

NOTICE TO JERSEY CENTRAL POWER & LIGHT COMPANY CUSTOMERS

Notice of a Filing and Notice of Public Hearings

In the Matter of the Verified Petition of Jersey Central Power & Light Company Seeking Review and Approval of Its Deferred Balances Relating to, and an adjustment of, The Solar Renewable Energy Certificates Financing Component (“SREC”) of the Rider RRC – RGGI Recovery Charge of Its Filed Tariff (“2019 Rider RRC Filing”), and Seeking Review and Approval of the Administrative Fee for the SREC II Program Effective as of January 1, 2021
BPU Docket No. ER20110698

PLEASE TAKE NOTICE that, on November 4, 2020, Jersey Central Power & Light Company (“JCP&L” or “Company”) filed a verified petition with the New Jersey Board of Public Utilities (“Board” or “BPU”) to review and approve the deferred amounts included in the Solar Renewable Energy Certificates (“SREC”) Financing Program component of the Company’s Rider RRC – Regional Greenhouse Gas Initiative Recovery Charge (“RRC”) deferred balance, which relate to the amounts the Company incurred under certain Board-approved demand response and renewable energy programs, to the extent accumulated from January 1, 2019 through December 31, 2019 (“2019 Rider RRC Petition”). The SREC Financing Program is a program where JCP&L purchases SRECs from solar projects and sells the SRECs in an auction with other New Jersey electric companies.

The 2019 Rider RRC Petition proposed that the SREC component of the Rider RRC tariff rate be increased from the current rate of \$0.000000 per kilowatt-hour (“kWh”) to \$0.000094 per kWh, exclusive of Sales and Use Tax (“SUT”), effective January 1, 2021. Based upon the Company’s requests in the 2019 Rider RRC Petition, a typical residential customer using 768 kWh per month would experience an increase of \$0.08 or 0.07%.

The following illustrative chart shows the estimated monthly bill impacts (by dollars and percentages) for a typical and class average customers based upon a comparison of present and proposed rates, and the approximate net effect of the proposed increases in charges on customers in various rate classes, although the actual effect on specific customers will vary according to the applicable rate schedule and level of the customer’s usage.
