	Summary of Changes
June 29, 1999 Version 1.0	 Initial Release. Changes since last release: Changed "EGS" to "ESP" and "EDC" to "LDC" throughout the guideline. Removed "NJ Definitions" and replaced it with "LDC Definitions" and "ESP Definitions" in the Notes section. Added "How to use the implementation guideline" page. In addition, changed all headers to the true X12 definition. Also corrected the Table on Page 4 to reflect X12 definitions and added the words "X12 Structure" to the title on that page.
July 14, 1999 Version 1.1	Change Control Process Change #002 – Emergency Change: • Corrected X12 Error – changed BGN07 segment to BGN08
October 1, 1999 Version 1.1b	Change Control Process Change #004: Fixed PER examples Clarified FRF Rejection Code for 810 Added FRG Rejection Code for 810 Additional changes: Clarified that all day requirements in the Notes section are "business" days. Moved NJ Notes to its own page Added Delmarva Delaware information Removed Rejection Codes "OBW" and "W06" for 867
November 4, 1999 Version 1.2	This is a FINAL version for Pennsylvania and New Jersey
December , 1999 Draft version 1.2MD1	 Add Maryland use to document – the changes were added to the version 1.2 of the regional standards Added Table of Contents Added Data Dictionary Added example of rejecting an entire 820 transaction Added "Accept" values for the BGN08 and OTI01 fields. These values still need to be verified and the rules for using them clarified.
December 23, 1999 Version 1.2MD2	 Added positive acknowledgement for 810 for Maryland Corrected code for positive acknowledgement of 810 to "CF" (Confirm). Added DTM segments for Date Bill Rendered and Bill Due Date Added AMT segment for outstanding balance Create example of rejecting a single account from an 820 Create example of confirming a bill ready 810
January 17, 2000 Version 1.2MD3	 Clarified REF*45 only used when LDC is sending transaction Clarified several error messages (FRF and TCN)
May 30, 2000 Version 1.2MD4	Clarified use of old account number for MD Corrected data dictionary to show customer name in MD as 60 characters Change Control Process Change #005 Added ADM, NCP, and 008 Rejection Codes for 810 Change Control Process Change #007 Added IIS Rejection Code for 867 Change Control Process Change #013 Added EXP Rejection Code for 810 Change Control Process Change #014 Added PCR Rejection Code for 810 Added Pennsylvania Notes section
July 22, 2000 Version 1.2MD5	 Modified MD use of NTE to reflect it is only required if TED02 value is A13 or API. Remove TCN from valid 867 reject reason. Correct references to BGN08 (was BGN07). Added clarifications to improve understanding of transaction Corrected information in examples, added further clarification notes to examples.

	Add 867HU to list of PA transactions on Pennsylvania Notes page.
August 14, 2000 Version 1.2MD6	 Made REF*6O optional for 810 (never discussed as required) Change MD email id to edi@psc.state.md.us Add TED02 value TXI for invalid TXI information on the 810 Add Note to New Jersey Notes for each LDC's Use of 824 transaction Incorporate PA Change Control X026 for no current charges on bill
Version 1.2MD7	 Document PSE&G sending 824 when no supplier charges are on bill
September 10, 2000 Version 1.3	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Delmarva only).
January 7, 2001 Version 2.0	Added Rejection codes to TED segment page 32
October 19, 2001 Version 2.0rev01	 Incorporate Delaware Electric Coop (DEC) information for Delaware Correct BGN01 to allow value of 00 – some examples showed it, but BGN segment based had not included it.
January 9, 2002 Version 3.0	• Incorporate SMECO specifics for MD (MD Change Control 003) This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
December 21, 2004 Version 3.0.1D	 Included information about new MD Regulations which require LDCs to send customer balance and payment information whenever a consolidated bill is issued. Also includes intent for Delmarva to send for DE and NJ.
January 26, 2005 Version 3.0.2D	 Made updates as a result of CTIWG discussions to add further clarifications regarding planned changes for the proactive 824.
January 20, 2006 Version 3.0.3D	 Incorporate NJ Change Control 005 (NJ CleanPower program changes) Incorporate NJ Change Control 006 to reflect current operations
October 23, 2006 Version 3.0.4D	Incorporate NJ Change Control 008 to reflect NJ CleanPower – unmetered usage for RECO)
February 12, 2007 Version 3.0.5F	Considered FINAL for PA and NJ
February 22, 2009 Version 3.0.6D	Incorporate NJ Change Control PSEG-E-Ref45
January 24, 2010 Version 3.1	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
September 8, 2010 Version 3.1.1D	 Incorporate PA Change Control 060 Incorporate MD Change Control – Admin (Admin/Cleanup change for MD
February 16, 2012 Version 4.01	 Incorporate PA Change Control 076 (add DIV to TED02 for 820) Incorporate PA Change Control 086 (Clarify NCC 824)
March 8, 2013 Version 6.0	 Moving to v6.0 to align versions across all transaction sets Cleaned up references to Allegheny and APS throughout document
March 17, 2014 Version 6.1	 Incorporate PA Change Control 106 (add AFB to TED02 for 810) Incorporate MD Change Control 031 (add AFB to TED02 for 810) Incorporate NJ Change Control 031 (RECO removal from IG)
May 18, 2018 Version 6.2	 Incorporate PA Change Control 141 (add FirstEnergy to DIS in TED02 – 810) Incorporate NJ Change Control Electric 043 (add FirstEnergy to DIS in TED02 – 810) Incorporate MD Change Control 051 (add FirstEnergy to DIS in TED02 – 810)
March 22, 2019 Version 6.3	• Incorporate NJ Change Control Electric 048 (NJ Note – End of Clean Power Choice)
March 31, 2020 Version 6.4	 Incorporate NJ Change Control Electric 049 (Proactive 824 - ACE) Incorporate NJ Change Control Electric 050 (Remove old list server references) Incorporate MD Change Control 057v3 (Proactive 824 – Delmarva DE)

