Docket No. QO16020130

Pursuant to the Open Public Meetings Act, N.J.S.A. 10:4-6 et seq., the New Jersey Board of Public Utilities ("Board") has scheduled public hearings wherein interested parties may present comments for the record on the state of the New Jersey solar market.<sup>2</sup>

The production of clean solar energy continues to be an issue of importance in New Jersey. Given the significant technological changes in the industry over the years, the economics and the financial models of solar energy have also changed significantly. At this time, the Board considers it prudent to solicit input on the development of the New Jersey solar market.

By Order dated September 22, 2017, the Board directed Staff to convene all interested parties to participate in a generic proceeding to review all aspects of New Jersey's solar market. As part of the generic proceeding, the Board will hold three separate public hearings as detailed
