1
                MR. BENNETT: I will do a quick roll
 2
   call. Miss Suarez?
 3
                MS. SUAREZ: Present.
 4
                MR. BENNETT:
                             Mr. Mapp?
 5
                MR. MAPP:
                           Present.
 6
                MR. BENNETT: Mr. DiRocco?
                                             Mr.
          Mr. Avery?
7
   Close?
8
                MR. AVERY:
                           Here.
 9
                MR. BENNETT: Miss Rodriguez?
10
                MS. RODRIGUEZ:
                                Here.
11
                MR. BENNETT: Mr. Blee?
12
                MR. BLEE:
                          Here.
13
                MR. BENNETT: And Mr. DiRocco, did I
14
  see you enter?
15
                MR. DIROCCO: Yes, I'm here.
                                               Thank
16 you.
17
                MR. BENNETT: Mr. Light is absent.
18
  This meeting was previously opened. We are just
19 waiting on Mr. Close, but we do have a quorum at
20
  this time.
21
                MS. SUAREZ: We'll give Mr. Close a
22
  minute.
            If not, we'll proceed. We'll get
  started and Mr. Close can catch up.
                                         I think
  we're going to start with applications.
25
                I believe Woodbridge Township Fire
```

```
District Number 4 is the first to appear before
       Before we actually begin, if everybody who
  is not going to be talking can just put
  themselves on mute so we don't have any feedback.
 4
 5
                And then I believe we have Bart and
 6
  Bart, CPA signed the application.
                                      Mr. Bart, if
  you would just make sure that everybody who you
  have here just announces themselves so they can
  come forward. They'll pop up on the screen and
  then they can be sworn in.
10
11
                           William Drake on behalf
                MR. DRAKE:
12
  of Woodbridge Township Fire District 4.
13
                MR. POWELL:
                             Robert Powell, fire
14
  commissioner, Woodbridge Township Fire District
15
  4.
16
                (At which time those wishing to
17
  testify were sworn in.)
18
                           Thank you very much.
                MR. BART:
19 Yes, commissioners, on behalf of Woodbridge Fire
20 District 4 in the Keasbey section of Woodbridge,
  the district is applying for a lease purchase of
22
  a piece of fire apparatus. We are looking to do
23
  an $835,000 10 year lease purchase.
24
                The cost for the apparatus is not to
25
  exceed 1.3 million. The district is putting a
```

```
down payment of 525,000 out of its unrestricted
  reserve funds towards this lease.
                                      Just quickly,
  the apparatus is, that the district will be
  acquiring, is replacing a 1972 open cab 75 foot
 5
  tower ladder which isn't in compliance with NFPA
  requirements any longer.
 6
 7
                The primary reason that the district
  is choosing Pierce Manufacturing as the
8
  manufacturer is that they are the only
10 manufacturer that can build the apparatus not to
  exceed 41 feet five inches in total length that's
12
  going to fit into the fire house's truck bank.
13
                The board did an election for voter
14
  approval to do this project. They received 32
15
  yes votes and only one no vote out of the
16
  approximately 1800 registered voters in that fire
17
  district. While the district covers two square
  miles in its own district, it also assists
18
  Woodbridge Township on its mutual aid calls and
19
  the first due ladder and all structure fires in
20
21
  the City of Perth Amboy.
22
                The territory in Keasbey section is
  comprised of large industrial buildings, a
23
  recycling transfer station, two hotels, three
  four story apartment complexes, office buildings
```

```
as well as commercial properties. We're looking
1
2
  to do a 10 year lease purchase in the amount of
  $835,000.
 3
 4
                Again, the down payment for reserve
5
  funds will come from the district. The district
  sought out and got five quotes for interest rates
  for this lease. The lowest of which being
8 1.875 percent from TD Bank. So working with
  those numbers, the district has calculated that
10 the overall impact to the voters of the district
11 would be approximately 12 cents per 100, home
12 valued at $150,000 in the Keasbey in this
13 district would wind up paying an additional $180
14 per year for this lease. That's our application.
15 We would be welcome for questions.
16
                MS. SUAREZ:
                             Thank you, Mr. Bart.
17
  Just so I understand here, it's $180 per year
18
  leven with a substantial down payment you quys are
19
  going to be putting down?
20
                MR. BART: Correct.
21
                MS. SUAREZ: And I saw that the down
22
  payment is pretty substantial. I think about
23
  $530,000?
24
                           Right.
                MR. BART:
25
                MS. SUAREZ: How much of the fire
```

```
district's budget, or reserves I should says, is
2
  done each year?
 3
               MR. BART:
                           As of December 31st 2019,
  the district had over 1.2 million dollars in cash
5
  on hand.
            I believe, I'll have to get you an
  exact figure for what the reserve portion of that
  is, but the fire district is well able to handle
  it, so I'll get you a number for what we have
  broken out between reserves and operating funds
10
  as soon as I can.
11
               However, the district is in very
12
  healthy financial shape. As I say, at the end of
  the 2019, they had over 1.2 million dollars in
13
14
  funds which they contribute to this project.
15
               MS. SUAREZ: And thank you for that.
  My last question is, I did hear you reference it
17
  and I did read in the application, about 33 total
18
  voters actually participated out of 1800
19
  registered voters. Is that pretty reflective of
20
  the actual voter participation and typical fire
21
  district elections or what you see with the fire
  questions?
22
23
               MR. BART:
                           Yeah, that's basically
24
  the typical response. And you know, the district
  follows all of the regulations and the guidelines
```

```
for in person voting ballots and the like.
  yeah, that's basically the typical turn out we
  would be looking for. We would be looking for
  100 percent participation. Unfortunately, but
  that's basically what they receive on average.
 6
               MS. SUAREZ: Yeah, we see that
7
  across the state. And then my last question is
  when was this question actually posed to the
  voters?
10
               MR. BART:
                           Bob, you can jump in on
11
  that?
12
               MR. POWELL:
                             I can answer that.
                                                 The
13
  election was at the annual election on February
14
  2020. And I don't know if Michael quoted that
15
  the Board of Elections in Middlesex County sent
16
  out 250 mail in ballots also and we only received
17
  18 back out of 250, so it's just very difficult
18
  to get people to come out to vote for fire
19
  district elections throughout the state.
20
               MS. SUAREZ: Yeah, I know.
                                            Ι
  remember when we were working on the legislation
22
  to try to increase voter participation if we
23
  moved the fire district elections, so I know it's
  always been an issue across the state.
  for indulging those questions. That's it for me.
```

```
Do any of the board members have questions?
  Hearing none, any members of the public? Do we
  have a motion?
 4
                MR. AVERY: So moved.
 5
                MS. RODRIGUEZ: Second.
                MR. BENNETT: Miss Suarez?
 6
 7
                MS. SUAREZ: Yes.
 8
                MR. BENNETT: Mr. Mapp is absent.
  Mr. DiRocco?
10
                MR. DIROCCO: Yes.
11
                MR. BENNETT: Mr. Close?
12
                MR. CLOSE: Yes.
13
                MR. BENNETT: Mr. Avery?
14
                MR. AVERY: Yes.
15
                MR. BENNETT: Miss Rodriquez?
16
                MS. RODRIGUEZ:
                                Yes.
17
                MR. BENNETT: Mr. Blee?
18
                MR. BLEE:
                          Yes.
19
                MR. BENNETT: Mr. Light is absent.
20
                MR. BART: Thank you, commissioners.
21
                MS. SUAREZ: Thank you. I think
22
  next on our agenda is Frenchtown Borough.
23
  Cantalupo, are you going to be presenting?
24
                MR. CANTALUPO: Yes, Director.
25
  are you.
```

```
MS. SUAREZ: Well. How are you?
1
 2
               MR. CANTALUPO: Okay. Can you hear
 3
  me okay?
 4
               MS. SUAREZ: I can hear you just
5
  fine. Anybody else we're going to need to swear
  in?
 6
               MR. CANTALUPO:
                                I know Mayor Brad
8 Myhre is having a little bit of trouble getting
  on.
10
               MR. MYHRE: John, I'm on.
11
               MR. CANTALUPO: Okay. Great.
12 Andrew Bernath is on. And I believe also that
13
  our auditor Warren Korecky. Warren, are you on?
14
               MR. KORECKY: Yes, I'm on.
15
               MR. CANTALUPO: Those are the three
  we would need to swear in, Director.
17
                (At which time those wishing to
18
  testify were sworn in.)
19
               MR. CANTALUPO: Director, you want
20 me to proceed?
21
               MS. SUAREZ: Please.
                                      Thanks, Mr.
22
  Cantalupo.
23
               MR. CANTALUPO: So the Borough of
24 Frenchtown is seeking approval to issue general
25 obligation bonds through the United States
```

```
Department of Agriculture. The bonds are in the
  amount of $1,590,000 that are going to be issued
  to finance a portion of a sanitary sewer
  extension in the Hilltop area of the township.
 4
 5
                The borough is receiving
  approximately $1.4 million grant from the USDA on
 6
  top of the low interest loan that they're
  receiving at 1.5 percent. The bonds will be
  issued for over a 40 year period. And again, the
  interest rate will be at 1.5 percent.
10
11
               We're seeking approval for a
12 Non-Conforming Maturity Schedule because the
  overall debt service is level. The annual
13
14 increase to the average user of the system of
15 which there are 830 sewer users will be $64 a
16 year or six percent.
17
               With that, we respectfully request
18
  the approval of the Local Finance Board of the
19
  Non-Conforming Maturity Schedule to be issued
20
  through the USDA. If you have any questions,
  Director, we're happy to answer any.
21
22
                             Thanks, John.
               MS. SUAREZ:
                                            I just
23
  wanted to delve into a little bit deeper.
24 looked at the application. I saw some, almost
  conflicting numbers. I wanted to drill down
25
```

```
maybe a little further on the actual figures for
  the debt here.
 3
                So if you wouldn't mind indulging me
  on that. What kind of funds are servicing the
4
  debt here and we can break that down. I also
 6 saw, I know this is self-liquidating. So it
  shouldn't actually go to the municipality's net
  debt, but I want to walk through that because it
  looks like we're approaching the net debt
  percentage limit. I wasn't sure if that was a
10
11
  typo or if that's accurate. If we could just
12
  touch on them.
13
               MR. CANTALUPO:
                                What we did,
14 Director, in the application because sometimes
15 the borough's debt and the sewer utility can go
16 in and out of being self-liquidating. I can
17
  certainly have Warren Korecky talk about that in
18
  a minute.
19
                We wanted to show that overall it
  would still be within the debt limit even if the
20
21 sewer utility (inaudible). So Warren, if you
22 want to elaborate on the sewer utility going in
23 and out?
24
               MR. KORECKY: When I gave the
  numbers to the individual that put the
```

```
application together, they were self-liquidating
  at year end December 31st 2020. However, I
  wanted to show the exorbitant debt they would
  still be under the three and-a-half percent.
 5
                If that was a point of confusion,
  that was strictly my fault because I could have
 6
  said the debt limit was the same.
                                      Sometimes just
  because the way the collections come in over to
  several years.
10
                Sometimes they're self-liquidating,
11 and sometimes they're way above the
12
  self-liquidating numbers. So I was trying to
13
  show a point if they absorb this whole debt by
14 itself, it would still be within the three
15 and-a-half percent.
16
               MS. SUAREZ:
                             That's fair, and I
17
  appreciate that. I actually prefer knowing both
18
             Just so I'm clear, what is
  scenarios.
19
  Frenchtown's current net debt?
20
               MR. CANTALUPO: Just one second.
  Warren, do you have that number?
22
               MR. KORECKY: No, I don't have that
23 in front of me, no.
24
                MR. CANTALUPO: I think we have it,
25
  Director. I apologize.
```

```
That's okay. I think
1
                MS. SUAREZ:
2
  it said that I guess with this application,
  wasn't self-liquidating that the net debt would
  increase to about 2.228 percent. Is that
 5
  correct?
 6
                MR. CANTALUPO:
                                I believe so, yes.
7
  I'm flipping to the page, yeah.
 8
                MS. SUAREZ: I appreciate that.
 9
                MR. CANTALUPO: No problem.
  believe it's 2.28 percent.
                MS. SUAREZ: That would be with this
11
12
  debt though, right?
                        If it wasn't
13
  self-liquidating, that's not the borough's actual
14
  current net debt?
15
                MR. KORECKY: That's correct, yes.
16
                MS. SUAREZ: So it would be fair to
17
  say that it's probably under three percent
18
  currently, or we think it's currently below
19
  three percent?
20
                MR. CANTALUPO: It's below three
21
           It's at 2.125 right now.
  percent.
22
                MS. SUAREZ: Great.
                                     Thank you.
                                                  Му
23 last question is the impact on the average
  assessed home, or you said it's going to be go
25
  through it's self-liquidating. Are we
```

```
anticipating an increase in sewer rates?
1
2
               MR. CANTALUPO: In my initial
  presentation, I said it would be about $64 for
  the average user of the system.
                                    There are 830
  users of the system and they pay a little over a
  thousand dollars a year, so this would be about a
7
  six percent increase.
8
               MS. SUAREZ: Okay.
                                    Thanks for
  highlighting that. That's it for my questions.
  Do any board members or members of the public
10
11 have questions? Hearing none, do we have a
12
  motion?
13
               MS. RODRIGUEZ: So moved.
14
               MR. DIROCCO: I'll second it.
15
               MR. BENNETT: Miss Suarez?
16
               MS. SUAREZ: Yes.
17
               MR. BENNETT: Mr. DiRocco?
18
               MR. DIROCCO: Yes.
19
               MR. BENNETT: Mr. Close?
20
               MR. CLOSE: Yes.
21
               MR. BENNETT: Mr. Avery?
22
               MR. AVERY:
                          Yes.
23
               MR. BENNETT: Miss Rodriquez?
24
               MS. RODRIGUEZ:
                                Yes.
25
               MR. BENNETT: Mr. Blee?
```

```
1
                MR. BLEE:
                           Yes.
 2
                MR. BENNETT:
                             Mr. Light is absent.
 3
  Motion passes.
 4
                MS. SUAREZ:
                             Great.
 5
                    CANTALUPO:
                                Thank you, Director.
 6
                MS. SUAREZ:
                             Thanks everyone.
7
  believe Brooklawn Borough is up.
                                     Mr. Winitsky,
  are you going to be presenting.
 9
                MR. WINITSKY: I am.
                                       Thank you.
10
                MS. SUAREZ: Do we have anybody else
11
  that needs to be sworn in?
12
                MR. WINITSKY:
                               Is Ryan Guiles on
13
  this morning or Kirk Applegate?
                                     Those would be
  the only folks who might in fact need to be sworn
15
       I can't see if they're specifically on.
  in.
  Perhaps not, so I can certainly go right ahead,
  if the board is ready.
17
18
                MS. SUAREZ:
                             Absolutely.
                                           Thank you.
19
                MR. WINITSKY:
                               I'm here today on
20
  behalf of the Borough of Brooklawn seeking
  approval pursuant to N.J.S.A. 40A:2-26(b).
22
  going to copycat what John Cantalupo just did.
23
  It's the same application. It's a different
  municipality in this case. It's the Borough of
25
  Brooklawn.
```

```
We likewise are seeking to issue
1
2
  general obligation bonds in the amount of
  $1,141,000 to be purchased by the United States
  Department of Agriculture through their Rural
  Development Program.
                This particular program allows for
 6
7
  very low debt service over a longer period of
  time, in this case, 40 years, which is a little
  bit different than is otherwise required under
10
  the Local Bond Law as you're aware, so we're
11
  seeking approval to specifically utilize that
12 Non-Conforming Schedule.
13
                Debt service payments under this
14 program for the borough would be approximately
15 $40,000 a year with a maximum interest rate of
16 1.75 percent which is very competitive in the
  market place and it allows for the borough to
17
18
  extend those payments over time.
19
                The use of the proceeds of the bonds
20
  are being used to permanently finance bond
21
  anticipation notes that are already outstanding
22
  for the borough. Those notes were issued to pay
23
  for certain renovations and improvements to the
  borough's water utility system.
25
                This particular issue of bonds will
```

have no effect actually on the borough's water They actually anticipated doing this bond issue through the USDA a couple years ago, so they had already raised rates in the borough to account for that. 5 Obviously, they didn't know what the 6 7 interest rate would be, but they hoped it would be relatively low and it turned out to be exactly that. So there will be no impact to sewer rates 10 and no impact to taxes generally. The borough 11 (inaudible) same spot debt perspective because there's already notes outstanding. 12 13 Specifically, we're at 2.23 percent 14 which is well below the statutory requirement of three and-a-half percent. I'm the only one on 15 16 the line, so if you have any questions about the 17 project or the bonds in particular, I am happy to 18 answer them. 19 MS. SUAREZ: Thank you, Mr. 20 Winitsky. I do. What I would like to talk a 21 little bit about is I understand this will be 22 going threw, I guess the water system, right, so 23 it's self-liquidating. If you can indulge me and let me know what Brooklawn's current net debt is and then what their net debt percentage should

```
actually increase should this now be
 2
  self-liquidating?
 3
                MR. WINITSKY: So it is presently
                 To the extent that it remains
4
  2.23 percent.
  self-liquidating, it would stay the same,
  2.23 percent. As I mentioned before, they
 6
  actually adjusted water rates a couple years ago
  to account for that.
                         I believe to the extent
  that this would not qualify as self-liquidating.
  It would depend on what amount.
10
11
                Even if it didn't and all of it
12
  didn't, it would still be underneath their
13
  statutory requirement net debt. So we don't
14
  expect it to, but even if it did, we would remain
15
  under three and-a-half percent, so hopefully that
16
  answers your question.
17
                MS. SUAREZ: Yes.
                                   Thank you.
                                               I did
18
  hear and see in the application that you guys had
19
  already increased the rates to kind of absorb the
20
  cost here?
21
                MR. WINITSKY: Yes.
22
                MS. SUAREZ: So is that $72 a year
23
  increase, is that still ongoing and will that be
  for the remainder of the term?
25
                MR. WINITSKY: Yes. That will
```

```
remain in place. It was instituted and the
  expectation of servicing this particular debt.
  don't think that the borough presently has any
  plans for additional indebtedness. You never
         It's a water system. You never know what
  may or may not happen.
                           But at this point in
  time, the system is working properly, so it
  should stay where it is.
 9
               MS. SUAREZ: Okay. I do not have
  any additional questions. I don't know if any of
10
  the board members or members of the public has
  questions. Hearing none, to we have a motion?
12
13
               MR. BLEE:
                          Motion.
14
               MR. AVERY: Second.
15
               MR. BENNETT: Miss Suarez?
16
               MS. SUAREZ: Yes.
17
               MR. BENNETT: Mr. DiRocco?
18
               MR. DIROCCO: Yes.
19
               MR. BENNETT: Mr. Close?
20
               MR. CLOSE: Yes.
21
               MR. BENNETT: Mr. Avery?
22
               MR. AVERY:
                          Yes.
23
               MR. BENNETT: Miss Rodriquez?
24
               MS. RODRIGUEZ:
                                Yes.
25
               MR. BENNETT: Mr. Blee?
```

```
1
                MR. BLEE: Yes.
 2
                MR. BENNETT: And Mr. Light is
 3
           Motion approved.
  absent.
 4
                MR. WINITSKY: Thank you very much.
 5
                MS. SUAREZ:
                             Thank you. I believe
  Willingboro Township is next.
 6
7
                MR. MCMANIMON:
                                Yes.
 8
                MS. SUAREZ: Mr. McManimon, you'll
 9
  be presenting?
10
                                Yes, along with
                MR. MCMANIMON:
11
  Sherry Tracy and we do have Eusebia Diggs who is
12
  the chief financial officer for Willingboro.
13
                (At which time those wishing to
14
  testify were sworn in.)
15
                MR. MCMANIMON:
                                Thank you.
                                            Again,
  Ed McManimon from McManimon, Scotland and
17
  Baumann, bond counsel to Willingboro.
                                          This is
18
  specifically an application in connection with
  the issuance of 14,241,000 of general obligation
19
20
  bonds.
21
                The purpose is to permanently
22
  finance 12,341,000 notes that come due in
23
  September along with some additional new money.
  This is similar to a couple of other applications
25
  that we and others have had recently which is to
```

proceed with a bond sale now rather than wait a 2 year because of the market. 3 When Phoenix, and through Sherry, was advising them when their note was coming due, 4 the view was, it was better to do a bond issue how, even though from a budget perspective, the goal was to start the debt service a year later rather than now in terms of next year because there's a significant drop off of debt service in their budget, about a million 800,000 dollars. 10 11 So the idea here is to have 12 principal in the first year of the third and have 13 a level principal schedule accelerating the payments much more quickly they would have to do. 14 15 And the benefit of doing that is because there's a neutral impact on the taxpayers because of the 17 drop off that occurs with regard to the debt 18 service rather than having it start in next year, 19 having increase taxes to pay the debt and then 20 decrease the following year for the rest of the 21 term. 22 This is a 14 year term. Their net 23 debt is basically just over two percent, so they're well within the three and-a-half percent 25 that's allowed. So if you would like to have

```
questions, both Sherry and Eusebia can respond to
  those.
 3
                Our request is to allow this to be
  nonconforming only in the sense of the first year
  deferral.
             The rest of the maturities are, not
  only conforming, but they're accelerated beyond
  the 100 percent step up to occur much more
  quickly than would have to happen.
 9
               MS. SUAREZ:
                             Thank you, Mr.
10 McManimon. I think Nick coined the term of
11 non-conforming light, which I kind of like
12
  because it seems to make sense.
                                    If it's going to
13
  save money in the long run and kind of move
14
  things along, I understand it will be technically
15
  non-conforming in first year.
16
               But thereafter, not only is it
17
  conforming but it makes much more financial sense
18
  for the municipality moving forward, so I
19
  appreciate you highlighting that. As far as the
20
  net debt, you said around they're around two
  percent currently. Do you know what this would
21
22
  bring them up to?
23
               MR. MCMANIMON:
                                2.234 percent.
24
                   TRACEY: Most of it is already
  outstanding in a note. They're only adding 1.8
```

```
million of new additional capital. That was for
  2021 capital, so the majority of it is already
 3
  outstanding in a note.
 4
                MS. SUAREZ: Perfect.
                                       Mr.
5
  McManimon, I know you did talk about the 1.8 fall
       I understand that waiting until calendar
  year 2020 will actually allow the debt to kind of
  wrap around existing debt service because the 1.8
  is going to fall off in '22.
10
                Does that mean there's not going to
11
  be an impact on the homeowners or are we still
12
  anticipating there will be an increase in thee
13
  average assessed home?
14
                MS. TRACEY:
                            We expect it to be a
15
  neutral impact. In fact, it should be pretty
  flat and potentially maybe even a dollar to drop,
17
  but potentially flat, no impact with this.
18
  just as Ed said, again, the plan was really
19
  initially to do bonds next year, but given the
20
  current rates, and the notes have only been
21
  outstanding for two years, so even if we were to
22
  renew them one more year, the township would not
23 be required to make a paydown.
24
                So this is actually a win win for
25
  the taxpayers as well because we're getting the
```

```
project permanently financed a year earlier than
  we would have and at lower rates likely than what
 3
  we would see next year.
 4
                MR. MCMANIMON: Embedded in their
5
  debt service is a million eight that will drop
       We're only adding a million five here, so
  off.
  it's actually less debt than would have to be
  absorbed in their budget than would otherwise be.
 9
                MS. SUAREZ: I think that's
10
  partially why I'm comfortable with this even
11 though it's technically non-conforming because of
12
  the financial prudence, so thank you for
13
  highlighting that as well, Miss Tracey.
                                            I don't
14
  have any additional questions. I don't know if
15
  any board members or members of the public have
              Hearing none, do we have a motion?
16
  questions.
17
                MR. DIROCCO: I'll make a motion,
18
  Director.
19
                MR. CLOSE:
                            Second.
20
                MR. BENNETT: Miss Suarez?
21
                MS. SUAREZ:
                             Yes.
22
                MR. BENNETT:
                             Mr. DiRocco?
23
                MR. DIROCCO:
                             Yes.
24
                            Mr. Close?
                MR. BENNETT:
25
                MR. CLOSE: Yes.
```

```
1
                MR. BENNETT: Mr. Avery?
 2
                MR. AVERY: Yes.
 3
                MR.
                    BENNETT: Miss Rodriguez?
 4
                MS. RODRIGUEZ:
                                Yes.
 5
                MR. BENNETT: Mr. Blee?
                MR. BLEE:
                          Yes.
 6
 7
                MR. BENNETT: And Mr. Light is
8
  absent. Motion approved.
 9
                MR. MCMANIMON:
                                Thank you very much.
10
                MS. SUAREZ:
                             Thanks everyone.
11
  on the agenda I think we have South Brunswick.
12 Miss Tracey, are you sticking around for that
13 one?
14
                MS. TRACEY:
                            Yes.
                                   I'll be
15 presenting this one. To invite a few others,
16 Jackie Shanes, bond counsel for the township, Joe
  Monzo who is a colleague of mine at Phoenix
17
18
  Advisors, former CFO prior of retirement of South
19 Brunswick Township.
20
                We also have the current CFO of the
  township, John Bolcato on the line and I believe
22
  also Anthony Campisano who is the attorney for
23
  the township. I'm not sure if Scott Clelland,
  the auditor, was joining us or not.
25
                (At which time those wishing to
```

```
testify were sworn in.)
1
 2
                             Miss Tracey, before you
                MS. SUAREZ:
  jump into this, I wanted to frame this up a
  little bit for some of the board members that you
  guys did come to speak with us in advance of the
  board meetings that we can discuss the
  application and the justifications for why you
  guys were coming before us to seek refunding.
 9
                And I kind of wanted to highlight
10
  again that you guys explain the rationale for
11
  doing this a little bit. I know you had
12
  originally asked for five years.
                                     We had some
  discussions on that. Curious where that landed,
13
14
  and I wanted to point out that South Brunswick
15
  did disagree with the court's ruling and were
16
  actively, I think, pursuing appealing that and
17
  believed they have a strong case to kind of
18
  reverse the court's previous decision.
19
  wanted to frame that a little bit for everybody
  and make sure that's all readdressed before the
20
21
  full board and public.
22
                MR. CAMPISANO:
                                Thank you, Miss
23
  Suarez.
           This is Anthony Campisano. I'm the
  assistant township attorney. And just to give
  the board members further background on this.
                                                   As
```

```
Miss Suarez Chairwoman just correctly indicated,
  this need to fund and bond arises out of our
 3
  litigation over affordable housing.
 4
                In 2016 is when we really began this
5
            At that time, the New Jersey Supreme
  Court entrusted various trial courts to determine
  the affordable housing obligations of
8 municipalities. We had a trial in 2016 which
  determined the number of units and their
10
  locations within the township.
11
                And the township disagreed with the
12
  court's findings at that time. That litigation
13
  then spawned what's called builder remedy
14 lawsuits. And builder remedy lawsuits are where
15
  individual developers come to the court with
16
  their plans to develop housing and to, within
  various locations of the township, to provide not
17
18
  only affordable units but prime market rate
  residential units as well.
19
20
                There are, approximately, 10 of
  those lawsuits, approximately half of which, to
22
  this point in time, we've been able to resolve,
23
  but a number of them also went against the
24
  township. We have filed appeals of all of the
  decisions to this point in time regarding the
```

```
number of overall units that we need to provide
  as well as their locations within the township.
 3
                As part of that litigation though
  too, there were challenges to the township's use
 4
 5
  of the affordable housing trust funds.
  municipality is permitted to use some of those
  funds for various expenses in pending litigation
  or its other affordable housing needs.
 9
                The court appointed an independent
10
  auditor who determined that approximately
11 | 1.3 million of the township's use of those founds
12
  was above a 20 percent cap maximum rate.
13
  disagreed with that finding as well.
14
  auditor had indicated that no more than 400,000
15
  would have to be reimbursed for the fund.
16
                Nevertheless, the court agreed with
  its own auditor and has ordered the township to
17
18
  refund 1.3 million.
                       A second application was
19
  made on part of the affordable housing advocacy
20
  group for attorney's fees which resulted in an
21
  entry where an award to that group of $600,000 in
22
  attorneys fees. We vigorously opposed that
23
  application.
24
                We felt it was improper and we felt
  that it was excessive for various reasons, but
```