Purpose of 824

To automate the communication of application problems occurring with EDI transactions other than the 814's.

Situations and Procedure for Use

This list of "Situations for Use" reflects all situations used by any state using this document. To see which transactions are used by each state, refer to the state-specific "Notes" section.

1. Non-billing party may reject bad 867MU or IU

- a. If 824 action code indicates resend, metering party must correct and resend the transaction within 5 business days or contact the trading partner to agree on an alternative. You need only send the corrected 867, but you may send a cancel 867 and corrected 867 if your system requires that to correct the problem.
- b. If Rate Ready and you sent a good 810, you do not need to resend 810. But you may resend 810 if your system requires that to correct the problem.
- c. If Bill Ready Consolidated Billing, Billing Party must hold bill and restart bill window from time corrected 867 is sent. Corrected 867 shall contain new document due date.
 - ♦ If corrected 867 is good, Non-Billing party must return good 810 by new document due date
 - ♦ If corrected 867 is bad, repeat a-c, until a good 867 is received or other agreement is made between LDC and ESP.

2. For Rate Ready Billing, non-billing party may reject bad 810

- a. If 824 action code indicates resend, billing party must correct and resend corrected 810 within 5 business days or contact the trading partner to agree on an alternative.
- b. If sent good 867, do not need to resend 867. But may send cancel 867 and new 867 if your system requires that to correct the problem.

3. For Bill Ready Consolidated Billing, billing party may reject bad 810

- a. If 824 action code indicates resend, non-billing party may correct and resend 810 immediately if still time in billing window. If not, they must wait until next billing window to resend.
- b. If non-billing party resends 810 and misses billing window, they will receive another 824 stating the 810 was outside the billing window.

This 824 notification replaces the current missed billing window e-mail or phone notifications.

4. Non billing party may reject bad 568

Because the 568 transaction may contain many accounts per transaction, it is difficult to automate resolution of problems. Therefore, 824's for bad 568's will be sent as notification only. Corrective actions will be handled outside the EDI process as agreed upon by the billing and non-billing parties.

5. Non billing party may reject bad 248

820 If action code is resend, billing party must correct and resend the 248 within 5 business days or contact the trading partner to agree on an alternative.

6. Non billing party may reject bad 820 remittance received directly from Billing Party or from the Bank.

Because the 820 transaction may contain many accounts per transaction, it is difficult to automate resolution of problems. Therefore, 824's for bad 820's will be sent as notification only. Corrective actions will be handled outside the EDI process as agreed upon by the billing and non-billing parties.

7. Non metering party may reject bad 867HU

a. If action code is resend, metering party must correct and resend the 867HU within 5 business days or contact the trading partner to agree on an alternative.

8. Bill Ready Billing Party may acknowledge non-billing party charges appeared on bill

- a. If the bill print has non-billing party charges, an 824 may be sent. It will contain the date the bill was rendered, the bill due date, and the total supplier amount due (which will include current charges and any arrearages)
- 9. Bill Ready Billing Party issues bill with no non-billing party charges.

Transaction Structure

867MU, 867IU, 867HU, 810, and 248:

♦ One 824 per LDC Account.

Since these transactions are also one per LDC Account, the 824 will match one for one with the originating transaction in these cases.

