New Jersey Department of Environmental Protection
CO₂ Budget Trading Program (N.J.A.C. 7:27C)

Instructions for Dispatch Agreement Facility Certification

The certification provided with this document, and the supporting documentation to be provided as Attachments A and B to the certification, are required to be submitted to the Department for certification of a CO₂ budget source as a “dispatch agreement facility” pursuant to N.J.A.C.7:27C- 5.5(b). A separate certification and supporting documentation must be submitted for each CO₂ budget source.

Note that the Department plans to publish a public notice of the procedures for purchasing CO₂ allowances through a fixed-price sale offer in accordance with N.J.A.C. 7:27C-5.4(b) through (h) on November 1st, 2020. This notice will include the CO₂ allowances offered for sale to each CO₂ budget unit at a certified dispatch agreement facility that meets the requirements at N.J.A.C. 7:27C- 5.5(b).

In order for a CO₂ budget source to be certified as a dispatch agreement facility prior to the release of the Department’s public notice, the certification and attachments referenced in this document must be received by the Department by no later than 5 P.M. EST on October 15th, 2020. Only certified dispatch agreement facilities will receive a fixed-price offer of CO₂ allowances from the Department as part of the public notice.

Note that any material change from the certification language provided with this document, or failure to provide the required information in Attachments A and B, may result in failure of the CO₂ budget source to be certified as a dispatch agreement facility.

All terms used herein have the meanings set forth at N.J.A.C. 7:27C-1.2.

Submission

Using the separate Word document certification statement template that accompanies this document, enter the requested information in the fields at the top of the document. Print the document and sign, date, and notarize. Compile the requested information for Attachments A and B referenced in the instructions that follow in this document, and attach as Attachments A and B to the signed and notarized certification statement.

Submit the original executed certification statement and Attachments A and B to the following address:
New Jersey Department of Environmental Protection
Bureau of Climate Change and Clean Energy
Attn: NJ RGGI Program,
401 E. State Street, 2nd Floor,
Mail code 401-02H
P.O. Box 420
Trenton, NJ 08625-0420

The original executed certification statement and Attachments A and B must be received by the Department at the above address by **5 P.M. EST on October 15th, 2020**.

I certify the following:

The above-named CO₂ budget source, and the above-listed CO₂ budget units at the source, meet the following criteria for a certified dispatch agreement facility set forth at N.J.A.C. 7:27C-5.5(b):

1. The CO₂ budget source is a cogeneration facility or the CO₂ budget source has a heat rate of less than 8,100 Btu per kilowatt-hour electric.
2. The CO₂ budget source is subject to a power purchase agreement that includes the following conditions:
   a. The agreement was executed prior to January 1, 2002.
   b. The agreement is for a duration of more than 15 years from its effective date.
   c. The agreement provides that the counterpart to the agreement that purchases energy from the facility controls the electric dispatch of the facility.
   d. The agreement does not allow for the facility to pass the cost of CO₂ allowances on to the counterpart to the agreement that purchases energy from the facility.
   e. The agreement is currently in effect.

Attachment A to this certification provides supporting documentation that the above-named CO₂ budget source, and the above-listed CO₂ budget units at the source, meet the criteria listed above.

Attachment B to this certification provides documentation of the conditions of the power purchase agreement(s) to which the above-listed CO₂ budget units at the above-named CO₂ budget source are subject.

The owner or operator of the above-named CO₂ budget source shall provide on-site access, upon the Department’s request, to any information the Department requires to determine the validity of this certification.

If subsequent to the submittal of this certification and supporting documentation, there is any material change to the information and statements contained herein or to the supporting material attached hereto, I or my successor shall submit to the Department a supplemental sworn affidavit and supporting material addressing any such material change within thirty (30) days after the change occurs. I acknowledge that if the supplemental sworn affidavit and supporting material are not submitted to the Department within this time period, the CO₂ budget source will no longer be eligible to receive a fixed-price CO₂ allowance sale offer.
I acknowledge that at such time as the power purchase agreement relating to the above-named CO₂ budget source expires or is terminated, or when the services under a new contract become effective, the above-named CO₂ budget source will no longer be considered a certified dispatch agreement facility.

