In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**WATERSHED PROPERTY REVIEW BOARD
NOTICE OF REQUEST FOR JURISDICTIONAL DETERMINATION**

The Watershed Property Review Board (the “Board”) is charged with granting or denying exemptions to the Watershed Protection and Moratorium Act, P.L. 1988, c.163, as amended by P.L. 1990, c.19 (the “Act”). The Act requires that all municipalities, municipal utility authorities and utilities obtain an exemption from the Board prior to the conveyance of any land utilized for the purpose of the protection of a public water supply. Exemptions can be granted if the person applying for the exemption can demonstrate a compelling public need for the conveyance, that the denial would result in extraordinary hardship, or that the sale or development of the watershed property is otherwise consistent with the purposes of the Act. The Board only has jurisdiction over land utilized for the purpose of the protection of a public water supply.

Please take notice that the City of Newark, through the Newark Watershed Conservation and Development Corporation, has asked the Watershed Property Review Board to make a determination as to whether certain watershed properties should be granted an exemption under the Act. The exemption would permit the City of Newark to convey a lease or easement to Tennessee Gas Pipeline Company (“Tennessee”) to accommodate its proposed extension and upgrade of an existing natural gas pipeline that Tennessee currently owns and operates.

The properties are:

Township of Vernon, Sussex County,
Block 203, Lot 1 and Block 210, Lot 7

Comments or questions regarding this jurisdictional determination should be sent to the Watershed Property Review Board, John Flynn, NJDEP, Green Acres Program, P.O. Box 412 Trenton, New Jersey 08625 or by telephone at (609) 984-0628 or via email at John.Flynn@dep.state.nj.us. **Comments must be received by the WPRB within 30 days of this publication.**

Renovations from 2004 through 2007 included the construction of a 26'x82' troop cabin, six 26'x32' log cabins, six 18'x18' activity shelters, a 40'x60' activity shelter, a 20'x25' log style garage, a new pool, and a new pool house. The expansion allowed the camp population to increase from 108 to 172 people per day in the winter and a summer increase of 265 people per day in the summer to 358. Overnight camping only takes place on the weekends during the winter and is limited to a maximum of 40 girls for six nights one week during the summer. The focus of the facility will remain as a day camp during the summer. Based on actual flow data plus a safety factor, the projected wastewater design flow is 1772 gallons per day. The expansion removes the blackwater component of wastewater from the groundwater discharge by the use of composting toilets. The gray water from sinks and showers is collected and gravity drained to a media filter and tanks prior to onsite disposal via subsurface drip irrigation. Gray water from an educational center and lodge discharged to ground water via separate upgraded subsurface disposal systems. A 25,000 square foot disposal area receives the discharge of filtered gray water to ground water. The design flow of wastewater from the facility is 1,772 gpd, and monitoring wells are utilized to assess compliance with the Ground Water Quality Standards.
