

Description of Equipment Need

The New Jersey Department of Agriculture (NJDA), Animal Health Diagnostic Laboratory (AHDL) provides Pathology services in the form of necropsy gross examinations of animal remains, microscopic examination of biopsy and necropsy tissue specimens, and necropsy specimen collection for ancillary diagnostic tests (e.g., bacterial cultures, fecal parasite examination, molecular and toxicological analyses) to determine cause of death for an individual or group of animals. These specimens are received from practicing veterinarians, private food and companion animal owners, regulatory and law enforcement agencies, racetracks, wildlife, zoos and nonprofit animal facilities throughout New Jersey.

The AHDL is looking for **one (1)** double-bowl stainless steel work sink that is designed to be functional, durable and safe for use during animal necropsies and tissue dissections and after procedures for the cleaning, washing and disinfection of grossly soiled instruments, utensils, containers and other miscellaneous items. Purchase of this sink would also include placement and installation.

Equipment Specifications

T304 stainless steel construction

Heliarc welded construction

All exposed welds ground and polished to #4 finish

4" high back splash

Raised marine edge for retaining water on sink top

Two (2) 28" x 16" x 10.5" deep sinks with etched gallon indicator markings

Sink bowls shall be offset to left or right side of countertop with countertop space located opposite

Under-counter storage shelves with (1) fixed and (1) adjustable shelf shall be located under the countertop opposite sink bowls

(1) Deck mounted hot and cold-water faucet/spray rinse combination centered between sinks

(1) Hot/cold water faucet at left sink

(1) Deck-mounted eye wash at right sink

(2) Lever handle drain control valves

1 horsepower heavy duty disposal with ON/OFF switch

(4) 1 ½" x 16 gage wall stainless steel tubular legs with adjustable leveling feet

Overall dimensions: 30" W x 104" L x 38" H sink top

Installation includes material labor and travel; onsite at facility to uncrate the unit and inspect for damage; move the unit into the final location and level; provide the final connections to the building utilities and test the system to ensure it is functional and working