820 and 568:

Since these transactions may contain many LDC Accounts per transaction, the 824 can be used either at the account or summary level as follows:

- If there is a problem with one or more accounts on the 820 (such as account number is not in receiver's system), one 824 will be sent for <u>each</u> problem account. Each 824 will be coded as a Transaction Set Partial Accept/Reject (OTI01 = TP) and the appropriate LDC account number will be provided.
- ♦ If there is a problem with the transaction that cannot be attributed to a specific LDC account, the 824 will be coded as a Transaction Set Reject (OTI01 = TR) indicating that the entire transaction is being rejected.

Rejection Reasons

To prevent abuse of the 824, the receiver should only send an 824 Rejection for reasons contained in this

guide. The "Other" code (A13) may be used for situations needing immediate attention. However, each time an A13 is used, you must e-mail the appropriate state's EDI Working Group so that a new code can be established. See TED segment for further explanation.

Action Code

An Action Code will be used to tell receiver what action to take, if any.

- Follow Up (BGN08 = 82): This indicates that the receiver of the 824 must resend the transaction. This code should be used when it is possible and desirable to resolve the problem by correcting and resending the transaction.
- ♦ Evaluate (BGN08 = EV): This indicates that the receiver of the 824 should evaluate the problem and make modifications to their system as necessary without resending the transaction. This code should be used when it is not possible to correct the situation automatically (such as problems with the 820 and 568 transactions) or it is not desirable to do so (such as when receiver chooses to make minor corrections because that is the easiest or quickest solution).
- ◆ Confirm (BGN08 = CF): This indicates that the sender of the bill has sent a bill to the customer, and is relaying balance information to the non-billing party. No action is required from the non-billing party.

Conditions for use of 824

- ◆ Party receiving 867, 810, 568, 248 or 820 may send an 824 when one of the valid reject reasons shown on the implementation guideline is detected. The 824 is mandatory if a transaction cannot be processed by the receiver's system (rejection) and must be resent. The 824 is optional if the receiver needs to manipulate any data required by their application system (accept with error) but they are not asking for the transaction to be resent.
- ♦ Bill Ready 810's that do not appear on the bill: An 824 containing an appropriate rejection code will be sent whenever an 810 is received but the charges are not included on the bill. An 824 will NOT be sent if an 810 is not received by the billing party. This allows the non-billing party to know that any 810's they sent, minus any 997 rejects, minus any 824 rejects, is what was accepted by the receiver and placed on the customer bill. An 824 MAY be sent by the billing party in the event a bill is issued without non-billing party charges present.
- ♦ Bill Ready 810's with use of 824 Acceptances: An 824 will be sent for every customer bill that should contain non-billing party charges. If the 810 received was not placed on the bill or no 810 was received, an 824 Rejection will be sent containing an appropriate rejection code. If the 810 received was placed on the bill, an 824 Acceptance will be sent. This allows the non-billing party to know what happened to each bill that should have contained their charges. The non-billing party should receive an 824 for each one-bill 867 they receive.
- ♦ If the receiver detects a problem as listed in the implementation guideline and chooses to send an 824, they must send it within 1 business day of receiving a bad transaction. Otherwise, the sender will not be held to their timing requirements. (i.e., If you do not send an 824 in response to a bad 867 within 1 business day, the billing window may not be held up and the bill may go out without your charges.)
- If the receiver detects a problem other than the valid reasons listed in the implementation guideline, they should phone or e-mail the sender as soon as possible. The sender should respond as soon as possible.
- ♦ If you receive an 824 with an action flag set to resend (Follow Up), you are required to respond either automatically or manually. You must correct and re-send the transaction within 5 business days or contact your trading partner and agree on an alternative. **Note:** An exception to this is that any rejection of a Bill Ready 810 will not change the billing window.
- If you receive an 824 with action flag set to notification only (Evaluate), a manual response (e-mail or phone call) to let the sending party know when the problem will be fixed is

- suggested.
- ♦ The proactive 824 is generated whenever the billing party renders a bill for the non-billing party. The proactive 824 is not used as an acknowledgement that the billing party received the non-billing party's invoice (810) transaction, or to provide information about the charges on the current bill.
 - ◆ Pay as you get paid (PAYGP) the balance amount in the proactive 824 reflects the non -billing parties charges due.
 - ◆ Purchase of Receivables (POR) the balance amounts in the proactive 824 will not reflect the non-billing parties' charges due but rather the billing parties balance.

General Notes

LDC Definitions:

The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:

- EDC Electric Distribution Company (Pennsylvania, Delaware)
- LDC Local Distribution Company (New Jersey)
- EC Electric Company (Maryland)

ESP Definitions:

The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:

- EGS Electric Generation Supplier (Pennsylvania)
- TPS Third Party Supplier (New Jersey)
- ES Electric Supplier (Delaware)
- ES Electricity Supplier (Maryland)

Renewable Energy Provider Definition:

The term Renewable Energy Provider in this document refers to the party that provides Renewable Energy Credits (RECs). This party does not provide generation to the account. Each state may refer to the Renewable Energy Provider by a different acronym:

• GPM – Green Power Marketer (New Jersey)

Note: The transaction will either have an ESP or a Renewable Energy Provider, but not both.

