

BEWARE VAMPIRE ENERGY

VAMPIRE ENERGY

is the energy used to power electronics that are off or in standby mode.

\$3
BILLION

It costs U.S. energy customers more than \$3 billion each year.

5%

Vampire Energy is responsible for 5% of the energy consumed in the United States.

SLAY ENERGY VAMPIRES

UNPLUG DEVICES

Unplug devices not in use, such as phone chargers, computers, printers, extra TVs and coffee makers.

USE POWER STRIPS

Group appliances that are hard to turn off into power strips with an on-off switch or smart controls.

UPGRADE TO ENERGY STAR®

ENERGY STAR® appliances have a lower stand-by consumption than general appliances.