I acknowledge that pursuant to N.J.A.C. 7:27C-5.5(g), any CO₂ allowances purchased by a CO₂ authorized account representative on behalf of a CO₂ budget source for a certified dispatch agreement facility that remain in the compliance account for the related CO₂ budget source subsequent to the compliance deduction by the Department of CO₂ allowances for a control period pursuant to N.J.A.C. 7:27C-6.9(b) shall be assigned to the consumer benefit account established pursuant to N.J.A.C. 7:27C-5.2(a).

I understand that any signatory to a sworn affidavit submitted pursuant to N.J.A.C. 7:27C-5.5(b) who knowingly gives or causes to be given any false or misleading information or who knowingly makes any false or misleading statement in such affidavit shall be subject to the penalties and financial assessments outlined at N.J.S.A. 26:2C-49e, and the CO₂ budget unit(s) referenced in the affidavit shall no longer be considered a certified dispatch agreement facility.

The co-signing entity identified below is independent from the owner and operator of the above-named CO₂ budget source. The owner and operator of the above-named CO₂ budget source has no direct or indirect financial interest in the entity, ownership or otherwise, and exercises no direct or indirect control over the entity. Likewise, the co-signing entity has no direct or indirect financial interest in the above-named CO₂ budget source, ownership or otherwise, or in the owner and operator of the CO₂ budget source, ownership or otherwise, and exercises no direct or indirect control over the CO₂ budget source or the owner and operator of the CO₂ budget source.

I have the legal authority to act on behalf of the owner or operator of the above-named CO₂ budget source or the independent entity named below, as applicable. This legal authority includes the authority to make this submission. In the case of the signatory submitting this affidavit on behalf of the owner or operator of the CO₂ budget source, I perform the functions of Chief Financial Officer, or equivalent, for the owner or operator of the above-named CO₂ budget source.

I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information, including the possibility of fine or imprisonment.

Contents

Attachment A must provide documentation that the CO₂ budget source meets at least one of the criteria for a certified dispatch agreement facility at N.J.A.C. 7:27C-5.5 (b), which states that the CO₂ budget source must be a cogeneration facility¹ or have a heat rate² of less than 8,100 Btu per kilowatt-hour electric. Provide a description of the CO₂ budget source and how it meets one or both of these criteria.

For each CO₂ budget unit at the CO₂ budget source, provide the following data for the 2019 calendar year:

- electrical output (MWh)
- useful thermal energy output (MMBtu)³
- heat input (MMBtu; LHV)

For all data, reference the CO₂ budget unit to which the data applies by NJ DEP Unit ID number. Provide the source of the data for the CO₂ budget unit for each requested category of data above. To the extent practicable, data sources should be consistent with those specified in the output monitoring plan submitted in accordance with N.J.A.C. 7:27C-8.8(e).

Heat rate may be demonstrated using the 2019 net electric output and heat input data requested above, or through the provision, as part of Attachment A, of heat rate test results for each CO₂ budget unit at the CO₂ budget source. If test results are provided, the heat rate for the CO₂ budget source is the weighted average (based on MWe capacity) heat rate of all CO₂ budget units at the CO₂ budget source.

¹To determine if the CO₂ budget source meets the criterion of “cogeneration facility” apply the definition of “cogeneration unit” at N.J.A.C. 7:27C-1.2 to all units, in aggregate, at the CO₂ budget source.
²Heat rate refers to the heat input (Btu) required to generate one kilowatt-hour of net electrical output (Btu/kWh).
³See definition of “useful thermal energy” at N.J.A.C. 7:27C-1.2.
**Instructions for Attachment B**

**Identifying Information**

Provide the following requested identifying information in the table format below.

<table>

**Contents**

Attachment B must provide the following documentation of the terms of the power purchase agreement to which the listed CO₂ budget units at the CO₂ budget source are subject:

- d. Date of execution of power purchase agreement
- e. Duration of power purchase agreement
- f. Parties to power purchase agreement (seller, purchaser, and any intermediaries)
- g. Summary of provisions that govern the electric dispatch of one or more CO₂ budget units at the CO₂ budget source, the CO₂ budget unit(s) subject to such provisions, and the party that controls the electric dispatch of the unit(s)
- h. Summary of the payment terms related to the energy output of the CO₂ budget unit(s), including the categories of energy generation costs and energy generation services upon which payment is based
- i. Summary of any conditions upon which the terms of the contract may be modified

If different CO₂ budget units at the CO₂ budget source are subject to different power purchase agreements, provide the documentation listed above separately for each contract.