```
nonetheless, the court entered judgement against
  the township for that amount as well.
                                          All of
  these judgments, as indicated by the chairwoman
  have now become final as of I believe July 6th.
 4
 5
                And the township will be filing its
  appeal to the town that's against us to this
 6
  point in time.
                   I would just indicate in closing
  that any of the financial questions will be
  addressed by our financial folks in South
10
  Brunswick, but the township has not and never
11 ignored our responsibility to provide affordable
12 housing.
13
                We simply think that the number of
14
  units though that have been ascribed to us is
15
  excessive and we also disagree with the court
  determinations of the various locations within
16
17
  the township where these units should go.
18
  we're hopeful and we're optimistic that our
19
  appeal will be successful for all of these issues
20
  up to this point in time. I'll turn it over to
  the financial folks now.
21
22
                MS. TRACEY:
                             Thank you. And with
23
  Mr. Campisano's introduction and also Director
24
  Suarez's background on that as well.
25
  application that we have before you today is
```

seeking the board's approval for the issuance of 1 refunding bonds in an aggregate principal amount of not to exceed two million 083. 4 The refunding bonds will be issued 5 as mentioned to fund the cost of the emergency appropriation which will satisfy the order by the Supreme Court by the New Jersey Law Division, Middlesex County directing the reimbursement of the \$1,354,642 to the township's affordable 10 housing trust fund along with the legal fees and 11 expenses to the Fair Share Housing Center in the 12 amount of 602,259. 13 The original application had a not 14 to exceed of 2 million 313. That's because of 15 the time we were waiting on the final decision 16 from the courts as to what the amount might be 17 and it could potentially have been up to 18 1,585,000 to be reimbursed. 19 But between the time of the 20 application was submitted and now it had been 21 determined that the final amount was 1,354,642. 22 I should also note that this reimbursement to the 23 Affordable Housing Trust has been ordered to be made by August 27th of this year. As the director mentioned, the township did initially

```
request repayment over a five year period.
1
 2
                However, the township would like to
  amend that request after some discussions
  together with the director and staff and
  internally, we would like to ask for repayment
  over a three year period. The tax impact on the
 6
  average home which is assessed at 192,638 in
  South Brunswick is about $34.43 a year.
 9
                A two year repayment would be $51.40
  per year, and while we understand it has been the
11 board's practice, to determine the number of
12
  years of repayment based on what is $50 or more
13
  in a year, the township is seeking that one
14
  additional year of approval for a three year
15
  repayment as they are already faced with some
16 additional financial challenges stemming from
17
  COVID and this year and then looking into next
18
  years budget.
19
                The township did suffer significant
20 losses during the COVID-19 pandemic. They're
21
  eligible to, and will be using and have used I
22
  should say, as the budget is already introduced,
23
  the full 2.8 million that they're receiving from
  the American Plan Rescue Plan monies in the '21
25
  budget.
```

```
And in addition, the township did
1
2
  take advantage of the Chapter 72 emergency
  appropriation legislation which for both the
  current fund and the general fund. And beginning
  in 2022, they're going to be making repayments of
  about $280,000 a year which adds another $14 on
7
  the average home.
 8
                So together, with this judgment,
  with that repayment, with the three years on the
10
  judgment, we would be roughly about $50 on the
11
  average home. So given these financial
12
  challenges. And the township again is seeking
13
  that repayment over a three year period and
14
  happy, at this time, certainly to take any
15
  questions that you may have.
16
                MS. SUAREZ:
                             So as far as addressing
17
  that payment, I think is due mid August; is that
18
  correct?
19
                MS. TRACEY:
                             Yes, August 22nd, yes.
20
                MS. SUAREZ:
                             And I'm assuming then
  you guys would actually incur interest if this is
22
  not paid off in one lump sum?
23
                UNKNOWN SPEAKER:
                                  That would be
24
  correct pursuant to the court rules. And I
25
  should note also that the attorney fee payment
```

```
has already been made, been required to have been
  made by the township.
 3
                MS. TRACEY:
                             Exactly. That was
 4
  required by July 1st.
 5
                MS. SUAREZ:
                             Okay.
                                    Now, I do
  believe before we kind of jump directly into
 6
  questions, I may have jumped the gun a little,
  that there was somebody else maybe that wanted to
  address the board on this matter.
10
                MR. MCPHERSON:
                                My name is Mark
11 McPherson from Waters, McPherson, McNeill on
12 behalf of South Brunswick Center, LLC which is an
13 interested party and one of the parties to the
14 underlying litigation. And I would just ask that
15 the court note and consider on this date that we
  have made a submission on June 9th, on June 23rd
17
  and on July 12th.
18
                And I'm not sure that all of the
19
  board members have that, but it was by way of an
20
  update of the entry of final order by July 6th
  and the August time for appeal which will cause
22
  the township to incur additional attorney fee
23 liabilities under the Civil Rights Act in
  addition to the 600,000 they've already made part
  of this application, and I don't mean to take up
```

too much time. 1 2 The only thing, place in context is appeal which they have renewed. It's a renewed appeal that had been rejected previously on a number of occasions. Some of the costs they've 6 incurred are the costs in unitemized costs of retaining private investigators to shadow the trial judge and the trial judge's wife, who happens to be the chief judge of the New Jersey 10 Federal District Court. And that's the tenor and 11 quality of their activities that they're asking 12 for the court to sanction. Thank you for your time and attention. 13 14 MS. SUAREZ: Thank you, Mr. 15 McPherson. 16 MR. CAMPISANO: Director, I don't 17 know if you want me to respond to any of those 18 statements or not, if it's necessary. 19 MS. SUAREZ: I leave that up to you 20 actually, if you would hike to respond. 21 MR. CAMPISANO: Yeah, just to 22 respond to Mr. McPherson. I mean, we feel that 23 obviously, the township counsel believes, it is acting in the best interest of its township 25 residents. We don't feel anything that we have

```
done has been improper or obstructionist in the
 2
  least.
 3
                With respect to the trial judge who
  made these decisions against the township,
4
5
  although it might sound somewhat nefarious when
  you couch it in terms of investigation and
7
  shadowing simply because we felt that trial judge
  was improperly biased and prejudiced because of
  his own professional and personal relationships.
10
                And that was one way for the
11
  township to flush out those allegations.
12
  still feel very, very strongly that there was
13
  prejudice and bias by the trial court.
14
  Obviously, people go to court to get a fair shake
15
  and that's a very, very important civil liberty.
16
                But I think the township residents
17
  are raising these arguments on appeal, something
18
  we are entitled to do and we're acting in the
  best interest of what we believe of the
19
20
  township's residents.
                          Thank you.
21
                MS. SUAREZ:
                            Mr. McPherson, I'll
22
  give you an opportunity if there was anything
23
  else you wanted to add there quickly before I ask
  any of the board members if they have questions.
25
                MR. MCPHERSON: No, Your Honor, not
```

```
to repeat it, but the context is the orders of
  the prior and a number of trial courts are
  squarely within Mount Laurel precedent on
  affordable housing and the township continues to
  be an extreme outlier almost every other
  municipality in the state has resolved these
7
  things.
           Thank you.
 8
                MS. SUAREZ:
                             Mr. Close, did you want
  to say something or ask a question?
10
                MR. CLOSE: I was curious, in terms
11
  of the amount being asked for that has now been
12
  amended from 23 to 2,000,083.
                                  It appears that
13
  you have a significant balance left in your
14 litigation expense account, about a hair shy of
15 1.4 million.
16
                Was any consideration given to using
17
  some portion of that to offset and be utilized
18
  for the judgment? I would like to get some
  feedback on that from someone.
19
20
                MR. MONZO: I'm looking.
21
                MR. CLOSE:
                           Joe, we had a report
22
  that showed you had set aside since 2015,
23
  2.6 million dollars and you've only spent, to
24
  date, it appears 1.270.
25
                MR. MONZO: I'm not quite sure what
```

```
document that is. I know at the end of the 2020
  budget year, the township still had monies in
  reserve in the budgeted line item for COAH
              Some of that is being used to make
  expenses.
  that payment that was required to be made in
  July.
 6
7
                It's going to be reimbursed by any
  approved borrowing that the board gives the
  township. That document may be a rolling number
10
  where in terms of budget appropriations, a budget
11
  appropriation only lives for two years and the
12
  balance, whatever is leftover in that year as
13
  appropriation becomes township fund balance.
14
                So even though they may have spent
15 less than they budgeted, the only balance that
  was available was the balance from the 2020
16
17
  budget year which is being used, at least
18
  temporarily, to satisfy the judgment for the
19
  attorneys fees.
20
                MR. CLOSE: Joe, how much was that
21
  amount in the reserve account?
22
                MR. MONZO:
                           John, do you know what
23
  that amount was for last year?
24
                MR. BOLCATO: Let me look this up.
25
  Hold on a second.
```

```
1
                MR. MONZO: While John is looking
2
  that up, just to satisfy some of the other
  directives from the director's office with
  respect to this application, the township has
  filed its FLS for 2020. The 2019 audit was filed
  and the 2021 budget was introduced by the
7
  township counsel at a special meeting last week.
 8
                MS. SUAREZ:
                             Thank you for that.
 9
                MR. BOLCATO: It was $590,396.97.
10
                MS. SUAREZ:
                             I will ask a follow up
11
  question.
             Just trying to figure out.
                                          I know
12
  there are still, I think some appeals
13
  outstanding, or I should say at least discussions
14
  with some other developers that are still
15
  ongoing.
16
                Do we anticipate that those will be
17
  resolved, or is there a potential that South
18
  Brunswick will need to come before the board
  again for something similar, or do we think
19
20
  that's not something that we need to be concerned
21
  about?
22
                MR. CAMPISANO:
                                Director, I can't
23
  predict with any accuracy whether those, I
  believe there's about five or six remaining
  matters will or will not be settled.
                                         There have
```

```
been discussions. I don't anticipate that we
  would have to come back for an application
  similar to this in the future regardless of
  whether those matters are or are not settled.
 5
               Hopefully this is a one time
 6
  application just because we've been litigating
  now for, approximately, five years.
                                        Again, we'd
  like to see everything resolved. We certainly
  would have liked to see everything resolved prior
10
  to getting to this point. But as for the future,
  we're hopeful that this is going to be a one time
12
  and we're static right now.
13
               MS. SUAREZ: I guess, should it not
14 be in like a worst case scenario, is there
  anything that South Brunswick is looking to do, I
16
  quess to ensure that maybe there are certain
17
  reserves or pots of funds that are reserved for
18
  future costs associated with anything they should
19
  pursue?
20
               MR. CAMPISANO:
                                I think the best way
  to probably address that would be that if we were
22
  to lose the appeal on all issue, and the
23
  appellate costs, I think will only be a fraction
  of the costs that have been incurred to this
  point for litigation, appellate costs are usually
```

1 less. 2 If we were to lose on all issues lagain, then the township counsel at that point would have to make a determination as to whether they wanted to seek a further appeal to the Supreme Court. I can't predict that. But if, at that point, we were to have lost then at the appellate level, having incurred only whatever the cost would have been through that time, there 10 would be no additional fees for use, I believe of 11 the Affordable Housing Trust Funds because they 12 would not have been generated from another defense of litigation. 13 So I don't think the future costs 14 going forward would come anything close to what 16 we incurred at this point if that is answering 17 your question. In terms of reserves, I don't 18 I'll defer to the financial people, but I 19 don't think the reserves would have to be nearly 20 to the magnitude of what this expenditure is. 21 MS. SUAREZ: Do any board members or 22 other members of the public have any additional 23 So I do understand where the questions? operation is coming from. I have read the 25 submissions and they were forwarded to all board

```
members as they came in.
2
                Just to kind of couch this, the
  Local Finance Board can only address the question
  that's actually before the board. And what's
  before today which is the refunding the
  obligation that currently exists, so the board
  cannot speculate about financing, future
  obligations from this appeal, nor, can we opine
  on the policy or legal strategy that South
10
  Brunswick should pursue.
11
                That's really for the local
12
  officials and residents to decide.
                                      With that
13
  being said, do we have a motion on the refunding
  bond ordinance?
15
                MR. AVERY: So moved.
16
                MR. BLEE:
                           Second.
17
                MR.
                   BENNETT: Miss Suarez?
                MS. SUAREZ: Yes.
18
19
                MR. BENNETT: Mr. DiRocco?
20
                MR. DIROCCO: Yes.
21
                MR. BENNETT: Mr. Close?
22
                MR. CLOSE: This is for three years,
23
  Director?
24
                MS. SUAREZ:
                             Three years.
  what's currently asked of us.
```

```
MR. CLOSE: It's consistent with
1
2
   your discussion with them?
 3
                MS. SUAREZ: Yes.
 4
                MR. CLOSE:
                            Okay. Yes.
 5
                MS. SUAREZ: Mr. Avery?
                MR. AVERY: Yes.
 6
 7
                MR. BENNETT: Miss Rodriquez?
 8
                MS. RODRIGUEZ: Yes.
 9
                MR. BENNETT: Mr. Blee?
10
                MR. BLEE: Yes.
11
                MR. BENNETT: Motion approved.
12
                MR. CAMPISANO: Thank you very much,
13
  Madam Director.
14
                MS. SUAREZ: Thank you everyone for
  your time. Next on our agenda is Newark.
16
                MR. EISMEIER: Tim Eismeier with NW
17
  Financial.
18
                MR. MAYER: Good morning, Director.
19 It's Bill Mayer, and I see Ben Guzman and John
20
  George are also on and they will need to be sworn
21 in.
22
                (At which time those wishing to
23 testify were sworn in.)
24
                MR. MAYER:
                           Tim, would you like me
25
  to go forward, or are you presenting?
```

```
1
                MR. EISMEIER: You can go ahead,
2
  Bill.
 3
                MR. MAYER: This is an application
  for a supplemental $20 million appropriation for
4
  the city's small diameter sewer project.
  was a prior bond ordinance and a prior
  construction financing program note from the NJIB
  for 20 million dollars.
 9
                The project continues. John George
  would probably be best to describe the physical
11
  project. And Ben Guzman, who is now the
12
  assistant CFO in Newark can answer any financial
13
  questions.
14
                MS. SUAREZ:
                             So I think I saw in the
  application that it's 20 million dollars total.
16 15 million will actually be at zero percent, and
  5 million will be at market rate.
17
                                      Is that
18
  accurate?
19
                MR. EISMEIER: Yes, that's correct.
20
                MS. SUAREZ: So the application
  itself, I didn't have any questions about.
22
  only two questions I have for the city are just
23 |if they can give an update as to the budget and
  the audit and maybe a time frame as to when we
25
  could expect them from the city.
```

```
1
                MR. GUZMAN: Good morning.
                                            This is
2
  Ben Guzman from the City of Newark.
                                        The City of
  Newark is currently, we're hoping that we'll have
  the budget introduced to counsel some time in
  late August, early September.
                I know that traditionally, the city
 6
  has been working on getting it introduced much
  earlier and we have been approving over the
  years, unfortunately, due to the current
10
  circumstances, it has delayed us again, but we
11
  are looking to have it introduced prior to third
12
  quarter of 2021.
13
                And as far as the 2020 audit, I know
14
  our auditors are working on that one, but we
15
  currently don't have a time frame for the audit
  litself. But as I said, we do anticipate to have
16
17
  the 2021 budget introduced shortly.
                             Is there a draft of the
18
                MS. SUAREZ:
19
  bucket yet, Mr. Guzman?
20
                MR. GUZMAN:
                            Yes, there is.
                                             They
  have been working on it. I haven't seen the
22
  initial draft just yet. They're having some
23
  changes back and forth. We're also taking into
  account the ARP funds the city received for 2021,
  and that has been circling around.
```

```
We're waiting for that to come out
1
2
  of our Office of Management and Budget Office and
  my director has been working closely with
  Director Tate of the Office of Management and
  Budget, but we should have something, a draft
  available soon.
                    And as soon as we have one, we
  will make a copy of that affordable to yourself
  and to this body.
 9
                MS. SUAREZ:
                             That would be great.
  And if you could also just include Tina Zapichi
  as well who is in charge of our financial regs
12
  group.
13
                MR. GUZMAN:
                             Yes, always.
14
                MS. SUAREZ:
                             Thank you.
15
                MR. GUZMAN: You're welcome.
16
                MS. SUAREZ:
                             That's it for my
17
  questions.
               I don't know if any board members or
18
  any members of the public have any additional
19
  questions.
              Hearing none, do we have a motion?
20
                MS. RODRIGUEZ:
                                I make a motion.
21
                           Second.
                MR. BLEE:
22
                MR.
                   BENNETT:
                             Miss Suarez?
23
                MS.
                   SUAREZ: Yes.
24
                MR. BENNETT:
                             Mr. DiRocco?
25
                MR. DIROCCO: Yes.
```

```
MR. BENNETT: Mr. Close?
1
 2
                MR. CLOSE: Yes.
 3
                MR.
                    BENNETT: Mr. Avery?
 4
                MR. AVERY:
                           Yes.
 5
                    BENNETT:
                MR.
                             Miss Rodriquez?
                MS.
                   RODRIGUEZ:
 6
                                 Yes.
                             Mr. Blee?
 7
                MR. BENNETT:
                MR. BLEE:
 8
                           Yes.
 9
                MR. BENNETT: Motion approved.
10
                MR.
                    GUZMAN:
                             Thank you, everyone.
11
                MS.
                    SUAREZ:
                             Thank you. So the next
12
  application appearing before the board is the
13
  City of Trenton on a proposed reversion from
14
  fiscal year to a calendar year budget cycle.
                                                  As
15
  you come up on the screen, please speak up so we
16
  can get you on Teams and everybody can be sworn
17
  in and I'll have some brief remarks before we get
18
             I see Mr. Cherry, I see Mr. Liston,
  started.
19
  see Mayor Gusciora. I did see Mr. Cruz.
20
  disappeared for a second there. Do we have
21
  anyone else from Trenton?
22
                MR. GROSSMAN: Neil Grossman here.
23
                (At which time those wishing to
24
  testify were sworn in.)
25
                MS. SUAREZ: So before you begin to
```

```
introduce this application, I wanted to speak to
  the board briefly about the efforts that we've
  seen in Trenton and what they've kind of
  undertaken in the last few weeks to get this
 5
  done.
                The reversion to calendar year is
 6
7
  something that follows about 20 to 30 years of
  efforts that is required by municipalities around
  the state. I think it's quite a ways back that
  municipalities reverted to the fiscal year as
11 part of a restructuring effort that has since
12 been reversed in all but a handful of
13 municipalities across the State of New Jersey.
14
                I believe about 45 municipalities
  have already converted back to the calendar year,
  but it's been particularly challenging for
17
  municipalities that has a large budget because
18
  it's an accounting exercise that really has to be
19
  undertaken.
20
               And that's no easy feat, not only in
  the wake of COVID-19, but you combine that with
22
  the budget conditions of the city and that can
23
  create some complications. So the technical
  advisors within the division have worked
  diligently with Trenton administration, city
```

```
council, Trenton staff members to work toward the
1
 2
  common goal of further stabilizing the finances
 3
  of Trenton.
 4
                And we raised the suggestion of
5
  reversion earlier this year. Many in Trenton
  were immediately interested in moving forward
  with that and have worked diligently in trying to
  quickly manage that transition.
                                    And I think
  we've all worked well together including my staff
10
  in trying to quell the concerns of some of the
11
  skeptics, so I'm very happy to see you before the
12
  board today.
13
                With that being said, I turn it over
14
  to you to introduce the substantive conversation.
15 And thank you, Mayor, for joining us to discuss
  this important exercise. Mr. Liston, are you
16
17
  going to be the one talking us through this?
18
                MR. LISTON:
                            If the mayor wanted to
19
  start, let him.
20
                MR. GUSCIORA: Thank you, Director.
  Arch is much more knowledgeable and Adam and
22
  Colin, yeoman's effort on this, but I want to
23
  thank DCA staff and particularly our monitor,
  Jack Liston, and you, Director, for really
  assisting us in this effort. This has been a
25
```

```
great undertaking, but it really help bring
 2
  certainly to our finances.
 3
                We expect to have 18 months of
 4
  stable tax rate. And most importantly, it will
  give us the tools to wean us off of transitional
  aid as much as we enjoy your monitorship. But we
  think this is a good thing for the taxpayers of
  Trenton.
 9
                We've worked really hard on this.
  And again, we really appreciate all the effort
  that DCA has done to assist us in this regard and
12
  I'll turn it over to Arch for the specifics.
13
                MR. LISTON:
                             The biggest thing that
14
  we see in this process is the fact that we are
15
  going to receive that additional influx of
16
  revenues along with the capital city's funding
  that will continue through the process.
17
18
                It really will stabilize our budget
19
  over the next 18 months and allow us, especially
20
  with some of the funding coming in, we'll be able
21
  to do some real different and amazing things
22
  around and city with upgrades and so forth.
23
                So this really allows us, with the
24
  state's assistance, to stabilize us and not have
  some of the issues we've had before with the TA
```

```
monies and back and forth with monitoring.
  think we are aware and in good shape and I think
  this 18 month period really allowed us to
  stabilize the city.
 4
 5
                MS. SUAREZ: Have there been any
  conversations yet about, I guess, what the next
 6
  six quarters might mean as the additional influx
  of revenue would mean for the city and kind of
  discussions about what they're looking to do, I
10
  quess, with the additional revenue?
11
                MR. LISTON:
                            Well, I think the
12 largest thing with the additional revenues is,
13
  you know, we're stabilizing the public safety
14
  lissues and we are short both in police and fire
15
  on the fire side. And one of our biggest
16
  concerns is replenishing those resources,
17
  obviously, the bodies on the street for the
18
  police and getting the fire. So that's going to
19
  be the biggest impact over the next six quarters
  I would say. Adam, do you have anything to add
20
21
  to that.
22
                MR. CRUZ:
                           Yes.
                                 I just wanted to
23
  add that we are very grateful that the Department
  of Community Affairs for the partnership they
  have done with the city, not only with providing
```

```
the transitional aid, but also capital city as
  well as an additional 5 million dollars that Arch
  Liston was able to work out with DCA the last
  couple of weeks.
4
 5
               As Arch mentioned, public safety,
  you all know, is our number one goal in the city.
 6
  It would help us stabilize the number of murders
  that occurred each year. We went, as you
  probably all know, we had a historic number of
10
  murders last year. And by having the additional
11 funding, they will allow us to hire additional
12
  police officers.
13
               Also, one of the great things that
14 has not happened probably the last couple of
15 decades, I think to your commitment, as well as
  the Lieutenant Governor, we were successful in
16
  having a zero tax increase last year, which is
17
18
  historic because that has not been the case, as I
19 mentioned, in probably 20 years.
20
                It was actually a light at the end
  of the tunnel. And with the transition year that
22
  we are now going into now with the July and into
23
  December, we also are doing a zero tax increase
  in the next six months as well.
  stabilization, you know, takes place, not only in
```

```
local government, but also with our residents.
1
2
               And that is something that people
  have been craving for a very long time. Our city
  taxes are probably the highest -- are the highest
  in the county, and then when you compare it to
  other municipalities, we are probably at the very
7
  top of the list as well.
 8
                So stabilization of taxes is a huge
  thing. It would promote additional people, you
  know, buying properties as well as hopefully
11 having new businesses coming to the city.
12
  everything that DCA has been doing for us has
13
  actually assisted us in the last couple of years.
14
               And now moving forward with the
  transitional budget, it will help us, you know,
16
  do an additional six months of zero tax increase
17
  and then we will have a stable 2022 calendar year
18
  should council approve the change. So, yes,
19
  that's all I have to say.
20
               MS. SUAREZ:
                            Thank you, Mr. Cruz.
  Just going back, I'm just going to follow up on
22
  this. As far as using some of this additional
23
  funding for hiring, I guess my concern always is,
  how are you forecasting that going forward.
  will be of course an additional infusion of money
```

```
just the way that the fiscal to calendar year
1
  reversion falls.
 3
                So the city will have less payments
  to make, additional funds coming in, which is
4
  where we come up with the additional cash.
  moving forward, if some of this money is utilized
  hiring, what is the game plan I guess, and is the
  city thinking that through because this will be a
  one time additional cash infusion.
10
               But going forward, it will be
11
  incumbent on the city to come up with how they're
12
  going to be paying for those additional costs.
13
  Because, as we all know, it's a 25 year
14
  commitment plus a pension, so I'm trying to
  figure how that's shaping up.
15
16
               MR. LISTON: I can answer on that in
17
  the fact that the cash helps.
                                  There's no
18
  minimizing that, but we have to, at the city
19
  level, start looking at the efficiencies and
20
  building efficiencies into the systems. We've
21
  got to be able to look at every department and
  we've got to go in and cut and reduce and make
23
  sure every dollar spent right now.
24
               And you're correct, Director, we've
  got to look at this over the next five years and
```

```
I think we've had some five year projections in
  the past. But what we need to look at if we can
  build efficiencies across the board, evaluating
  the fire department costs and restructuring the
  police department, cost there, the dollars of
 6 manpower, the pension costs and the retirement
  costs in collective bargaining, those are all
 8 issues we need to address across the board and
  keep our costs down going into '23, '24, '25, so
10
  we are projecting well beyond this 18 month
11 period.
                            Happy to hear.
12
               MS. SUAREZ:
                                             Do any
13 board members or members or members of the public
14 have any questions? Anything else the city
15 wanted to add? Hearing none, do we have a
16 motion?
17
               MR. AVERY:
                            Motion to approve.
18
               MS. RODRIGUEZ:
                                Second.
19
               MR. BENNETT: Miss Suarez?
20
               MS. SUAREZ: Yes.
21
               MR. BENNETT: Mr. DiRocco?
22
               MR. DIROCCO: Yes.
23
               MR. BENNETT:
                            Mr. Close?
24
               MR. CLOSE:
                          Yes.
25
               MR. BENNETT: Mr. Avery?
```

```
1
                MR. AVERY:
                          Yes.
 2
                MR. BENNETT:
                             Miss Rodriquez?
 3
                MS. RODRIGUEZ:
                                Yes.
 4
                MR. BENNETT: Mr. Blee?
 5
                MR. BLEE:
                           Yes.
 6
                MR.
                   BENNETT:
                             Motion approved.
 7
                MS. SUAREZ:
                             Thank you. I wish you
  all the best in this endeavor. Obviously, we are
  here to continue to assistance and advice we can
  give in ensuring this is as smooth a process as
10
  possible.
             As you know, we just did it with
12
  Camden and Paterson last year.
13
                So I will not pretend there won't be
14 bumps in the road, but we're happy to partner
  with the city to get this done. I think this is
16
  definitely a step in the right direction for your
17
  residents, so kudos to you.
18
                MR. GUSCIORA:
                               Thank you, Director.
19
                MS. SUAREZ: We have Trenton next on
20
  the agenda again for proposed adoption of an
21
  ordinance and issuance of bonds for Municipal
22
  Qualified Bond Program. Mr. Johnson, are you
23 here with us?
24
                MR. JOHNSON: Good morning,
25
  Director, I am here.
```

```
1
               MR. GUSCIORA: Director, do you mind
2
  if I lead off before Everett?
                                  I wanted to bring
  to your attention that if you go to Ewing along
  Olden Avenue, there's a Home Depot, Aldi's Food
  Market, there's many small shopping centers and
  also Shoprite.
 6
                For the last 20 years, that water
  main along Olden Avenue has burst and we have
  promised the good citizens of Ewing that we would
10
  repair it.
             Unfortunately, we can only afford
11 Band Aids. With an agreement with the Mayor Bert
12
  Steinmann who has been quite upset there's been
13
  three water main breaks in the last two years, we
  have decided to commit to fixing it once and for
15
  all.
16
               We need to replace the water main
17
  down Olden Avenue completely. It's disruptive,
18
  not only to the citizens but to the businesses
19
  along the way and at some point we'll probably be
20
  liable for their losses so this is a really
  important project. Trenton owns the pipes.
22
               We have to fix them and this would
23
  be a good way to reestablish good neighborly
24
  relations with Ewing and I'll just turn it over
25
  to Everett. Thank you.
```

```
1
                MR. JOHNSON: Thank you, Mayor.
                                                  Ι
 2
  don't know if I need to say anything else,
             He said everything I wanted to say.
  Director.
  do want to note that in addition to everyone that
  was on the last meeting, the last agenda item, we
  have Mark Lavenberg with us who is executive
  director of Trenton Water Works and I think Mary
  Henry from the finance department.
 9
                (At which time those wishing to
10
  testify were sworn in.)
11
                MR. JOHNSON:
                              The city seeks the
12
  approval of Local Finance Board for the adoption
13
  of the bond ordinance pursuant to the Municipal
14
  Qualified Bond Act. The bond ordinance
15 authorizes a project through the Trenton Water
16 Works which is a self-liquidating utility of the
17
  city.
18
                As a result, the bond ordinance has
19
  not utilized any of the city's borrowing
20
  capacity. The Local Bond Law has no impact on
  the city's net debt. The city is not required to
21
22
  make a down payment in this ordinance.
                                            The
23
  utility is currently self-liquidating.
24
                In addition, the project is being
  financed through the New Jersey Infrastructure
```