Pennsylvania Notes

Pennsylvania Use:

This transaction is used for rejections of:

- 810 Rate Ready and 810 Bill Ready
- 867 MU and 867 IU
- 867 HU
- 248 Write Off
- 568 Collections
- 820 Payment transaction

PECO will also be sending an 824 when no current charges print on a bill for the non-billing party. (This is an optional purpose in PA)

New Jersey Notes

New Jersey Use:

This transaction is used for rejections of:

- 810 Rate Ready and 810 Bill Ready
- 867 MU and 867 IU
- 820 Payment transaction

PSE&G also sends when there are no ESP charges on the bill – see item below.

Rockland Electric Company (RECO) does not utilize this EDI implementation guideline. RECO uses the New York EDI implementation guidelines.

PSE&G Use as of CAS:

If no 810 is received within billing window, PSE&G will send bill to customer stating that no ESP charges were available and send an 824 to ESP.

- PSE&G will send at least one 824 for each 810 that PSE&G determines contains error(s). PSE&G will send each error condition found in an 810 as a separate 824.
- PSE&G will reject 810's (Action Code BGN08=82) for billings errors, and not print TPS charges or text message on the bill sent to the customer. However PSE&G will send an 824 evaluation notice (Action Code BGN08=EV) to TPS advising that there as an error with TPS's text portion of the 810 but **still** print the TPS charges on the customer's bill if the 810 contained no billing errors.
- PSE&G will send 824 with the customer name missing for any 824 notifying TPS of a text error.
- PSE&G will send 824 with customer name missing for any customer account number not found in PSE&G's system.

NJ Clean Power Choice

Pursuant to Board Order, Docket No. QO18040393, the Clean Power Choice Program is coming to an end effective February 28, 2019. The EDI segments and data elements used for Clean Power Choice will remain in the EDI Implementation Guidelines to support any cancel/rebill scenarios or for future use in the event another program is established that may need these data elements.

Delaware Use:

Delaware Notes

- Delmarva Delaware: This transaction will be used for rejection of:
 - 810 Bill Ready
 - 867 MU and 867 IU
 - 820 Payment transaction

- This transaction is also to be used as:
 - Proactive 824 to confirm balance information

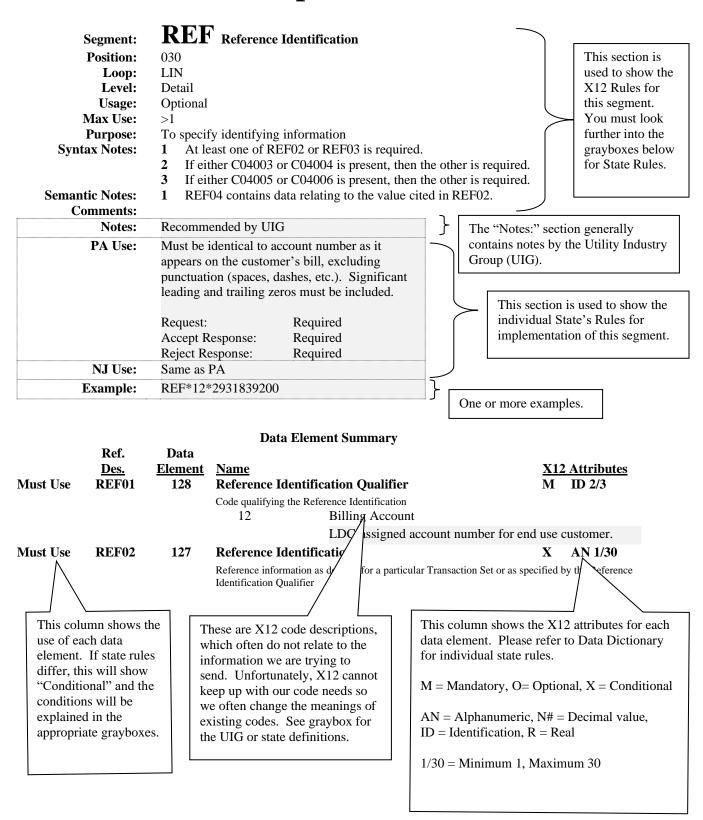

Maryland Notes

Maryland Use:

- This transaction will be used for rejection of:
 - 810 Rate Ready and 810 Bill Ready
 - 867 MU and 867 IU
 - 248 Write Off
 - 820 Payment transaction
- This transaction is also be used as:
 - Proactive 824 to confirm balance and payment information

.

