

JERSEY TASTES! ACTIVITY SHEETS

ALL ABOUT NEW JERSEY!

Plant winter squash between May & June in New Jersey.

HOW DOES IT GROW:

Squash like to grow on long, trailing vines. One growing method is to grow squash up a trellis, like the one shown to the left. Another method is to build mounds or hills, plant the squash seeds directly into the ground, once they come up and grow to about 2 inches in height, thin the plants to three plants per hill. Always remember that squash need a lot of space to grow either horizontally or vertically and they prefer well-drained soil.

NUTRITION FACT:

Most orange squashes are loaded with vitamin A. A single cup provides more vitamin A than most people need in a day (457% of the daily value, to be exact).
