General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

The permittee shall discharge stormwater and non-contact cooling water to surface waters of the State only as authorized herein and consistent with the terms and conditions of this permit. This permit does not authorize any unpermitted discharge of : domestic wastewater; leachate; process water; aircraft, ground vehicle, runway and equipment wash waters; chemicals; dry weather discharges of deicing/anti-icing chemicals; and discharges of non-contact cooling water not identified within the permit. Dry weather discharges are those discharges generated by processes other than those included in the definition of stormwater (N.J.A.C 7:14A-1.2). The definition of stormwater includes stormwater runoff, snowmelt runoff, and surface runoff and drainage. All other discharges constitute non-stormwater discharges. Operators of non-stormwater discharges, other than those non-stormwater discharges identified within this permit, must obtain a separate New Jersey Pollutant Discharge Elimination System (NJPDES) permit if discharged to waters of the State or through a municipal separate storm sewer system.</p> <p>The Authority has applied for a NJPDES permit renewal to the New Jersey Department of Environmental Protection (NJDEP), Bureau of Nonpoint Pollution Control. The Authority had submitted a timely renewal application. A location map of the facility is included. The Authority, as an operator of ERW, provides aviation transportation services for passengers and cargo, under Standard Industrial Classification (SIC) code 4582. These services include maintenance of runways, taxiways and terminals, as well as the provisions of aircraft hangers for servicing of aircraft. The existing permit regulates stormwater and non-contact cooling water discharges to Newark Bay via the Peripheral Ditch and the Elizabeth Channel. The Surface water classification for Newark Bay and Elizabeth Channel is SE3. The surface water classification for the Peripheral Ditch is dependent upon the salinity content of the segment. The NJDEP presently does not have information regarding the salinity of the Peripheral Ditch at each of ERW's discharge outfalls, and has therefore classified the water body segment as FW2-NT/SE3. This classification was done in accordance with the provisions outlined under N.J.A.C. 7:9B-1.15.</p> <p>The objective of this regulatory action is to provide a general permit that will be made available to all operating entities for the ERW complex. This general permit will be offered to all operating entities as an alternative to an individual permit. The purpose of developing a general permit is to provide equal and consistent regulatory requirements for all operators that must obtain a permit at the ERW complex. This specifically applies to those portions of the facility that include vehicle maintenance operations (including vehicle rehabilitation, mechanical repairs, painting, fueling and lubrication), equipment cleaning operations, and deicing operations in accordance with the definition for 'stormwater discharges associated with industrial activity' N.J.A.C. 7:14A-1.2.</p>

The unnamed tributary to the Hackensack River is located within the Hackensack River Basin. This application is for a renewal of a NJPDES permit to discharge an average of 0.75 MGD. The existing facility currently discharges a monthly average flow of approximately 0.65 MGD.</p>
