JOHN E. MCCORMAC, CPA
State Treasurer

LOCATION:
33 W. STATE STREET
TRENTON, NJ

RICHARD J. CODEY
Acting Governor

Ref: 06-X-37533 – Gasoline, Automotive Revised Bid Opening Date: January 4, 2006

Addendum #4- Revisions to the RFP

REVISIONS TO RFP

Delete RFP Sections 3.8.2 and 3.8.3 and Replace with the following:

3.8.2 CONTRACTOR RESPONSIBILITIES

There shall be no topping off vehicles, mobile fuel tanks, and storage tanks. Drip pans must be used under all hose and pike connections and other leak-prone areas during bulk transfer of fuels.

- During bulk transfer, storm sewer inlets must be blocked, or tanks must be contained with temporary berms or temporary absorbent booms during the transfer process. If temporary berms are being used instead of blocking the storm sewer inlets, all hose connection points associated with the transfer of fuel must be within the temporary berms during the loading/unloading of bulk fuels.

It will be the Contractor's responsibility to either provide the materials to block storm sewer inlets within 50 feet or to berm around their truck. A typical single drain grate is 23 ½ x 49 ½ inches. The largest inlet a contractor would be expected to dike is 47 x 49 ½ inches outer frame dimensions (what's known as an "E" inlet, i.e. double grate - no curb piece)

- As per DEP Regulations, any equipment, tanks, pumps, piping and fuel dispensing equipment found to be leaking or in disrepair must immediately be repaired or replaced.

It is the Contractor's responsibility to immediately repair or replace any of the Contractor equipment, tanks, pumps, piping and fuel dispensing equipment found to be leaking or in disrepair.

In the case of any State owned equipment, tanks, pumps, piping and fuel dispensing equipment found to be leaking or in disrepair --- it is the Contractor's responsibility to immediately notify personnel as appropriate for the particular location/circumstances at the Agency, NJDEP (Warn DEP Hotline at 877-WARNDEP &/or UST Operational issues - Jonathan Berg at (609) 633-0737.) You are also requested to notify the Purchase Bureau Buyer for this contract as soon as possible.

- The Contractor will be required to use drivers who have been trained in the Standard Operating Procedures for bulk fuel deliveries. The training shall incorporate the required practices for fueling listed in RFP SOW Appendix 4 Highway Agency Stormwater General Permit Attachment D.

3.8.3 DELIVERY SCHEDULING

Using Agencies that have a NJPDES permit on file should have a trained employee present to supervise during bulk transfer. The contractor must contact the key location representative one hour prior to each fuel/gasoline delivery or the delivery may not be permitted. If an emergency situation exists, the key location representative may instruct the contractor to deliver the fuel/gasoline without an agency employee present. Times and dates for regular and emergency deliveries will be scheduled in accordance with the original terms of the contract. Any additional specific agency instructions will be advised separately in a future Notice of Award Amendment.

The Contractor is required to provide one hour notice prior to delivery but is not required to wait for the Using Agency to supervise the delivery as the driver is required to be trained, except in circumstances where the Using Agency provides specific instructions otherwise.

Add the following paragraph add the end of RFP Section 4.4.4.1:

“The price quoted by bidders in their bid proposal will be assumed to be an upcharge unless it is clearly identified as a downcharge.”

Price sheets for RFP --- Delete the descriptions for lines # 00031 and 00033 and replace them with the language “RESERVED FOR FUTURE USE BY PURCHASE BUREAU”.

NOTE: These changes will be made to the RFP Text and the RFP will be re-uploaded to the website. Either Reload the entire RFP or attach this Addendum to the original RFP.