```
Bank and the New Jersey Department of
  Environmental Protection. Therefore, no down
  payment is required under this section, 11C of
  the Local Bond Law.
 4
 5
               Bond ordinance appropriates and
  authorizes the issuance of bonds and notes in an
 6
  amount not to exceed 4 million dollars for the
  replacement of water mains in the Trenton water
  service including water main pipe along Olden
  Avenue in the Township of Ewing.
11
               All the bonds issued in the bond
12
  ordinance will be issued as qualified bonds under
13
  the Qualified Bond Act, and the bonds will be
14 issued again through the New Jersey
15 Infrastructure Bank. The city is requesting
  approval to adopt a bond ordinance pursuant to
16
  the Qualified Bond Act to issue qualified bonds
17
18 in accordance with the Maturity Schedule set
19
  forth by the Ibank included in the application
20
  and is seeking your approval to move forward with
  the adoption of the bond ordinance.
21
                                        At this
22
  point, we'll entertain any questions you may
23 have.
24
                MS. SUAREZ: So I will piggyback off
25
  of Mayor Gusciora's comments.
                                  So I completely
```

```
understand how this is necessary. I completely
  understand that this will help with relationships
  with Ewing. My concern is just the city being
  able to get the full five votes from the council
  to make sure that this actually moves forward,
  right, because as we know, this is completely
  outside of Trenton's boundaries, yet, it needs
  necessitates Trenton council votes to get this
  done since it's Trenton Water Works. Can you
10
  touch upon where that sits right now?
11
               MR. GUSCIORA: I can answer that.
12 Yes, we do have strained council relations and
13
  there's a couple of council members that are
14
  adamantly opposed to any improvements, not only
  in the City of Trenton, but Ewing for that
15
16 matter.
17
               This is something that we have to
18
  fight for and the mayor of Ewing and residents
19
  are prepared to come to our council meetings to
20
  make the case, but every council person
21
  ultimately shops at the Shoprite on Olden Avenue,
22
  goes to the Home Depot. They've seen the roads
23 have been blocked.
24
                It's really disruptive, and you
  would have to really put your head in the sand
```

```
not to realize what we're doing. And also, most
  importantly, we're under ACO with DEP and the
  surrounding towns have said to us that we can't
  manage our own affairs. They'd like a regional
  utility.
 5
                So our counsel has to make the
 6
7
  choice, do we want DEP or the surrounding towns
  to take us over, or do we want to do what we're
  obligated to do is run an efficient water works
  department and that takes care of all the
10
11 municipalities, not just the ones that are on
12
  your block, but it will be a challenge no doubt.
13
               MS. SUAREZ:
                            Fair enough. Thank you
14
  for addressing that. I'm assuming just, as far
15
  as paying for this, would it all be done through
  rate increases or is that the anticipation?
17
               MR. GUSCIORA: In theory, yes.
18
  all five municipalities would be paying it off,
19
  not just Trenton or not just Ewing and we make
20
  repairs, we're obligated to make repairs on all
21
  five service municipalities.
22
               MS. SUAREZ: So as far as just the
23
  net debt of the city, I know a few years back,
  there were concerted efforts to kind of bring
  down the total percentage. Can you maybe give me
```

```
an update as to where that currently sits?
 2
  think are we around the six percent mark?
 3
               MR. JOHNSON: That's exactly -- Neil
  is on the line now, but that's exactly where
4
  we're at right now. I think six percent exactly
  is the number.
 6
               MS. SUAREZ:
                            Any kind of efforts to
8
  kind of bring that down? I'm always happy to
  assist any way the division can. I know we're
10
  kind of high. I know we did bring it down a few
  years back, just looking to see how that's
12
  shaping up and what the projections look like.
13
               MR. JOHNSON: I'll speak first and
14 I'll let anyone from the city who might want to
15
  chime in thereafter. We haven't really moved
16
  forward with a capital general improvement bond
17
  ordinance in a while. Pretty much all the
18
  ordinances have been utility ordinances which
19
  have no impact.
20
               As you may recall, last year, the
  city went through all of its outstanding
22
  ordinances that had not yet borrowed any money
23
  and it repealed and canceled about 30 million
  dollars of appropriations in an attempt to reduce
25
  the net debt, so there have been periodically,
```

```
more recently, things that were done to kind of
  look at the city's net debt profile and make
 3
  changes where appropriate.
 4
                And I think for the most part,
5
  what's currently outstanding, projects that are
  forthcoming, so there's not really much room to
  cut further. You know, so I'm sure the city is
  looking at efforts to increase their tax base and
  do other things, but we're not -- the city is not
10
  coming down here more than once a year for a
11
  capital ordinance, even though, as you know, the
12
  city's infrastructure is as such that they
13
  probably need to come down more frequently and
14 borrow money to finance equipment upgrades and
15
  things of that nature.
16
                They've done all they can to
17
  minimize that because their net debt limit is
18
  somewhat high. I'm not sure if anybody from the
19
  city wants to chime in on that.
20
                MR. GUSCIORA: I just want to add to
21
         Director, not to put the cart before the
22
  horse, but as we all know, the feds are talking
23
  about an infrastructure bill that would take care
  of a lot of lead service line replacement.
25
                And since that's involved with a lot
```

```
of our debt, we're hopeful that there will be
  monies available so that will avoid further
  capital expenses that will get us further in
  debt, so we're hopeful that the Ibank and
  other -- we've pursued all financial strategies
  and we'll continue to do so, but we're hopeful
  that in the future our debt will actually go down
  because of what the feds are doing and also the
  mercury recovery plant.
10
                MR. JOHNSON:
                              Director, I think
11
  that's an important statement to make. Because
12
  although the lead service line debt does not
13
  impact the city's net debt because it's being
14
  financed through the water utility. At some
15
  point, if they keep borrowing through the
  lutility, it could not be self-liquidating and
16
17
  impact the net debt.
18
                So any financing that could come
19
  from the federal government for infrastructure to
20
  reduce the utility's debt would also be
21
  lassisting, helpful to the city going forward
22
  making sure that doesn't impact the net debt from
23
  the utility debt.
24
                MS. SUAREZ:
                             Fair enough.
  we're all looking for more money from the feds,
```

```
right?
1
 2
                MR. GROSSMAN:
                              Yeah.
                                      The only thing
 3
  I would add to that is that the city's currently
  outstanding general improvement debt calls for
4
  principal paydowns of about 17 million dollars in
   '22 and again in '23, and then it drops off
 6
7
  pretty dramatically after that.
8
                So if they don't add a whole lot of
  new money general improvement ordinances, you're
  going to see the net debt drop over the next year
10
11
  or two through those paydowns.
12
                MS. SUAREZ:
                             Thank you for that.
                                                   Ι
13
  do not have any additional questions. Do any
  board members or members of the public have
15
  questions?
16
                MS. RODRIGUEZ:
                                Director, I would
17
  like to make a comment. Coming from your city,
18
  not a board in terms of water treatment and
19
  provision of quality water, drinking water, I
20
  think this is really responsible, the action of
21
  City of Trenton has taken because the water works
22
  and it is their responsibility to replace those
23
  mains when you have damage in the infrastructure,
  especially in a busy area like that, it causes
25
  havoc.
```

```
And I imagine that the residents of
1
2
  the City of Trenton frequent the Home Depot and
  the Shoprite as they were saying, so I'm positive
  on this and I just want to commend the city for
  moving forward on this.
 6
                MS. SUAREZ:
                             Thank you, Idida.
  Agreed.
            Hearing no other comments or questions,
  do I have a motion?
 9
                MS. RODRIGUEZ: I make a motion.
10
                MR. CLOSE: Second.
11
                    BENNETT: Miss Suarez?
12
                MS. SUAREZ: Yes.
13
                MR. BENNETT: Mr. DiRocco?
14
                MR. DIROCCO: Yes.
15
                MR. BENNETT: Mr. Close?
16
                MR. CLOSE:
                           Yes.
17
                MR.
                   BENNETT: Mr. Avery?
18
                MR. AVERY:
                           Yes.
19
                    BENNETT: Miss Rodriguez?
20
                MS. RODRIGUEZ:
                                Yes.
21
                MR. BENNETT; Mr. Blee?
22
                MR. BLEE:
                          Yes.
23
                             Motion approved.
                MR.
                    BENNETT:
24
                MS. SUAREZ: Next on the agenda.
  have Eatontown Board of Education. Do we have
```

```
Miss Litzebauer?
1
 2
                MS. LITZEBAUER: Yes, I'm here.
 3
                MS. SUAREZ: If we can get everyone
 4
  sworn in.
 5
                (At which time those wishing to
  testify were sworn in.)
 6
7
                MS. SUAREZ:
                             Miss Litzebauer, are
8
  you going to be presenting?
 9
                MS. LITZEBAUER: I think Andrea Kahn
  will be from McManimon.
11
                           I'm Andrea Kahn from
                MS. KAHN:
12 McManimon, Scotland and Baumann. We are bond
13
  counsel for the Eatontown Board of Education.
14 Laurie Youngclaus, the business administrator,
15 board secretary is here as is Heather Litzebauer
16 from NW Financial, the financial advisors and
  Brian Lavin from DC Energy, the energy savings
17
18
  company or ESCO.
19
                This application is to seek the
20
  approval of the Local Finance Board for the
  adoption of the School Energy Savings Obligation
22
  Refunding Bond Ordinance in an amount that will
23 not exceed $5,250,000. This is to authorize and
24 issue bonds to fund energy conservation measure
25
  improvements pursuant to the Energy Savings
```

```
Improvement Program Law, N.J.S.A. 18A:18A-4.6 and
  the School Refunding Bond Law which is N.J.S.A.
  18A24-61.1.
 3
 4
                The district has followed the energy
5
  savings improvement process. They had an audit
 6
  of their facilities.
                         They determined to use the
  services of an ESCO whom they selected through
  competitive contracting and they selected DCO
  Energy to assist them with the development of the
  plan and the implementation of the plan.
11
                The board appointed Whitman as its
12
  independent verification agent to verify the
13
  lenergy savings. Whitman issued its report which
14
  was sent to the Board of Public Utilities with
15
  the plan and the BPU approved that plan on June
16
  16th. And then the Board of Education determined
17
  that the plan of savings would cover the cost of
18
  the improvements and they approved that plan on
19
  June 21st.
20
                These improvements include LED
  lighting, an energy management system upgrade,
22
  mechanical improvements and combined heat and
23
         The projected savings from the plan is
  power.
  \$5,878,000. And the total coasts are \$4,736,000.
  The savings in each year will cover the cost of
```

```
the debt service payments by at least $2,400, and
  we anticipate the cumulative net savings would be
  $48,000. We'll be happy to answer any questions
  that you might have.
 5
                MS. SUAREZ:
                             Thank you, Miss Kahn.
  It's my understanding, from reading the
 6
  application, this is actually impacting four of
  the schools. Is that accurate?
 9
                MR. LAVIN:
                            That is correct.
10
                MS. SUAREZ:
                             And then I quess, in
11
  just quick layman's terms, I heard you go over a
12
  little bit in the application, but can you tell
13
  me exactly what some of these improvements are
14 actually doing?
15
                MR. LAVIN:
                            I can take that
16
  question.
             So currently at the schools, they do
17
  have infrastructures, roof top is one of the main
18
  priorities was that these roof top units are
19
  aging.
          They're getting to the point where
20
  they're going to be need to replaced in the next
21
  few years.
22
                Normally that cost would be born by
23
                   Through this program, we're able
  the taxpayers.
  to replace many of those roof top units at no
25
  cost to the taxpayer paid back through the energy
```

```
savings. In addition to that, they're putting in
  new LED lighting in all classrooms bringing them
  up to code, making them nice and bright and good
  classroom experience for its students as well.
 5
                And on the green energy side of it,
  we're also including solar panels at the schools
 6
  to generate power on site. We've got a solar PPA
  at a very favorable rate. That's going to save a
  lot of money for the school district as well.
10
                MS. SUAREZ:
                             Thank you for that.
                                                   I
11
  think that's all of my questions. Does anyone
12
  from the board or any members of the public have
13
  questions?
              Hearing none, do we have a motion?
14
                MR. AVERY:
                           Motion.
15
                MS. RODRIGUEZ:
                                Second.
                MR. BENNETT: Miss Suarez?
16
17
                MS. SUAREZ: Yes.
18
                MR. BENNETT: Mr. DiRocco?
19
                MR. DIROCCO: Yes.
20
                   BENNETT: Mr. Close?
                MR.
21
                MR. CLOSE:
                           Yes.
22
                MR.
                   BENNETT:
                             Mr. Avery?
23
                MR. AVERY:
                            Yes.
24
                             Miss Rodriquez?
                MR. BENNETT:
25
                MS. RODRIGUEZ:
                                Yes.
```

```
MR. BENNETT: Mr. Blee?
1
 2
                MR. BLEE:
                          Yes.
 3
                    BENNETT: Motion approved.
                MR.
 4
                           Thank you very much.
                MS.
                    KAHN:
 5
                MS.
                    SUAREZ:
                            Good luck. Next on the
 6
  agenda, we have Carneys Point, the township's
7
  sewer authority.
 8
                MR. WINITSKY: Good afternoon.
                                                 Jeff
  Winitsky from Parker McCay, bond counsel to the
10
  Sewage Authority. I'm not sure if anybody else
11 is on. Perhaps is Tim Keel, he's the CFO of the
12
  authority or maybe Mike Welding, the auditor?
13
  Hearing none, I will go at alone as I did earlier
14
  this morning, which is not a problem.
                So we are here today seeking
15
  positive finding pursuant to N.J.S.A. 40A5-6 for
17
  the issuance by the authority of its $330,000
18
  project notes. The proceeds of which are being
  used to refinance certain notes of the authority
19
20
  that were issued in September of last year.
21
  would use the proceeds of these notes together
  with available funds of the authority in the
23
  amount of $110,000 to do so.
24
                The original notes were actually
  issued in 2017 for the purpose of conducting
```

```
certain improvements and repairs to the
  authority's sewer system. The only reason that
  we're appearing before the Local Finance Board
  today is we are beyond the three year renewal
  term for which we would only need to do a letter
  filing to the board.
 6
7
               Because we're beyond that period, we
  would have to do a formal application seeking
  positive findings. The notes were intended to be
  paid down over a period of years. We're very
10
11 close to doing that. This is sort of an
12 administrative function. As I mentioned, the
13 notes will be in an amount of $330,000 to be
14 issued for a period of one year.
15
               We expect to issue the notes on a
16
  competitive basis and seek proposals for
17
  purchase. As I mentioned earlier, this is purely
18
  administrative, so we're happy to answer any
19
  questions about the notes or about the original
20
  projects or even the security for the notes which
21 is revenue of the authority together with a
22
  service contract that they have with the Township
23
  of Carneys Point, as most sewage authorities and
  water authorities do, so happy to answer any
  questions that you might have.
```

```
1
               MS. SUAREZ: Thank you.
  Winitsky, just so I understand, the way that this
  kind of read to me, was that this is going to be
  layering into debt that is anticipated to fall
  off. Is there no anticipation of increase in
  rates for this?
               MR. WINITSKY: No, none.
                                          This was
  intended to be amortized over a term of years.
  It's actually gone down in principal every year,
10
  so no rate increases are expected.
11
               MS. SUAREZ:
                            Okay. That's it for
12
  me. Does anyone from the board or members of the
  public have any questions? Hearing none, do we
  have a motion?
               MR. AVERY: So moved.
15
16
               MS. RODRIGUEZ:
                                Second.
17
               MR. BENNETT: Miss Suarez?
18
               MS. SUAREZ: Yes.
19
               MR. BENNETT: Mr. DiRocco?
20
               MR. DIROCCO: Yes.
21
               MR. BENNETT: Mr. Close?
22
               MR. CLOSE: Yes.
23
               MR. BENNETT:
                            Mr. Avery?
24
               MR. AVERY:
                          Yes.
25
               MR. BENNETT: Miss Rodriguez?
```

```
MS. RODRIGUEZ:
1
                                Yes.
 2
                MR. BENNETT: And Mr. Blee?
 3
                MR. BLEE:
                         Yes.
 4
                MR. BENNETT:
                              Motion approved.
 5
                    WINITSKY: Thank you very much.
 6
                MS. SUAREZ: Thank you.
                                        Next up, I
7
  think we have the Union County Improvement
  Authority. Do we have Mr. Draikiwicz?
 9
                MR. DRAIKIWICZ: I am here.
                                              I think
  we have a few others joining us.
11
                MS. SUAREZ: If we can get everybody
12
  to say something so we can see them on the screen
13
  and then we get them sworn in.
14
                MS. TAYLOR: Good morning. It's
15
  Bibi Taylor.
16
                MS. MAHR:
                           Good morning.
                                          It's
17
  Colleen Mahr, the mayor of Fanwood.
18
                MS. HARRIS: Good morning.
                                            It's
19 Rayna Harris, business administrator for Fanwood.
20
                MR. DRAIKIWICZ: And I guess that's
  our team for today.
22
                MS. TAYLOR: I think Mike Hanley is
23
  on the call, but he hasn't identified himself.
24
  We'll see where that goes.
25
                (At which time those wishing to
```

```
testify were sworn in.)
1
 2
                MR. DRAIKIWICZ: Thank you,
 3
  Director.
             May I proceed?
 4
                MS.
                    SUAREZ:
                             Absolutely.
 5
                MR. DRAIKIWICZ:
                                 The Union County
  Improvement Authority proposed to issue its bonds
 6
  and notes in an aggregate principal amount not to
  exceed 8 million dollars. The proceeds of which
  will be utilized to purchase land and then to
10
  construct a new 17,000 square foot Department of
  Public Works facility on such land.
                                        The project
12
  will be undertaken in two phases.
13
                The first phase is to acquire the
14
  site upon which the facility will be located and
15
  undertake the design of that facility and it's
16
  anticipated that that phase will be undertaken by
17
  the issuance of two year notes by the Improvement
  Authority.
18
             The second phase would be to
19
  refinance those notes and then to construct the
20
  facility and that will be done by the issuance of
21
  the authority's bonds as well.
22
                The bonds will be secured by a lease
23
  agreement between the authority and the borough
  pursuant to which the lease payments under that
  lease will be sufficient to pay the debt service
```

```
on the notes and or bonds. In addition, the
  authority's bonds will be secured by a quarantee
  by the Borough of Fanwood. That is the legal
  structure and what the authority and borough
  intend today do.
               We hereby request positive findings
 6
7
  in connection with the project financing as well
  as the borough guarantee. We would be happy to
  answer any questions you may have at this time of
10
  course.
11
               MS. SUAREZ:
                             Thank you, Mr.
12 Draikiwicz. I know when we spoke last that
13 Fanwood wasn't exactly sure if it was going to be
14 utilizing the Improvement Authority as its actual
  project manager. So if we could maybe walk
15
16
  through that a little bit and also discuss the
17
  municipality does phase one through the
18
  Improvement Authority and does phase two
19 separately or on its own.
20
               What does that kind of look like?
  Refunding the bond for the $2 million piece
22
  general obligation? If we can walk through that
23
  scenario, or if Fanwood has further
24
  clarifications to how they're looking to proceed,
  that would be wonderful, too.
```

```
MR. DRAIKIWICZ: I'm not sure if the
1
2
  mayor or Michael Hanley would like to respond to
 3
  that question.
 4
                MR. HANLEY: We will use the
5
  Improvement Authority for the take out
 6
  regardless.
               The question is, as we go through
  the design, what actual project management will
  be.
 9
                MR. DRAIKIWICZ:
                                 The first phase,
10
  Director, is really going to be the acquisition
11 of the site and secondly, would be the design of
12
  the facility which will be considered on the
13
            They haven't worked out the specifics
  as to how that will be allocated at the present
15
  time.
16
                MS. SUAREZ:
                             Okay.
                                    So either way,
17
  if they move forward, so planning phase being
18
  under the Improvement Authority and then should
19
  they decide not to go with the Improvement
20
  Authority as the project manager, they're still
21
  anticipating leaving that first 2 million as
22
  under the Improvement Authority?
23
                MR. DRAIKIWICZ: The authority would
  be definitely issuing the first phase.
  definitive by the issuance of its notes.
```

```
right now, the approximation of that note is
  maybe around 2 million dollars, but it has not
  been finalized yet.
 4
                And the reason for the authority and
5
  the borough doing it in this phase is that they
  wanted to save some costs to not issue the entire
  8 million dollars at this time.
7
                                    So when they are
  ready, they would rather do it with the project
  being a more formalized position.
10
                They thought it would be
11
  advantageous to waiting that time so they do not
12
  need to incur debt service costs during this time
13 frame.
14
                MS. SUAREZ:
                             Okay.
                                    And then I know
  we also talked about it previously, but if we
16
  could just walk through for all the board
17
  members, I know we addressed the slightly
18
  non-conforming nature of the schedule.
19 know Mike believes that since it's all level
20
  debt, that it's technically conforming.
21
                As far as the principal payment is
22
  going from 180 to 395,000 so the debt technically
  doesn't kind of fall off as we move through the
23
24
  years.
          If we could walk through what that looks
25
  like.
```

```
1
                MR. HANLEY:
                             Sure.
                                    So I agree, that
2
  it's not conforming. What I was trying to
  describe is that it's easy to structure your debt
  service in a conforming manner when you're
  financing something out of a shortness of a life.
  Something with a long useful life, it creates a
7
  very downward sloping debt service schedule.
 8
                It's a math problem.
                                      Because of the
  number of years and the way it amortized the
10
  debt. Because this is an asset that is going to
11 exist for 30 years, it makes sense to finance it
12
  and pay it off over that time which is very
13
  common in long term projects.
14
                MS. SUAREZ:
                            No, I got that.
                                               Ι
  quess I never saw decreasing debt as a financing
16
            So okay. Do any members of the board
  problem.
17
  or members of the public have any additional
18
              Hearing none, do we have a motion?
  questions?
19
                MR. AVERY: So moved
20
                MR.
                   BLEE:
                           Second.
21
                             Miss Suarez?
                MR. BENNETT:
22
                MS. SUAREZ:
                            Yes.
23
                MR. BENNETT:
                             Mr. DiRocco?
24
                MR. DIROCCO:
                            Yes.
25
                MR. BENNETT: Mr. Close?
                                          Mr. Avery?
```

```
MR. AVERY: Yes.
1
 2
                MR. BENNETT: Miss Rodriguez?
 3
                MS. RODRIGUEZ:
                                Yes.
 4
                MR. BENNETT: Mr. Blee?
 5
                MR. BLEE:
                          Yes.
 6
                MR. BENNETT: Mr. Close again?
  have five votes without Mr. Close. So motion
  approved.
 9
                MR. DRAIKIWICZ: Thank you, Director
10 and the other members of the board for your
11 positive findings and your connection with the
12 transaction. Much appreciated by the authority
13 and the borough.
14
                MS. MAHR: Thank you very much.
15
                MS. SUAREZ: Good luck. I think
16 next up we have Middlesex County Utilities
17 Authority.
18
                (At which time Mr. Mapp joins the
19 hearing.)
20
                MR. LANGHART: Good afternoon,
21
  Director.
22
                MS. SUAREZ: Hello.
23
                MR. MARINIELLO: Good afternoon.
24
  Dan Mariniello.
25
                MR. LANGHART: We also have Karen
```

```
Levenson, the CFO from the authority and
1
 2
  executive director, Joe Cryan on.
 3
                (At which time those wishing to
  testify were sworn in.)
 4
 5
                MR. LANGHART: Thank you for hearing
                     The Middlesex County Utilities
 6
  our application.
  Authority is here making application for the
  lissuance of not to exceed 11 million dollars in
  sewer revenue bonds for the acquisition of an
10
  existing solar array which is on the property of
11
  the authority right now.
12
                The bonds will be paid back over a
13
  five year period. It will be issued on a
14
  subordinate and a taxable basis. The reason that
15
  the authority is doing this, is they currently
16
  have an existing PPA contract with the solar
17
  provider that has a buyout provision in the 6th
18
  year which is where we are now.
19
                If we were not to buy out the
20
  contract, and acquire the solar array ourselves,
21
  the operational costs increase dramatically over
22
  the life of the contract. Even though it's a
23
  short payback on the bonds, a five year period,
  approximately two million dollars a year, the
  avoidance of the operational costs that we will
```

```
lincur, we were not to acquire the array, and the
  revenue that we will obtain from selling the
 3
  SRECs that we can get from the solar array should
  make the project cash flow neutral to the
  authority for the five years.
                And then after that, it will be cash
 6
  flow positive to the tune of about a million and
  change every year from the avoidance of the
  operational costs. It's a pretty straight
10
  forward application.
                         If you have any questions,
11 we're happy to answer anything you might have.
12
                MS. SUAREZ:
                             Thank you very much.
                                                    Ι
13 know that I had the ability, along with some of
14
  the board staff to meet with you guys prior to
15
  the actual board meeting so we can kind of go
16
  over the structure since this is a little bit
17
  different of a project than we typically see come
18
  before the board.
19
                So it was kind of astounding to me
20
  to see some of the cost savings, just how high it
  was going to be jumping from this year to next
22
  year for your solar usage. So if you could just
23
  highlight a little bit of that again for the
  board members because I think that is something
25 worth counting.
```

```
1
                MR. LANGHART: Karen, are you able
 2
  to address that?
 3
                MS. LEVENSON:
                               Sure.
                                      Let me get my
 4
  notes out. Sorry about that.
                                  Here it is.
  the operational fees as are outlined in our
  current power purchase agreement would run
  approximately 1.2 million dollars a year for the
  next year seven through 15. And that includes
  everything.
10
                It includes O&M costs, insurance,
11
  general administrative costs, a commission for
12
  them selling the SRECs which are the solaray
13
  energy credits that are generated.
                                       There's a
14
  monthly reporting fee, there's some equipment,
15
  there's a management fee, on site supervision and
  then some maintenance and plowing costs.
17
                So all of those various things
18
  together come to be about 1.2 million dollars a
19
         In addition to that, we also pay $400,000
  year.
20
  a year now currently for the solar power that is
21
             We are paying at a rate of 6.9 cents
  generated.
  per kilowatt hour. And in the event that we do
23
  not purchase this system, the rate would jump to
  the current utility rate less one cent.
25
                We have energy consultants to advise
```

```
us on that. A Google search last week told me
1
  that the energy rate in this area is
  approximately 12.41 cents, so that would jump
  this up to 11.41 cents per kilowatt hour, which
 5
  is not quite double, but it's close.
 6
  significant increase in the cost of the power.
 7
                And then again, with the SRECs
8
  revenue, we are not currently receiving that as
  we are not the owners of the system. So once we
10
  are the owners of the system, the SRECs revenue
11 will be the authority's to keep. Currently,
12
  lagain, we have an energy expert that would advise
13
  us as we were in the position to sell.
14
                Currently, they are trading at about
  $235 per SRECs. So again, as bond counsel
  mentioned, all of those things together put us in
17
  a positive cash position of approximately 2
18
  million dollars a year, give or take, which is
19
  why we feel we will be in a cash flow neutral
20
  position and those cost avoidances and the
  additional revenue would off set the debt
21
22
  service.
23
                MR. LANGHART:
                               Just to add,
24
  Director, I think we mentioned on the call.
  These contracts are designed to be almost bought
```

```
out after six years because that's when the tax
  credits to the solar provider expire.
  really have no incentive to say in the deal.
  That's why they get structured this way.
 5
               MS. SUAREZ: Yes.
                                  I do remember
         Thanks for reiterating.
 6
  that.
                                  And Miss
  Levenson, maybe you could go over a little bit
8 how the utilities authority benefitted from the
  panels in the first 10 years since the
10 installation. Has it even been a full 10 years
11 yet?
12
               MS. LEVENSON: We're in year six
13
  right now.
             The panels provide power to our
14 administration building. That's a small field.
  There's actually two solar fields on our
15
  property. The larger field powers part of our
17
  central treatment plant. It powers part of our
18
  Edison pumping station which is one of the large
19
  stations that brings the waste water flow into
20
  the treatment plant.
21
               And it also provides power to the
  Middlesex County Fire Academy, which is not owned
23
  by the Middlesex County Utilities Authority.
  It's owned by the County of Middlesex.
  have a shared services agreement with the county
```

```
wherein they purchase the energy from us.
  mentioned earlier, we are paying 6.9 cents per
  kilowatt hour to the solar company.
 4
               We are getting paid by the county,
5
  7.2 cents per kilowatt per hour. The additional
  tiny fraction is to cover administrative costs on
  our end.
           We also receive rental income from the
  county. Approximately, $1,000 per month.
  that is a 25 year lease with the county.
10
               And also as part of the shared
11
  services agreement, the county agrees to enter
12 into a new agreement with us after purchase for
13
  appear period of not less than 19 years.
14 would bring us to the 25 year mark, which is the
15 estimated life of the systems. Yes. And the
  system has been recently inspected and found to
17
  be in very good condition, so there are no
18
  operating concerns at this time.
19
                So it has been quite good for us to
20
  be using the solar power. Of course it allows us
21
  to purchase less electricity from JCP&L, and
22
  that's always a good thing because we're buying
23
  the solar at a cheaper rate than we would be
  paying JCP&L for the same power.
                                    And of course
  we're going green, which is always good.
```

