## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

PSEG Nuclear LLC Hope Creek Generating Station  NJ0025411  DSW Major	Artificial Island Foot of Buttonwood Rd Lower Alloways Creek, NJ 08038  Salem County	Heather Genievich  Bureau of Surface Water Permitting  (609) 292-4860	Delaware River  Zone 5  Delaware River	This application is for a renewal of a NJPDES permit to discharge an average of 54.46 MGD of treated industrial wastewater. The Hope Creek Generating Station is a single unit nuclear power steam electric generating facility. The facility discharges an estimated long term average flow of 54.46 million gallons per day. The majority of the discharge consists of cooling tower blowdown, with contributions from internal waste streams such as the low volume oily waste system and sewage treatment plant. In addition, this permit authorizes the discharge of storm water from storm water drains.
Pureland Water Treatment Plant  NJ0023299  DSW Minor	High Hill Road Bridgeport, NJ 08014  Gloucester County	Bela Mankad  Bureau of Surface Water Permitting  (609) 292-4860	Unnamed tidal tributary of Raccoon Creek  SE2  Raccoon Creek / Birch Creek	This application is for the renewal of an existing permit for the discharge of filter backwash water from a potable water treatment plant. This plant serves as a backup source of drinking water for Logan Township and has not been used since 2002.  When operational, groundwater is pumped through two ion exchange filters for Iron removal prior to introduction into the distribution system. The filters are backwashed and rinsed using raw well water where approximately 4,000 gallons of wastewater is generated per backwash cycle and stored in a settling tank. Wastewater generated from two backwash cycles is held in the tank prior to final mixing, settling and decanting of the supernatant. The supernatant is then discharged to the receiving stream via discharge serial number 001A.

There is no production or product storage on-site. The drainage areas for DSN001A and DSN002A are non-industrial areas. The permittee is working with the Department's Site Remediation Program to investigate and address any on-site contamination. Due to the large acreage that is presently zoned for commercial redevelopment, and its potential to generate wastewater, Hercules has maintained the wastewater treatment plant and wants to renew the permit to discharge from the outfall DSN004A.
