BY THE BOARD:

This Order memorializes action taken by the Board of Public Utilities (Board) at its July 30, 2008 Agenda Meeting. The Board of Public Utilities' Customer On-Site Renewable Energy (CORE) program offers prescribed financial incentives to New Jersey property owners to encourage the installation of Class I renewable energy technologies. Eligible applicants may receive rebates for a portion of the cost of installing solar, wind, or sustainable biomass at their site.

The Staff of the Office of Clean Energy (OCE) has reviewed the CORE applications described below as well as the amount of rebates requested. In addition, Honeywell, the Contract Market Manager, executed appropriate documentation affirming that, consistent with the terms of its contract, Honeywell is not acting as both the Contract Market Manager and a market participant in any of the CORE rebate applications submitted for Board approval. The signed documents are appended to this Order. Therefore, the OCE finds that each application is complete and fully conforms to all Board requirements for a rebate commitment under this program.

*Rebates for private sector applications and public sector applications utilizing a Power Purchase Agreement ("PPA") are limited to a maximum amount based on 100 kilowatts ("kW") of installed capacity, which is the monetary equivalent of \$245,000 or a lesser amount if the installed capacity is less than 100kW. IM/O Comprehensive Energy Efficiency and Renewable Energy Resource Analysis for 2005-2008: 2008 Programs and Budgets: Compliance Filings, Docket Number EX04040276 (Mar. 31, 2008). Public sector applicants are approved based on the public and non-profit rebate levels that were in effect at the time that the application was deemed complete. If a public sector applicant will utilize a PPA, the applicant must notify the Market Manager and supply a copy of the PPA. Any previously issued approval letter will then be revised to reflect the rebate level for the private sector and the payment cap of \$245,000 will be applied if the system capacity is greater than or equal to 100 kW.

Based on the foregoing, the OCE recommends that the Board approve the above referenced rebate applications. Upon review, the Board **FINDS** that the applications fully conform to all relevant requirements for the CORE program. The Board **HEREBY APPROVES** the aforementioned rebate applications for the amounts requested and **AUTHORIZES** the Staff of the OCE to direct the renewable energy market managers to issue a standard commitment letter to the applicants identified above, setting forth the terms and conditions of this rebate commitment.*