```
MS. SUAREZ: Yes. It's a twofer.
1
 2
                MS. LEVENSON:
                               It is.
 3
                   SUAREZ:
                MS.
                            Last question.
                                              I know
  we've also spoken about this previously.
5
  can just discuss, I know you consulted with one
  lender regarding the financing, which I do
 6
  understand, I think the utilities authority
  already has prior relationships with.
 9
                But if we can just kind of go
10
  through the process and why that was done because
  I'm sure other board members will have the same
12
  question.
13
                MR. LANGHART: I should have said
14
  that we plan on selling the bonds as a private
  placement to a bank and that's what Dan had
15
16 marketed.
17
                MR. MARINIELLO:
                                 We had spoken to
18
  Amboy Bank originally just because of the
19
  relationship that they have and that they're just
20
  generally interested in this kind of security.
21
  But the real reason for getting to that point was
22
  the authority has a bond indenture that they must
23
  follow if they're issuing bonds regularly through
  a public offering.
25
                And that indenture requires, the
```

major thing that it requires that we were trying to avoid is a significant reserve fund and there's really no reason to have a reserve fund for this particular issue because it's covered by, we have enough revenues from the system to cover the debt. 6 In fact, we were looking at even 8 going out longer term, but we can see clearly we can cover this debt over just five years which 10 really worked out well. We're getting a 11 significantly lower rate and amortizing the bonds 12 over a shorter period of time, but Amboy Bank's 13 rate that we have been working with, and it's 14 important to be able to negotiate this with them 15 was because of two reasons. 16 One, we wouldn't have to have a 17 significant reserve fund which would have added 18 another million dollars or so to the bonds. it also allows, us if we should choose, to do it 19 20 as a taxable deal. Why that might be important is we're borrowing at such low rates, and if we 22 were so choosing to invest any of the bond money 23 for a period of time, we wouldn't be limited to what we could invest in. 25 So as to be able to get the highest

```
rate we could in an investment of those
  securities, but it worked out well we had the
  opportunity to do it this way as opposed to a
  public offering, which actually wouldn't have
 5
  saved us any real money because of all the
  underwriting costs and costs printing an OS and
 6
7
  getting a rating and all those additional costs.
 8
                It actually is working out better
  for us to do it as a private placement for all
  those reasons. And we felt that the rate that
10
11 Amboy started having discussions with us was a
12
  good rate.
             It's basically the five year treasury
13
  rate which today is 0.8.
14
                So we do anticipate before we
  actually consummate the deal with Amboy, making
  sure that we've tested the market and seen what
16
17
  other rates are out there. So this was important
18
  for us to know where we were starting from.
19
                                          That
                MS. SUAREZ:
                             Thank you.
20
  concludes my questions. Any board members or
21
  members of the public have questions? Hearing
22
  none, do I have a motion?
23
                MR. AVERY:
                            Move.
24
                MR. CLOSE:
                            Second.
25
                MR. BENNETT: Miss Suarez?
```

1	MS. SUAREZ: Yes.
2	MR. BENNETT: Mr. Mapp?
3	MR. MAPP: Yes.
4	MR. BENNETT: Mr. Close?
5	MR. CLOSE: Yes.
6	MR. BENNETT: Mr. Avery?
7	MR. AVERY: Yes.
8	MR. BENNETT: Miss Rodriguez?
9	MS. RODRIGUEZ: Yes.
10	MR. BENNETT: Mr. Blee?
11	MR. BLEE: Yes.
12	MR. BENNETT: Motion approved.
13	MR. LANGHART: Thank you very much.
14	MS. SUAREZ: Next on the agenda we
15	have the Hudson County Improvement Authority.
16	MR. LEE: Hi. My name is Bakari Lee
17	from McManimon, Scotland and Baumann, bond
18	counsel to the Hudson County Improvement
19	Authority with respect to this matter. We should
20	also have with us Kurt Cherry, the CFO executive
21	director of the Hudson County Improvement
22	Authority.
23	As well we should also have with us
24	Jonathan DeJoseph from West New York, Tammy Zucca
25	from Union City, Donna Mauer from Bayonne, Lisa

```
Toscano from Weehawken. These are the borrowers
  for this particular serious of the note pool
  program which I'm aware that you are very
  familiar with.
 4
 5
                (At which time those wishing to
  testify were sworn in.)
 6
 7
                MS. SUAREZ:
                             Mr. Lee, take it away.
 8
                MR. LEE:
                          Thank you, Director.
  Again, you are very aware of this note pool
10
  program.
            It is a note pool program of the Hudson
11 County Improvement Authority designed to enhance
12
  the credit access of the local units of the
13
  County of Hudson into the short term debt market.
14
                The program is back stopped by the
  county guarantee of the county of Hudson which
16
  provides for a much better credit rating than the
17
  local municipalities or local units would be able
18
  to achieve on their own.
                             Again, the borrowers in
19
  this serious are West New York, Union City,
20
  Bayonne, Weehawken and the Weehawken Parking
  Authority and we have representatives from each
22
  relative to that.
23
                The program has been extremely
24
  successful over the years that it has been in
25
  existence. It enables the local units access to
```

```
the short term debt market at a much lower
  interest rate than they would otherwise be
  available to access on their own.
                                      They do not
  need the support of this kind of program for the
  long term bond market because the local units
  benefit from the Municipal Qualified Bond Act,
  which is back stopped by state aid.
 8
                This program has been very
  successful over the years for the short term debt
10 market for the local units. This current issue
11 is a 65,721,000 county quarantee pooled note.
12
  That also includes project notes of the Weehawken
13
  Parking Authority to the tune of about
14 $12,435,000.
15
                The notes are being issued for a
16 serious of purposes relative to each specific
17
             And where applicable, the borrowers
  borrower.
18
  are making the statutory limit required pay downs
19
  pursuant to the Local Bond Law.
                                    So this
20 application is before you in accordance with the
21 Local Fiscal Authorities Control Law as well as
22 Section 80 of the County Improvement Authorities
23 Law.
24
                So we would be glad to answer any
  particular questions you may have including
```

```
relative to any other particular borrowers.
1
 2
                MS. SUAREZ:
                             Thank you, Mr. Lee.
 3
  am somewhat familiar with the pooled notes
  program that Hudson County has. I just have
  probably one general question that I think has
  been ask said previously, and especially in
 6
7
  today's market.
 8
                Given the interest rate environment
  that we've currently in, are the participants,
10
  have they given any serious consideration to
  permanently financing some of these notes just
12
  qiven the amazing rates that we're seeing right
13 now?
14
                MR. LEE:
                          Sure.
                                 The rates that
15 we're experiencing here for this note pool
  program are also extremely low.
                                    They're powered
17
  and realized economy to scale through the program
18
  are beneficial to each individual, each
19 individual borrower under the program.
20
                And thus, they have determined to
  remain with the program notwithstanding the low
22
  interest rates, I should say, in the market.
23 believe we also have Nick Wilenchenski from NW
  Financial and Mike Hanley may also be on from NW
  Financial who are the, as you know, are the
```

```
municipal advisors to the Improvement Authority
  as well as some of the borrowers, so they may
  have a little bit more perspective to share
  relative to the market.
 5
               MR. HANLEY: Each of the
  municipalities have gone out for long term debt
 6
  on a number of issues and continue to do so, but
  they also continue to have needs that are remain
  funded in the current market. So every year or
  every other year, each of those towns are
10
  permanently financing and then replacing what has
12
  been permanently financed the notes.
13
               MS. SUAREZ:
                             Mr. Hanley, how long
14
  did the municipalities technically stay in the
15
            I know it's probably depending on what
  program?
  they're actually pooling, but on average?
17
               MR. HANLEY: You know, it's
18
  different at different times. Usually, notes
19
  stay in the program for a few years and get
20
  permanently financed and back filled with new
  notes. Much like, municipalities all over the
21
22
  state do.
23
               MS. SUAREZ:
                             Absolutely.
                                          That's
  partially where my question was coming from.
  get that all the interest rates are great,
```

```
whether notes or bonding right now, but if
  they're permanently financed sooner rather than
  later while the rates are very low and
  anticipated to go up in the next year possibly.
  That is something that's been contemplated yet by
  some of the municipalities participating in the
 6
7
  pooled notes program.
 8
                MR. HANLEY:
                             Yeah.
                                    I mean, the goal
  of them have anticipated and have done
  permanently financing, just not for all of the
10
11
  temporary stuff that are outstanding. It's a
12
  budget management and debt management issue.
13
                MS. SUAREZ: And Miss Zucca, I think
14
  you had your hand up at one point.
15
                MS. ZUCCA:
                            I did.
                                    Thank you,
16
  Director.
             Mike basically answered how I was
  going to answer. Union City itself, we did
17
18
  permanently finance about 44 million of our notes
19
  back in February of this year. The only ones we
20 have left really are special emergency notes
  which will be paid off in five years or probably
22
  four now because I believe we issued them last
23
  year and we do have minimal bonds, minimal notes
24
  left.
25
                But, yeah, I just wanted to put that
```

```
out there, that, you know, we did take advantage
  of the bond market this year and we funded a big
  portion of our notes. And we do look at them,
  you know, every year during these note programs,
  so just to see what else we can fund.
 6
                MS. SUAREZ: Thank you.
7
  appreciate that.
                     I do not have any other
  questions. Any members of the board or members
  of the public? Hearing none, do we have a
  motion?
10
                                I make a motion.
11
                MS. RODRIGUEZ:
                           I'll second it.
12
                MR. MAPP:
13
                MR. BENNETT: Miss Suarez?
14
                MS. SUAREZ: Yes.
15
                MR. BENNETT: Mr. Mapp?
16
                MR. MAPP:
                          Yes.
17
                MR. BENNETT: Mr. DiRocco?
18
                MR. DIROCCO: Yes.
19
                MR. BENNETT: Mr. Close?
20
                MR. CLOSE: Yes.
21
                MR. BENNETT: Mr. Avery?
22
                MR. AVERY:
                           Yes.
23
                MR. BENNETT: Miss Rodriquez?
24
                MS. RODRIGUEZ:
                                Yes.
25
                MR. BENNETT: Mr. Blee?
```

```
1
                MR. BLEE: Yes.
 2
                MR. BENNETT: And Mr. Light is
 3
  absent.
           Motion approved.
 4
                            Thank you, Director.
                MS. ZUCCA:
 5
                MS. SUAREZ:
                             I think we are sticking
  with the Hudson County Improvement Authority and
 6
  we will turn to the Township of Weehawken Port
  Imperial Redevelopment Project.
 9
                MR. LEE:
                          Hi. Again, Bakari Lee
  from McManimon, Scotland and Baumann on behalf of
10
  the Hudson County Improvement Authority with
12
  respect to this matter. This matter is a
13
  refunding request for the 2011 Port Imperial
14 bonds that were issued the Hudson County
15 Improvement Authority.
16
                It's also my understanding that
17
  there was a meeting between several of our
18
  professionals and your staff regarding this
19 matter, so I believe there is some awareness of
20 it to this point. Essentially, in 2011, the
  Improvement Authority issued bonds for the
22
  finance of the acquisition and construction of a
23
  parking facility in the Township of Weehawken
  adjacent West New York relative to the
  comprehensive Port Imperial Redevelopment
```

Project. 1 2 The parking facility is part of the 3 The debt service on the bonds relative project. to the parking facility would be financed by parking revenues. And as a result of the pandemic and other issues, the revenue stream relative to the parking receipts have been challenged. So this is a current refunding of the 2026, 2031 and 2041 term bonds in the 2011 bond issuance. 10 11 We are also seeking to, and I should 12 also mention that the structure of the 13 transaction is a mirror bond transaction whereby 14 the bond proceeds from the Improvement Authority were utilized to acquire bonds of the township. 15 16 The proceeds of which, the town used to construct 17 and participate in the project of Port Imperial 18 Redevelopment Project. 19 At that time, the township 20 authorized the useful life of 40 years, although 21 the refunded bonds were issued under a 30 year principal amortization schedule. Customarily in 23 these circumstances, we would have been able to do a refunding without an application to the Local Finance Board.

```
1
                So we are here before you because we
2
  are seeking to utilize the full 40 year useful
  life by extending the amortization schedule for
  an additional 10 years. This refunding will
 4
 5
  enable the township to realize annual debt
  service savings of about $505,000 and about
 6
7
  4.9 million dollars over the term.
 8
                MR. HANLEY: If I can step in for a
  second just to kind of give everyone a little bit
10
  of a reminder. This is a really important
  project for the township. It allowed the
12
  township to clear surface parking decks.
13
                This investment created parking that
14
  allowed the ferry to continue to be successful,
  but also allowed for the development of hundreds
15
16
  of units in Weehawken that would not have been
17
  available that were not able to clear the parking
18
  decks.
          The township, because we have a lot of
19
  parking revenue that's part of our system as well
20
  as court revenue and other revenues, things that
21
  are affected by COVID, we were forced to do
22
  special emergency notes last year, and we may
23
  have to come back again for special emergency
  notes related to lost revenue.
25
                So this extension allows us to take
```

```
our debt service from a million dollars a year to
  closer to half a million dollars a year.
  that half a million dollars in savings protects
  us from some of those lost revenues in the short
 4
 5
         It does have incredible present value
 6
  savings over the life, 40 percent.
7
                MS. SUAREZ:
                             Just to highlight that
8
  because you were a little soft spoken. That was
  40 or 45 percent of total savings over the term?
10
                MR. HANLEY: I said 40.
                                         It's
11
  probable lee more like 45.
12
                MR. LEE:
                         Being conservative.
13
  and in excess of three percent might have been a
14 better way to put it.
15
                MS. SUAREZ: Just a smidge over.
16
                MR. LEE:
                          Just a little bit.
                                              So we
17
  also do have Lisa Toscano from the township here
18
            I believe she was sworn in under the
  as well.
19
  prior matter. So with that, we request your
20
  approval.
21
                MS. SUAREZ:
                             Thank you very much.
  I'm glad we highlighted that again. I wanted to
23
  make it crystal clear just how much savings were
  going to be realized here. I am sorry that the
  mayor could not join us. Please tell him he was
```

```
missed and we all expect pictures. And if no
  other board members have any questions or members
  of the public, then we can look for a motion.
 4
                MS. RODRIGUEZ:
                                I make a motion.
 5
                MR. CLOSE: Second.
                MR.
                   BENNETT: Miss Suarez?
 6
 7
                MS. SUAREZ: Yes.
 8
                MR. BENNETT: Mr. Mapp?
 9
                MR. MAPP: Yes.
                MR. BENNETT: Mr. DiRocco?
10
11
                MR. DIROCCO:
                             Yes.
12
                MR. BENNETT: Mr. Close?
13
                MR. CLOSE: Yes.
14
                MR. BENNETT: Mr. Avery?
15
                MR. AVERY: Yes.
16
                MR. BENNETT: Miss Rodriquez?
17
                MS. RODRIGUEZ:
                                Yes.
18
                MR. BENNETT: Mr. Blee?
19
                MR. BLEE:
                          Yes.
20
                MR. BENNETT: And Mr. Light is
  absent.
           Motion approved.
22
                MS. SUAREZ:
                             Thank you all.
23
                MR. LEE:
                          Thank you.
24
                MS. SUAREZ:
                             Next I think we have
25
  the Morris County Improvement Authority coming
```

```
back as old business?
1
 2
                MS. EDWARDS:
                             Hi, Director.
 3
                MS. SUAREZ: Hi, Miss Edwards.
 4
  you going to be presenting today?
 5
                MS. EDWARDS: I will be. I believe
 6
  Matt Jessup will be joining me as well.
7
                MR. JESSUP:
                             Good morning, Director.
 8
                MS. SUAREZ: Is that it? Just you
 9
  two?
10
                MS. EDWARDS:
                             Yes.
11
                (At which time those wishing to
12
  testify were sworn in.)
13
                MS. EDWARDS:
                              Thank you.
                                          The Morris
14
  County Improvement Authority is seeking positive
15 findings today from the board for a two year
16
  extension of the county guaranteed leasing
17
  program which would bring the new maturity date
18
  to July 31st 2023.
                       The program provides funding
19
  for capital equipment to local units within the
20
  county.
21
                U.S. Bank is the lender and provides
  funding based on the county guarantee.
22
                                            The
23
  program has a 30 million dollar not to exceed
         Since the implementation of the program,
  the authority has been able to extend 187 leases
```

```
to local governments totaling over 58 million.
1
 2
                This is a revolving pool, so once
 3
  the participants pay back the lended amounts,
  they revolve and become available again for
  additional leases to local units and school
  districts and fire districts within the county.
  We are seeking a two year approval.
                                        In previous
  years, our last extension was a two year
  approval.
10
               Prior to that, we would come to the
11 board for one year approvals. We are seeking
12 another two year approval. I'm hoping that would
  be okay with the board.
13
                          We do have several
14
  participants that are interested in completing
15 leases this summer. They're all school districts
  preparing for September, so it's a lot of
17
  technology equipment and things of that nature
  preparing for the new school year.
18
                                      And we can
19
  take any questions.
20
               MS. SUAREZ: Do any board members
  have questions or any members of the public?
22
  do not have any additional questions so thank you
23
  both for being available.
24
               MS. EDWARDS: Thank you.
25
               MS. SUAREZ: Do we have a motion?
```

1	MR. BLEE: Motion.
2	MR. AVERY: Second.
3	MR. BENNETT: Miss Suarez?
4	MS. SUAREZ: Yes.
5	MR. BENNETT: Mr. Mapp?
6	MR. MAPP: Yes.
7	MR. BENNETT: Mr. DiRocco?
8	MR. DIROCCO: Yes.
9	MR. BENNETT: Mr. Close?
10	MR. CLOSE: Yes.
11	MR. BENNETT: Mr. Avery?
12	MR. AVERY: Yes.
13	MR. BENNETT: Miss Rodriguez?
14	MS. RODRIGUEZ: Yes.
15	MR. BENNETT: Mr. Blee?
16	MR. BLEE: Yes.
17	MR. BENNETT: And Mr. Light is
18	absent. Motion approved.
19	MS. EDWARDS: Thank you very much.
20	MS. SUAREZ: Next we have the
21	Monmouth County Improvement Authority.
22	MR. DIROCCO: I'd like to recuse on
23	this matter for the record.
24	MR. DRAIKIWICZ: This is John
25	Draikiwicz joined from Gibbons, bond counsel to

```
the Improvement Authority. And also from the
  authority we have Doug Bacher from NW Financial.
  We also should be having joining us the
  representatives from the 10 municipalities and
 5
  the two school districts who will be
  participating in the program, all of which were
  available for our hearing at 1:10 today, so
  hopefully most of them are present.
                                        And if so,
  they can be sworn in at this time.
10
                (At which time those wishing to
11
  testify were sworn in.)
12
                MR. DRAIKIWICZ:
                                 I'm not sure if
13
  this is an opportune time to do a roll call for
14
  the other participants, or you want me to
15
  proceed, Director?
16
                MS. SUAREZ: We can do a roll call
17
  quickly.
           That way if they do speak up or answer
18
  any questions, they're already sworn in.
  would be fine.
19
20
                MR. DRAIKIWICZ: Aberdeen?
                                            Any
  representatives from Aberdeen Township?
22
                MS. MORIN:
                            Hi.
                                 How are you.
23
                   DRAIKIWICZ:
                MR.
                                 Freehold Township?
24
                MR. BACHER: Cathy Campbell is
25
  supposed to be joining us and maybe because we
```

```
are a little bit early, she's not on. Cathy is
1
 2
  the CFO.
 3
                MR. DRAIKIWICZ: Hazlet Township?
 4
                MR. BACHER: We have Robert Phillips
5
  on the list, but I quess because, again, we're
 6
  early, he must not be here.
7
                MR. DRAIKIWICZ: Holmdel Township.
  Holmdel Board of Education? Howell Township?
 9
                MR. PALAZZO: Lou Palazzo for Howell
  Township is here, present.
11
                MR. SANASAC: Ron Sanasac for Howell
12 Township Board of Ed.
13
                MR. DRAIKIWICZ:
                                 Manalapan?
14 Matawan? Neptune City? Neptune Township?
15 Red Bank? Director, would you like me to
             I know a number of participants are not
16 proceed?
17
  present.
18
                MS. SUAREZ: We can get started.
19 And hopefully a few of them will join. I know
20
  this new trend of being early is really throwing
21
  everybody off.
22
                MR. DRAIKIWICZ:
                                  The Monmouth County
23 Improvement Authority proposed to issue its bond
24 \mid \text{in an amount not to exceed } \$23,350,000 \text{ to the}
  public. The proceeds of which will be acquired
25
```

```
not to exceed 23,353,000 of its own bonds.
  proceeds of which will be used to fund the
  purchase of various items of capital equipment
  for 10 municipalities and two school districts in
 5
  the county.
 6
                The Monmouth County Improvement
  Authority bonds will be secured by a general
  obligation lease of each municipality for their
  respective items and they're also subject to
10
  appropriation lease from each school district
11
  participating in the program.
                                  The Improvement
12
  Authority bonds secured by each school district
13
  will also be secured by a quarantee by each of
14
  their municipalities.
                And in our situation, it will be
15
  quaranteed by their respective shared by Township
  of Holmdel and with the Township Howell.
17
18
  are the two municipalities that are quaranteeing
  their school districts the debt. The Improvement
19
20
  Authority's debt will also be secured by a
21
  guarantee by the County of Monmouth.
22
                As part of the application, it
23
  included the list of the items and the equipment
  that was included as well as the ordinances that
  were part of the transaction, and the county
```

```
guarantees were also submitted as well. We are
  hereby requesting positive findings in connection
  with the private financing as well as the two
  municipal quarantees and the county quarantees as
 5
         If you have any questions, we'll be more
 6
  than happy to answer them at this time.
 7
               MR. BACHER:
                             I would add that the
  school leases can be no longer than five years.
  The municipal leases don't go any further than 10
10
  years and each entity's maturity schedule is
11
  designed around that five year and 10 year
12
  schedule and each piece of equipment is amortized
13
  within its useful life.
14
               MS. SUAREZ:
                             Thank you. That's
  helpful.
           So I don't have any questions in
  particular, Mr. Draikiwicz. Last time we talked
17
  about the way that Monmouth County does their
18
  pooled notes. I think it was really helpful for
19
  me in understanding their structure and how they
20
  kind of do that to ensure that each one is kind
  of siloed so that nobody affects the other.
22
               What would be helpful to me if maybe
23
  we can go over, I know not everybody is here, but
  maybe we can go through, I know Howell Township
25
  is here. I think I saw Manalapan pop on.
```

```
can't remember where Miss Morin is from.
  could go over maybe a brief overview of what
  their projects look like or what they're actually
  utilizing the Improvement Authority for in the
  pooled notes program, that would be helpful for
 6
  me.
               MR. DRAIKIWICZ:
                               With that, we have
8
  representatives from Aberdeen. Maybe we can go
  with Aberdeen first.
10
               MS. MORIN:
                            Hi.
                                 Aberdeen Township,
11 Angela Morin.
                  I'm the CFO. Basically, some of
12
  the items that we're going through is mostly for
13
        We have a lot of dump trucks and front end
14
  loaders that we're updating. Also, the play
15
  scapes at our parks. We're improving all of our
  parks and we're putting in new play scapes, new
17
  equipment there also and then the other item is
18
  just our computer equipment.
19
               As you know, we always have to
20
  update every couple years, even the software goes
  and you have to improve the hardware, plus we're
22
  changing our offices around and we're adding more
23
  security items to it, so that's the extent of our
24
  portion of our request.
25
               MR. DRAIKIWICZ:
                                 Thank you, Angela.
```

```
Unless there is questions on them, we have a
  representative of Howell. Why don't we do Howell
  next before we do the Howell Board of Education.
  So Lou, if you can speak on Howell's behalf, that
  would be appreciated.
 6
               MR. PALAZZO: Absolutely. Good
  afternoon.
              The main usage of the program, we do
  use it for our vehicle replacement program to
  replace a lot of the vehicles that are used up
10
  out in the field. Quite a bit of equipment for
11
  our police department to replace vehicles on
12
  their end as well as the mobile computer
13
  replacements that are used in said vehicles, as
14
  well as some other server upgrades and some
15
  upgrades to our 911 system.
16
               As well as some equipment and
17
  vehicle truck replacements for our Public Works
18
  and sewer department. We like using this program
19
  every other year so that we can take benefit of
20
  the county's AAA rating, so it's advantageous to
21
  the township.
22
               MS. SUAREZ:
                             So Mr. Palazzo, how
23
  much is Howell actually going to be using of the
24
  pooled notes?
25
               MR. PALAZZO: As of right now, our
```

```
estimated borrowing is basically 4.63 million.
1
 2
                MS. SUAREZ:
                             Thank you for that.
 3
                MR. PALAZZO: You're welcome.
 4
                MR. DRAIKIWICZ:
                                 Perhaps we can go
5
  to Howell Board of Education next.
 6
                MR. SANASAC: Hello. Ron Sanasac,
  business administrator for Howell Township Public
  Schools. Thank you. We're much the same as some
  of the others, replacing vehicles, two school
  buses. It's a million 517 in toto. School buses
10
11 are 15 year mandatory statutorily have to come
12
  off the road, replacing two 15 year old buses, a
13
  backhoe, a very large field mower, some
14 maintenance vans that travel around the district
15 and do maintenance on the building, technology
  upgrade of six year old technology and snow plow
17
  lequipment and trucks for that. Maintenance of
18
  snow and maintenance of the district. I could go
19
  more specific, if you would like.
20
                MS. SUAREZ: I appreciate that.
  Thank you very much.
22
                MR. DRAIKIWICZ:
                                 Then I think we
23
  have a representative from Manalapan on board.
24
                MS. ADDARIO:
                             Ηi.
                                   Patricia Addario,
  CFO for Manalapan Township. We are only
```

```
financing 620,000 with primarily made up of
  vehicle replacements as well. We're doing four
  pick up trucks with plows, a bucket truck.
  doing a truck lift for the maintenance garage.
 5
               We're doing police SUVs fully
 6
  outfitted with their computers and cameras and
  light package, pick up truck, replacements as
  well and we will upgrade our park with new park
  equipment.
10
               MR. DRAIKIWICZ:
                                 I think we saw
11
  Catherine Campbell from Freehold Township just
12
  join us. Catherine, we are going over the items
13
  that are part of your equipment list.
                                          Some of
14
  the participants have already spoken about their
15 lists. If you can add to that, that will be
16
  appreciated.
17
               MS. CAMPBELL: Good afternoon,
18
            Catherine Campbell with the Township
  Director.
19
  of Freehold. We've been using the Monmouth
20
  County Improvement Authority since 2005 and we
21
  are basically going for some SUVs, some single
22
  axle dump trucks.
23
                It will be the last in our fleet for
  all our snow removal, leaf machines, roll off
25
  truck, stump grinder and some F450 dump trucks
```

```
and an F250 dump trucks.
1
 2
                MS. SUAREZ: That's a lot of dump
 3
  trucks.
 4
                MS. CAMPBELL: Yes.
                                    We have a 233
5
  fleet of vehicles and equipment. We have 36,000
  people, we've got a lot of streets and roads.
  And when we do have a big storm with the dump
  trucks and everything else, we also have a
  recreation department, we have various parks and
10
  that type of thing, so the dump trucks, the big
11
  single axle dump trucks are going to be -- this
12
  will fill out the rest of the inventory and we
13
  would not really need anymore of these big dump
14
  trucks for 10 years or more.
                MS. SUAREZ:
15
                            Understood.
                                          Thank you.
16
                MS. CAMPBELL:
                               Thank you.
17
                MR. DRAIKIWICZ:
                                 I think we are
18
  fortunate to have Bill Antonides join us, and
19
  he's representing the townships of Holmdel and
  Neptune City. Bill, if you are able to go
20
21
  through the equipment for Holmdel and Neptune
22
  City, that would be appreciated.
23
                MR. ANTONIDES: The main thing in
  Holmdel we're looking to get a new aerial
  platform truck. The current truck that we have
```

```
is from 2002, and this truck is really impacting
  the ISO rating and it's causing a lot of concerns
  with the residents because of the insurance for
  their homeowners insurance, almost a thousand
  dollars more per month per resident.
                Some of the other items we're
 6
  getting for Holmdel Township again is DPW packer
  truck. We're replacing a truck from 2003, Public
  Works vehicles. We're replacing a number of
10
         They're going back to 2006 and also some
  them.
11
  trucks, SUVs for the police department.
12
  replacing 2015 and 2017 Ford Explorers.
13
               And for the Borough of Neptune City,
14
  we have a 1989 Pierce fire truck that we're
15
  replacing. It is well beyond its useful life and
  it should have been replaced a number of years
17
  ago and that's the only thing we're looking for,
18
  for Neptune City.
19
               MR. DRAIKIWICZ:
                                 I'm not sure if
20
  there's any representatives from the remaining
21
  governmental units. Hazlet, Holmdel Board of
22
  Education, Matawan, Neptune Township or Red Bank.
23
  Any representatives from those entities, have
  they joined us yet. I see Bob Phillips.
               MR. BACHER: And I think Darren
25
```

