Summary of Changes

April 2, 1999 Version 2.0	Initial release of version 4010.
May 25, 1999 Version 2.1	 Made changes for consistency with the 814 4010 changes: BGN02 – clarified to be unique over time BGN03 – clarified to be application system date N901 – added language for ESP account number N901 – changed requirement for old LDC account number to last 60 (not 90) days Added PA/NJ Use fields, clarified Must Use/Optional, etc., added examples Added note to LX Changed LX01 to remove the word "Sequential"
May 26, 1999 Version 2.2	Re-issued to be consistent with Data Dictionary • Changed requirement for ESP account number to 2/1/2000
May 28, 1999 Version 2.3	Change example to reflect only one LX loop per CS loop. If an account has 2 payments on the same day, there will be 2 CS loops.
June 8, 1999 Version 3.0	 Added clarification regarding use of LX loop being used once. Document is being used as FINAL for Pennsylvania Added some New Jersey clarifications. Tentative rules for New Jersey need to be approved before this document can be considered FINAL for New Jersey.
June 29, 1999 Version 3.1	 Changed "EGS" to "ESP" and "EDC" to "LDC" throughout the guideline. Removed "NJ Definitions" and replaced it with "LDC Definitions" and "ESP Definitions" in the Notes section. Added "How to use the implementation guideline" page. In addition, changed all headers to the true X12 definition. Also corrected the Table on Page 4 to reflect X12 definitions and added the words "X12 Structure" to the title on that page. Modified note on LX01 – removed reference to X12 and removed "Line Item Counter".
July 21, 1999 DRAFT Version 3.1a	 Removed "Tentative Plan" for New Jersey to indicate this is plan for New Jersey. Upon approval, this document will be considered final for New Jersey.
October 1, 1999 DRAFT Version 3.1b	 Added Delaware Information Moved the adjustment definitions from the data dictionary to the notes section of the implementation guide.
November 4, 1999 Version 3.2	This is a FINAL version for Pennsylvania and New Jersey
November 1999 Draft version 3.2MD1	 Add Maryland use to document – Maryland will not use the 568 when the market opens. Added Table of Contents Added Data Dictionary
January 17, 2000 Version 3.2MD2	Clarified N9*45 is only used if LDC is sending transaction.
June 26, 2000 Version 3.2MD3	Corrected description for Customer name in Data Dictionary
September 10, 2000 Version 3.3	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Delmarva only).
October 19, 2001 Version 3.3rev01	Incorporate Delaware Electric Coop (DEC) information for Delaware
January 9, 2002 Version 4.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.

	Version 6.4
February 22, 2009 Version 4.0.1	Incorporate PA Change Control 048.
January 24, 2010 Version 4.1	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
September 8, 2010 Version 4.1.1D	 Incorporate PA Change Control 060 (PA Admin/Cleanup changes) Incorporate MD Change Control – Admin (Admin/Cleanup changes for MD)
February 28, 2011 Version 5.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 16, 2011 Version 5.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware. No changes since last version.
March 8, 2013 Version 6.0	 Moving to v6.0 to align versions across all transaction sets Cleaned up references to Allegheny and APS throughout document
March 17, 2014 Version 6.1	Incorporated PA EDI Change Control 113 (PPLEU doesn't send 568)
May 18, 2018 Version 6.2	Incorporated PA Change Control 146 (Citizens & Wellsboro doesn't send 568)
March 25, 2022 Version 6.3	Incorporate PA Change Control 162 (PECO doesn't send 568)
April 29, 2023 Version 6.4	Incorporate NJ Change Control Electric 054 (Update NJ Rules)

General Notes

Use of 568 transaction	PA Rules:
Ose of 368 transaction	The 568 Collections transaction will be used in all cases for the billing party to notify the
	non-billing party of payments received from the customer.
	The transaction must be sent regardless of whether the billing party is making the other party whole or not.
	Special exceptions may be made by the PUC if the billing party is remitting the money received to the non-billing party in a timely manner.
	Duquesne Light will not be sending the 568 transaction for Purchase of Receivable accounts during their POR pilot commencing January 1, 2008.
	PPL Electric Utilities does not send the 568 transaction.
	Citizens & Wellsboro does not send the 568 transaction
	PECO does not send the 568 transaction NJ Rules:
	The 568 Collections transaction will be used for the billing party to notify the non-billing party of payments received from the customer when not making the other party whole.
	The transaction will not be sent if the billing party is making the other party whole.
	This document will not be required if the billing party is remitting the money received to the non-billing party within 5 calendar days. The billing party will instead send the 820 remittance advice to the non-billing party within 1 day of receipt of monies.
	Utility payment plan: Atlantic City Electric: Not Used JCP&L: Sent within one business day of receipt of payment from customer PSE&G: Not Used Realthand Electrica Not Used
	Rockland Electric: Not Used DE Rules:
	The 568 Collections transaction will be used for the billing party to notify the non-billing party of payments received from the customer when not making the other party whole.
	The transaction will not be sent if the billing party is making the other party whole.
	This document will not be required if the billing party is remitting the money received to the non-billing party within 4 calendar days. The billing party will instead send the 820 remittance advice to the non-billing party within 1 day of receipt of monies.
	 Utility payment plan: Delmarva will be remitting the money received to the non-billing party within 4 calendar days; therefore, the use of this document is optional.
	MD Rules:
	The 568 Collections transaction will be used for the billing party to notify the non-billing party of payments received from the customer when not making the other party whole.
	The transaction will not be sent if the billing party is making the other party whole or under purchase of receivables.
	This document will not be required if the billing party is remitting the money received to

