NOW IS THE TIME TO PROCURE MANURE FROM SOURCE SUPPLIERS

Manure Hauling Considerations

The highly contagious and deadly avian influenza (HPAI) is an immediate, high-level threat to poultry in New Jersey. To help safeguard the industry, strict standards for cleaning vehicles, containers and materials that transport poultry and related products have been enacted by the NJ Department of Agriculture.

Cleaning and disinfecting are essential to avoid spread of avian flu

2022 General Quarantine Order(s): Virus Control for Highly Pathogenic Avian Influenza (HPAI); Restriction of poultry litter import from HPAI states.

- To date, HPAI has not been detected in commercial poultry flocks in New Jersey.
- Poultry litter import from HPAI states requires approval and permit issued by NJ State Veterinarian.
  - Learn about permit requirements, contact the NJ Department of Animal Health (609)671-6400
- All vehicles, conveyances, containers, and materials that transport poultry and related products must be completely cleaned and disinfected using commercial truck washing equipment before entry onto a new areas.