```
McConnell is here from Red Bank.
1
 2
                MR. DRAIKIWICZ: Maybe Darren,
 3
  you can go over Red Bank's items with the
  director, that would be appreciated.
 5
                MR. MCCONNELL: Sure. So there's a
  few SUVs on here, most of them are from the
 6
  police department.
                       They're replacing vehicles
  that are about six years old. We have our police
  department on a five year rotation.
10
                Every five years they rotate their
11
  patrol cars down to another department, take them
12
  out of the front line.
                           We have a total of 20
13
  vehicles so we replace three to four every year.
14
  This calls for five vehicles total over the two
  year period covered, so a little less than
16 normal.
17
                And then there's one more for the
18
  construction department which is a Ford Explorer
19
  SUV.
        That's replacing a vehicle that's 14 years
20
  old.
        Theirs last a lot longer.
                                    There's a few
  relatively minor fire department items like turn
22
  out gear and radios on there.
                                  The biggest items
23
  are for our DPW and water utility.
24
                There's an aerial truck that's not a
  fire department aerial truck, but an aerial truck
```

```
working on our traffic signals in town.
                                            We own
  two traffic signals in town, although one is
  contracted with the county for service.
  other one is ours. And for other aerial work is
  downtown for tree trimming purposes.
                The current aerial truck we have is
 6
  completely out of service at this point.
  been out of service for a couple years. And then
  there's a roll off truck that's replacing a truck
10
  that's approximately 15 years old.
                                       That's an a
  roll off for Dumpsters for carting away
12
  recyclables and debris, and then there's a total
13
  of four utility trucks.
14
               They're basically a large pick up
15
  chassis with a cargo box on the back.
                                          Two of
16
  those for our DPW and two for our water utility,
17
  also replacing vehicles that are over 10 years
18
        Also, for our water utility is a hoist
  old.
19
  truck.
20
                That's a little bit larger utility
21
          It has a small crane on the back for
  truck.
22
  working on our lift stations. That vehicle is no
23 longer serviceable. It's about 16 years old.
  And other than that, there's some computer
  equipment on here for both the police department
```

```
and for our fire marshals office and fire
  department for in car computers, tablets for the
  vehicles.
 4
                They're also on a five year
5
  rotation.
             And then there's a fire chief vehicle
  that's replacing one that's eight or nine years
  old for either a Ford Expedition or Chevy
  Suburban for the fire chief.
 9
                MR. DRAIKIWICZ: I think Bob
10
  Phillips is joining us from Hazlet. Bob, can you
  go over some of the items and equipment for the
12
  director as well.
13
                MR. PHILLIPS: Absolutely. We have
14 a pick up truck, an F150 five year life. Most of
15 these vehicles are for DPW. And we have, the
  Stryker gurney retrieval system is for first aid
17
  obviously. A street sweeper, 20 yard Dupree
18
  truck and roll off container, recycling truck,
19
  two dump trucks, one ton utility truck, a one ton
20
  pick up truck and a 72 inch mower and a utility
21
  trailer, all for things that are happening around
22
  town and for DPW.
23
                MS. SUAREZ:
                             Thank you.
24
                MR. DRAIKIWICZ:
                                 Thanks, Bob.
  think we also have Nicole Horvath from Matawan
```

```
able to describe the items for Matawan?
 2
               MR. BACHER:
                             John, I also saw Mike
 3
  Baskin joined.
 4
               MR. BASKIN:
                            We're replacing six
5
  police department SUVs. The ones being replaced
  are all over 150,000 miles. We're replacing some
  emergency service equipment, including a light
  trailer, a towable light trailer with generator.
  That's replacing one that is over 30 years old.
10
  That was actually Army surplus.
11
               Also, a great deal of training
12
  equipment relative to a training center that
  we've established for Hazmat, fire EMS, police
13
14
  and our Public Works facilities and employees.
15
  Personal protective equipment, typical SCVAs and
16
  turn out gear, some radio equipment to replace
17
  hand held radio units that are compatible with
  the county's trunk system in the hands of some of
18
19
  our first responders that do not have them.
20
               Hazmat metering equipment. We have
  one of the three type one certified Hazmat teams
22
  in the county, so we have to keep the Hazmat
23
  metering equipment current. Automated stretchers
  for our ambulances. Unfortunately, what we've
  found out is that these stretchers are currently
```

```
eight years old.
1
 2
                We've discovered that the useful
  life and the warrantee period and willingness to
  maintain that expires in seven years.
  recommend these at seven years, so we're going to
  have to start replacing these on our ambulances
  so this is replacing about three of them.
  have three more to replace that we'll look at in
  a year or two.
10
                Acquisition of administrative
11
  vehicles.
             These are vehicles that are all well
12
  over 10 years old for code enforcement, our
13
  construction department, our administration
14
  department. We are looking at electric vehicles
15
  to replace these, some computer servers and
16
  equipment, typical replacement of older
17
  equipment, two garbage trucks, one an automated
18
  truck on a front loading truck.
19
                The front loading truck is used for
20
  our commercial pick up and condominiums, things
21
  of that nature. The automated pick up truck is
22
  for our residential pick up. They are both
23
  replacing trucks that are 12 years old. Leaf
24
  vacuum replacement.
                      That is, believe it or not,
  one leaf vacuum now, these things used to cost
```

```
about 45,000 to $50,000.
1
 2
                They're now over $110,000 each, so
  that is important to us. We also have a front
  end loader for our sewer department for
  maintaining sewer trails and replacing sewer
  lines and the acquisition of two pick up trucks
  with plows for the sewer department staff.
  Again, both of those trucks are over 12 years old
  that are being replaced.
10
                MR. DRAIKIWICZ:
                                 Thanks, Mike.
                                                 Ι
11
  think Nicole is working things through. I'm not
12
  sure if we have the final representative.
13
  the other ones have spoken, but for Holmdel Board
14
  of Education is the only one that's outstanding.
  Any representative from Holmdel BOE on?
16
                              I'm Anthony Gattini.
                MR. GATTINI:
17
  I'm the director of technology. Since my peers
18
  aren't on yet, I will speak to the IT equipment,
19
  the computer equipment. The majority of the
20
  expenditure is for replacing student Chromebooks
21
  that are five years old or older.
22
                The remainder of the IT computer
23 hardware is for Enterprise servers for faculty
  desktops and notebook computers and for classroom
  projectors that were purchased in 2010, so those
```

```
are like 11 years old.
                           There are three items
  below the IT or computing items that are for
  buildings and grounds.
 4
                I quess our director of plant
5
  operations isn't on the call yet, but they would
 6
  be for maintenance, maintenance purposes I quess,
7
  buildings and grounds, maintenance purposes.
8
                MR. BACHER: It looks like it's two
  tractors and a four wheel drive pick up truck are
  the other three items.
10
                MR. DRAIKIWICZ: I think Michael
11
12
  Petrizzo just joined as well from Holmdel Board
1.3
  of Education.
14
                MR. GATTINI: Hi, Michael. I just
15 went over the computer equipment. I just spoke
16 to the three maintenance grounds tractors.
17
  you want to add something?
18
                MR. PETRIZZO: No, unless there are
19
  any questions.
20
                MR. DRAIKIWICZ: I guess that will
21
  leave Nicole.
22
                MS. SUAREZ: I think she's trying to
23
  call in.
24
                MS. CAMPBELL: Sorry about that.
25
  for Matawan, we're trying to replace for a couple
```

of different departments. The OEM department is looking for a utility truck just with everything going on lately, as well as an LED light tower for safety issues in town. 4 5 Fire prevention, they currently 6 don't have any vehicles to go around town, so we're looking to get them one to two vehicles, lutility trucks as well. Our DPW department is looking for a new dump truck as well as a utility 10 truck and a leaf vactor to replace the existing 11 leaf vactor. 12 Police is looking for a slue of 13 different items, whatever is not going to be 14 replaced or used for the grant for body arm 15 cameras, we're looking for the difference from 16 the grant to outfit all the guys as well as some 17 of the new tasers that they're looking to put in, 18 replacing some license plate readers, the laptops 19 that are in all their vehicles are due to be 20 replaced. 21 What else do we have here. Some 22 random traffic control items, cones and things of 23 that nature as well as a Polaris vehicle because we have the access to the Henry Hudson Trail in 25 town. And the only way they can currently access

```
that trail is on foot, so they're looking for a
  small vehicle for that.
 3
                Boat and water rescue accessories.
  We have a couple of lakes in town.
                                       That will be
  for those things. They're looking to reoutfit
  their squad room because everything that's
  currently there is very outdated and needs to be
  replaced, lockers, furniture, those kinds of
  things, some work stations.
10
                A new work station for the secretary
11
  to the chief, an Elco test machine that they need
12
  which they're only going to use partially funding
13
  for this and partially funding another way.
14
  the fire department is looking for a couple of
15
  sets of gear as well as replacing their STBA
16 bottles.
17
                They're going to do some that are
18
  the 25 year life and some that are the 10 year
19
         That way they're not going out at the same
20
  time and that's everything we have on our list.
21
                             Thank you, Nicole.
                MS. SUAREZ:
22
                MR. DRAIKIWICZ:
                                 Monmouth County
23
  Improvement Authority is proud to say 12
  participants, they're all here.
25
                MR. BACHER: Director, if I can just
```

```
add, this is a program that is only offered at
  the Improvement Authority every other year,
  this is the 15th time we've done it over a period
  of 30 years. And if you go back through the
  history, you can see, it's kind of like repeat
 6
  participants. They put themselves in this two
7
  year schedule and it seems to work out well.
 8
                MR. SUAREZ:
                             I appreciate that very
 9
  much. So I shouldn't say I'm only approving one.
10
                MR. DRAIKIWICZ:
                                Doug, have you been
11
  on board for all 15 programs?
12
                MR. BACHER:
                             I have.
13
                MS. SUAREZ:
                            Who's counting.
  not have any additional questions. Thank you all
15
  for taking the time to explain what you were
  actually utilizing the pooled notes program for.
17
  I do appreciate it. It gives me a good flavoring
18
  of what the various municipalities are utilizing
19
  the Improvement Authority for. Do any board
20
  members or members of the public have questions?
  Hearing none, do we have a motion?
22
                MS. RODRIGUEZ:
                                So moved.
23
                   AVERY:
                MR.
                           Second.
24
                MR. BENNETT: Miss Suarez?
25
                MS. SUAREZ: Yes.
```

```
1
                MR. BENNETT: Mr. Mapp?
 2
                MR. MAPP: Yes.
 3
                MR. BENNETT: Mr. DiRocco has
 4
   recused.
           Mr. Close?
 5
                MR. CLOSE: Yes.
 6
                MR. BENNETT: Mr. Avery?
 7
                MR. AVERY:
                           Yes.
 8
                MR. BENNETT: Miss Rodriguez?
 9
                MS. RODRIGUEZ: Yes.
10
                MR. BENNETT: Mr. Blee?
11
                MR. BLEE:
                          Yes.
12
                MR. BENNETT: And Mr. Light is
  absent. Motion approved.
13
14
                MR. BACHER: Thank you, Director,
  members of the board.
16
                MR. DRAIKIWICZ: Thanks again.
                                                Much
17
  appreciated.
18
                MS. SUAREZ: Thanks all. Next on
19
  our agenda, we have Buena. Do we have everyone
20 here?
21
                MS. COSTIGAN: I think so.
22
                MS. SUAREZ: Do you want to do a
  brief introduction of everybody and we can get
  all non attorneys sworn in?
25
                MS. COSTIGAN: Sure. Thank you very
```

```
much.
         Good afternoon, board members. And my
  name is Angela Costigan. I'm from the law firm
  of Costigan and Costigan, and I am the attorney
  for Buena Borough. Thank you to each of you for
  listening to the application and considering the
  application on behalf of Buena Borough.
 7
               This is an application of
  dissolution of fire district number 1 and for the
  enlargement of fire district number two known as
10 Minnetola. I also want to thank the staff of the
11 Local Finance Board who has been exemplary and
  has provided us with the required assistance.
13
  Thank you again. We appreciate it very much.
14
               This application is very basic.
                                                 Ιt
  meets both of the statutory requirements for
16
  dissolution. First off, we have the statutory
17
  requirements to take care of all of Landisville.
18
  Landisville has certified threw its chairwoman
  and its treasurer that it has no debt, so that
19
20
  part of it is very easy.
21
                In fact, it has approximately
  $300,000 in surplus, which it has accumulated
23
  unfortunately in lieu of obtaining proper
24
  certifications of its firefighters and in lieu of
  properly obtaining required apparatus and in lieu
```

```
of properly obtaining certifications for its
1
2
  firefighters.
 3
                The dissolution and the enlargement
  will provide a significant tax savings for the
 5
  residents of the borough. We have going to
 6
  testify, Michael Garcia.
                             Mike, are you on?
 7
                MR. GARCIA:
                             I am, yes.
 8
                               Mr. Garcia is the
                MS. COSTIGAN:
  auditor for the Borough of Buena and he will
10
  testify as to the tax savings of approximately
  $102,000 for the taxpayers as well as a reduction
11
12
  of the tax rate to 9.52 cents.
                                   That would be a
13
  reduction on the 2021 budget of Minnetola of 16
14
  cents and for Landisville, 10 cents .3.
15
                This is a tremendous benefit to all
  of the taxpayers.
                     The second part of the statute
17
  talks about the immediate assumption of services
18
  necessary for the health, welfare and safety of
19
  the resident. The enlargement plan prepared by
  fire district number 2 which is Minnetola has
20
21
  certified that it will shut down Arbor Avenue
  which is the location of the Landisville building
23
  and it will, however, continue to pay for
  utilities and maintenance of that.
25
                The plan also provides that
```

```
Minnetola does not need any of the equipment and
  has sufficient resources to pay for the
  maintenance of any such equipment within their
           In fact, it is clear that Minnetola can
  budget.
  provide for the residents adequate services,
  since it has done so, since December 14th of
7
  2020.
 8
                That is when the borough shut down
  Landisville due to numerous state violations of
10 health and it continues to be shut down.
11 Minnetola has currently 25 certified
  firefighters, five of which are nine officers.
12
13 It has four trucks and had been adequately
  providing services to the borough for now, almost
15
  seven -- what I want to impress upon the board is
  Buena Borough is seven square miles.
17
                It has approximately 4500 residents.
18
  It no longer needs two fire district.
                                          It will
19
  maximize efficiency and provide for the residents
20
  by having only one fire district and only needs
21
  one fire district. Finally, I do wish to touch
  upon the late opposition that was supplied by
22
23
  Landisville. In fact, I did not receive it until
  late on Monday.
25
                If the board does consider that late
```

```
opposition, then that would be the services
  through Mr. Kemery, I believe, the consultant and
  that would be the response times. I ask that it
  be considered very, very sporadically, since
  obviously, we could not verify anything from the
  documents provided.
 6
                There was no CAD report and also the
  linformation was unreliable and uncertifiable.
  for all these reasons, I request that the board
10
  grant the application for dissolution.
11
               The order of testimony will be Mayor
12
  Zappariello. It will then be the public's safety
13
  director, Joseph D'Alessandro from the borough.
14
  It will be Michael Garcia on the finances, the
15
  borough auditor. It will be Chief Tony Habersham
16 from Minotola and we will conclude with Chairman
17
  Steve LaPorta from Minotola.
18
               MS. SUAREZ:
                             Thanks, Miss Costigan.
19 Before we move forward, I want to take a moment
20 before we swear everybody in. I want to kind of
21
  frame the dialogue a little bit. I think there's
22
  sometimes confusion as to what it is the board is
23 looking at when we get dissolutions coming before
24
  us.
25
               As far as this application, our
```

```
statutory charge is really just to make sure that
  the absorbing entity has the financing to do so.
  We want to make sure there is a local plan to
  provide for services and any obligations. So in
  essence, can fire district number 2 pay the bills
  and provide the services of and for fire district
 6
7
  number 1.
 8
                The board's role here is really not
  to opine on the politics or whether or not the
10
  residents support this dissolution.
11 something to be handled by officials at the local
12
  level. And please remember, this is not the
13 final step.
14
                Should the dissolution be approved
  by the board today because, again, we're looking
16
  truly at the finances and the ability to pay any
17
  debts off as well as perform the services, it
  then goes back to the governing body to make a
18
  final call on the dissolution.
19
20
                So I want to frame that a little bit
  for this conversation so everybody understands
22
  the scope that the board has hear. So going
23
  forward, if everybody can speak up, so we can see
  you on the screen and we can get you sworn in
  before anyone else gives any testimony, so any
```

```
non lawyers will need to be sworn in.
1
2
                (At which time those wishing to
 3
  testify were sworn in.)
 4
                MR. FRATTARELLI:
                                  May I be heard on
5
  behalf of the fire district number 1? Am I going
  to be make an opening statement as Miss Costigan
7
  did?
 8
                MS. SUAREZ:
                             Absolutely. I figured
  we could get through everybody on her side
10
  quickly, then we'll turn it over to your side.
  Then if there's any comments being had going back
11
12
  and forth to address any points or concerns,
13
  absolutely that can happen.
14
                MR. FRATTARELLI:
                                  Okay.
15
                MS. COSTIGAN:
                              Thank you.
                                           I will
  lask Mayor Zappariello to put in a few words.
17
                MR. ZAPPARIELLO:
                                  Thank you. Good
18
  afternoon, everyone. I do have a short prepared
19
  statement. On behalf of the governing body of
20
  the Borough of Buena, thank you to the chairwoman
21
  and the board members and their staff for
22
  reviewing our application for the dissolution of
23
  fire district number 1, Landisville.
24
                The decision to move forward with
25
  the application was not an easy one. There has
```

```
been two fire districts in Buena Borough for as
  long as I can remember.
                           So to move for
  dissolution of fire district number 1 required a
  great deal of thought and planning.
 4
 5
                This decision was not made hastily
  and did take into consideration strong public
 6
  sentiment for and against dissolution.
  Ultimately, the governing body decided that
  dissolution of fire district number 1 would be
10
  the best for our community.
11
                As our solicitor indicated, Buena
12
  Borough is a small municipality consisting of
13
  4500 residents and only seven square miles, and
14
  we truly no longer need two fire districts.
15
  tax base strengths every year, so our residents
16
  bear the burden of increased overall costs.
                                                 Ву
  dissolving fire district number 1, Buena Borough
17
18
  would realize a tax savings.
19
                The expansion of fire district
20
  number 2 would adequately serve the needs of all
21
  of our residents and would provide a seamless
22
  transition. Fire district number 2 has carefully
23
  prepared its expansion plan and its commissioners
  have certified that both from both a financial
  and fire matic standpoint, it is ready to fulfill
```

```
all of the fire suppression duties necessary to
 2
  keep our borough safe.
 3
                In fact, fire district number 2 has
4
  already been providing fire suppression services
 5
  to all of Buena Borough since December 14th 2020
  when the fire service operations of fire district
  number 1 were suspended and continued to be
  suspended due to unsafe and unhealthy conditions
  present in the operations of fire district number
10
  1 which placed all of the firefighters and the
  public at risk.
11
12
                As mayor, I am confident that moving
13
  forward with the expansion plan will better serve
14
  the needs of our residents, and therefore, I ask
15
  the board to grant our application.
                                         Thank you.
16
                MS. SUAREZ:
                             Thank you, Mayor.
17
                MS. COSTIGAN: I have next the
18
  director of public safety for Buena Borough.
19
  That would be Joseph D'Alessandro who is also a
20
  councilman of the borough.
21
                MR. D'ALESSANDRO:
                                  Good afternoon.
22
  Thank you to the chairwoman and the board members
23
  and their staff for hearing our application.
  council decision to apply for dissolution of fire
  district number 1, Landisville, was difficult,
```

```
but essential in order to protect the residents
1
 2
  of the borough.
 3
                As public safety director for the
  borough, I believe the safety of our residents
 4
  and all the firefighters that risk their lives
  for us every day is paramount. For the past year
  and-a-half, the mayor and I have attended
  numerous meetings with members of fire district
  number 1, held public meetings and have spoken to
10
  the public about the safety of our residents.
11
                What I learned is that fire district
12
  1 was operating for a very long time without
13
  properly certified equipment, timely inspections,
14
  firefighter certifications and that the district
15
  had become more of a social venue than a fully
16
  operational firefighting operation.
17
                The quantity and the quality of the
18
  systemic problems with fire district number 1
19
  mandated that the council address and rectify the
20
  issues. Our investigation revealed that very few
21
  state protocols were followed to protect our
22
  residents.
23
                And finally, in November of 2020,
24
  the state cited the district for numerous state
  health and safety violations which led to the
```

```
council decision to close the fire service
  operations of the fire district on December 14th
  2020 which continues today.
 4
               Once the serious health and safety
5
  issues were investigated and cited by the state
 6 and the district was shut down, fire district 1
  began its clean up operation. It took seven
 8 months for the citations to be remedied. And to
  this day, I am still not certain if all the
  firefighters who are on staff at fire district
10
11 number 1 have the necessary certifications to
12
  serve our residents.
13
                Looking forward, counsel will never
14 be certain that safety protocols will be
15 appropriately followed by fire district number 1,
16
  so we cannot place our residents at risk.
  Therefore, for all of these reasons, we request
17
18
  that our application be granted.
                                     Thank you.
19
               MS. COSTIGAN: May I proceed.
                                               Thank
20
        Mike Garcia, you're on the line?
  you.
21
               MR. GARCIA: I am here. I'm Mike
22
  Garcia from Ford Scott and Associates.
23
               MS. COSTIGAN: Mr. Garcia is the
  auditor for the borough. Mike, can you say a few
  words about your savings plan and also your tax
```

```
rate calculation which you conducted.
1
 2
                MR. GARCIA:
                            Yes, I can.
                                           The
  borough has requested that I review the budgets
  of both fire districts 1 and 2 to isolate areas
 4
  of possible savings should a consolidation occur.
  What I was able to determine was about $102,000
  could be saved by consolidating fire district 1
  and 2.
 9
                And that comes from specifically
  about $37,000 worth of redundant administrative
10
11
  office type expenses, like your standard office
12
  expenses, professional services, et cetera.
13
  about 37,000 of outright redundant expenses, once
14
  you consolidate the districts.
15
                Also, we determined that about
  $16,000 could be saved in building occupancy
17
  costs because the plan is that the building that
18
  fire district number 1 currently operates would
19
  be closed and would no longer be a functioning
20
  building, and we determined, we estimated that
21
  the cost to maintain the building while vacant
22
  and not operating would be 50 percent of what was
23
  previously budgeted so that gets us $16,000 worth
24
  of savings.
25
                Also, capital expenditures that were
```

being budgeted by fire district number 1 that would now once again become a redundant expense due to the fact that fire district number 2 has adequate capital supplies. Those budgeted 5 capital items that would be redundant in a consolidated district would amount to about 6 7 \$49,000. 8 The total of those three items, the redundant administrative, the building occupancy 10 and the redundant capital total \$102,684 which amounts to a significant savings in the property 12 tax rate. Based on the 2021 tax rates, that would reduce the tax rate for fire district 13 14 number 2 by six and-a-half cents and it would 15 reduce the tax rate for fire district number 1 by eight 10ths of a cent, so both districts would 16 17 receive a tax savings. 18 As the board is aware, frequently 19 when consolidations are considered, it becomes difficult because one district or one entity may 20 21 be losing where the other one is gaining. 22 this case, both the original participants or 23 constituents of fire district 1 would receive a tax savings as would the fire district number 2 25 constituents, and that would amount to the eight

```
10ths of a cent for fire district 1 would be
  about $8 per year on the $100,000 worth of
  assessment.
 4
               And it would be about $6.50 a year
5
  on the $100,000 assessment in fire district
  number 2. In Buena Borough, the average
  assessment is about $171,000, so on the average
 8 residential assessment, it comes out to about $15
  a year for fire district number 1 and about $109
  a year for fire district number 2.
11
               MS. COSTIGAN: Thank you, Mr.
12
  Garcia.
           I just have a quick question for you.
13
  When we look at your savings plan, you talk about
14 building and maintenance, correct?
15
               MR. GARCIA:
                            Yes.
16
               MS. COSTIGAN: Building and
17
  maintenance savings, that would come to $10,127?
18
               MR. GARCIA:
                             That's one, yes,
19 building and maintenance, $10,127. Also, the
20
  utility is line litem is in my analysis for
21
  occupancy costs. I also calculate about a $6,000
22
  savings for utilities when the building is
23 vacant.
24
               MS. COSTIGAN: So to be fair, if
  there's a $6,000 savings, there would also be a
```

```
$6,000 increase that Minotola would have to pay
  for utilities to keep the lights on, correct?
 3
                MR. GARCIA:
                             True.
                                    Well, when we
  look at an annual budget, it wouldn't be an
4
 5
  increase.
             It wouldn't be a $6,000 increase.
                                                  The
  original costs for utilities in fire district
  number 1 was 12,000. Now, with a vacant
  building, it would be 6,000.
 9
                MS. COSTIGAN: Okay. Thank you.
  And for the maintenance of the building itself,
11
  to basically shut the building since they've
12
  certified that they don't need it, that would be
13
  $10,127 by your estimate, correct?
14
                MR. GARCIA: Correct
15
                MS. COSTIGAN: So that would be
  roughly $16,000 that would have to come out of
17
  their current budget, correct?
18
                MR. GARCIA: Out of fire district
19
  number 2's current budget in 2021.
                                       If this
20
  dissolution was to happen today, remember, my
21
  numbers are on an annual basis.
                                    If this
22
  dissolution was to happen today, fire district
23
  number 2 would need an additional $10,000 for
  building maintenance but we're halfway through
25
  the year, so it would be an additional $5,000 to
```

```
get through the end of the year.
1
 2
                So as part of this application, my
 3
  understanding is that fire district number 2
  would assume the assets of fire district number
  1. So fire district number 2 would be able to
 5
  amend their budget to increase line items to
  reflect the fact that their fire district number
  2 costs are higher.
 9
                Yet, the consolidated town's cost
10
  will still ultimately be lower because fire
11 district number 1's budget would be going to
12
  zero.
13
                MS. COSTIGAN: Understood.
14
  you very much, Mr. Garcia.
15
                MR. GARCIA: You're welcome.
16
                MS. COSTIGAN: May I proceed?
17
                MS. SUAREZ: Yes.
18
                MS. COSTIGAN: I next have Chief
19
  Tony Habersham from Minotola. Chief, are you
20
  there?
21
                MR. HABERSHAM: Yes. Good
22
  afternoon.
              How are you?
23
                MS. COSTIGAN: I'm fine.
                                          Thank you.
24
  Chief, would you like to give a brief statement
25
  of your plan.
```

```
MR. HABERSHAM: Yes.
                                      I'm the chief
1
2
  of the Minotola Fire Company located in Buena
           We have currently 26 members which
  Borough.
  staff four apparatus which are yearly tested
  according to NFPA and state regulations.
  now handling all calls in the borough since the
  shutdown of Landisville took place in December.
  We've had no issues.
 9
                I see no issues in the future moving
10
  forward.
            Operationally, we're moving on as we
  always have. There's been no disruption in our
12
  day to day operations of handling the entire
13
            We currently do not need any additional
  apparatus to handle the business we've been
14
15
  handling. We've been doing it with what we have.
16
               Everything seems to be working as
17
  well as it possibly could, so in my eyes this
18
  transition would be seamless and non disruptive
19
  to the operational side of the Minotola Fire
20
  Company. Next to me, I have my head of
21
  commission. He can speak on the budgetary
22
  issues, but operationally, this is just a smooth
23
  seamless transition which is basically day to day
  for us and there will be no changes in anything
25
  we do. No policy changes, no operational
```

```
We can fully handle the district as
  changes.
 2
  we've been doing.
 3
                MS. COSTIGAN:
                               Thank you.
                                           Chief,
  can you give us a little information on mutual
 5
  aid?
 6
                MR.
                   HABERSHAM: Our mutual aid plan
  has been what it has been for the bureau for as
  long as I can remember being in this borough.
  For house fires, there are mutual aid companies
  that come into the borough which is normal for
10
  any fire company.
11
12
                You get a structure fire, a dwelling
13
  fire, you do rely on outside agencies coming in
  with other specialized apparatus and manpower.
  That has been in the past and that continues
15
  today and will always continue in the future.
17
                As like I said, every fire agency
18
  relies on mutual aid at some level no matter how
  big you are, how small you are. We have signed
20
  mutual aid agreements in place with surrounding
21
  fire companies.
                   It's worked smooth.
                                         We work
  with them, they come to us and that will continue
23
  in the future.
24
                MS. COSTIGAN:
                               From a structural
  standpoint, what are the benefits of mutual aid?
```

