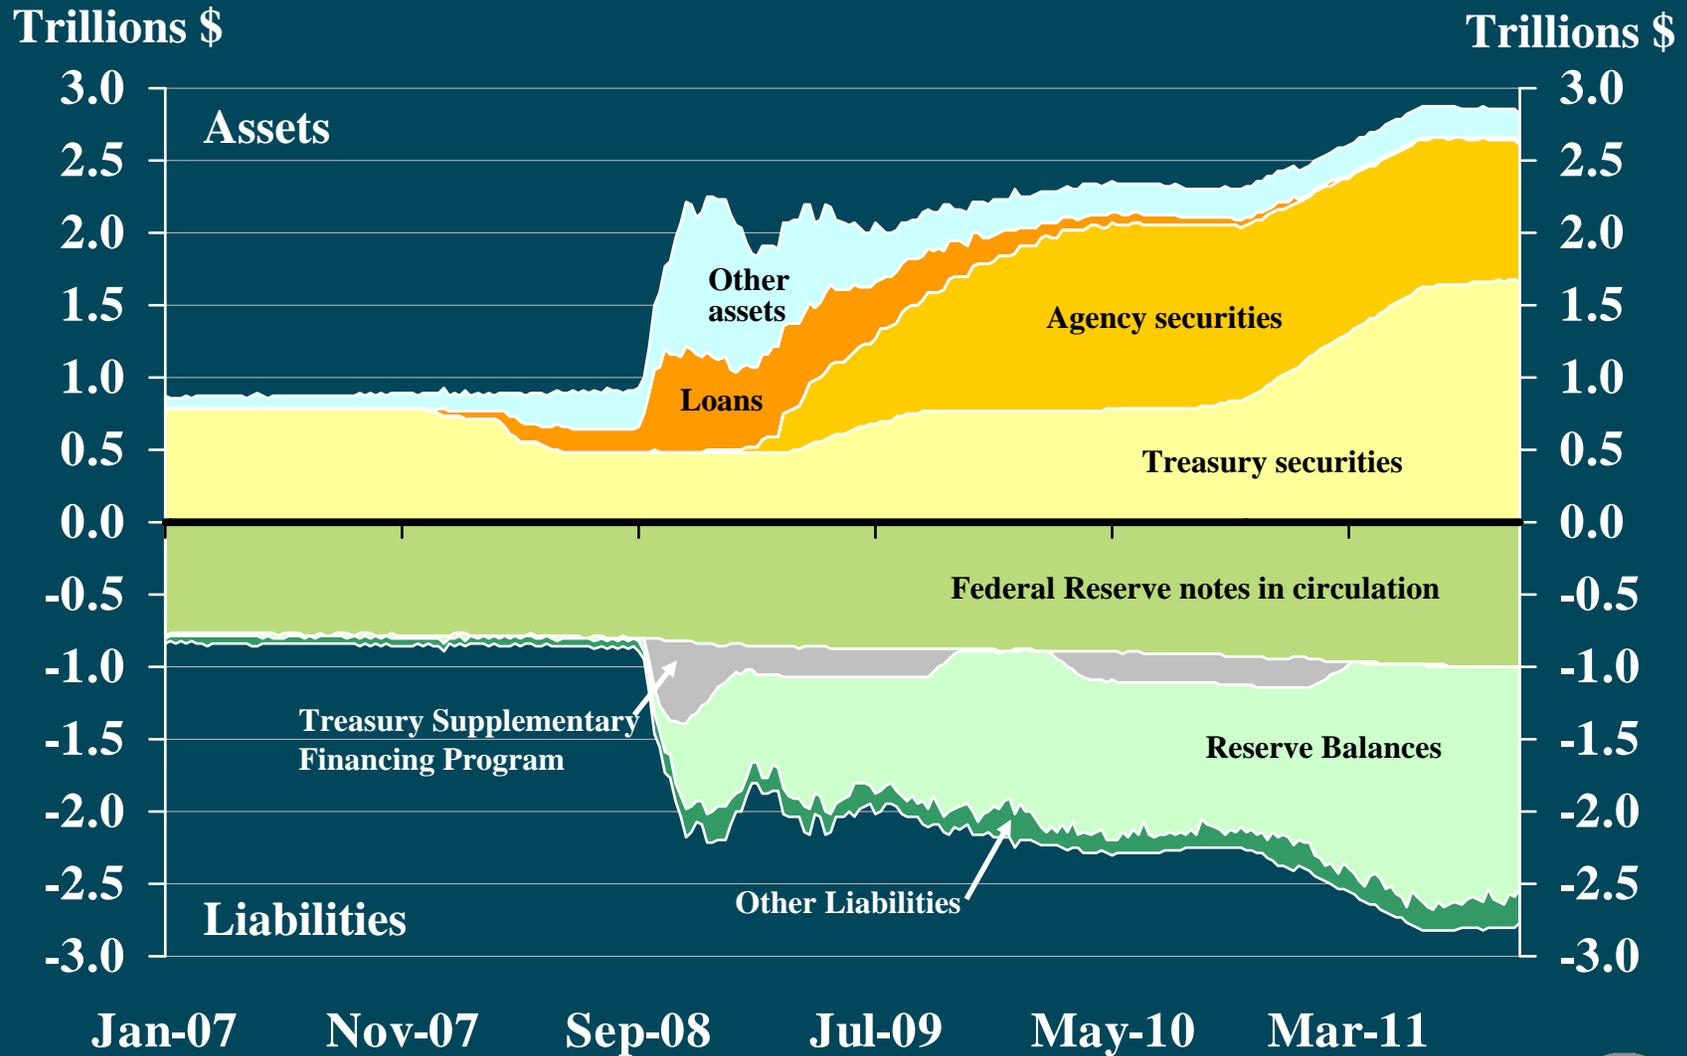

- Bear Stearns, AIG, Citigroup

Programs Focused on Longer-Term Asset Prices

- Purchases of the direct obligations of and MBS guaranteed by the housing-related GSEs
- Purchases of longer-term Treasury securities
- Maturity extension program = “Operation Twist”
- Forward guidance

The asset purchases have tripled the size of the Fed's balance sheet

FEDERAL RESERVE BANK
OF PHILADELPHIA

For almost three years, the Fed has kept the fed funds rate at essentially zero and it expects the funds rate to remain there at least through mid-2013. Interest rates are very low across the maturity spectrum.

Weekly data: Last point plotted is November 4, 2011

FEDERAL RESERVE BANK
OF PHILADELPHIA

Nonconventional monetary policy works on expectations and the term premium

Long-term interest rate = Average of current and expected future short-term interest rate + Term premium

Real rate = Nominal rate – Expected inflation

Nonconventional monetary policy at zero bound

To lower real borrowing rates:

- Lower expected future short-term rates
- Lower the term premium on long rates
- Increase inflation expectations if too low

With the fed funds rate at zero, the Fed will need to consider other tools if it wants to ease policy further

Long-term interest rate = Average of current and expected future short-term interest rate + Term premium

Real rate = Nominal rate – Expected inflation

(1) Forward guidance: Communication and commitment

