## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION  
NOTICE OF INTENT TO SETTLE  
Flood Hazard Area Permit**

**TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION** (Department) intends to settle a matter to allow for the placement of 180 linear feet of stormwater pipe within and alongside Stephensburg Road, within the riparian zone of Stephensburg Brook. The stormwater pipe is associated with a proposed single-family house. The application was received by the Department on June 28, 2007 which is prior to the November 5, 2007 effective date of the current Flood Hazard Area Control Act (FHACA) Rules, N.J.A.C. 7:13-1.1, et seq. The prior FHACA Rules require a 50-foot riparian zone adjacent to Stephensburg Brook. The applicant has minimized the riparian zone disturbances to the maximum extent possible and the project meets the prior Rules. In addition, the applicant has addressed the reason for the Department's prior denial of the application by providing a Highlands Applicability Determination and Water Quality Management Plan Consistency Determination letter which finds the project to be exempt from the requirements of the Highlands Water Protection and Planning Act, N.J.S.A. 13:20-1, et seq., and the Highlands Water Protection and Planning Act Rules, N.J.A.C. 7:38-1.1, et seq., and consistent with the Water Quality Management Plan. The Department, therefore, intends to issue a Flood Hazard Area Permit in accordance with the prior FHACA Rules.

The project is depicted on the plan prepared by Ferriero Engineering, Inc., dated September 21, 2006, last revised October 1, 2007, and entitled: "Variance Plan, Lot 62.01, Block 43, Washington Township, Morris County, New Jersey", Sheet No. 1 of 4. This plan can be viewed at the Washington Township Clerk's office or at the following Department address: Division of Land Use Regulation, 501 East State Street, 2<sup>nd</sup> Floor, Trenton, New Jersey. An appointment to view the file or plan, or to get a copy of the settlement document, may be made by calling (609) 777-0454.

NOTICE OF INTENT TO RECONSIDER**

Notice of the Department's intent to initiate a reconsideration of application of substantive standards under 7:7-1.10 of the Coastal Permit Program Rules and to provide a 30 day comment period as provided in the referenced rules.

Reconsideration of application of substantive standards is being initiated for:

Development by Salvatore La Forgia and Daniel and Nancy Crabbe

Certain engineering measures must be implemented to ensure bluff stability, and the remainder of the property will be protected from future development. The preliminary analysis and proposed development plan is available by contacting Joanne B. Davis at the address below.

A 30-day public comment period shall commence upon the publication in the bulletin. Comments may be sent to:

The new discharge will consist of treated wastewater from two areas of the Vernon Town Center. The first area is at Route 94 and Route 515 consisting of a mix of existing commercial and residential units. The second area is the Mountain Creek Development and consists of the Black Creek Sanctuary Condominium Complex and the Mountain Creek Village, which will consist of new hotels, retail commercial units, condominiums and a conference center. The proposed discharge of 265,000 gpd of sanitary wastewater will originate from two areas of the Vernon Town Center. The wastewater will be directed to the Upper Walkkill Wastewater Treatment Plant located in Hardyston Township. Wastewater disposal will be facilitated through two subsurface disposal beds with a total area of 81,154 sq. ft. The wastewater treatment facility will be designed to meet the Ground Water Quality Standards (GWQS) for all parameters of concern, except fecal coliform bacteria, prior to discharge to the disposal areas. Although disinfection will be provided, the ground water quality standard for fecal coliform bacteria will be achieved by utilizing the unsaturated native soils beneath the disposal area. All residuals generated under this NJPDES Discharge to Groundwater (DGW) permit will be wasted to the Upper Walkkill Wastewater Treatment Plant's existing sludge thickener and will be monitored under NJPDES Discharge to Surface Water (DSW) permit NJ0053350. All residuals generated at the Upper Walkkill Wastewater Treatment Plant are composted under NJPDES permit NJ0109525.</p>
Two Bridges WTP NJ0079651 Ground Water	end of Lincoln Blvd  Lincoln Park Boro  Morris County	Greg Chin  Bureau of Nonpoint Pollution Control  (609) 633-7021		<p>Two Bridges Sewerage Authority (TBSA) operates a regional wastewater treatment facility located in Lincoln Park, Morris County. TBSA processes sewage sludge generated at the facility, as well as a sludge from outside sources, by incineration. Surface water discharge is permitted through NJ0029386. The residue resulting from incineration is pumped as slurry to two unlined lagoons. Water from the slurry is reduced by evaporation and infiltration and the ash is removed offsite. Three monitoring wells monitor impact of the lagoons on ground water quality.</p>

The permittee currently operates at a permitted flow of 2.25 MGD. The permittee currently discharges the treated sanitary effluent to the ground waters of the State via eighteen (18) existing off-site infiltration/ percolation (I/P) lagoons which are located approximately 3.8 miles northwest of the plant on Erial-Williamstown Road. Three of eight on-site lagoons have plastic membrane liners which have been installed. The remaining five on-site lagoons continue to be used until implementation of the long-term wastewater management plan. The lined lagoons (surface impoundments) provide 3.5 million gallons of storage for flow equalization to the off-site basins. Sludge generated by Winslow Township Wastewater treatment Plant is managed at the Camden County Municipal Utilities Authority located in Camden, New Jersey. Only seventeen (17) of the eighteen (18) off-site lagoons will be in service at any one time, leaving an extra basin to allow for service without interrupting the operating sequence. Each basin will be filled on day one and day four of a fourteen day cycle or on day one of a seven day cycle.</p> <p>The Department has added two new residual monitored locations, SLB3 (SQAR Sludge Storage Tank) and SLP3 (SQAR - Sludge Production). Monitored location SLB3 was added to accommodate reporting of liquid residuals removed from the sludge storage tanks, and SLP3 was added to accommodate reporting of the annual residual production Waste Characterization Report (WCR). The Department is granting a reduction in the number of parameters that must be reported on the annual residuals "production" WCR at monitoring location SLP3, pursuant to N.J.A.C. 7:14C-1.13(c). Monitored location SL3A (Belt Filter Press) will be deactivated when the permit becomes effective since the belt filter press has recently been shut down. All SQAR reporting information for the liquid residual currently being removed shall be reported under monitored location SL3A until this permit becomes effective. In the event the belt filter press is turned back on the permittee shall notify the Department in writing so that monitored location SL3A can be reactivated and the appropriate forms under SLB3 deactivated as detailed under Part III of the permit. In addition, the Department has also deleted 2,3,7,8-Tetrachloro-dibenzo-p-dioxin (TCDD) from the annual residuals "priority pollutant" WCR consistent with changes made in the Sludge Quality Assurance Regulations on June 5, 2006.</p>
