

Sandy Funding Criteria Worksheet

State Department:
Military and Veterans' Affairs
Name of Expenditure or Program:
Hurricane Sandy Restoration Funding
Amount:
\$2,850,000

Overview:
Through the Master Cooperative Agreement (MCA) between the Department and the federal National Guard Bureau, funds will be expended to restore facilities damaged by Hurricane Sandy that are utilized by the Department and the New Jersey Army National Guard.
Federal Department of Origin:
Department of Defense, National Guard Bureau.
Federal Requirements / Restrictions:
Per MCA regulations, this funding is provided under funding category "Act of Nature Damage Repair" and requires a state match of 25%. (see attached copy of Interim Chapter 7 of National Guard Regulation 420-10, section 7-12 c (3)).
Selection Standards:
Projects are selected by the facilities management office and approved by the Adjutant General.
Eligibility Standards:
A list of projects were submitted to the federal National Guard Bureau and approved.
Other Notes:
This worksheet will be revised as funding amounts change.

for the cost of furniture and information technology equipment for facilities being constructed using 100% State funds, provided that that project would have been eligible for Federal reimbursement had the State elected to seek it.

7-12. Sustainment, Restoration, Modernization, and Demolition Costs Authorized Reimbursement

a. Demolition not associated with construction. The State may request reimbursement for the cost of demolishing facilities authorized or once authorized support on the FISP when there is no replacement construction planned. Otherwise, the costs of demolition are covered in the construction project. The rate of reimbursement for such demolition shall be 100%, except that demolition of State-owned readiness centers shall require a 25% State match.

b. Architectural and Engineering (A-E) Services.

(1) Costs of A-E services for FP projects are authorized. Rates should be consistent with NGR 415-5, and the State shall charge the costs to the A-E account associated with the project. Type B services may not exceed the limits established in 10 USC 2306(d).

(2) Master planning, evaluation studies, or similar efforts to determine the scope of projects and the future use of real property and real property facilities are authorized reimbursement. However, they are classified as facilities operations costs.

c. Sustainment, Restoration, and Modernization.

(1) The State Military Department may request reimbursement for the cost of doing sustainment, restoration, and modernization of real property and real property facilities authorized such support on the FISP. The State may complete these projects with employees reimbursed under the FP Appendix or they may subcontract with a private firm or another government agency to do the work.

(2) The State Military Department may request reimbursement for the cost of supplies for doing sustainment, restoration, and modernization of real property and real property facilities authorized such support on the FISP.

(3) Acts of Nature Damage Repairs. Acts of Nature (AON) repairs to readiness center and non-readiness center damaged facilities are authorized as follows. The Federal share for AON damages to those readiness centers coded under the FISP as SC1 or SC2 shall be 100 percent. Non-readiness centers coded under the FISP as NO shall receive no Federal support.

Federal Share	State Share	
Readiness center	75%	25%
Non-readiness center	100%	0%

(a) AON damage projects are special types of repair or construction projects resulting from sudden, unexpected, major damage. The TAG must demonstrate that a project meets all of these criteria to receive required approval. Just because damage occurred during a storm or flood damage does not mean the proposed project is an AON project. The storm must have caused the damage.

(b) Reimbursement for AON damage is an exception to the level of support authorized in the FISP for certain facilities, as indicated above.

(c) In the case of AON projects with a required State share, the Federal share shall be the lesser of 75% of the repair project or the amount of the project not covered by insurance. However, insurance proceeds shall not be applied as a required State share to other projects.

(d) Due to the urgency of the requirements, execution shall be accomplished in the most expeditious manner.

Accordingly, AON damage projects may be funded with FP Appendix or MCARNG funds. Approval authority shall be according to that required for normal repair or construction projects funded under the selected fund source. The justification for AON damage projects shall include:

1. Statements that the projects are, in fact, restorations or replacements of facilities that have been damaged by an Act of Nature.

2. Statements that the scope is the minimum to satisfy current and projected missions.

3. Statements that the quality of construction proposed is comparable with that originally damaged or destroyed; allowing, however, for improved materials and equipment to conform with current design practice and to minimize the possibility of future damage. It is essential that all AON damage project submissions include the above statements in the justification.

4. Newspaper clippings relative to the Act of Nature causing the damage or photographs of the damaged areas should accompany the request for repairs or reconstruction.

d. Operations and Maintenance Minor Construction.