Transaction Set Notes

- 1. The OTI loop is intended to provide a unique identification of the transaction set that is the subject of this application acknowledgment.
- 2. The REF segment allows for the provision of secondary reference identification or numbers required to uniquely identify the original transaction set. The primary reference identification or number should be provided in elements OTI02-03.
- 3. The DTM segment allows for the provision of date, time, or date and time information required to uniquely identify the original transaction set.
- **4.** The AMT segment should be utilized if monetary amount information is important to the unique identification of the original transaction set.

Data Dictionary for 824 – Application Advice

Appl Field	Field Name	Description	EDI Segment	Loop / Related EDI Qualifier	Data Type
1	Transaction Reference Number	A unique transaction identification number assigned by the originator of this transaction. This number must be unique over time.	BGN02	BGN01 = 11 or 00	X(30)
2	System Date	Date that the data was processed by the sender's application system.	BGN03		9(8)
3	Action Code	Indicates whether the receiver of the 824 is expected to resend the transaction or not. 82 – Follow Up (Resend) EV – Evaluate (Do not resend) CF – Accept	BGN08		X(2)
4	LDC Name	LDC's Name	N102	N1: N101 = 8S	X(60)
5	LDC Duns	LDC's DUNS Number or DUNS+4 Number	N104	N1: N101 = 8S N103 = 1 or 9	X(13)
6	LDC Technical Contact	LDC Contact information (Telephone, Email, Fax) to resolve this particular issue.	PER	N1: N101 = 8S	See IG
7	ESP Name	ESP's Name	N102	N1: N101 = SJ	X(60)
8	ESP Duns	ESP's DUNS Number or DUNS+4 Number	N104	N1: N101 = SJ N103 = 1 or 9	X(13)
9	ESP Technical Contact	ESP Contact information (Telephone, Email, Fax) to resolve this particular issue.	PER	N1: N101 = SJ	See IG
9.3	Renewable Energy Provider Name	Renewable Energy Provider 's Name	N102	N1: N101 = G7	X(60)
9.4	Renewable Energy Provider Duns	Renewable Energy Provider 's DUNS Number or DUNS+4 Number	N104	N1: N101 = G7 N103 = 1 or 9	X(13)
10	Customer Name	Customer Name as it appears on the Customer's Bill	N102	N1: N101 = 8R	X(35) Note: X(60) for MD
11	ESP Account Number	ESP Customer Account Number	REF02	N1: REF01= 11	X(30)
12	LDC Account Number	LDC Customer Account Number		N1: REF01= 12	X(30)
12.2	LDC Account Number - unmetered	LDC Customer Account Number – Unmetered	REF03	N1: N101 = 8R REF01 = 12 REF03 = U	X(80)
13	Old Account Number	Previous LDC Customer Account Number	REF02	N1: REF01= 45	X(30)
14	Rejection Level Indicator	 Indicates that the entire transaction is being rejected (OTI01=TR), only part of the transaction is being rejected (OTI01=TP), the entire transaction is accepted (OTI01=TA) 	OTI01		X(2)

		• Item is rejected (OTI01=IR)			
15	Transaction Reference Number	Transaction Reference Number echoed from the Original Transaction or appropriate value.	OTI03	OTI: OTI01= TP or TR or TA or IR OTI02 = TN	X(30)
16	Transaction Set	Transaction Number that is being 15esponded to	OTI10		X(3)
17	Cross Reference Number	Cross Reference Number from the 810 and 820 transaction.	REF02	OTI: REF01 = 6O	X(30)
18	Date Bill Rendered	Date bill was rendered to the customer (for 824 Acceptance of a Bill Ready 810)	DTM02	OTI: DTM01 = 003	9(8)
19	Bill Due Date	Date customer payment is due (for 824 Acceptance of a Bill Ready 810)	DTM02	OTI: DTM01 = 814	9(8)
20	Outstanding Balance	Total outstanding balance that printed on bill for non-billing party (for 824 Acceptance of a Bill Ready 810)	AMT02	OTI: AMT01 = BD	9(11).99-
21	Non-billing party charges	Charges that printed on bill for first time for non-billing party (for pro-active billing 824). This may include charges for the current bill period and / or charges for previous bill periods that are displayed on bill for the first time.	AMT02	OTI: AMT01 = PB	9(11).99
22	Billing party outstanding balance	Total outstanding balance that printed on bill for billing party (for pro-active billing 824)	AMT02	OTI: AMT01 = J8	9(11).99
23	Billing party charges	Charges that printed on bill for first time for billing party (for pro-active billing 824). This may include charges for the current bill period as well as adjustments that are displayed on bill for the first time.		OTI: AMT01 = T4	9(11).99-
24	Payments applied to bill	Indicates payments applied to all billing party accounts represented on this bill.	AMT02	OTI: AMT $01 = \mathbf{QZ}$	9(11).99
21	Rejection Reason Code	Code indicating rejection reason - See implementation guideline for valid codes.	TED02	TED: TED01 = 848	X(3)
22	Rejection Text	Text explaining rejection reason	NTE02	TED: NTE01 = ADD	X(80)