```
MR. HABERSHAM: Benefits of mutual
1
2
  aid, you get more manpower because during a house
  fire, especially if it's long term, there are
  proper work rest periods that are set up when
  members are supposed to have rest during the work
  period of a fire, so you can get more manpower on
  scene, so you can keep people doing the tasks at
  hand while you have people in rehab where they're
  supposed to be so you don't wear out all your
10
  manpower.
11
                You can also bring in specialized
12
  equipment that the borough, we don't have on hand
13
  and we don't necessarily need on an every day
  basis, which would not justify purchasing, but if
14
15
  you need it, you can reach out to another mutual
  aid company that has that piece and it can come
17
       Same thing with our piece.
18
                We have a ladder truck that
19
  technically sometimes is called to leave the
20
  borough. When that does happen, I have three
21
  other pieces of apparatus and other manpower in
22
  my station cover the borough.
                                  We leave our
23
  ladder truck goes with crew four.
                                      The rest of
  the members report to the station, cover the
  borough until that piece is released and back to
```

```
the station.
1
 2
                It keeps everybody from spending
 3
  dollars on things you don't necessarily need, but
  if you need it one time here or there, you can
  request it from another agency and the dispatch
  center will send it.
 6
 7
                MS. COSTIGAN:
                               Thank you, Chief.
                            Chief, if I may, before
 8
                MS. SUAREZ:
  we just move forward, one quick question, I hear
  what you're saying. There's about 26 current
10
11 members of your fire department. So if this
12
  dissolution actually moved forward, how would
13
  that work?
14
                Is there some sort of plan in place
  to either, I guess, absorb the volunteers from
  fire district number 1 or how does that look?
                                                   Ι
17
  don't want to see certified firefighters just
18
  languishing out there.
                           I'm always thinking
19
  through LOSAP, right.
20
                So if some of these members have
  already been involved with that but aren't fully
22
  vested, how would that work? I mean, I know
23
  obviously you can drag a horse to water, you
  can't make it drink. If they don't want to
  become volunteers of fire district number 2, I
```

```
understand how that works, but what's the game
  plan there?
 2
 3
                MR. HABERSHAM:
                                Yes.
                                      Whatever may
4
  or may not happen with Landisville, any member of
  the public has the opportunity to come fill out
 6
  an application to join the Minotola Fire Company.
7
  We have an application that gets filled out.
 8
                There's a background check and those
  members that passed the background check or have
10
  to go to school are sent there and then they can
  be voted in as members of the fire company.
12
  have an open door policy, so it's not going to be
13
  those members aren't allowed to come here.
  They're going to fill out the application process
14
15
  and go through the same process, that every
  member has in the past come through.
17
                MS. SUAREZ: So they would still
18
  have to go through schooling all over again even
19
  if they've already done it?
20
                MR. HABERSHAM:
                                The non certified
  firefighters, if there are any, would have to go
22
  through schooling to meet state minimum
23
  requirements. Anybody that already has state
24
  certification would fill out the application, go
  through the background process, but they do not
```

```
need the schooling part.
1
2
                Their level, after that point, would
  be being acclimated to our equipment, getting
  familiar with our equipment, how to operate it,
  et cetera and that would be it, but they're all
 6
  welcome to apply if they wish.
7
                MS. SUAREZ: Miss Costigan, is there
8
  anyone else from your side?
 9
                MS. COSTIGAN:
                               Yes.
                                     We have
  Chairman Steven LaPorta of the fire district
10
             Mr. LaPorta, are you there?
11 number 2.
12
                MR. LAPORTA:
                             Yes, I am.
                                           Thank you,
13
  Angela.
14
                MS. COSTIGAN: Would you like to
  give a statement?
16
                MR. LAPORTA:
                             Yes.
                                    Thank you to the
17
  chairwoman and members of the board for your time
18
                                   There have been
  today in hearing this hearing.
19
  several things that you've heard in regards to
20
  fire district 2 and the Minotola Fire Company.
  They've been covering the borough since 12/14 of
22
  2020 with the suspension.
23
                You've heard this from everybody
  that's spoken before, but I'd like to give you a
  low down and the understanding of the fire
```

```
district where we come from. Fire district
  number 2 consists of five commissioners. We have
  very high level of service.
 4
                We mandate and ascertain that all of
5
  our firefighters have at least firefighter 1
  within their first year of being here and all the
  line officers have exceeded or meet the minimum
  requirements set forth in incident management and
  what they need.
10
                We're prepared to handle all the
  lutilities and costs as discussed with Mr. Garcia.
12
  We can find revenue in our budget by foregoing
13
  other expenses to handle those costs should they
14 be necessary for it.
15
                As we have talked about it, the fire
  district number 2, we do not intend to use the
17
  equipment or trucks of fire district number 1,
18
  but we plan to store them in the Landisville
19
  building until we can determine their overall
20
  condition and compatibility.
21
                Fire district number 2 is going to
22
  be responsible for related expenses to the
23
  building equipment and other carrying costs.
  we acknowledge that we will not be seeking the
  additional funds. As I stated, we'll find a
```

```
revenue in the budget by foregoing other
  expenses, and once fire district number one's
  building equipment trucks are evaluated, they
  would either be sold or incorporated into the
  operations of fire district number 2 as needed.
                You've heard the fire chief speak
 6
  about the number of officers and everything that
  we have in terms of that. That number is, the
  membership application, any member from
10 Landisville or anywhere else, as the chief said,
11 would have the opportunity of submitting an
12 application.
13
                We have a process where it would go
14
  through interview panel, background check and
15
  anybody else would be eligible as would any
  member of the public would be.
17
                MS. COSTIGAN: Mr. LaPorta, have you
18
  had an opportunity to review anything from
19
  Landisville in its recent opposition?
20
                MR. LAPORTA: In regards to the
  letter that was received late Monday?
22
                MS. COSTIGAN: Yes.
23
                MR. LAPORTA:
                             Yes, I have had an
24
  opportunity to read that.
25
                MS. COSTIGAN: Do you have a comment
```

on that for the board members? 1 2 MR. LAPORTA: Yes. Some of things I would like to make note on there is in regards to it, it's very minimal detail as described in the appendixes that were attached. It doesn't contain a full CAD report. One of the things I'd like the board to be aware of is Atlantic County Fire and EMS has a known issue with Gloucester County Emergency Response Center and their dispatching and radio communications. 11 It's a well known fact. 12 meetings, elected officials have been there. 13 what the issue is we have, there's several times 14 that any Atlantic County EMS or Fire will sign on 15 and several minutes can go by and we don't get an acknowledgement. 16 17 Several times we can sign on the 18 air, arrive on location, put ourselves out and 19 not get acknowledged on it. So in looking at the 20 appendix, I can understand what was broken down with the dates, the address and the incident. And when you sit and you look at what was 23 provided in terms of the dispatch time and the arrive time, for the 57 calls that were provided to us there, there's one call in there that has a

```
20 minute time on it and that was for a CO alarm
1
  in an apartment complex.
 3
                But including that time there, the
4
  average response of Minotola Fire Company being
  on scene for those 57 calls is 8.911 minutes.
  do believe that falls under the NFPA, what they
          If we were to take out that one 20 minute
  call which was in an apartment complex where we
  were not given the correct apartment number which
10
  took us a while to find it, if we remove that one
11
  call, our average response time is 8.659 minutes.
12
                In addition to it, Miss Costigan,
13
  something else that I did is the response listed
14
  the first truck and staffing just for the first
15
  truck.
           If the CAD report was included, it would
  also show second due apparatus if somebody else
17
  signed on the air, different things like that.
18
                So going through our records
19
  management system, looking at these same 57
20
  calls, I went through and I got the total
21
  responding member count for all 57 of these
22
  calls.
          When I totaled these numbers up and I
23
  conducted an average, the average members
  responding to these calls is 9.3965 members.
25
                And I do believe that average number
```

```
of those members responding is even larger than
  their current member list that was just provided
 3
  to the borough.
 4
               MS. COSTIGAN: The current member
5
  list being nine members?
 6
               MR. LAPORTA: If that's the number
  that we provided. Our average response of
 8 members on these 57 calls is higher than their
  current member list provided.
10
               MS. COSTIGAN:
                              Okay. Have there
11 been any problems in Minotola had serviced the
12
  entire borough for all these seven months?
13
               MR. LAPORTA:
                             In regards to what do
14 you mean problems, Miss Costigan?
15
               MS. COSTIGAN: Arrival time,
16 manpower?
17
               MR. LAPORTA: No.
                                   We've been doing
18
  it just as we've been doing since December 14th
  2020 and for several years prior to that, we've
20
  just been doing what's expected of us as the fire
  company, ma'am.
21
22
               MS. COSTIGAN: Thank you. Do we
23 have any questions?
24
               MS. SUAREZ: I'll reserve any
25 further questions until after Mr. Frattarelli
```

```
1
  presents his side.
 2
                MS. COSTIGAN: Thank you.
 3
  completes our witness list for Buena Borough.
 4
                                  Good afternoon,
                MR. FRATTARELLI:
5
  everyone.
             I'm Peter Frattarelli.
                                      I'm the
  solicitor for fire district number 2. I'm going
  to be presenting the basis for our opposition
  today. Testifying for us will be Keith Kemery
  who is a consultant for the fire district as well
10
  as the Chief Kenneth Barbagli and we also are
  going to have testimony from Charles Gazzara.
12
                Look, we realize this is an unusual
13 hearing and dissolution applications oftentimes
  are presented either as a consolidation or as
15 kind of a fait accompli. But, you know, this is
  a unique situation. We have a fire station
16
17
  that's been around for literally 100 years.
                                                 The
  fire district has been around for 60 years.
18
19
                And the reasons it's being closed,
20
  I'm not going to spend a lot of time today, I
21
  want to focus on what the director indicated, the
22
  lissues that are at hand. In our view, the issues
23
  are quite suspect, the number of the violations
  that they cited and allegedly closed us for
  happen in many fire district.
```

```
1
                There were a number of paperwork
 2
  errors we admit to. But as you saw in the
  opposition, the reply that was sent in by Miss
  Costigan on June 15th, fire district 2 had many
 5
  of the same problems, missing certifications,
  also individuals had to be stepped down from
7
  their roles.
 8
                But I want to focus on the two
  lissues that are really an issue with the statute.
10
  Certainly we agree there is no issue in terms of
11
  them taking over our debt because we have no
12
  debt. We have a terrifically run fire district
13
  that built up a surplus of over 300,000 and I can
14
  certainly present testimony to this if necessary,
  but we haven't had a loan or a bond in literally
15
  anyone's memory, so it's been well run.
17
                So we agree, there's no debt issued
18
  here because there is none. But what is
19
  important is the second issue. The expansion
20
  plan does have to adequately provide for the
21
  protection of the residents, their health, safety
  and welfare, and we don't think their expansion
23
  plan does. Originally their expansion plan was a
  little bit vaque. Now, it's clear.
25
                As you heard it today, they want to
```

```
shut down Landisville Fire Company and we think
  that's a real mistake here. That will not
  provide adequate protection to the residents.
  Landisville Fire Company, as I said, has been
  around for about 100 years, decades of protecting
  the residents.
               We heard no outcry of wasted
  resource or issues. And although they shut us
 8
  down, we're not sure if they have the legal
10
  authority, where we are here today is to decide,
11 is this expansion plan going to adequately
12
  protect it. We think it will not and we think
13
  that's clear from the operational data that we
14 presented.
15
               First, I'm going to present the
  testimony of Keith Kemery. We provided that
  information earlier this week simply because it
17
18
  took us several months to get that information
19
  available to us in OPRA requests.
                                      Again, this
  application was filed in late April. It took us
20
21
  time to get this data together.
22
               Mr. Kemery will explain his
23
  experience, has reviewed that operational data.
24 And he, as well as the chief, have serious
  concerns about whether or not Minotola Fire
```

```
Company will be the one that can adequately
 2
  protect the borough.
 3
                And what we focused on is the data
  from when the Landisville Fire District closed in
  January up and through May. There were 57 calls
  as you just heard. Certainly that CAD data is
              They want to question the data.
  available.
  certainly can question Mr. Kemery's experience
  and knowledge in terms of reviewing and analyzing
10
  that data.
11
                And what's important are both
12
  response times and staffing levels.
                                        The response
  times showed well over half of the calls had a
13
14
  response time of 10 minutes or more of the
15
  staffing, where there was staffing data
16
  available, there was less than the required NFPA
17
  number of four members.
18
                Mr. Kemery will explain this average
  that he just gave of you of 9.39. That could be
19
20
  many minutes, half an hour, an hour later when
21
  someone may have joined or signed on.
22
  important is what fire apparatus shows up, how
23
  many people were on it and how quickly they get
  there, and that's what Mr. Kemery will explain.
25
                We'll also explain, again, the
```

```
mutual aid is a terrific thing. We agree, we
  rely on the outside borough's for mutual aid.
  But mutual aid is not the be all and end all
  because if another town is tied up with another
  incident in their town, their obligation is to
  their residents, just like Minotola and
  Landisville Fire Company's obligation is to their
  residents.
 9
                So if they can't respond, you know,
  lagain, we had a situation where both Minotola and
10
11 Landisville, for a number of years, were able to
12
  respond to calls within the borough.
                                         There were
13 issues with Landisville getting a full crew out
14
  just like there were issues with Minotola.
15
               But having two stations within the
  borough of being able to respond with two or
17
  three firefighters gives you an adequate team and
18
  that worked well for many, many years and we see
19
  the real risk, as Mr. Kemery and Mr. Barbagli
20
  will explain.
21
               Lastly, we'll also explain the
22
  location of Landisville Fire Company is actually
23
  central and more centrally located with respect
  to certain areas of the town. We think they're
  most at risk or most, if there is an issue, could
```

```
lead to a potentially serious issue. We'll
 2
  explain that well.
 3
                And look, the idea that nothing has
  happened in five months, I mean, that's great,
  but not that's where you want to be. You want to
  put together an expansion plan saying we got away
  with it for five months. We skated and avoided a
  problem, but we really should not rely on that.
 9
                A couple other things. One is, they
  brought up, they didn't bring them up today, they
11 brought them up in their application about the
12
  supposedly economic problems we were having.
13
  There were three minor errors in an audit, I
14
  think clearly explain those as minor issues
15
  involving use of a credit card and a claim and
  certification.
16
17
                And the fact that they're minor,
18
  can tell you why they're minor because fire
19
  district two is doing the exact same thing up
20
  until any notice that Fire District 1 was doing,
21
  and they corrected it just like we have.
22
  respect to the safety issues, Mr. Kemery is
23
  working intensively on those.
24
                I want to strongly disagree with one
  of the statements that was made. It did not take
```

```
us seven months to correct these problems.
1
  vast, vast majority were corrected many, many
  months ago as soon as they were brought to our
  attention.
 4
 5
                Some of the paperwork and training
 6
  issues just required some time to get them
             But more importantly, PEOSH's final
  scheduled.
  review, which we got on June 16th, we were more
  than ready several months ago at least.
10
  was just not available because of their busy
  schedule with everything that's going on.
11
12
                And lastly, again, I do want to
13
  point, we're not trying to pinpoint fingers, but
14
  the idea that fire district 2 is terrific. Fire
  district 1 is terrible is just a gross over
15
16
  statement.
             The reply that Miss Costigan sent in
17
  has a statement attached from fire district 2,
  again, which I think, very honestly lays out some
18
19
  of the same exact issues we had, issues where
20
  they didn't have certifications.
21
                Someone had all their training, but
22
  they didn't have a copy of their certification in
23
  the file.
             We have one person left in that
  situation. I think, from their opposition, there
  were 16 where they have that going on. Other
```

```
issues as well where, again, the same financial
1
 2
  errors, also the level of crews.
 3
                Again, they're pointing to us for
  these issues and including the fact that they
 4
 5
  removed some firefighters were stepped down
  because they didn't have the training, the same
  thing we did. They called them errors for us.
  They can't have it both ways.
                                  There can't be
  errors for us and just good practice for fire
  district 2.
10
11
                One last thing I want to point out
12
  in terms of the dialogue. Yes, there was a lot
13
  of dialogue early on, but there has been
14
  absolutely no dialogue as to shutting down
15 Landisville Fire back in December before it
  happened, considering a consolidation of the fire
16
17
  districts because frankly, my five commissioners,
18
  they're not wed to their jobs.
19
                Their loyalty is to make sure this
20
  fire station stays open. They're more than
21
  willing to consider a consolidation, had they
22
  even been asked or even been approached.
23 never were.
               They simply were and issues about
  their fire expansion plan about whether we had
25
  adequate equipment, was the equipment in good
```

```
1
  shape.
 2
                They could have come and asked us.
  They could have asked us for this information,
  could have asked whether we thought you could
  adequately protect the borough with one fire
  station, instead of unilaterally deciding that
 6
  they didn't need to.
                         So with all that, I'll
  present my witnesses.
 9
                MS. SUAREZ:
                             Mr. Frattarelli, were
10
  they already sworn in?
11
                MR. FRATTARELLI:
                                  They were sworn in
12
  at the same time.
                     I'm going to have Keith Kemery
13
  testify. If it's all right with the director,
14
  I'm going to just do a question and answer to
  move this along. Mr. Kemery, how are you still
15
  associated with the fire district?
16
17
                MR. KEMERY: Consultant with the
18
  fire district on its operation matters.
19
                MR. FRATTARELLI: Can you briefly
20
  tell us what your experience is.
21
                MR. KEMERY: I've been a member of
22
  the fire service since January of 1980.
23
  Virtually all of my service time has been in a
  fire suppression capacity within volunteer or
25
  combination departments in suburban communities
```

```
as well as a representative and consulting.
1
 2
                MR. FRATTARELLI: And you're a lay
 3
  representative for what organization?
 4
                MR. KEMERY: The International
5
  Association of Firefighters?
 6
                MR. FRATTARELLI:
                                  And how many fire
7
  districts does that involve?
 8
                MR. KEMERY: Numerous.
                                        Too many to
  count, but it's fair to say I've interacted and
  worked with the fire districts in the north,
10
11
  central and south portions of the state.
12
                MR. FRATTARELLI:
                                  Based upon your
13
  experience, are you familiar with the
14
  requirements of the NFPA for responding to calls?
15
                MR. KEMERY:
                             I am.
                MR. FRATTARELLI: So what did fire
16
17
  district 1 ask you to do?
18
                MR. KEMERY:
                             Initially, fire
19
  district 1 asked me to serve as the point of
20
  contact and work with PEOSH and the Department of
  Labor relative to their inspection and safety
22
  issues that were noted.
                           Subsequent to that, I
23 have been working with analysis, the operational
  information concerning the issues at hand
25
  currently.
```

```
MR. FRATTARELLI: Let's start with
1
 2
  the violations. There was one by Department of
  Labor and one by PEOSH, correct?
 4
                MR. KEMERY: Yes.
 5
                MR. FRATTARELLI: Have those been
  corrected?
 6
 7
                MR. KEMERY: All violations have
8
  been corrected, yes.
 9
                MR. FRATTARELLI:
                                  The Department of
  Labor, when has those been corrected?
11
                MR. KEMERY: Prior to February of
12
  this year when I was retained.
13
                MR. FRATTARELLI: How about the
14
  PEOSH issue? When were those corrected?
15
                MR. KEMERY: All PEOSH issues were
  confirmed through interaction with PEOSH on or
  about May 11 of this year to be resolved.
17
  were actually resolved sooner than that, but that
18
  determination couldn't be made until certain
19
20
  clarifications were received by me from PEOSH as
21
  to what exactly their interpretation of the
22
  standard was. Once I received the information, I
23
  confirmed our people measured up to that standard
  and we knew we had the issues resolved.
25
                MR. FRATTARELLI: For the
```

```
commission's benefit, we attached in our
  opposition all of the information including that
  many, many of those violations were resolved as
  far back as February. That's Exhibit F.
  last letter from PEOSH was dated June 16th.
  did it take so long, and if these were corrected
  earlier?
7
 8
               MR. KEMERY: Just workload with
  PEOSH. Only had X number of people to deal with
10
  the issues throughout the state. Although on May
11 11th, I advised them they we were ready and
12 available.
             The earliest opportunity was in June
  and it took several weeks for them to process and
13
  move the close out letter confirming all issues
  were addressed through their chain of command.
16
               MR. FRATTARELLI:
                                  You also said you
17
  were tasked to review some operational data.
18
  that correct?
19
               MR. KEMERY:
                             Correct.
20
               MR. FRATTARELLI: What operational
  data did you review?
22
               MR. KEMERY: Specifically, response
23
  information for calls for service, while the
  Landisville Fire Company was out of service.
25
               MR. FRATTARELLI: Where did you get
```

```
that information?
1
 2
                MR. KEMERY:
                             Through the dispatch
  information provided through the Gloucester
  County Communication Center, the communication
  center that handles the emergency communication
  for fire and EMS in the City of Buena Borough.
 7
                MR. FRATTARELLI:
                                   There was a CAD
8
  file.
          Is that the type of thing you reviewed?
 9
                             Exactly.
                MR. KEMERY:
10
                MR. FRATTARELLI: And how did you
11
  get that information?
12
                MR. KEMERY:
                             The information was
  received through our Open Public Records Request.
13
14
                MR. FRATTARELLI: And did you
  prepare a chart of the summary?
16
                MR. KEMERY:
                             I did.
17
                MR. FRATTARELLI: And that was
18
  attached to the July 12th letter; is that
19
  correct?
20
                MR. KEMERY:
                             It was.
21
                MR. FRATTARELLI: Is this a copy?
22
                MR.
                    KEMERY:
                             It is.
23
                MR.
                    FRATTARELLI: Just briefly tell
  me what you were trying to capture when you
25
  summarized the data.
```

```
Well, again, the date
1
                MR. KEMERY:
  of the incident, the location for purposes of
 2
  reference, the type of incident and the operative
  times, the time of dispatch, the time equipment
  responded and equipment that arrived.
 6
                For purposes of the chart, it wasn't
  possible to list every apparatus.
                                       In some
  instances, there were multiple apparatus
  responding but the true capture was what's the
  first truck, when does the first actual fire
10
11
  apparatus arrive on scene after being dispatched.
12
                My experience, as a firefighter
13
  throughout the years is, basically, the first
14
  truck is staffing and its ability to effectively
15
  engage the situation and respond accordingly is
  going to set the stage for the success for
17
  failure potentially of the overall operation.
18
                Also within the chart, is whether or
19
  other companies responded with Minotola to the
20
  incidents within the borough.
                                  I would also like
21
  to note that, again, it's personal experience,
22
  but that on at least one occasion in my career, I
23
  responded with a less than fully staffed
  apparatus to what was an automatic alarm call.
                We arrived to find a working fire.
25
```

```
And by the time that incident was concluded, all
  three of us on the first arriving apparatus had
  sustained injuries because the work didn't go
  away, we just didn't have the people to get
  everything done the way we want to get it done,
  sometimes working beyond our capacity.
 6
 7
                That obviously was a hazard to us
  and it translates into a hazard to the people
  that are calling for help when 911 is called.
10
                MR. FRATTARELLI:
                                  So I want to focus
11
  on two issues, staffing and response time.
12
  You've heard, obviously, the borough has
  indicated by district 2, they feel they can
13
  adequately protect the residents of the borough
14
15
  with just Minotola Fire. Do you agree with that?
16
                MR. KEMERY:
                             The history and review
17
  of these responses does not reflect that
18
  representation, no.
19
                MR. FRATTARELLI:
                                  What is it about
20
  the staffing that you saw in the data that
21
  concerned you?
22
                MR. KEMERY:
                             Initially, there was 26
23
  calls with staffing data. Of those calls,
                                              15
24
  calls had les than four firefighters on the first
25
  responding apparatus.
```

```
1
                MR. FRATTARELLI:
                                  Why is four
 2
  significant?
 3
                MR. KEMERY:
                             Four is the recommended
  minimum established by the National Fire
 5
  Protection Associates for each responding
  apparatus, four fully trained firefighters.
 6
 7
                MR. FRATTARELLI:
                                  You heard some
8
  testimony earlier about the fact that there was
  an average of 9.3 I think it was that eventually
10
  showed up. Can you explain what the significance
  of that is?
11
12
                MR. KEMERY:
                             Again, when you have
13
  the report is being done at the conclusion of an
14
  incident, it reflects all responding members.
  doesn't necessarily reflect, did you have nine
15
  people on the first rig or did you have three
17
  people on the first responding apparatus and the
18
  other six arrived.
                       Maybe some of them even
19
  arrived as the apparatus was backing back in
20
  quarters upon the return from the incident.
21
                And again, it equates to sending
22
  a -- you got your nine people, but again, if only
23
  three of them were on the first truck or the
  trucks responding, three or half of them, that's
  like sending half a football team on the field,
```

```
executing the play and sending the other half in
  while you're halfway engaged into the play.
 3
  just doesn't work.
 4
                MR. FRATTARELLI:
                                  The other issue I
5
  wanted to ask you about was response time.
 6
  you do an analysis to response time?
 7
                             Yes, I did.
                MR. KEMERY:
 8
                MR. FRATTARELLI:
                                  What did that
  analysis show of the data from January to May?
10
                             36 calls had response
                MR. KEMERY:
11
  times of 10 minutes or more.
12
                MR. FRATTARELLI: Out of that total,
13
  how many calls?
14
                MR. KEMERY:
                             57 calls survey.
15
                MR. FRATTARELLI:
                                  Is 10 minutes
  acceptable in your view?
17
                MR. KEMERY: It's right there toward
18
  the outer range of the NFPA standard, but again,
19
  that's a lot of time for somebody not to be
20
  breathing or a lot of time for somebody to be
21
  trapped in a fire or to allow fire to spread
  while you're still getting there.
22
23
                MR. FRATTARELLI: A couple other
  questions on this. Did you also analyze the data
  for the locations of the fires?
```

```
I did.
1
                MR. KEMERY:
 2
                MR. FRATTARELLI: What did that
 3
  analysis show you?
 4
                MR. KEMERY: My analysis showed that
5
  due to its central location of the borough of the
  responses in 2021, Landisville Firehouse was
  actually the closest firehouse to 55 percent of
  the calls.
              The Minotola Firehouse was the
  closest firehouse to 29 percent of the calls.
10
                11 percent of the calls, the
11
  response time was even. Both fire districts had
12
  the same response distance and projected response
1.3
  travel time. And three calls were mutual aid, so
14
  they were not counted in the equation
15
  representing five percent.
16
                MR. FRATTARELLI:
                                  So you were
17
  analyzing, these three fires, Landisville didn't
18
  go to, right?
19
                            Landisville did not
                MR. KEMERY:
20
  respond because they were closed. Minotola
  responded in many cases with a back up company.
  And so if 55 percent of the time, Landisville
  would have been the closest firehouse responding
24 had they been opened.
25
                55 percent of the occasions there
```

```
was a delay and response because a firehouse from
  further away was called. Also, the out of town
  company East Vineland, with all due respect to
  them, just because of their geographic location,
  in some cases, their response time, to back up
  Minotola since Landisville was not in service was
  double the response time for the back up to
  arrive.
 9
               MR. FRATTARELLI:
                                  Last topic is we
  heard a little talk about mutual aid and out of
10
11
  town companies. Can you just explain briefly how
12
  that works, when companies from out of town will
13
  come to fight a fire in the borough?
14
               MR. KEMERY: As was indicated by the
  chief, usually in a structure fire situation,
  you'll send more companies to a structure fire
17
  than you will an automatic alarm call or an
18
  lincidental such as a car fire, brush fire or
19
  wires call or smoke investigation. Again, the
20
  mutual aid, it's coming from farther away.
21
                So if you have less firefighters and
  less equipment in town getting the location at
23
  approximately the same time because they're both
  in town, now, you have one company there, they're
  waiting for the back up to get there longer
```

```
because it's coming from farther away.
1
 2
                MR. FRATTARELLI:
                                  And lastly, by the
 3
  same token, does Minotola or Landisville, if they
  were open, do they go out of town as well?
 4
 5
                MR. KEMERY: Minotola and several in
 6
  these runs did respond to mutual aid calls for
  working fires or a cover assignment where you're
  filling in for another firehouse in another
  community that's committed to a working fire so
10
  they still have coverage while their company is
  committed.
11
12
                In the case, since Landisville was
13
  closed, in the case where Minotola's ladder truck
14 would be out on mutual aid, there was no ladder
15 truck in Buena Borough. Had Landisville been
16
  open, okay, one ladder truck went out of town to
17
  provide mutual aid, we still got another one
18
  left.
19
                The current fleet between the two
20
  districts is pretty much balanced with two
  lengines, two aerial apparatus, which also has
  pumps, two brush trucks. Minotola has air light
22
23 and rescue utility. And Landisville has the
  tanker truck. So together, they represent a
  pretty good fleet that provides back up even when
```

