	Summary of Changes
March 29, 2000 Initial Draft	Initial Release 4010
June 22, 2000 1.1	Updated notes section Segment BPR – removed unused elements Segment RMR – elements RMR07 and RMR08 conditional on RMR03 = AJ (Adjustment) Segment REF*11 – ESP Account Number changes to Optional Added segment REF*60 – Cross Reference Number Segment DTM – add description of posted date Updated Examples
September 21, 2000 Version 1.2	Added REF*QY – Identify transaction as GAS Updated Example
May 29, 2001 Version 1.3	Added Table of Contents Added Data Dictionary
June 22, 2001 Version 1.4	Corrected Use Note on Segment REF*11 (ESP Account Number)
August 10, 2001 Version 1.5	Added for PSEG CAS Added elements RMR05 and RMR06 to segment RMR and data dictionary
November 29, 2001 Version 1.6	Added code “CWT” - Clearing House Interbank Payment System (CHIPS) / Wire Transfer to BPR04 and data dictionary
March 8, 2002 Version 1.7	Change Note section “ Instructions for Handling a Negative Remittance ”
February 23, 2012 Version 1.8	Added note indicating South Jersey Gas does not support 820 transaction
February 15, 2013 Version 1.9	Revised Version
January 30, 2023 Version 2.1	Incorporated Change Control NJG009 to reflect that SJG supports 820 and add RMR03 value PR and REF*60 Cross Reference Number. Incorporated Change Control NJG022 for Elizabethtown Gas to reflect that ETG does support 820 and that if the 810 was a cancel then the REF*60 will contain the LDC Account Number.
February 20, 2025 Version 2.2	Incorporated Change Control NJG023 to notes to add POR section for ETG/SJG to reflect that ETG/SJG will use special LDC Account number values in RMR02 in order to send the POR Charges (SJG Only) and Marketer Bill Processing Fee so that the Total Distribution Amount matches the Bank Payments. Also add new example transactions.

	Notes
General Info	PSE&G, New Jersey Natural Gas, South Jersey Gas, Elizabethtown Gas do support the 820 transaction.
ASC X12 Version	When sending the remittance advice separate from the payment, you are required to use the ASC X12 Version 004010 as documented in this guideline. When making payments through the banking system, you may use whatever ASC X12 version that your bank will accept.
Use of CCD+ Transaction	<p>All New Jersey GDC's require the use of CCD+ transactions. GIWG requires that if the payment and remittance are sent separately and the payment is made electronically, a CCD+ transaction will be used. The CCD+ was chosen because of its ability to carry an addenda record that can be used to reassociate the payment and remittance advice and it is inexpensive.</p> <p>If you currently have a relationship with your bank for sending EDI 820 CCD+ transactions, you can continue to use the process you have in place. The standard you are currently using is negotiable between you and your bank and does not affect your trading partner because they do not see the data you send to your bank. The value of the CCD+ is the addenda record. The addenda record is used to reassociate the payment and remittance; how that is accomplished is up to the receiver and their bank. Those who do not have an EDI 820 relationship with their bank for CCD+ transactions, may use this document as a starting point for discussions with their bank. The bank may have specific requirements. GIWG's only requirement is that the trace number be passed on with the payment instruction and also be present in the remittance advice.</p>
Reassociation	If a CCD+ transaction is sent without remittance information through the banking system, it will contain a TRN segment that will contain a trace number that will also appear on the TRN of the remittance advice that is sent directly to the trading partner.
Addenda Record	The addenda record is built from the information contained in the segment(s) for the payment and this same information will also appear in the TRN segment of the remittance advice.
Testing	In addition to testing with your trading partner, you must allow sufficient time to test with your bank. Most banks require setup/lead time to implement new trading partners.
Prenotes	It is recommended that all new trading partners send/receive a prenote in advance of moving live payments. Do to experience in Electric will consider using penny test in place of prenote test.
	The guideline is presented from the perspective of the sender initiating payment instruction/remittance advice.