- Announce commitment to keep rates low for specified period of time or until specified event occurs

(2) Quantitative easing

- Add more reserves to the banking system than needed to keep ff rate = 0 by buying assets
- Use composition of the Fed's balance sheet to target borrowing rates in particular markets (e.g., mortgages)

(3) “Operation twist”: Buy longer-term Treasury securities and sell shorter-term Treasuries

- Direct effect on long rates; might put downward pressure on term premium by increasing total demand for long-term issues, and reducing supply available to the public

(4) Target inflation at a higher level

(5) Lower the rate that the Fed is paying banks on their reserves

FOMC forecasters expect moderate growth and slow declines in unemployment

Central tendency of Fed Governors and Presidents November 2011 Forecasts

	<u>2011</u>	<u>2012</u>	<u>2013</u>
Real GDP Growth (Q4/Q4 growth)	1.6 to 1.7%	2.5 to 2.9%	3.0 to 3.5%
Unemployment Rate (Q4)	9.0 to 9.1%	8.5 to 8.7%	7.8 to 8.2%
PCE Inflation (Q4/Q4 growth)	2.7 to 2.9%	1.4 to 2.0%	1.5 to 2.0%

The FOMC has been revising down the 2011 forecast throughout the year

There has been only slow progress on recovering lost jobs

Incorporates September 2011 data

**Payrolls are nearly 5 percent below their peak, a net loss of over 6 million jobs.
At the current pace of job creation it will take 4 years to make up those losses.
If job creation speeds up to what it was earlier this year, it will take 2-1/2 years.**