```
there's multiple incidents going on at the same
  time in town and out of town.
                MR. FRATTARELLI: So is it fair to
 3
  say with fire stations open, we would lower the
4
  response time, we would increase the staffing and
  also lessen the risk that the out of town
  companies may not be able to respond promptly.
  Is that all fair to say?
 9
                MR. KEMERY:
                            Yes.
10
                    FRATTARELLI: That's all I have.
                MR.
11 My next witness, unless you have any questions,
12
  Director, is Chief Kenneth Barbagli.
                                        Can you
13
  give us your association or affiliation with the
14
  fire district?
15
                MR. BARBAGLI: I am the chief of
16 Landisville Fire and Rescue.
17
                MR. FRATTARELLI: How long have you
18
  been the chief?
19
                MR. BARBAGLI: Since December 6th
20
  2020.
21
                MR. FRATTARELLI: December 6, 2020?
22
                MR. BARBAGLI: Yes.
23
                MR. FRATTARELLI: And just tell me
  what your experience is, as a firefighter?
25
                MR. BARBAGLI: I've been a
```

```
firefighter for a lot of years. Experiences I
  have is the only thing I can really say is I
  believe, if I'm saying it right, I believe
  Minotola and Landisville are two companies that
  should stay alive.
 6
               MR. FRATTARELLI: We'll get to that.
7
  Have you worked as a chief before?
 8
               MR. BARBAGLI: No, deputy chief.
 9
               MR. FRATTARELLI: Can you estimate
  how long you've been a firefighter?
11
               MR. BARBAGLI: Probably about
12
  25 years.
13
               MR. FRATTARELLI: Is this a paid
14
  job?
15
               MR. BARBAGLI: No.
16
               MR. FRATTARELLI: You've heard the
17
  arguments today. Minotola Fire, their
18
  commissioners believe they can adequately protect
19
  the residents of the borough with just Minotola
20
  Fire. Do you agree with that?
21
               MR. BARBAGLI:
                              No.
22
                   FRATTARELLI:
                                  Why not?
23
               MR. BARBAGLI: Because I heard
  earlier, and it's the truth. Landisville Fire
  has different equipment than Minotola. We have a
```

```
10 and 35 gallon tender.
                             They have a rescue and
  we just have different equipment and we can do
  different things than they can and they can do
  different things than we can.
 5
                                  What about with
                MR. FRATTARELLI:
  respect to responding to calls, having two fire
 6
7
  stations.
              Do you feel that's necessary?
 8
                MR. BARBAGLI:
                              To run, yeah.
 9
                MR. FRATTARELLI:
                                  Why?
10
                MR. BARBAGLI:
                              We're responding to
11
         Daytime have problems with volunteer
  calls.
12
  firefighters. We can make a good team with both
13
  companies going out at the same time.
                                          If they
14
  have two, three, we have two or three, maybe
15
  more.
         It's better to have two companies run
16
  them.
17
                MR. FRATTARELLI:
                                  A problem with
18
  volunteers in the day, is that something unique
19
  to Buena Borough?
20
                MR. BARBAGLI: Volunteers are hard
  to come by.
22
                MR. FRATTARELLI:
                                  I'm saying, is
23
  that something that just happens in Buena or is
  that something that happens in other places?
25
                MR. BARBAGLI: No, that happens
```

```
everywhere.
1
 2
                MR. FRATTARELLI: With respect to
 3
  the location of Landisville Fire Company, do you
  feel that is important in terms of protecting the
 5
  residents?
                MR. BARBAGLI: Yes.
 6
 7
                MR. FRATTARELLI:
                                  Why is that?
 8
                MR. BARBAGLI: Landisville's company
  lis located in the middle of Buena. We are close
10
  to just about every, even though it's not our
11
  district, we're closer to a lot of Landisville's
12
  homes, senior homes.
13
                MR. FRATTARELLI: Why are you
14
  concerned about that?
15
                MR. BARBAGLI: Well, you got one
  senior home that has over 76, over 76 apartments
17
  which people are in wheelchairs, handicapped.
18
  They have one elevator. I believe you need
19
  people there fast if they have to be evacuated.
20
                MR. FRATTARELLI:
                                  Is that closer to
  Landisville or Minotola?
22
                MR. BARBAGLI: I believe that's
23
  close to both of them, yeah, somewhere.
24
                MR. FRATTARELLI: You mentioned the
25
  staffing. In terms of the response time, would
```

```
having two fire stations affect the response
 2
  time?
 3
                MR. BARBAGIT: Yeah.
 4
                MR. FRATTARELLI:
                                  How?
 5
                MR. BARBAGLI: Well, as far as the
  response time is, we all have the same problem.
 6
  We all have jobs. We all come to the station and
  we go. And like I said, there's a bunch of us
  that live in town, so at night, it's easier.
  During the day, it's a little harder.
11
                MR. FRATTARELLI:
                                  Lastly, were you
12 involved in helping to correct some of the PEOSH
13
  violations against the fire company?
14
                MR. BARBAGLI: I was involved in all
15
  of them.
16
                MR. FRATTARELLI: Did the
17
  commissioners take them seriously?
18
                MR. BARBAGLI:
                              Yes.
19
                MR. FRATTARELLI: Were there any
20
  resources?
21
                MR. BARBAGLI: No.
22
                MR. FRATTARELLI: Do you feel all of
23
  them have been adequately corrected?
24
                MR. BARBAGLI: Yes.
25
                MR. FRATTARELLI: Is Landisville
```

```
Fire Company ready to go?
1
2
                MR. BARBAGLI: Landisville Fire
 3
  Company is ready to go. The men and women have
  been ready to go.
 4
 5
                MR. FRATTARELLI:
                                  Have you been in
  contact with the volunteers since the suspension?
 6
                MR. BARBAGLI: Every Monday we meet
  at this building?
8
 9
                MR. FRATTARELLI: And you've gotten
10
  them up to speed in terms of their training and
11
  certifications, correct?
12
                MR. BARBAGLI: Yes.
13
                MR. FRATTARELLI: Do you feel
14
  there's an adequate number of volunteers that can
  help reopen Landisville Fire if you get the call?
16
                MR. BARBAGLI: Yes. And we have
17
  more members coming once Landisville is open.
18
                MR. FRATTARELLI: I don't have any
19
  other questions.
20
                MR. BARBAGLI: Thank you.
21
                MR. FRATTARELLI:
                                  Lastly, I'm going
22
  to call Charles Gazzara. Mr. Gazzara, can you
23
  tell us what your affiliation is with the fire
24
  district?
25
                MR. GAZZARA: I've been a
```

```
firefighter for 49 years, just about, past
  commissioner, past assistant chief. I've just
  been active in the fire company.
 4
                MR. FRATTARELLI: When were you a
5
  commissioned?
 6
                MR. GAZZARA: Just recently, I was a
  commissioner by replacing a gentleman that left
  in the middle of his term, so I filled an expired
  term.
10
                MR. FRATTARELLI: Do you remember
11 when that was?
12
                MR. GAZZARA: September of last
13 year, I believe. It was only a few months.
14
                MR. FRATTARELLI: So since September
  of 2020 until when.
16
                MR. GAZZARA: The election which was
17 April.
18
                MR. FRATTARELLI:
                                  April of 2021.
19 What title did you have on the board?
20
                MR. GAZZARA: I was chairman.
21
                MR. FRATTARELLI: As chair person,
22
  you were around at the time Landisville Fire
23
  Company was closed, correct?
24
                MR. GAZZARA:
                            Yes.
25
                MR. FRATTARELLI: And you were also
```

```
around when they filed their dissolution
 2
  application, correct?
 3
                MR. GAZZARA:
                             Yes.
 4
                MR. FRATTARELLI: Do you support the
5
  board's action to close Landisville Fire?
 6
                MR. GAZZARA:
                             No.
 7
                MR. FRATTARELLI: Did the board ever
8
  consult you, prior to closing Landisville Fire,
  that they were going to do it?
10
                MR. GAZZARA:
                              They said they were
11 having some meetings, but we have never had any
  meetings with the board after actually the State
13
  of New Jersey came in.
14
                MR. FRATTARELLI: Did you ask to
  have meetings about the situation at that time?
16
                MR. GAZZARA: I know the mayor
  directly asked for a meeting and it was talked
17
         I know the chief was told about.
18
19 was no meetings to discuss anything with the
20
  consolidate.
21
                MR. FRATTARELLI: When the PEOSH
22
  violations were happening, did the borough
23
                                        Is there
  contact you whether they were true?
  anything to this? What's going on?
25
                MR. GAZZARA: No contacts.
```

```
1
                MR. FRATTARELLI:
                                  Did they give you
2
  any advance notice before they had a meeting to
   close the fire station?
 4
                MR. GAZZARA:
                              No.
 5
                MR.
                    FRATTARELLI: How did you find
  out about it?
 6
                MR. BARBAGLI: We had a Zoom
8
  meeting, telephonic meeting of the council.
  were never sent anything officially, resolution
          We have never received a resolution that
10
  or not.
11 we were given personally.
12
                MR. FRATTARELLI: Are you familiar
13
  with the application they made to dissolve fire
  district number 1?
15
                MR. GAZZARA:
                             I am.
16
                MR. FRATTARELLI: Did the borough
17
  meet with you in advance before they filed that
18
  to sit down with you and go over whether or not
  fire district 1 agreed to being dissolved?
19
20
                MR. GAZZARA:
                              No.
21
                MR. FRATTARELLI:
                                  Did they ever
22
  approach you about consolidating the two fire
23
  districts?
24
                MR. GAZZARA:
                              No.
25
                MR. FRATTARELLI: I don't have any
```

```
other questions. I do want to add one other
  point on the behalf of the fire commissioner of
  fire district 1, as I indicated in my opening
  statement. Based upon the operational data that
  Mr. Kemery provided, they do feel it is vital
 6
  that those fire stations stay in business.
                Their view is certainly that both
 8
  our stations are needed to protect the residents.
  They are certainly willing. They're not wed to
10
  their jobs. They're certainly willing to
  consider consolidation of fire districts.
12
  the key proviso, in their view, is to make sure
13
  this fire station stays open for all the reasons
14
  we have submitted. That concludes our
15
  presentation.
16
               MS. SUAREZ:
                             Thank you, Mr.
17
  Frattarelli. Are there any other points that
18
  either side would like to raise at this juncture?
19
               MS. COSTIGAN: Yes, Director.
20
  would like to recall Joseph D'Alessandro, the
  public safety director.
22
               MR. D'ALESSANDRO:
                                  Yes, Miss
23
  Costigan.
24
               MS. COSTIGAN: Mr. D'Alessandro, as
  public safety director, did you review response
```

```
times of Landisville prior to their shutdown from
1
 2
  September to December 14th of 2020?
 3
                MR. D'ALESSANDRO:
                                   T did.
 4
                MS. COSTIGAN: And did you prepare
5
  an analysis of their response times for that
  period?
 6
                MR. D'ALESSANDRO:
 7
                                   I did.
 8
                MS. COSTIGAN: Would you please
 9
  speak to that?
10
                MR. D'ALESSANDRO: I sure will.
                                                  The
11 mayor and I were meeting regularly with the
12
  members of Landisville at that point between the
  summer and early fall of 2020. The mayor and I
13
14 had attended a September 2020 fire district
15
  commissioners meeting and became concerned.
16
                The level of internal conflict and
17
  disharmony among the membership and the
18
  commissioners was staggering. So as a result,
19
  the mayor and I decided it would be prudent for
20
  the borough to monitor the fire district's
21
  emergency response during that time frame.
22
                So the following data was collected
23
  between September 8th of 2020 and December 14th
  of 2020 and it wasn't through CAD reports.
  director of public safety, I have access to the
```

```
Gloucester County Communications with the local
  fire district, so I actually would transcribe the
 3
  calls.
 4
                So there were a total of 11 calls
5
  for service in fire district 1, the Landisville
  section, from September 2020 to December 2020.
  During that time, Landisville attempted to
  respond with a fire truck to only six of the 11
  calls.
10
                So Landisville was able to get a
11
  responding fire truck on the road 45.5 percent of
12
  the time and it took an average of 8.2 minutes
  for Landisville fire truck to leave the firehouse
13
14
  to respond on those six calls. Of the six times
15
  that the fire truck responded, Landisville's fire
16
  truck arrived on location to only three of the 11
  calls.
17
18
                It took an average of 10.7 minutes
19
  to arrive on location after the initial dispatch.
20
  And firefighters from Landisville Fire company
21
  arrived on location to emergency assignments in
22
  their own district, only 27.2 percent of the
23
  calls for which they were dispatched from
  September to December of 2020.
                                  Just to add to
25
  that, they responded with an average of 2.6
```

```
firefighters per call during that time frame as
 2
  well.
 3
                MS. COSTIGAN: And was this also
  considered as part of the borough's consideration
4
  prior to suspension of the fire district?
 6
                MR. D'ALESSANDRO:
                                  Yes, this was,
  among other issues, that had occurred during the
  summer of last year.
 9
                MS. COSTIGAN: As far as the PEOSH
10 issues, which the board members have heard a lot
11 about, but at this point, they've been abated.
12 And can you speak on those just briefly?
13
                MR. D'ALESSANDRO:
                                   With regard to
14
  the PEOSH violations, they were cited 28 total
15 violations, 19 of those were serious back in
16 October and November of 2020. They originally
17
  had a date that was, I think it was about
18
  90 days.
            I'd have to consult the actual order to
19
  comply.
20
                It was somewhere in the middle of
  February. It ended up taking passed that date.
22
  I think it was in March. Landisville had put an
23
  application in to extend their abatement period
  to the middle of June. So to best of my
25
  knowledge, it took until the middle of June for
```

```
them to be abated.
1
 2
                I can't speak to PEOSH's work load
 3
  or if that was the rationale for the delay.
  as far as the borough is concerned, they became
4
  abated when we received the close out letter.
                MS. COSTIGAN: That was June of this
 6
7
  year, correct?
 8
                MR. D'ALESSANDRO:
                                   That's correct.
 9
                MS. COSTIGAN: Thank you.
                                            That's
  all I have for Mr. D'Alessandro.
11
                MR. D'ALESSANDRO:
                                   Thank you.
12
                MS. COSTIGAN:
                               I also wish to recall
13
  Mr. LaPorta.
14
                MR. LAPORTA: Yes, Miss Costigan.
15
                MS. COSTIGAN: Mr. LaPorta, did you
  listen to the testimony from Mr. Kemery?
17
                MR. LAPORTA:
                             Yes, I did.
18
                MS. COSTIGAN: And do you have
19
  comments on the testimony of Mr. Kemery?
20
                MR. LAPORTA: Mr. Kemery's opinion
  is based upon the facts provided to him and it's
22
  an opinion through his training and experience.
23
  But in regards to the fact that Mr. Kemery
  stated, the CAD report does contain the fact of
  second due apparatus or potential mutual aid
```

```
apparatus responding in with additional manpower
1
 2
  on it.
 3
                In regards to the comment of Mr.
  Kemery's statement that the 9.3965 average
  members that responded on our calls on East 57 as
  being here an hour or whatever afterwards, it's a
  complete moot point. When the call is done, we
  come back, we take roll and that's complete.
 9
                These are fully trained structural
                 And I'd like to take a moment here
10
  firefighters.
  to go back on a comment that Mr. Frattarelli
12
  said.
        He made a comparison of we have 16 to
  their one. We have 25 members of the Minotola
13
14
  Fire Company. 22 were fully certified structural
15
  firefighters.
16
                SCBA, fit test certified and
17
  everything all the way through. We do have four
18
  members that assisted in engineering capacities
19
  and other things like that. That number there of
20
  22 structural firefighters is two and-a-half
  times the listed members that Landisville even
21
22
  provided to you today.
23
               But back on that further comment is
  what we end up doing is after the call is done,
  we come back. Those personnel being at the
```

```
station on a second due arriving is very
  beneficial. It doesn't matter if they're coming
  from four 10ths of a mile away or an additional
  seven 10ths of a mile away.
 4
 5
                This is something when command gets
 6
  on location, they size up the building.
  provide their analysis of what's going on.
  know the resources and the manpower that's coming
  in to them to be able to handle the situation at
10
  hand.
11
                               And you heard the
                MS. COSTIGAN:
12
  comments about the equipment, correct?
13
                MR. LAPORTA:
                              Yes.
14
                MS. COSTIGAN: Does Minotola have
  enough equipment to handle the firematic services
16
  throughout Buena Borough?
17
                MR. LAPORTA:
                             Yes, ma'am.
                                            We've
18
  been doing it, as we said, since 12-14-2020 with
19
  no issues.
20
                MS. COSTIGAN:
                               Thank you, sir.
  That's all I have, Director.
22
                MR. LAPORTA: If I could real quick,
23
  on a statement that was made by Chief Barbagli, I
  believe he was referencing to the high value
25
  target of 114 West Arctic Avenue. Just for facts
```

```
and I want the director and members of the board
  to know, when he gave the comparison, there's two
  elevators in that building. And that building is
  located .7 miles from Minotola Fire Company and
  it is 1.1 miles away from Landisville Fire
 6
  Company.
           Thank you.
7
               MS. COSTIGAN:
                               Thank you.
 8
               MR. LAPORTA: Miss Costigan, I would
  like to add one other point. There's been
10
  discussion a lot about PEOSH and violations as it
11 relates to dissolution. I think it's fair that
12
  we put this into perspective.
                                  The rationale for
13
  dissolution started months prior to PEOSH's
14 involvement.
               Last July, the Bureau of Buena
15
  became aware several issues that were at the time
17
  ongoing at Landisville Fire Company and fire
18
  district 1. Just to enumerate a few of those.
19
  In July of 2020, Landisville fire Company had 36
20
  SCBA bottles that were expired by 11 months and
21
  10 months.
22
               All of their operational bottles
23
  were expired. Their pump tests on their
  apparatus was five years past due. Half their
  members were seven months late on fit testing.
```

```
Their SCBA regulators hadn't been tested for two
          They had three illegal line officers
  including the assistant chief. He didn't have
  lincident command management level one minimum.
 5
                They were missing documentation of
  annual training and exposure and Hascom for nine
 6
           Their annual ladder test and the five
  year non destructive was past due. All but one
  of their members had a valid CPR card.
                                           They were
10
  all expired, at that point, by seven months.
  These were issues that the Borough of Buena took
12
  very seriously, and that began the process that
13
  brought us to where we are today.
14
                MS. COSTIGAN:
                              Thank you very much
15
              I think that concludes our
  for that.
  presentation, Director. Thank you very much for
17
  all your attention and time.
18
                                  Director, I'd like
                MR. FRATTARELLI:
  to submit into the record the Board of Fire
19
  Commissioners of fire district 2 on March 24th
20
21
  2020 amended the bylaws to indicate that the
  Minotola Fire Company cannot exceed 30 active
23 members.
24
                So I want to offer that to rebut the
  statement that they're willing to accept any and
```

```
They now have a 30 active member
  everyone.
  limit, which according to the minutes is the
  meeting is because of their JIF insurance policy,
  which limits their coverage to 30 members.
 5
               As a result, I don't think it's
 6
  valid that they're able to go above to take in
  anyone they want that works, that had volunteered
  before for Landisville Fire. And lastly, one
  other point I do want to make just in terms of
10
  argument.
11
                In response to the information that
12
  was just provided, the PEOSH violations were
13
  serious. We took them serious.
                                    They've all been
14
  corrected. We have a new management team in
15
  place. The point was at no point, were they come
  to us, before they decided to close and dissolve
17
  and bring those as the reasons.
18
               And lastly, the data as to what
19
  happened on 11 calls, I believe, so you got a
20
  small snapshot in time, including situations
21
  where they may have been recalled. We don't have
22
  data.
         Again, that just makes our point.
23
  shown the failings and the lackings of Minotola
  and their response times and their staff times.
               Having Landisville available in
25
```

```
combination would help alleviate any risk to the
            That is really the key here that all of
  our witnesses have stressed. And that's why we
  don't think that they've met their burden under
  the dissolution application. That's all I have.
  Thank you.
 6
7
               MS. SUAREZ:
                             I appreciate that.
8
  Just to clarify that point then, is that
  accurate? So fire district number two can only
  have a total of 30 members?
11
               MR. LAPORTA: Currently right now,
12
  by the bylaws, Mr. Frattarelli is right, with the
13
  understanding that's the basis it's at 30
14
  members. Prior to that, it was 35. And right
  now, we have the ability that members can apply,
16
  they can come in. We do have a wait list
17
  possible. And if necessary, the Board of Fire
18
  Commissioners, can by resolution consider go back
19
  and raise it again to a 35, a 40 as necessary.
20
               MR. FRATTARELLI:
                                 I'll only add,
  Director, according to the minutes, the reason it
  was lowered to 30 was to be, quote, align our
22
23
  membership to that of our JIF insurance policy.
  I think there may be another constraint there
  that Mr. LaPorta may not be aware of or maybe is
```

```
aware of it, but it is I think an additional
 2
  constraint that would have to be considered.
 3
               MS. COSTIGAN: The JIF policy would
  actually, when the application goes into the JIF,
  the policy would provide for the number of
  members, so it could be easily increased by a
  bylaw amendment and also as an amendment to the
8
  JIF policy.
               That's not a concern.
 9
               MR. FRATTARELLI: Okay. That's an
10
  assumption.
               I don't know that.
11
               MS. SUAREZ: At this juncture, do
12
  any board members have questions or members of
  the public have any questions that they want to
13
14
  raise?
15
               MR. MAPP:
                           Yes, Director, I have a
  question.
16
             What happens to the assets?
17
  you explained some of that as far as equipment is
18
  concerned.
             What happens to the building?
19
  is the short term and long term plan for all of
20
  the assets of fire company 1, fire district 1?
21
               MS. COSTIGAN: As far as our
22
  application, the building for now will be shut
23
  down. Utilities will be kept on.
                                     Within a short
  period of time, Minotola will assess the need for
  the building. And if it no longer needs the
25
```

```
building, it will be sold.
1
2
                As for the equipment and the
 3
  apparatus, for the short term, it will maintain
  the equipment and the apparatus. It will also
  ascertain if it's compatible with the equipment
  and apparatus of Minotola. If it is, it may keep
 6
         If not, it will be sold.
                                    Is that correct?
  Mr. LaPorta?
 9
                MR. LAPORTA: Yes, that is correct.
10
  Thank you, Miss Costigan. Mr. Mapp, did you have
  any questions with that, sir?
11
12
                MR. MAPP: No, I'm fine.
13
                MS. SUAREZ: Does anyone else have
14
  any questions or comments?
15
                MR. FRATTARELLI:
                                  The only comment I
  would add, Director, in light of that question
17
  and that testimony, this is certainly something
18
  that could have been worked out, had they
19
  approached us about consolidation or about
20
  dissolution.
21
                It's not like this data that they're
22
  now going to look at or evaluate the trucks is a
23
  secret. We're all near by and we all live in the
24
  same borough. It's frankly frustrating to the
25
  commissioners that it was not approached in that
```

```
manner. Certainly, it would not have led us to
 2
  today?
 3
                MR.
                   ZAPPARIELLO:
                                  Chairwoman, can I
  speak, please?
 4
 5
                    SUAREZ:
                             Yes, Mayor.
 6
                MR.
                   ZAPPARIELLO:
                                  Yes.
                                        During the
  public meeting that we had at Buena Regional High
  School, in our Power Point presentation, I did
  present as evidence in October of 2020, we talked
10
  about dissolution and there was an email that was
11
  generated in the Power Point presentation that we
12
  explicitly told Landisville that dissolution
13
  would be a possibility.
14
                MS. SUAREZ: So I hear everybody's
  thoughts, comments, concerns. I certainly
16
  understand some of the frustration that's felt on
17
  probably both sides here. And Mr. Frattarelli,
18
  to be quite frank with you, I do applaud fire
19
  district's number 1 sincerity with handling the
20
  violations and things of that nature and ensuring
21
  that things moved forward in a way that, for lack
22
  of a better term, righted the ship there.
23
                Again, I just want to be clear that
24
  this board is not passing judgment on the
  validity of the dissolution of fire district
```

```
number 1. Our scope is limited to ensuring the
  absorbing entity has the financing to take on
  fire district number 1 and perform the services
  of the dissolved district.
5
                So for this board, this isn't about
  whether this is the best course of action.
  is solely left to the local governing body to
  opine on that. I just want to be crystal clear
  on that as we kind of move forward here and at
  this juncture, I'm going to ask the board if we
10
11 have a motion.
12
                MR. BLEE:
                           Madam Chair, I make the
13 motion to approve the dissolution.
14
                MR. MAPP:
                           I will second that
15
  motion.
16
                MR. BENNETT: Miss Suarez?
17
                MS. SUAREZ: Yes.
18
                MR. BENNETT: Mr. Mapp?
19
                MR. MAPP:
                          Yes.
20
                MR. BENNETT: Mr. DiRocco?
21
                MR. DIROCCO: Yes.
22
                MR. BENNETT: Mr. Close?
23
                MR. CLOSE: Yes.
24
                MR. BENNETT: Mr. Avery?
                MR. AVERY: Yes.
25
```

```
1
                MR. BENNETT: Miss Rodriguez?
 2
                MS. RODRIGUEZ:
                                Yes.
 3
                MR. BENNETT: Mr. Blee?
 4
                MR. BLEE:
                          Yes.
 5
                MR. BENNETT: And Mr. Light is
 6
  absent.
          Motion is approved.
7
                MS. COSTIGAN:
                              Thank you to the
8
  board. Thank you, Director.
 9
                MS. SUAREZ: Thank you everybody for
10
  your time.
             I think everybody hear I can tell is
  very passionate about this and that definitely
12
  came through. I also appreciate everybody doing
13
  their best to be respectful when there are
  emotions at stake here, so I appreciate that.
15
                MR. LAPORTA:
                              Thank you, Madam
16 Director and the board. Please have a good day.
17
  Thank you.
                             The final item on our
18
                MS. SUAREZ:
19
  agenda is a presentation discussion concerning
20
  changes to third part disbursement services
21
  regulations.
               We have Mr. Palatucci here?
22
                (Whereupon a break was taken.)
23
                MS. SUAREZ: Do we have Bill
24
  Palatucci?
25
                MR. MCCARTHY: No. Good afternoon,
```

```
Madam Chairman and members of the board.
                                             My name
  is James McCarthy. I am in-house counsel for
  Municipal Financing Services Corp and we can
  proceed without William Palatucci who was our
  outside counsel.
               And I promise we will do our best to
 6
7
  be brief.
             It's been a long afternoon and we
  thank everybody for their patience and courtesy
 9 and attention. And with that, I will turn the
10 matter over to our chairman and CEO, Theodore
11 Ellenis.
12
                (At which time those wishing to
13 testify were sworn in.)
14
               MR. ELLENIS: Good afternoon, Madam
  Chair, members of the board. My name is Theodore
16
  Ellenis.
            I'm the chairman and CEO for Municipal
  Finances Services Corp. Joining us today is Mr.
17
18
  James McCarthy, our in-house counsel and our
19
  consultant, Mr. John Reinhardt.
20
               With that, I would like to take a
  moment to express my gratitude for allowing me
  and providing me the courtesy to appear before
22
23
  the board here today. Given it has been a long
  day, I'll be as brief as possible.
  respectfully requesting that the Local Finance
```

```
Board authorize Local Government Services to
  draft regulations, broadening the scope of
  N.J.A.C. 530-17, or in the alternative, Local
  Finance Board authorize LGS to draft regulations,
 5
  as it deems appropriate, to permit local
  government units to utilize the services of third
 6
7
  party vendor programs as we present here today.
 8
                What is a third party vendor
 9
            The third vendor program, or the
  program?
10
  program, provides local government units with the
11
  ability to have their existing accelerated basis
12
  while receiving new extended terms of payment
13
  from the third party vendor. Under this program,
14
  no tax dollars are advanced by the jurisdiction
15
  to the third party vendor.
16
                Rather, the third party vendor pays
17
  the local government units vendor for the
18
  approved or authorized services that were
19
  rendered to the jurisdiction. And then in turn,
20
  then provides new extended payment terms back to
21
  the jurisdiction. The program is a non factoring
22
  accounts payable program offered to the local
23
  government units again at absolutely no cost.
24
                The program would further assist the
  participating jurisdiction by providing a
```

