

New Jersey Cannabis Regulatory Commission

Public In-Writing Comments

Public Meeting: July 15, 2025

Full Name	Comment
Lorraine Scroggins	I am happy cannabis's is legal a lot is for medical use such as myself and if possible more restrictions for obtaining for personal use also have a question concerning handicap rules and who actually approves and not approve here in linden nj I get lied here or not the truth thank you
Malcolm Hunter	This program helps with a lot of things.
John Lupia	The State needs to take more vigorous action on labels placed on cannabis for medical patient use. Strains that have been reported to have medical treatment applications for specific ailments and conditions should note which one(s) and dosage recommended, expected time effect and endurance. Migraines are a common medical treatment, for example, and labels that say "Migraine Treatment" with recommended dosages would be spot on for the public good, health, and safety.
Robbin Wright	Is it too late to start classes? If not, can I please get info on how to start classes, especially the first ones
Ronald Jost	I am a Medical Marijuana user for 4+years and as a wheelchair user must travel quite a distance to a Dispensary that offers both Medical & Recreational Marijuana. Several local dispensaries only offer Recreational products. The Tincture I use as Medical is sold at these dispensaries but I have to pay taxes on it because they are not designated medical marijuana suppliers. Can something be done about that as I am being taxed by the State of NJ and the local Municipal tax as well. Thank you
