

New Jersey Cannabis Regulatory Commission
Public In-Writing Comments
Public Meeting: July 16, 2026

Full Name	Meeting Date	Comment
Matthew Klein	7/16/2026	This committee is an utter waste of time and serves no patient in need of cannabis. You speak the sympathy line but you sit on your well greased hands. Nicholas Scutari is sitting on and preventing legislation which would show he cares about helping real medical patients. The ability to grow your own cannabis is so long overdue, it's criminal, as is he.
Maria Lindell	7/16/2026	I am confused about what's going to be the situation after the cbd ban coming this November. I am a senior who depends on full spectrum cbd for day-to-day day management of my wellness. Can someone please address this and how its going to effect me? How is it that the dispensaries here in NJ are allowed to sell the banned products but they have no interest in doing so. What is the latest legislation on my ability to legally purchase cbd full spectrum flower in bulk or in any capacity? What will happen to the cbd farms in NJ?
Binal Amin	7/16/2026	Good Morning Leaders, OmniPay has developed 19 regulatory technology tools specifically for the NJ Cannabis Regulatory Commission — and every one of them is live today. Let me tell you what these tools solve. The application backlog — Application Pipeline Tracker • 691 pending applications, average processing time exceeding 11 months • Automates completeness validation and compliance pre-screening • Projects a 65 percent reduction in wait times — bringing New Jersey closer to the CREAMM Act's 90-day target Lab integrity — Lab Performance Scorecard + COA Verification Engine (Proprietary Tool) • Testing data shows a 307 percent spike in yeast and mold failures • One lab reports 0.2 percent failure on 493 tests — every other lab reports 4 to 7 percent • Lab Performance Scorecard grades every lab A through F and flags statistical anomalies automatically • COA Verification Engine captures instrument-level data and determines pass or fail against CRC limits — the lab enters the numbers, the system decides, and the lab cannot override it Enforcement — Enforcement Tracker + Illicit Market Intelligence

		• Enforcement caseload growing 15 percent month over month • Enforcement Tracker monitors active cases, penalty outcomes, and recidivism rates • New Jersey loses an estimated \$59 million annually in tax revenue to 847 reported unlicensed operators — a 2.6-to-1 ratio against 323 licensed dispensaries The municipal opt-in database — we already built it • Your staff told the Assembly Oversight Committee one was in progress — it exists today • Municipal Intelligence Map covers all 564 municipalities: opt-in status, license types, zoning, and local tax rates • Searchable, filterable, and live today Also live today • Consumer QR Verification — scan any product with a phone camera to see whether it was tested, whether it passed, and whether the COA is authentic; no app required • Dispensary Compliance Autopilot — catches METRC sync failures, COA expirations, and inventory anomalies before the CRC finds them • Price Compression Tracker — flower at \$6.80 per gram, identifying which licensees are under financial stress; price pressure is a leading indicator of compliance shortcuts All 19 tools are offered to the Commission at no cost. We at the OmniPay Solutions want to see how we can save consumer LIVES and not only make the world a better place but to provide them a tool that they can educate them self with and make an informative decision because I know what it feels like to lose a loved ones and how little it takes!!! We are a New Jersey company. We built this for New Jersey. Commissioners, the tools are live at pay.omnipossolution.com. We are ready to work with the Commission whenever you are. Thank you.