AN 1/30

 \mathbf{M}

Must Use OTI02 128 **Reference Identification Oualifier** ID 2/3Code qualifying the Reference Identification

Transaction Reference Number TN Must Use OTI03 127 **Reference Identification**

> Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

> > This data element is populated from the following data elements of the original transaction:

248 - BHT03

568 - BGN02

810 – BIG02

820 - TRN02

867 - BPT02

For cases in PA, when sending 824 due to no charges on bill, this field will contain the BPT02 of the original 867 in which no charges were received by the billing party

For case when PSE&G is sending 824 when no charges on are on bill, this field will contain:

MISSED BILLING WINDOW

For case when Atlantic City Electric / Delmarva is sending a proactive 824 at time of billing for New Jersey or Delaware respectively, this field will contain:

PROACTIVE 824 – indicates this 824 is being sent as the result of Atlantic City Electric / Delmarva issuing a bill.

For case when Maryland is sending a proactive 824 at time of billing, this field will contain one of the following:

- PROACTIVE 824 indicates this 824 is being sent as a result of the billing party issuing a bill and the customer is not on payment plan
- PRO824 PAYMENT PLAN indicates this 824 is being sent as a result of the billing party issuing a bill and the customer is on a payment plan Amount fields will relate to payment plan balances.

Transaction Set Identifier Code Must Use OTI10 143

Code uniquely identifying a Transaction Set

867

The EDI Transaction Set number of the transaction being responded to.

248	Account Assignment/Inquiry and Service/Status
568	Contract Payment Management Report
810	Invoice
	This value is sent when billing party notifies non-billing party a customer bill did not include non-billing party charges (TED03 = NCC).
820	Payment Order/Remittance Advice

Product Transfer and Resale Report

DE Use for	Not Used
Delmarva:	
MD Use:	Non-billing party charges that appear on bill for first time. This may include charges for the current bill period and / or charges for previous bill periods that are displayed on bill for the first time.
	Used only with Proactive 824 when bill is issued.
Example:	AMT*PB*125.75

Must Use	Des. AMT01	Element 522	Name Amount Qualifier (Attr M	ibutes ID 1/3
			PB	Non-billing party charges		
				Used on a proactive 824 to indicate new party charges	non-	billing
Must Use	AMT02	782	Monetary Amount		M	R 1/18
			Monetary amount			

 $Segment: \qquad AMT \ \ Monetary \ Amount \ (J8=Outstanding \ Customer \ Billing \ Party \ Balance)$

Position: 050
Loop: OTI
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To indicate the total monetary amount

Syntax Notes: Semantic Notes: Comments:

PA Use:	Not Used
NJ Use:	Not Used
DE Use for Delmarva:	Not Used
MD Use:	Total billing party charges due. This will either be the total charges due to the billing party for this bill; or if the customer has a payment plan, the payment plan amount due to the billing party. This will not include the balance of the non-billing party to whom this transaction is being sent. Used only with Proactive 824 when bill is issued and only for residential accounts. For BG&E, this will include all other balances shown on bill; i.e., utility gas and electric, as well as any other non-billing party balances.
Example:	AMT*J8*220.66

Must Use	Ref. <u>Des.</u> AMT01	Data <u>Element</u> 522	Name Amount Qualifier (Code to qualify amo	
			J8	Balance Due Used on a proactive 824 to indicate the billing party balance due that was included on the consolidated bill to the customer.
Must Use	AMT02	782	Monetary Amount Monetary amount	M R 1/18

Segment: AMT Monetary Amount (T4=Billing Party Charges)

Position: 050
Loop: OTI
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To indicate the total monetary amount

Syntax Notes: Semantic Notes:

Comments:

PA Use:	Not Used
NJ Use:	Not Used
DE Use for Delmarva:	Not Used
MD Use:	Current billing party charges for pro-active billing 824. This will have the same amount whether the customer has a payment plan or not. This will not include the current charges of the non-billing party to whom this transaction is being sent. Used only with Proactive 824 when bill is issued and only for residential accounts. For BG&E, this will include all other current charges shown on bill; i.e., utility gas and electric,
	as well as any other non-billing party charges.
Example:	AMT*T4*110.44

Must Use	Des. AMT01	Element 522	Name Amount Qualifier	Code	Attributes M ID 1/3
			Code to qualify amo	ount	
			T4	Billing party charges	
				Used on a proactive 824 to indicate new	billing party
				charges.

