

MAP RFQ QUESTIONS and RESPONSES

1. *Will the work be divided across disciplines? Can we bid on just the geotechnical portion of the work?*

The Project is intended to be awarded to a single prime Contractor, who may either perform the entire scope of work in-house, or sub-contract out portions of the work.

2. *Will the elevation projects include the filling in of finished basements, and if so, will additions be built to replace the lost living area?*

All below-grade basements will be filled to grade, and habitable space below the required Design Flood Elevation will be addressed on a case-by-case basis as part of the design services scope of work. All design solutions must confirm to the MAP Program's and FEMA's eligibility requirements.
