	At lunch, portion sizes planned for each component must meet both daily and weekly minimum requirements for each appropriate grade group. Production records must document that both daily and weekly minimum quantities for each component are offered. Vegetable subgroup and whole-grain rich requirements must also be met. Supporting documentation (including but not limited to the USDA Food Buying Guide, food labels, CN labels, manufacturers product formulation statements, standardized recipes, etc.) must be used to determine the creditable amount each menu item contributes to the meal pattern to assure that required minimum quantities are offered. Refer to the Lunch Meal Pattern Charts, available on the Department of Agriculture's Forms web site for specific component and minimum quantity requirements.				
	Error: For the review week, the SFA did not meet the weekly "other" vegetable subgroup requirement for the K-8 meal pattern. The menu and production records indicated that 1/8c cucumbers were offered and served on Apr 2. No other vegetables were planned or served. The K-8 meal pattern weekly requirement for other vegetable subgroup is 1/2cup.				
	Explain, in detail how the finding will be corrected and the measures taken to ensure that it will not reoccur in the future. Indicate the DATE of implementation.