Instructions for
Handling a Negative
Remittance

Option 1:

There are 2 options presented below that may be followed for handling a negative remittance. Each “sending” party should always follow one option – they should not switch options without informing their business partners. A zero remittance is not considered negative and may be sent through the banking system.

New Jersey Natural Gas can send negative remittance advice amounts. NJNG is sending wire transfers only twice per month and will send daily negative remittance advice amounts as necessary.

Option 1:

The 820 payment instruction and remittance advice will be sent on a daily basis and will include all applicable adjustments as outlined in the guides as long as the adjustments are not larger than the payments. If the adjustments are larger than the payments (creating a negative remittance advice), the remittance advice will be held by the sender for one business day with the expectation that additional payments due the next business day will offset the negative remittance amount.

If the negative remittance cannot be offset in one business day, the payer will contact the payee and arrange for the adjustment(s) causing the negative condition to be repaid to the payer. The payer will remove the offending adjustment(s) from the remittance advice, bring the remittance advice to a positive status and transmit the remittance advice to the payee.

Example:

Day 1: Utility X inadvertently transmits a misapplied payment of \$500,000 to Supplier A on Day 1.

Day 3: Utility X discovers the problem on Day 3 and reverses the \$500,000 on the remittance advice that also details payments of \$200,000 causing a negative remittance status:

- \$500,000 – Reversal of misapplied payment
- + 200,000 – Payment items for Day 3
- \$300,000 Negative net amount Day 3

Utility X will hold the remittance advice for one business day to accumulate additional payments to Supplier A with the expectation that additional payments will offset the negative balance.

Day 4: Utility X accumulates an additional \$100,000 to remit to Supplier A, but the net is still negative:

- \$300,000 – Negative net amount from Day 3
- + \$100,000 – Payment items from Day 4
- \$200,000 Negative net amount Day 4

At this point Utility X must call the Supplier and notify Supplier A that \$500,000 must be returned to Utility X because on Day 1 a payment was misapplied to Supplier A’s account. Supplier A must, upon verification of the error, remit \$500,000 immediately to Utility X.

Utility X must remove the -\$500,000 that created the negative remittance condition and forward payments for Day 3 and 4 the Supplier A.

- \$500,000 – Reversal of misapplied payment from Day 3
- + 200,000 – Payment items for Day 3

<p><i>Option 2:</i></p>	<p>+ 100,000 – Payment items from Day 4 <u>+ 500,000</u> – Removal of reversal of misapplied payment from Day 3 \$300,000 Remit to Supplier A</p> <p><u><i>Option 2: Supported by PSE&G</i></u> The 820 payment instruction and remittance advice will be sent on a daily basis and will include all applicable adjustments as outlined in the guides as long as the adjustments are not larger than the payments. If the adjustments are larger than the payments (creating a negative remittance advice), the remittance advice will be transmitted with a zero in the BPR02.</p> <p>The BPR02 will either contain the total positive amount being moved through the ACH system, which will add up to all your detail line items (RMRs), or zero if total of the detail line items is negative.</p>
<p>GDC Definitions:</p>	<ul style="list-style-type: none"> • The term GDC (Gas Distribution Company) in this document refers to the utility.
<p>ESP Definitions:</p>	<ul style="list-style-type: none"> • The term ESP (Energy Service Provider) in this document refers to the supplier.
<p>Purchase of Receivables / Marketer Bill Fees</p>	<p>ETG / SJG will send special RMR loops to include POR Charges (SJG Only) and Marketer Bill Processing fees to ensure that the BPR02 Total Distribution Amounts match the ACH Bank Payments: RMR02 values: 9999999999 – for representing Total Bill Processing charge (calculated as No. of Invoice * rate per invoice) 9999999990 – for representing POR charge (calculated as No. of Invoice * rate per invoice) – SJG Only</p>

