Walworth, NY 14568  
[jerry@clearsafelabs.com](mailto:jerry@clearsafelabs.com)  
586-212-7836

## Information from the Seed Trade Industry:

### ASTA Hemp Seed Working Group

The popular support documents for hemp seed buyers have been 'refurbished' with graphics and a more eye-pleasing layout.

- How to Read a Label on a Bag of Hemp Seed
- Laws, Regs & Other Considerations When Buying Hemp Seed
- Best Management Practices for Hemp Seed Production

They have been posted, in a ready-to-print format, to the ASTA website here:

<https://www.betterseed.org/resources/hemp/#1582654755810-bb9f0bef-edba>

**The aforementioned companies are not agents of the Department. The Department does not endorse these companies or their products or services. This list has been compiled for your convenience, but if you choose to engage any of these companies, you do so at your own risk. It is incumbent upon licensed New Jersey hemp producers to ensure that any seed ordered from out of state seed companies have been produced from varieties that will produce seeds and plants that contain a total THC level of no more than 0.3% on a dry weight basis.**