	VEISION 0.4
	the non-billing party within 5 calendar days. The billing party will instead send the 820 remittance advice to the non-billing party within 1 day of receipt of monies.
	Utility payment plans: All MD Utilities support Purchase of Receivables
Adjustment Definitions	• Returned Items (Non-sufficient funds, signature missing, etc.): This item will be reversed on the 568 and the 820.
	Adjustments (Credit/Debit) involve the manual crediting/debiting of the account's ESP balance. These transactions are typically used to correct misapplied payments.
LDC Definitions:	The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym: • EDC – Electric Distribution Company (Pennsylvania, Delaware) • LDC – Local Distribution Company (New Jersey)
	• EC – Electric Company (Maryland)
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym: • EGS – Electric Generation Supplier (Pennsylvania) • TPS – Third Party Supplier (New Jersey) • ES – Electric Supplier (Delaware)
	ES – Electricity Supplier (Maryland)

Transaction Set Notes

- 1. The BGN segment identifies the transaction set purpose code, a unique number used to identify this transmission, and the date and time of transaction set creation.
- The AMT segment identifies the collected amount and the disbursed amount to the extent that either amount applies to the transaction set.
- 3. The N1 loop identifies the name and address information for the transmitting and receiving parties.
- 4. The CS segment identifies the contract, modification, call, and order number of the procurement instrument, and the voucher number of the payment being reported on in this contract payment management report.
- 5. The N9 segment identifies the number of the original voucher on which a payment was made if the voucher being reported on in this transmission is a change, correction, or adjustment to that previous voucher.
- **6.** The REF segment identifies a reference number associated with the following appropriation data.
- 7. The N9 segment identifies a contract line item, exhibit line item, or subclassification of either against which specific data is being reported.
- **8.** The AMT segment identifies the gross, net, deducted, or collected amounts and the net variance amount applicable to the line item being reported.
- **9.** The N1 loop identifies address information for a quantity delivered in a specific shipment, to a specific ship-to address.

CS Contract Summary **Segment:**

Position: 010 CS Loop: Level: Detail Usage: **Optional**

Max Use:

To provide information about a contract **Purpose:**

Syntax Notes: Semantic Notes:

- If either CS04 or CS05 is present, then the other is required. CS09 is the permissible overage as a percentage of the total contract line item
- number (CLIN) quantity. 2 CS10 is the permissible shortage as a percentage of the total contract line item
 - number (CLIN) quantity. 3
 - CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.
 - 4 CS14 is the Unit of Measure stipulated in the contract.
 - CS15 is the contract line item number (CLIN) unit price specified in the contract.
 - CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract; an "N" indicates that no Critical Application Indicator is specified in the contract.
 - CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract; an "N" indicates that no Special Requirements Indicator is specified in the contract.

Comments:

- 1 CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).
- 2 CS07 and CS13 can be used to indicate two different types of special services required.

Notes:	It has been agreed that each CS loop will only contain one LX loop. This means if there are multiple payments on a specific account, there will be multiple CS loops for that
	account.
PA Use:	Required
NJ Use:	Required
DE Use:	Required
Example:	CS***12*12345678988*****-50.00

Date the date the payment was posted to the billing party if AM "KL" or date the adjustment was posted by the billing party if A to "RM"						•

to "BM".

Segment: AMT Monetary Amount

Position: 100
Loop: LX
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To indicate the total monetary amount

Syntax Notes: Semantic Notes: Comments:

PA Use:	Required
NJ Use:	Required
DE Use:	Required
Examples:	AMT*KL*25.00
	AMT*BM*-130.00

Data Element Summary

Must Use	Des. AMT01	Element 522	Name Amount Qualifier (Code to qualify amo		Attı M	ributes ID 1/2
			BM	Adjustments		
			KL	Collected Amount		
Must Use	AMT02	782	Monetary Amount		M	R 1/15

Monetary amount

Collected or adjustment amount allocated to the non-billing party for this customer.

Leading negative sign must be sent if this is a negative number, e.g. in the case of a bounced check to indicate the original check amount is being reversed. If the amount is positive, no sign is sent.

The sum of all AMT02 elements under this LDC Account Number is provided in the CS11.

 $N1 \ {\tt Name} \ ({\tt 8R=Customer} \ {\tt Name})$ **Segment:**

Position: 140 Loop: N1 Level: Detail Usage: Optional Max Use:

Purpose:

To identify a party by type of organization, name, and code At least one of N102 or N103 is required. **Syntax Notes:**

If either N103 or N104 is present, then the other is required.

Semantic Notes:

Comments: 1 This segment, used alone, provides the most efficient method of providing

organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2 N105 and N106 further define the type of entity in N101.

PA Use:	Required
NJ Use:	Required
DE Use:	Required
Example:	N1*8R*JOHN Q. CUSTOMER

Must Use	Ref. <u>Des.</u> N101	Data <u>Element</u> 98	Name Entity Identifier C Code identifying an individual	Code Attributes M ID 2/3 n organizational entity, a physical location, property or an
			8R	Consumer Service Provider (CSP) Customer
				End Use Customer
Must Use	N102	93	Name Free-form name	X AN 1/60

Segment: **SE** Transaction Set Trailer

Position: 020

Loop:

Level: Summary Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted

segments (including the beginning (ST) and ending (SE) segments)

Syntax Notes: Semantic Notes:

Comments: 1 SE is the last segment of each transaction set.

001111101100	2 52 is the last segment of each transaction set.	
PA Use:	Required	
NJ Use:	Required	
DE Use:	Required	
Example:	SE*28*000000001	

			Data Element Summary