			Monetary amount		

Segment: AMT Monetary Amount (QZ= Payment Amount)

Position: 050
Loop: OTI
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To indicate the total monetary amount

Syntax Notes: Semantic Notes:

Comments:

PA Use:	Not Used
NJ Use:	Not Used
DE Use for Delmarva:	Not Used
MD Use:	Payment amount applied to customer's bill. This represents total payment applied to the billing party's accounts, regardless of which account amount is applied to. This will have the same amount whether the customer has a payment plan or not. Used only with Proactive 824 when bill is issued and only for residential accounts. For BG&E, this will include all payments applied for the entire bill.
Example:	AMT*QZ*60.52

Must Use	Ref. <u>Des.</u> AMT01	Data Element 522	Name Amount Qualifier (Attributes M ID 1/3
			QZ	Payment Amount	
				Used on a proactive 824 to indicate pay all billing party accounts represented on	* *
Must Use	AMT02	782	Monetary Amount		M R 1/18
			Monetary amount		

Position: 070
Loop: TED
Level: Detail
Usage: Optional
Max Use: 1

Purpose: To identify the error and, if feasible, the erroneous segment, or data element, or both

Syntax Notes: Semantic Notes:

Comments: 1 If used, TED02 will contain a generic description of the data in error (e.g., part

number, date, reference number, etc.).

	number, date, reference number, etc.).
Notes:	The TED/NTE may loop as many times as necessary to provide all rejection reasons.
PA Use:	Required
NJ Use:	Required
DE Use for	Required
Delmarva:	
MD Use:	Required if transaction sent was rejected
	Not used when "confirming" Bill Ready 810.
Example:	TED*848*A76

Data Element Summary

	Ref.	Data			
	Des.	Element	<u>Name</u>		<u>Attributes</u>
Must Use	TED01	647	Application I	Error Condition Code	M ID 1/3
			Code indicating a	pplication error condition	
			848	Incorrect Data	

Rules for Rejection Reason Codes

The codes on the next several pages have been identified to convey rejection reasons. Only the codes listed for each service are valid for that service.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, the utility must inform the EDI Work Group who will determine whether a new code is needed.

Rejection Reason Codes in Response to a 248, 568 & 820

				L
Must Use	TED02	3	Free Form Messag Free-form text	O AN 1/60
			A13	Other
				See note above regarding the use of the A13 code
			A76	Account Not Found
			API	Required Information Missing
			SUM	Sum of Details does not equal total (does not apply to
				248)
			DIS	820 Pending Until Dispute Resolution
				Used in PA (PECO & FirstEnergy only) to indicate
				LDC is withholding an EDI 820 from an ESP as a result
				of the customer opening a dispute in which customer
				either questions ESP charges <u>OR</u> claims that they have
				been slammed.
			DIV	Invalid or missing date

Must Use T	ED02 3	Free Form Me	Codes in Response to an 810 o AN 1/60
		Free-form text A13	Other
		AIS	See note above regarding the use of the A13 code
		A76	Account Not Found
		A84	Invalid Relationship
		A04	Supplier is not the supplier of record
		ABN	Duplicate Request Received
		ADN	Duplicate 810 received
		ADM	Amount Does Not Match
		ADM	The amount within the 810 Cancellation/Reversal does
			not match the original 810.
		AFB	Account Final Billed with Supplier
		Al'D	Used in the event Supplier sends 810 transaction(s) after
			account has final billed with the Supplier and
			transaction is outside the bill window. Supplier will
			need to invoice customer directly
		API	Required Information Missing
		BRC	Number of SAC segments exceeds allowable maximum
		DIC	Used in PA by PECO only.
		CRI	Cross Reference Number Invalid
		Cita	The cross reference number provided on the 810 does
			not match the cross reference number on an open 867.
		DDM	Dates Do Not Match
		DDIVI	810 Service Period Begin and End Dates do not match
			the same dates on an open 867
		DIV	Invalid or missing date
		21,	Includes date ranges for billing periods no longer
			supported by CIS system
		EXP	810 Received for billing period older than that
			supported by the Billing System
		FRF	Bill Type Mismatch
			Supplier and utility system do not have same bill type.
			For instance, an 810 was received by the LDC for a
			customer that is listed as a DUAL bill option in the
			receiver's system. BGN08 must be EV for this rejection
			reason.
		FRG	Bill Calculator Mismatch
224 Application	Advice (4010)		30 IG824v6 A doc