How to Use the Implementation Guideline

Segment:	REF Reference Identification	
Position:	030	
Loop:	LIN Optional	
Level:	Detail	
Usage:	Optional	
Max Use:	>1	
Purpose:	To specify identifying information	
Syntax Notes:	<ol style="list-style-type: none"> 1 At least one of REF02 or REF03 is required. 2 If either C04003 or C04004 is present, then the other is required. 3 If either C04005 or C04006 is present, then the other is required. 	This section is used to show the X12 Rules for this segment. You must look further into the grayboxes below for State Rules.
Semantic Notes:	1 REF04 contains data relating to the value cited in REF02.	
Comments:		
Notes:	Recommended by UIG	The "Notes:" section generally contains notes by the Utility Industry Group (UIG).
PA Use:	Must be identical to account number as it appears on the customer's bill, excluding punctuation (spaces, dashes, etc.). Significant leading and trailing zeros must be included.	
	Request: Required Accept Response: Required Reject Response: Required	This section is used to show the individual State's Rules for implementation of this segment.
NJ Use:	Same as PA	
Example:	REF*12*2931839200	One or more examples.

Data Element Summary

	<u>Ref.</u> <u>Des.</u>	<u>Data</u> <u>Element</u>	<u>Name</u>	<u>X12 Attributes</u>
Must Use	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification	M ID 2/3
		12	Billing Account	
			GDC assigned account number for end use customer.	
Must Use	REF02	127	Reference Identification Reference information as determined for a particular Transaction Set or as specified by the Reference Identification Qualifier	X AN 1/30

This column shows the use of each data element. If state rules differ, this will show "Conditional" and the conditions will be explained in the appropriate grayboxes.

These are X12 code descriptions, which often do not relate to the information we are trying to send. Unfortunately, X12 cannot keep up with our code needs so we often change the meanings of existing codes. See graybox for the UIG or state definitions.

This column shows the X12 attributes for each data element. Please refer to Data Dictionary for individual state rules.

M = Mandatory, O= Optional, X = Conditional

AN = Alphanumeric, N# = Decimal value, ID = Identification, R = Real

1/30 = Minimum 1, Maximum 30

820 Payment Order/Remittance Advice

Functional Group ID=**RA**

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Payment Order/Remittance Advice Transaction Set (820) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to make a payment, send a remittance advice, or make a payment and send a remittance advice. This transaction set can be an order to a financial institution to make a payment to a payee. It can also be a remittance advice identifying the detail needed to perform cash application to the payee's accounts receivable system. The remittance advice can go directly from payer to payee, through a financial institution, or through a third party agent.

Segment:	BPR Beginning Segment for Payment Order/Remittance Advice
Position:	020
Loop:	
Level:	Heading
Usage:	Mandatory
Max Use:	1
Purpose:	To indicate the beginning of a Payment Order/Remittance Advice Transaction Set and total payment amount, or to enable related transfer of funds and/or information from payer to payee to occur
Syntax Notes:	<ol style="list-style-type: none"> 1 If either BPR06 or BPR07 is present, then the other is required. 2 If BPR08 is present, then BPR09 is required. 3 If either BPR12 or BPR13 is present, then the other is required. 4 If BPR14 is present, then BPR15 is required. 5 If either BPR18 or BPR19 is present, then the other is required. 6 If BPR20 is present, then BPR21 is required.
Semantic Notes:	<ol style="list-style-type: none"> 1 BPR02 specifies the payment amount. 2 When using this transaction set to initiate a payment, all or some of BPR06 through BPR16 may be required, depending on the conventions of the specific financial channel being used. BPR06 and BPR07 relate to the originating depository financial institution (ODFI). 3 BPR08 is a code identifying the type of bank account or other financial asset. 4 BPR09 is the account of the company originating the payment. This account may be debited or credited depending on the type of payment order. 5 BPR12 and BPR13 relate to the receiving depository financial institution (RDFI). 6 BPR14 is a code identifying the type of bank account or other financial asset. 7 BPR15 is the account number of the receiving company to be debited or credited with the payment order. 8 BPR16 is the date the originating company intends for the transaction to be settled (i.e., Payment Effective Date). 9 BPR17 is a code identifying the business reason for this payment. 10 BPR18, BPR19, BPR20 and BPR21, if used, identify a third bank identification number and account to be used for return items only. 11 BPR20 is a code identifying the type of bank account or other financial asset.
Comments:	
Notes:	<p>Notes: Specific qualifiers used in data elements BPR01, BPR03, BPR04 and BPR05 need to be discussed and agreed upon between the originator and the originator's financial institution prior to using the transaction. In addition to testing with your trading partner, you must allow sufficient time to test with your bank. Most banks require setup/lead time to implement new trading partners. It is recommended that all new trading partners send/receive a prenote in advance of moving live payments.</p> <p>For CTX payments and remittance details that travel together. These items may or may not be required by your bank. Different banks have different requirements related to the BPR elements. Your relationship with your bank will be the deciding factor on what information you will send and receive.</p> <p>NJ Use: BPR01, BPR02, BPR03, BPR04 and BPR16 are Required. The other BPR elements may be sent when sending the 820 through the banking system. It is important that confidential information, such as bank account numbers, NOT be sent when the remittance is being sent separately .</p> <p>In the event that your remittance advice sums to a negative amount, see the "Instructions for Handling a Negative Remittance" which appear in the Notes. The BPR is an instruction to the bank and the bank cannot move negative dollar amounts.</p> <p>"</p>