```
proprietary accounts payable platform that
  automates the accounts payable process, enhances
 3
  data management and reduces the internal cost
  while improving transaction integrity and
 5
  efficiency.
 6
                The program is completely voluntary
  for both the jurisdiction and its vendors.
  a vendor voluntarily elects to participate in the
  program, the third party vendor enters the
10
  vendor's information into the jurisdiction's
11
  secure accounts payable expedited data
12
  management.
13
                Thus, saving time while reducing
14
             When the invoice is approved by the
  expenses.
15
  jurisdiction, the third party vendor is then
16
  electronically noticed through the secured
17
  proprietary AP platform, at which point,
18
  authorized payments are expeditiously rendered to
19
  the vendor with notice being given back to the
20
  jurisdiction that a payment has been made.
21
                Within the scope of the notice,
22
  which is really provided in the form of a
23
  statement, the jurisdiction is notified of the
  new extended payment period. Thereafter, the
  jurisdiction would render payment in the name of
```

```
the vendor to a dedicated lock box.
                                        The payee of
1
  any service provided to a local government unit
 3
  is always the vendor.
 4
                In addition, there would be no
5
  change of control to jurisdictional payments to
 6
  the vendors and no payments would be made until
  approved by the local government unit.
  purposes of account integrity, the third party
  vendor establishes a New Jersey, LLC special
10
  purpose entity for each participating
11
  jurisdiction with a dedicated account and an
12
  approved federal/state financial institution to
13
  ensure that there is no commingling of funds,
14
  dedicated capital specifically for the prompt
15
  payment to the jurisdictional vendor and that
16
  those funds are managed and distributed by a
17
  trustee with the financial institution.
18
                Under this program, vendor payments
19
  are guaranteed on behalf of the jurisdiction by
20
  utilizing dedicated third party vendor funds that
21
  are retained in the New Jersey, LLC, special
  purposes entity account established specifically
23 for that jurisdiction.
                           The TPV funds, or the
  third party vendor funds, retained in the account
  are used solely for the payment of that
```

```
jurisdiction's approved invoices.
1
 2
                Upon jurisdictional approval, the
 3
  quaranteed vendor payments are made by the
  managing trustee of the financial institution.
  The program would also local government units to
  keep pace with the industry and jurisdictional
  changes, particularly in the area of finance and
 8
  technology.
 9
                I would like to summarize the
10
  features and benefits of the program that are
11
  extended to the local government units.
12
  accelerated accounts payable program is provided
13
  again as an absolutely no cost. It does provide
14
  improved cash flow for the jurisdiction by
15
  allowing the jurisdiction to retain their cash
  for longer periods of time.
16
17
                It does provide a proprietary
18
  accounts payable documentation and management
19
  system that digitizes the documentation, collates
  and archives all of the AP documents and payments
20
21
  at absolutely no cost. It provides a full
22
  register of all satisfied or paid vendor invoices
23
  within 24 hours of payment to the vendor, is a
  100 percent voluntary no obligation opportunity.
25
                The local government unit can cancel
```

203

```
the program at any time upon 30 days notice.
  There are no debt filings or reporting required
  and it increases the vendor relations and
  improves the local government units vendor profit
  margins by reducing costly financing options that
  they're currently using such as factoring, asset
 6
  based lending, inventory or purchase order
  finance.
 9
                Lastly, and perhaps most
10
  importantly, in addition to the many benefits,
11
  the third party vendor program fully supports and
12 hosts a proactive diversification and inclusion
13 initiative for the local government units.
14
  programs include our own MFEP program which is
  the Minority Firm Education Program which focuses
15
16
  upon the minority women owned, veteran owned,
  disabled veteran and small emerging business
17
18
  community.
19
                With us today is Major General
20
  Retired Jamal Beale who served as the
21
  commissioner and commander for the New Jersey
22
  Army and Air National Guard and Mr. James Souder.
23
  General Beale and Mr. Souder are the principals
  of Apex Solutions Group which manages our MFAP
25
  program.
```

```
1
                With that, I thank you, Madam Chair
 2
  and the members of the board. It's my pleasure
 3
  to turn this over now to Mr. John Reinhardt.
 4
                MR. REINHARDT:
                                So I know in local
5
  government, first of all, I think most of you
 6
          I'm a certified municipal finance officer,
  certified county finance officer, tax collector,
        I have a couple more licenses that are not
  worth going through. But in local government, we
10
  tend to, when something is new, we pull back
11 right away.
12
                This program is a little bit outside
  the box of what we traditionally see.
13
                                          It's a
14
  fresh idea. So it's just another tool for us to
15
  have at our disposal. There are several benefits
16
  to us in local government and I boiled them down
  to five different areas. The program allows for
17
18
  once the bills have been paid, local government
19
  now has 60 to 90 days to repay those bills.
20
                The bills still go through a lockbox
  program, so still issued to the vendor, but it
22
  gives us the ability to have cash flow. During
23
  this pandemic, this would have been an awesome
  tool for us instead of having to be sucked dry of
25
  our revenues to have the ability to pay our bills
```

```
60 to 90 days later, so it's just another tool
  and that's in a down environment.
 3
                In an up environment, it gives us 60
  to 90 days to invest those funds to increase our
4
  interest on when we invest those funds.
                                            The
 6
  second point I put down here is it keeps local
  government honest on the prompt payment loss.
                                                   Ι
  know most of us feel that we pay our bills on
  time, and I think we do a great job, but there
10
  are many of us that don't do a great job.
11
                So this is another tool that would
12
  help to provide, especially on large projects,
13
  the tool to make sure that we're paying out bills
14
  within that time frame. The third point is this
15
  program, and Ted touched on this, we have a
  document management system that attaches to this
17
  program that allows us to collect all of our data
18
  virtually.
19
                It's a digital inclusion of all the
20
  documents behind the financial transaction.
                                                 Wе
  all know that government tends to be paper
22
  intensive.
             We've got tons and tons of banker
23
  boxes in storage and have we have no idea what to
  do with them. This would actually digitize that
  process from the beginning having no papers
```

```
submitted and attaches the transaction hidden
  behind our financial system, which increases the
  efficiency on audits, our internal documentation,
  how we reference what's there, which is a great
  benefit.
 5
 6
                The fourth item that I put down here
7
  is increased competition. Ted touched upon the
  disadvantaged businesses and educating them on
  how to do business flow to government. We all
10
  know that increased competition helps us with our
  prices, it drives it down.
12
                The process they have there is to
13
  increase the knowledge of how to deal with local
14
  government. Usually it's a daunting task.
15
  first time you ever filled out an RFP or filled
16
  out a proposal for local government between the
17
  pay to play laws, everything else is there,
18
  a little frustrating to go through.
19
                I think through the education
20
  process, we've become much more inclusionary
  involving these disadvantaged businesses.
22
  fifth point I would like to make is by going
23
  through this, there's been a hesitancy from local
  government to go through the electronic payment
  process. I think that this program would allow
```

```
them to tiptoe into that.
1
 2
                It's also a gateway to find out how
 3
  those electronic payments work and see the
  advantage of that. Not only looking for a
  canceled check, but seeing the digital record
 6
  that the payment was made and having that behind
7
  that transaction.
 8
                So I think, you know, government
  tends to lag behind the industry, and I think
  what this might do is it might force us forward
10
11 into what the current industry is doing, taking
12
  advantage of all the technology that's there.
13
  Madam Chairman, that concludes our presentation,
  unless there are any questions.
15
                           Madam Chair, I have a
                MR. MAPP:
16
  question.
             How will this align with the
17
  procurement process within the State of New
18
  Jersey at the local level as well as a company
19
  level?
          Because there is a procurement process
20
  that must be followed. So with this proposed
  program, what guarantees that you will be the
22
  entity that will be providing these services?
23
                MR. ELLENIS:
                             Let me answer that
24
  question.
            One, we're not involved in the
  procurement process.
                         The procurement process
```

```
stays germane to the local community, its
  jurisdiction and the State of New Jersey.
  simply on the back end processing payment.
  the payment being approved by the jurisdiction,
  we have a dedicated capital account that's
  established for that jurisdiction for that
 6
  participating jurisdiction, again, to ensure that
  the funds are not commingled and that there's
  adequate capital there to quarantee payment to
10
  the vendors. Once the jurisdiction approves the
11
  payable for payment, we effectuate that payment.
12
  It goes up by the trustee. We do not touch the
  procurement process. We do not get involved --
13
14
               MR. MAPP: I understand that, sir.
  But I am saying that for a municipality to bring
16
  a service on board, there's a procurement process
17
  that the municipality has to follow.
                                         I'm not
18
  talking on the back end that you will handle.
19
               But how do you get to the table to
20
  provide that service to municipality X, Y or Z.
21
  There's procurement process that all
22
  municipalities, governmental entities in New
23
  Jersey must follow.
24
               MR. MCCARTHY: I appreciate that
25
  questioning. So what we're were asking the board
```

```
for today is authorization to allow local
  government services to expand N.J.A.C. 5:30-17,
  or in the alternative, to authorize the drafting
  of new regulations permitting this program, which
  would be pursuant again to regulation.
 6
                The procurement process on the
  vendor side would not change.
                                  These regulations
  as proposed, in the event the board is inclined
  to authorize Local Government Services to draft
10
  the regulations, would do just that.
11
  fact, today, we're just asking the board to
12
  authorize the drafting of them and you'll get
13
  another crack at it candidly in the event you're
14 inclined to approve our application today.
15
               Once the regulations are drafted,
  you'll have an opportunity to go through those on
17
  a granular level and with following public
18
  comment.
19
                MR. MAPP:
                           So to the Director, the
20
  conversation today, is it about approving an
  application from this entity or is it about a
22
  look at existing rules and regs and how we as a
23
  board might grant our okay to expanding the rules
  and regs? I ask that because I didn't get the
  impression that we were approving this entity
```

```
that is before us.
1
 2
                MR. MCCARTHY: I appreciate that
 3
  question, and if I didn't answer it clearly
  enough, I apologize. We're not asking you to
  approve the entity. We're simply asking the
  board to authorize Local Government Services to
  draft regulations following which you'll have an
  opportunity to review those proposed regulations
  in and of themselves.
10
                MS. SUAREZ:
                             This is partially why I
  wish Mr. Palatucci was here because that's who we
12
  had all of our initial conversations with.
13
  think we made it very clear on all of those
14
  conversations that this would be a presentation
15
  and discussion to the board.
16
                And that from there, it would be
17
  referred over to staff so we can move forward
18
  with looking at potential draft to regulations
19
  and things of that nature. So I just want to
  make that crystal clear so that everybody has
20
21
  their hopes set accordingly as to what was going
22
  to be accomplished on this board meeting.
23
                MR. ELLENIS: Madam Chair, that's
24
  our understanding as well.
25
                MS. SUAREZ: Perfect.
```

```
1
                MR. AVERY: Director, can I ask a
2
  question?
             How many firms in New Jersey offer a
  service like this or might offer a service like
  this, or is that unique to your company.
 5
                MR. ELLENIS: It's unique to our
            Nobody has offered it.
 6
  company.
                                     There are other
  financial services such as factoring, but we're
  the only group that comes in on an accelerated
  payment side.
10
                MR. AVERY:
                            Are you aware of any
11
  other state that allows this kind of a program?
12
                MR. ELLENIS:
                              I am.
13
                MR. AVERY: And that is?
14
                MR. ELLENIS: Michigan, Virginia.
15
  There's a few others. And we're working through
  that right now.
16
17
                MR. AVERY:
                           One of my concerns,
18
  frankly is that I know it takes a long time and a
  lot of effort to draft regulations. Before I'm
20
  authorizing the local government service staff to
21
  do that, I would like to have them do a little
  bit more basic research with the various
23
  professional groups that represent purchasing
  agents, CFOs and government and see if there's
  any interest or even demand for this kind of a
```

```
program prior to getting down the road and
  writing regulations and publishing them and
  having stakeholder meetings and all the other
  things that go along with the regulatory process.
  That's one of my concerns. We might get all that
  done and get to the end and it's all for naught.
7
  It's a lot of staff effort.
 8
                MR. ELLENIS:
                              I appreciate that
 9
              I wonder if Mr. Reinhardt might be in
  question.
  a position to respond.
11
                                So there are several
                MR. REINHARDT:
12
  providers already providing these to the local
13
  government and they're doing it without the
  blessing of what's been going on officially.
14
  That's why we're here before the board to talk
15
  about, that we're here to present ourselves to
16
17
  the board for this review process.
18
                Going before the DLGS is just a
19
  formality having them review the regs, having
20
  them review what we do to consider the procedural
21
  process behind that. I don't believe it's a
22
  heavy lift and I think that we volunteered our
23
  services and our legal staff to assist in that
  process to help them so they're taking the burden
  off of that staff.
```

```
1
                As a local government official
2
  myself, I have to admit, when I first saw this,
  it was that it's something new, so we pull back
  because it's new. But then after looking at it,
  looking at the possible opportunities of what
 6
  this could do, it started to peak my interest and
7
  there are some possibilities.
 8
                It is not a mandatory program.
                                                 It's
  a completely volunteer program on both the
10
  municipal side and the vendor side.
                                        It is just
  permissive and allows greater amount of
12
  flexibility in what we do. Again, I know most of
13
  us when it's something new, our first reaction is
14
  to pull back and take that deep breath and say
  what is this, because it's new, and that's
15
16
  exactly what it is.
17
                I think by allowing the staff
18
  to move forward with exploring it, discussing it
19
  and coming back with some possible recommendation
20
  to the board, I don't think that's taking too
21
  much time away from it. I think it's just
22
  something new for them to explore.
23
                           Folks, my apologies.
                MR. MAPP:
                                                  Ι
  have to sign off. Thanks everyone.
25
                (At which time Mr. Mapp leaves the
```

```
hearing.)
1
 2
                MR. REINHARDT:
                                Thank you, Mayor.
 3
                MR. CLOSE:
                           Mr. Reinhardt, I'm going
4
  to ask you to touch on one other aspect if you
  don't mind since you're here.
                                  I had some
 6
  concerns about, you addressed some of them.
                                                 But
  cyber security, and that's a big issue right now
  obviously for everyone.
 9
                I think for myself, I think most
  municipalities struggle with IT.
                                     Some have
11 better resources and staff than others.
12
  utilize outside professionals, but I think it's
13
  an area that is in desperate need quite frankly
14
  for towns and I'm concerned about this program in
15
  terms of cyber security issues and what towns can
16
  do internally and the number of things that we
  see through the various funds with loss of funds
17
18
  through folks because they don't have the proper
19
  programs, processes, fire walls in place.
20
  you touch on that a little bit relative to this
21
  program.
22
                MR. REINHARDT:
                                Sure.
                                        I'm going to
23
  jump in front of Ted because Ted is actually
  going to answer the question. I'm not here as a
25
  commissioner, but I happen to be one, and I'm
```

```
also the chairman of the cyber security task
  force for the -- which covers state wide and that
  was one of my primary concerns, and I know that
  Ted can address this. We've been working with
5
  the provider that's going to deal with the
 6
  processing.
                So Ted, you wan to run with that?
                MR. ELLENIS:
                             Yeah, sure.
                                           In terms
8
  of compliance and in terms of IT risk mitigation,
  our engine is really Bank of America's complete
10
  AP process. Outside of that, we also use AVIT.
  Currently, the platform itself to which we're
11
12
  discussing, on our back end, is being utilized in
13
  the State of New Jersey. It's fully complicit
  it's passed all of the banking regs and rules
14
15
  that we are required in terms of certification.
16
                Right now, we know it's being used
17
  in Jersey City, and outside of that, it's being
18
  used at various components at the utilities base,
19
  so we know that it's gone through its compliance
20
  review here in the State of New Jersey. And AVIT
21
  that has been submitted to LGS, we actually
22
  provided all this information prior.
23
                MR. CLOSE:
                            Thank you.
24
                    REINHARDT:
                                To follow up on
  those responses, any other IT or cyber security
```

```
concerns can be addressed by way of regulation.
1
 2
                MR. ELLENIS: Certainly.
 3
                MR. CLOSE:
                          I guess, sir, on that
4
  end, I do have concerns internally at the local
  level whether they have folks in place to handle
  and deal with it from their end a swell.
  you're talking about your platform, I believe
  versus the folks on what they have in place
  internally in each of the corresponding entities,
10
  but thank you.
11
                MR. ELLENIS:
                              Thank you.
12
                MR. REINHARDT: Mr. Close, just to
13
  address that. What we're proposing and we've
  been working with the current software vendors in
15
  the state, the program actually bolts on top of
  what's there, whether it's Edmonds or MSI or any
  other platform and it works in conjunction with
17
18
  our current controls.
                         And many of those
19
  obviously, the majority are between those two
20
  systems in the entire state.
21
                MR. CLOSE:
                            Thank you. I appreciate
22
  that follow up.
23
                MR. MARTUCCI: Director, Jason
24
  Martucci on the line. I was wondering if the
  representatives from Apex Solutions could go a
```

```
little bit in detail as far as their role in the
  services and the program provided by MFSC for the
  benefit of the board.
 4
                MR. BEALE:
                            Certainly. Can you hear
5
  me?
 6
                   MARTUCCI:
                MR.
                               Yes.
                            I'm Jemal Beale.
 7
                MR. BEALE:
8
  founding member, founding principal of Apex
  Solutions. And right now, one of our main lines
10
  of effort is training in the space for work force
11
  development, but we also a provide diversity
12
  linclusion and project management training and
13
  working with MFSC to, once they have a handshake
  agreement or agreement with the municipality, we
14
  come in and provide training to help vendors,
15
  minority vendors, minority business enterprises,
17
  disabled owned Veteran businesses and small
18
  businesses in the area to become registered and
19
  increase that presence in the community to work
20
  with the city, state, county, government,
21
  whatever the level of need is. And Mr. Avery,
22
  was that you who asked the question?
23
                MS. SUAREZ:
                             That was Jason
24
  Martucci.
25
                MR. BEALE: Jason, I hope I answered
```

```
your question, and I can good go in depth if
1
 2
  needed.
 3
                MR. MARTUCCI: As far as the
  training that's provided, is it more, I think it
4
 5
  goes to Mr. Mapp's question before he signed off,
  it's not really -- it wouldn't be on the
  procurement side per se. It would be more, kind
  of what type of -- can you go in a little more
  detail in terms of what type of training is
10
  provided to minority women owned business
11 enterprises, et cetera.
12
                MR. ELLENIS:
                              Jemal, if you don't
13 mind. Mr. Martucci, the way the program works is
  what we bring to the community is the following.
15
  We've noticed that in many of the jurisdictions,
16
  that there is a lack of minority participation at
17
  the RFP level and there's a lack of vendors.
18
                We came up with a program that is an
19
  event posted in the jurisdiction and in tandem
20
  with the EDA and the jurisdiction's embracement
21
  in that we market and bring in minority firms
22
  that are not properly recognized. Our objective
23
  is to get them properly registered in the system
  to be recognized as minority firms, or whatever
25
  the caption is, and then thereafter get them
```

```
properly positioned and understand how to
  effectuate an RFP, so they become part of the
  vendor profile and vendor community for that
  particular jurisdiction.
 4
 5
                There's a lot of moving parts,
 6
  you're aware. And while we found that many of
  these particular companies are great at what they
  do, administratively, there is no resource there
  to, A, give them time to get properly registered,
10
  get them cleaned up or get them even to the RFP
  process, so we do that in every community.
11
12
                Amongst other things there is an
13
  extended training program after that for them to,
  again, work with the RFP process, understand how
14
15
  they can monetize their agreements and move
16
  forward and grow within that community or serve
17
  multiple jurisdictions. That's the impetus of
18
  what the program is.
19
                And beyond that, Apex Solutions has
20
  been brought in to, not only help facilitate our
21
  own diversification plan, but to assist those
22
  firms that are coming in with theirs at no cost
23
  to the municipality.
24
                           If I could add, our firm
                MR. BEALE:
25
  itself is SB, BOB, NBE, SBE, DBE and it's a real
```

```
challenge to get all of that done, so we're here
  to help other firms reach that level of
  certification and it opens a lot of doors and
  creates a nice environment for small businesses.
 4
 5
                MR. REINHARDT: Coming from the
 6
  outside, most of us work in government so we see
           It's got that ten standard sheets that
  what it.
  respond to. The first time we come up with the
  political contribution form, you're trying to
10
  scratch your head, trying to figure out.
11
  are so many forms that are frustrating and
12
  confusing as you try to submit them and most
  people bail out.
13
14
                When you get passed that and you're
  awarded the contract and you're submitting your
  bill and you're wondering what this thing is, a
17
  PO.
       Who knows what a PO is.
                                 In our world we
18
  know what it is. For the people outside, we're
19
  educating them on a process of submitting it,
20
  sending their invoices in, and educating them not
21
  necessarily on a prompt payment, but here's the
22
  process that you need to do to make sure you're
23
  complete in order to get paid.
24
                But for the outsiders looking in,
  lit's frustrating, so that's the education process
```

```
of getting, you know, I want to quote,
  disadvantaged, not just minority, but it's any
  disadvantaged group in learning how to submit
 4
  proposals.
 5
                MR. BEALE:
                            John, you nailed it.
  Just last thing and I'll be quiet.
 6
                                      I'm the son
  of entrepreneurs, and one thing they are not,
  they are not involved in all these certifications
  because of what John just alluded to. He laid it
10
  out perfectly. My parents are experts at their
11 business, but they're not expert at back office
12
  and doing this paperwork. It's really
13
  challenging and we want to help the community
14
  grow in that area.
15
                MR. ELLENIS: Precisely.
16
                MR. AVERY: This service to more
17
  involve minority and certain eligible groups,
18
  that focused on the RFP, RFQ process?
                                          Because in
19
  my experience, most of government spending gets
20
  spent through the procurement of goods and
21
  services through the bid process where you bid
  for pencils or paper or whatever, not so much the
22
23
  professional services type operation on the RFP,
  RFQ stuff.
             Is it focused on trying to get
  professionals involved in government, which is
```

1 fine. 2 MR. ELLENIS: The focus is two fold. 3 The focus is first, again, to get those firms that fall into those categories that are not properly recognized now, properly registered. And thereafter, get them to the point where they get advisement and assistance so they can participate in the RFP and the RFQ process. 9 Specifically for core commodity 10 goods, whether it be anything from construction 11 to providing paperclips. It's not so much 12 professional services. It really is the core 13 goods that drive the jurisdiction. And it's in 14 that capacity that first you need to get them properly registered, so they can participate. 16 And then you got to teach them how 17 to be able to fill out, as John pointed out, my 18 colleague, Mr. Reinhardt, all of the paperwork 19 that's necessary. The problem is that when 20 they're working, they don't necessarily have the 21 capacity to put that together, nor, the 22 linstruction, so we put together a program that 23 does two things. 24 It gets them properly registered and we put this on our dime. There is no cost to the

```
jurisdiction. It makes sense because it brings
1
  in more community involvement and it brings in
  more vendors that can participate locally at that
          However, you can't just do it in a
 4
  level.
  vacuum. You have to be there to assist them
  because that mountain of paperwork, which people
  have worked with for 30 years that are
  experienced, not necessarily going to work with a
  guy who runs a welding company.
10
               He's going to need the advisement
11
  from consultants that he trusts from within and
12
  that's what we put together at no cost for this
13
          Now we do that in each community and I
14
  think it's a tremendous benefit for those
15
  communities because it has a demonstrable impact
  on the amount of firms that are now in your
16
17
  register of approved vendors.
               MR. REINHARDT: Further to that
18
19
  point, it can range from a cleaning service, a
20
  landscaping firm. I have a friend of mine that
  has a landscaping business and wanted to put in a
  bid and he was overwhelmed by a process.
23
  could be any of those all the way up to the
  attorneys.
             Construction jobs, any of them who
  want to participate in this program.
                                         It ranges
```

```
the full spectrum, and not just focused on
1
 2
  professionals.
 3
                MR. ELLENIS:
                             Again, I want to
4
  underscore, our program, and thank you, John, is
  focused upon diversification and inclusion and
  it's specifically to get more firms that are
  considered minority under any of those captions
  involved because that's where there's a real lack
  of vendor participation.
10
                MR. BEALE:
                            The phrase would be
11
  exposure leads to expansion. That's what you
12
  want to think about.
13
                MR. MARTUCCI: Mr. Ellenis, when
14 you're talking about approved vendors, almost
15 like a prequalification, is that for those
16 municipal local units that have set aside
17
  programs, do you mean approved vendors for those
  set asides?
18
19
                Under New Jersey law, there is a
20
  contracting permitted to have certain set asides,
  minority, women owned business enterprises,
  Veteran owned business enterprises, some small
22
23 business enterprises. It's approved vendors for
24
  those set asides, correct.
25
                MR. REINHARDT: I'm going to jump in
```

```
on that one. We could work with that, absolutely
1
             The specifics of every one of those
  we could.
  programs is going to be a little bit unique, so
  that would have to be crafted for each
 5
  municipality.
 6
                MR. ELLENIS:
                             Right.
                                      But we have
7
  the flexibility to address that.
 8
                MR. REINHARDT:
                               Absolutely.
 9
                MR. MCCARTHY: And it can be picked
  up in the regulations as well.
11
                MR. MARTUCCI: Director, those are
12
  all the questions I have.
13
                MS. SUAREZ:
                             Thank you, Jason.
14
  just want to get back to one question, I think
  Mr. Mapp was attempting to get at, which was, I
16
  of course understand some municipalities are
17
  hesitant.
             Nobody wants to be the first to do
18
  things.
19
                Has there been any municipalities or
20
  local government to have, I guess, engaged with
21
  or already had conversations with your entity
22
  about potentially doing something like this.
23
                MR. ELLENIS:
                             Yes.
                                    We've spoken
  with several municipalities and several vendors.
  Obviously, the vendors push us because of the
```

```
program being able to accelerate payment and
  they've experienced the frustration of late
           However, with respect to your direct
  payment.
  question, yeah, we've spoken with several
  communities.
 5
                However, we thought it best to first
 6
7
  go through the process of being complicit with
  LGS and going through the process of being
  properly acknowledged that we can do business as
10
  we say.
11
                MS. SUAREZ:
                             Right.
                                     I appreciate
12
  that. Ball park, about how many municipalities
13
  do you think have engaged on this so far?
14
                MR. ELLENIS: To date, around 12.
15
                MR. REINHARDT: With great interest
  and just with hesitancy that, hey, there's rules.
17
                MR. BEALE:
                           If you'd like, I can add
18
  some context from my previous life.
                                        When we
  would activate soldiers, first aid active duty,
19
20
  we would consume a lot of meals from a local
21
  vendor, just say a local deli.
22
                In a three day period, we'd run up a
23
  bill of 15, maybe $20,000 worth of food and they
  would like to get paid much sooner than the state
  provides right now. That's just a simple
```

```
You're putting a hurting on some of
  example.
1
  these businesses out there, so I know if I was in
 3
  their shoes, this would be a blessing to me.
 4
                MS. SUAREZ: I certainly see the
5
  benefit to the vendors of course.
                MR. ELLENIS: To the benefit to the
 6
  jurisdiction and you had asked about the
  interest. The reason that the jurisdictions have
  exercised interest and have been enthusiastic is
10
  because there's a program that comes in that does
11 help them usher into the new millennium.
12
                It gives them tools that they
13
  currently don't have to improve efficiency
14
  internally at no risk, literally at no risk.
15
  It's under that premise and with all the benefits
16
  and of course in today's environment
  diversification inclusion are big components of
17
18
  working collectively in the government sector.
19
                For those reasons, it's been warmly
20
  embraced and we've been grateful and we've been
21
  very blessed in that we haven been turned down
22
  anywhere we've stepped into as of yet.
23
                MS. SUAREZ: Do any of the board
  members have questions or any members of the
  public? Hearing none, I would ask that we move
```

```
to refer this matter to staff. Do I have a
1
 2
  motion?
 3
                MS. RODRIGUEZ: I make a motion.
 4
                MR. BLEE:
                           Second.
 5
                MR. BENNETT: Miss Suarez?
 6
                MS. SUAREZ: Yes.
 7
                MR. BENNETT: Mr. Mapp is absent.
8
  Mr. DiRocco?
 9
                MR. DIROCCO: Yes.
                MR. BENNETT: Mr. Close?
10
11
                MR. CLOSE: Yes.
12
                MR. BENNETT: Mr. Avery?
13
                MR. AVERY:
                           No.
14
                MR. BENNETT: Miss Rodriquez?
15
                MS. RODRIGUEZ:
                                Yes.
                MR. BENNETT: And Mr. Blee?
16
17
                MR. BLEE:
                          Yes.
18
                MR. BENNETT: With five votes, it
  will be referred to staff for review.
20
                MR. ELLENIS: Thank you.
21
                MS. SUAREZ: If I'm not mistaken, I
22
  think that was the last item on the agenda.
23
  do I have a motion to adjourn?
24
                MS. RODRIGUEZ: Make a motion.
25
                MR. AVERY: Second.
```

```
MR. BENNETT: All those in favor?
 1
                  BOARD MEMBERS:
 2
                                     Aye.
 3
                  (Hearing Concluded at 3:22 p.m.)