	An 810 was received for a customer with a bill
	calculator (REF*PC) different than what is listed in the
	recipient's system. BGN08 must be EV for this
	rejection reason.
IVL	SAC (charges and/or adjustments) sent in incorrect IT1
	Loop
IVT	PID segment(s) sent in incorrect IT1 Loop
NCC	No current charges
	Used in PA and NJ (PSE&G) only when bill issued with
	no current charges
NCP	No Cancellation Processed
	810 re-bill received before or not with 810 cancellation
OBW	Outside Bill Window
	The 810 was received outside of the billing window.
PCR	810 Rejected – Pending Cancel/Rebill
RBT	Over 50 PID segments (text) lines received and A
	PID05 element contained over 60 characters
RNA	Rolling text page Not Authorized
R50	Over 50 PID segments (text) lines recieved
R60	A PID05 element contained over 60 characters
SUM	Sum of Details does not equal total
TCN	Total Charges Negative (for billing parties that do not
	allow negative charges)
TXI	Invalid TXI information
W06	Duplicate Rates Found (PECO Only)
008	Account exists but is not active

Rejection Reason Codes in Response to an 867

	Ke	gecuo	on Keason Co	des in Response to an 867
Must Use	TED02	3	Free Form Messa	ge O AN 1/60
			Free-form text	
			A13	Other
				See note above regarding the use of the A13 code
			A76	Account Not Found
			ABO	Corrected transaction received prior to cancellation or
				rejection transaction.
				A corrected 867 was received without first receiving a
				Cancellation 867 or having sent an 824 rejecting the
				original 867.
			API	Required Information Missing
			DIV	Invalid or missing date
			FRF	Bill Type Mismatch
				Supplier and utility system do not have same bill type.
				For instance, an 867 was received for a customer with a
				bill type (REF*BLT) different than what is listed in the
				ESP system. BGN08 must be EV for this rejection
				reason.
			FRG	Bill Calculator Mismatch
				An 867 was received for a customer with a bill
				calculator (REF*PC) different than what is listed in the
				ESP system. BGN08 must be EV for this rejection
				reason.
			IIS	Invalid Interval Status
				Interval Detail usage data is sent when Interval
				Summary Usage Data was requested or vice versa.
			SUM	Sum of Details does not equal total

 $\textbf{Segment:} \quad \textbf{NTE} \ \textbf{Note/Special Instruction} \ (\textbf{Error Reason})$

Position: 080
Loop: TED
Level: Detail
Usage: Optional
Max Use: 100

Purpose: To transmit information in a free-form format, if necessary, for comment or special

instruction

Syntax Notes: Semantic Notes:

Comments: 1 The NTE segment permits free-form information/data which, under ANSI X12

standard implementations, is not machine processable. The use of the NTE segment

should therefore be avoided, if at all possible, in an automated environment.

PA Use:	Required
NJ Use:	Required
DE Use for Delmarva:	Required
MD Use:	Required if transaction sent was rejected and TED02 value is A13 or API; otherwise, NTE segment is optional. Not used when "confirming" Bill Ready 810.
Example:	NTE*ADD*ACCOUNT NOT FOUND

Must Use	Ref. <u>Des.</u> NTE01	Data Element 363	Name Note Reference Code Code identifying the functional area or purpose for which the note applies ADD Additional Information	Attı O	ributes ID 3/3
Must Use	NTE02	352	Description A free-form description to clarify the related data elements and their content Rejection Reason Text	M	AN 1/80

Segment: \mathbf{SE} Transaction Set Trailer

Position: 090

Loop:

Level: Summary Usage: Mandatory

Max Use:

Purpose: To indicate the end of the transaction set and provide the count of the transmitted

segments (including the beginning (ST) and ending (SE) segments)

Syntax Notes:

Semantic Notes:

Comments: 1 SE is the last segment of each transaction set.

comments.	1 BE is the last segment of each transaction set.	
PA Use:	Required	
NJ Use:	Required	
DE Use for	Required	
Delmarva:		
MD Use:	Required	
Example:	SE*28*00000001	

Data Element Summary

	Ref.	Data			
	Des.	Element	<u>Name</u>	X12	<u>Attributes</u>
Must Use	SE01	96	Number of Included Segments	M	N0 1/10
			Total number of segments included in a transaction set including ST and S	SE segn	nents
Must Use	SE02	329	Transaction Set Control Number	M	AN 4/9

Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set

Examples for 824

Example: 824 Rejection of an 867 Transaction for bad account number

For instance, ESP sending 824 on 867 from LDC when LDC is metering agent.

BGN*11*REJ867-199907110719-001*19990711*****82	Beginning Segment - Contains transaction reference number and system date. Indicates Follow-Up – receiver of transaction must correct error and resend the transaction.