Example: BPR*I*1000.00*C*ACH*CCP*****19990220 (Remittance Information Only)

Max Use:	1
Purpose:	To identify a party by type of organization, name, and code
Syntax Notes:	<ol style="list-style-type: none"> 1 At least one of N102 or N103 is required. 2 If either N103 or N104 is present, then the other is required.
Semantic Notes:	
Comments:	<ol style="list-style-type: none"> 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party. 2 N105 and N106 further define the type of entity in N101.

Data Element Summary				
	<u>Ref.</u> <u>Des.</u>	<u>Data</u> <u>Element</u>	<u>Name</u>	<u>Attributes</u>
M	N101	98	Entity Identifier Code	M ID 2/3
			Code identifying an organizational entity, a physical location, property or an individual	
			PR Payer	
			Initiator of the payment/remittance advice	
M/U	N102	93	Name	X AN 1/60
			Free-form name	
			Payer Name	
M/U	N103	66	Identification Code Qualifier	X ID 1/2
			Code designating the system/method of code structure used for Identification Code (67)	
			1 D-U-N-S Number, Dun & Bradstreet	
			9 D-U-N-S+4, D-U-N-S Number with Four Character Suffix	
M/U	N104	67	Identification Code	X AN 2/80
			Code identifying a party or other code	
			Payer D-U-N-S Number or D-U-N-S + 4 Number	

Segment:	N1 Name (PE = ESP Name)
Position:	070
Loop:	N1 Optional
Level:	Heading
Usage:	Optional
Max Use:	1
Purpose:	To identify a party by type of organization, name, and code
Syntax Notes:	1 At least one of N102 or N103 is required. 2 If either N103 or N104 is present, then the other is required.
Semantic Notes:	
Comments:	1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party. 2 N105 and N106 further define the type of entity in N101.
Notes:	NJ Use: Required Example: N1*PE*ESP COMPANY*1*007909422

