No comments were received from the applicant or anyone from the public. As a result of recent policy changes for operating permit renewal expiration dates, each Operating Permit Renewal will be granted a full five permit term. The following is the updated stack testing language which has been developed to ensure that stack testing occurs every five years:

Stack Testing every 5 years shall be defined as no later than the end of the 60th month after the first required and each subsequent stack test was completed for the new or modified source.

The new renewal permit will expire after 5 years from the approval date.
