

#### Licensed Private Pesticide Applicator Information:

According to NJDA discussions with representatives from the New Jersey Department of Environmental Protection (NJDEP) Pesticide Control Program, licensed private pesticide applicators who are awaiting new **paper** licenses to arrive in the mail may still purchase pesticides from pesticide dealers. Dealers can verify electronically the applicators currently licensed through the NJDEP's DataMiner program.

This program can be found on the NJDEP DataMiner webpage at <https://www13.state.nj.us/DataMiner>.

Then click on Search by Category, in this case, the Pesticide Control Program, and click submit.

A long list will be displayed, and then scroll down to the Private Pesticide Applicators links. There are three ways to search for your information: First, by Private Pesticide Applicators – Specific Information (where the applicator needs to enter the last 4 digits of their social security number along with their date of birth); Second, by their license number; Third, by name, where you can select your name on the drop-down list, which provides information including license number as well as license status, date of expiration, and license history.

This information is available to be downloaded as a PDF or an excel spreadsheet for your records.

See the sample below.

For questions, call the NJDA Division of Plant Industry at 609-406-6939.

## Private Certified Pesticide Applicators by Name

**License #:**