Data Element Summary

	<u>Ref.</u> <u>Des.</u>	<u>Data</u> <u>Element</u>	<u>Name</u>	<u>Attributes</u>

Segment:	ENT Entity
Position:	010
Loop:	ENT Optional
Level:	Detail
Usage:	Optional
Max Use:	1
Purpose:	To designate the entities which are parties to a transaction and specify a reference meaningful to those entities
Syntax Notes:	<ol style="list-style-type: none"> 1 If any of ENT02 ENT03 or ENT04 is present, then all are required. 2 If any of ENT05 ENT06 or ENT07 is present, then all are required. 3 If either ENT08 or ENT09 is present, then the other is required.
Semantic Notes:	
Comments:	<ol style="list-style-type: none"> 1 This segment allows for the grouping of data by entity/entities at or within a master/masters. A master (e.g., an organization) can be comprised of numerous subgroups (e.g., entities). This master may send grouped data to another master (e.g., an organization) which is comprised of one or more entities. Groupings are as follows: <ol style="list-style-type: none"> (1) Single/Single: Only ENT01 is necessary, because there is a single entity (the sending master) communicating with a single entity (the receiving master). (2) Single/Multiple: ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. The sending master is a single entity, so no other data elements need be used. (3) Multiple/Single: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. The receiving master is a single entity, so no other data elements need be used. (4) Multiple/Multiple: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. <p>This segment also allows for the transmission of a unique reference number that is meaningful between the entities.</p>
Notes:	NJ Use: Required Example: ENT*1

Data Element Summary

Ref.	Data		Attributes
<u>Des.</u>	<u>Element</u>	<u>Name</u>	
M/U	ENT01	554 Assigned Number	O N0 1/6
		Number assigned for differentiation within a transaction set	

Segment:	RMR	Remittance Advice Accounts Receivable Open Item Reference
Position:	150	
Loop:	RMR	Optional
Level:	Detail	
Usage:	Optional	
Max Use:	1	
Purpose:	To specify the accounts receivable open item(s) to be included in the cash application and to convey the appropriate detail	
Syntax Notes:	1 If either RMR01 or RMR02 is present, then the other is required. 2 If either RMR07 or RMR08 is present, then the other is required.	
Semantic Notes:	1 If RMR03 is present, it specifies how the cash is to be applied. 2 RMR04 is the amount paid. 3 RMR05 is the amount of invoice (including charges, less allowance) before terms discount (if discount is applicable) or debit amount or credit amount of referenced items. 4 RMR06 is the amount of discount taken. 5 RMR08, if present, represents an interest penalty payment, amount late interest paid, or amount anticipation.	
Comments:	1 Parties using this segment should agree on the content of RMR01 and RMR02 prior to initiating communication. 2 If RMR03 is not present, this is a payment for an open item. If paying an open item, RMR02 must be present. If not paying a specific open item, RMR04 must be present. 3 RMR05 may be needed by some payees to distinguish between duplicate reference numbers.	
Notes:	NJ Use: Required PSE&G will provide "72" or "CS" in RMR07 Examples: RMR*12*7799621539*PO*300.00 RMR*12*39481958690*PO*795.00 RMR*12*3965716927*AJ*-95.00***CS*-95.00 RMR*12*3942342340*PO*96.00*100.00*4.00 SJG: uses RMR03 PR for purchase of receivables	

Data Element Summary

	Ref.	Data	Attributes
	Des.	Element Name	
M/U	RMR01	128 Reference Identification Qualifier	X ID 2/3
		Code qualifying the Reference Identification	
		12 Billing Account	
		GDC-assigned account number for the end use customer.	
M/U	RMR02	127 Reference Identification	X AN 1/30
		Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	
		GDC-assigned account number for the end use customer.	
M/U	RMR03	482 Payment Action Code	O ID 2/2
		Code specifying the accounts receivable open item(s), if any, to be included in the cash application.	
		AJ Adjustment	
		Adjustment of a previous payment.	
		PO Payment on Account	
		PR Purchase of Receivables with Discount	

