CATHERINE R. McCABE
Commissioner

SHEILA Y. OLIVER
Lt. Governor

May 12, 2020

To Agriculture and Agribusiness Representatives:

The New Jersey Department of Environmental Protection (DEP) is issuing this notice concerning open burning due to colder spring overnight temperatures presently forecasted for areas of New Jersey from **Tuesday, May 12 through Friday, May 15, 2020**, which could adversely affect fruit, vegetable, and floriculture crops in bloom or near bloom around the state. The DEP intends to exercise its authority and discretion under the Air Pollution Control Code, N.J.A.C. 7:27, et seq., and other applicable authorities to permit the following procedure for open burning or the use of smudge pots to assist farmers to protect their crops in low temperatures.

Procedures for Open Burning and the Use of Smudge Pots Pertaining to New Jersey Fruit, Vegetables and Floriculture

- Facilities that believe they will conduct open burning or use smudge pots **must provide notice** to the DEP 24-hour Communications Center at 1-877- WARN DEP (1-877-927-6337) prior to the use of either technique.
- Facilities should notify DEP if they believe they may need to use either technique.
- Where DEP cannot be notified in advance, a facility must notify DEP the following morning no later than 9:00 a.m.
- The following information must to be provided to DEP upon each notification:
 1. Name of the individual deciding to conduct the open burning or use of smudge pots
 2. Name of the farm or facility
 3. Actual street address of the facility on which either technique will be used
 4. Contact person and telephone number at the facility
 5. Predicted temperature (in F) at facility anticipated when the technique will be used
 6. Predicted wind speed at facility anticipated when the technique will be used
 7. Predicted hours of open burning or use of smudge pots
 8. Predicted material to be used for open burning or use of smudge pots
- Upon completion of the open burning or the use of smudge pots, the facility must provide the following information within 2 business days to the DEP 24-hour Communication Center at 1-877-WARN DEP (1-877-927-6337):

1. The DEP Communications Center incident number
2. Ambient orchard(s) temperature (in F) at the time the technique was used
3. Actual wind speed at the orchard(s) location at the time the technique was used
4. A statement that all restrictions in the open burning or use of smudge pots were followed. The restrictions are noted below.

RESTRICTIONS

- **NO OPEN BURNING WILL BE PERMITTED UNLESS:**

1. The temperature within the orchard area is at or below the critical temperature for the bud stage. The attached report lists the critical temperatures for New Jersey crops.

-AND-

2. **The wind velocity is less than 5 miles per hour.**

- Authorized open burning material may consist only of either the following materials: clean scrap lumber (untreated), felled trees, prunings, hedgerows or firewood.
- **ABSOLUTELY NO** refuse, trade waste, tires, garbage, or other solid waste may be added to the authorized open burning material. **Introduction of any unauthorized material into an authorized open burn is a violation of environmental laws and may carry significant penalties.**
- **Smudge pots are only permitted when** the temperature within the orchard area is at or below the critical temperature for the bud stage (wind velocity restriction does not apply).
- Smudge pots must be fueled only with either kerosene or No. 2 fuel oil.
- Failure to abide by these provisions and restrictions may result in enforcement action.

If you have any question, please contact Richelle Wormley, the Director of the Division of Air Enforcement at Richelle.Wormley@dep.nj.gov.

Respectfully,

Elizabeth Dragon
Assistant Commissioner

10% kill	15	24	26	26	28	28	28	28	
90% kill	0	10	22	24	24	24	24	24	

Old standard temperature represented the critical temperature in Fahrenheit (the lowest temperature that can be endured for 30 minutes without damage). In addition, the chart shows the temperature at which 10 % and 90 % of normal buds will be killed. These numbers were taken from Washington (WSU), and Michigan (MSU) Extension Bulletins. Apple - WSU EB0913, Pears - WSU EB0978, Sweet Cherries - WSU EB1128, Peaches - WSU EB0914, Apricots - WSU EB1240, Tart Cherries - MSU Research. Rpt. 220