			Required when payment is for Purchase of Receivables with Discount Amount (SJG only)	
M/U	RMR04	782	Monetary Amount Monetary amount The payment/adjustment amount. This amount is algebraically summed to BPR02. Please see Notes above for instructions on how to handle a negative remittance - when the total remittance is negative, the sum of the RMR04 values will not add up to the BPR02 If a Factor is being applied to payment: Amount being remitted per customer account, invoice amount after factoring Should equal RMR05 - RMR06 (rounding may cause difference)	O R 1/18
	RMR05	782	Monetary Amount Monetary amount Total Amount from the 810 prior to factoring Required if a Factor is being applied to payment	C R 1/18
	RMR06	782	Monetary Amount Monetary amount Factored Amount Required if a Factor is being applied to payment	C R 1/18
	RMR07	426	Adjustment Reason Code Code indicating reason for debit or credit memo or adjustment to invoice, debit or credit memo, or payment Require if RMR03 = AJ 26 Invoice Cancelled 72 Authorized Return Returned Items CS Adjustment IF Insufficient Funds	C ID 2/2
	RMR08	782	Monetary Amount Monetary amount The adjustment amount. This amount must be signed if negative. The amount in RMR04 will always be the same as the amount in RMR08. The adjustment amount is only populated if there is an adjustment to be made. Require if RMR03 = AJ	C R 1/18

Segment:	REF	Reference Identification (11 = ESP Account Number)
Position:	170	
Loop:	RMR	Optional
Level:	Detail	
Usage:	Optional	
Max Use:	>1	
Purpose:	To specify identifying information	
Syntax Notes:	1 At least one of REF02 or REF03 is required. 2 If either C04003 or C04004 is present, then the other is required. 3 If either C04005 or C04006 is present, then the other is required.	
Semantic Notes:	1 REF04 contains data relating to the value cited in REF02.	
Comments:		
Notes:	<p>NJ Use: Conditional - GDC's are required to provide this data if store in their system.</p> <p>GDCs are not required to store ESP account number their system. GDCs if storing will do so if provided on 814 enrollment and/or 814 change. If GDC does store ESP account number, GDC will provide ESP account number on all transactions.</p> <p>Example: REF*11*1394959</p>	

Data Element Summary				
	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
M	REF01	128	Reference Identification Qualifier	M ID 2/3
			Code qualifying the Reference Identification	
			11 Account Number	
			ESP-assigned account number for end use customer.	
M/U	REF02	127	Reference Identification	X AN 1/30
			Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	

Segment:	REF	Reference Identification (60 = Unique cross-reference number)
Position:	170	
Loop:	RMR	Optional
Level:	Detail	
Usage:	Optional	
Max Use:	>1	
Purpose:	To specify identifying information	
Syntax Notes:	1 At least one of REF02 or REF03 is required. 2 If either C04003 or C04004 is present, then the other is required. 3 If either C04005 or C04006 is present, then the other is required.	
Semantic Notes:	1 REF04 contains data relating to the value cited in REF02.	
Comments:		
Notes:	NJ Use: Optional if billing party is making the non-billing party whole otherwise not used. Unique cross reference number used to associate metering information (867MU or 867IU transaction), billing information (810 transaction) and payment information (820 transaction) for a specific billing period for an account. For ETG if the 810 was a cancel this will contain the LDC Account Number	
	Example:	REF*6O*123456789 (Note code 6O with a letter O)

Data Element Summary				
	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
M	REF01	128	Reference Identification Qualifier	M ID 2/3
			Code qualifying the Reference Identification	
			6O	Cross Reference Number
				Unique cross-reference number to link 867, 810, and 820.
				The cross-reference number originally transmitted in the 867 – BPT02, and the 810 – BIG05.
M/U	REF02	127	Reference Identification	X AN 1/30
			Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	

Segment:	DTM Date/Time Reference (809 = Posted)
Position:	180
Loop:	RMR Optional
Level:	Detail
Usage:	Optional
Max Use:	>1
Purpose:	To specify pertinent dates and times
Syntax Notes:	<ol style="list-style-type: none"> 1 At least one of DTM02 DTM03 or DTM05 is required. 2 If DTM04 is present, then DTM03 is required. 3 If either DTM05 or DTM06 is present, then the other is required.
Semantic Notes:	
Comments:	
Notes:	NJ Use: Required if billing party is not making the non-billing party whole. Example: DTM*809*19990214

Data Element Summary				
	Ref.	Data	Name	Attributes
