Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation and Waste Management, proposes to issue the following New Jersey Pollutant Discharge Elimination System permit actions in accordance with N.J.S.A. 58:10A-1 et seq. and N.J.A.C. 7:14A-1 et seq.

The permit action prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection may be requested through the Open Public Records Act. Details are online at www.nj.gov/dep/opra, or call (609) 341-3121. Appointments for inspection of the NJPDES file only or requests for a copy of the draft document (at a nominal charge) may be made by calling Central File at (609) 292-0400.

Comments on the draft document or a request that the Department holds a non-adversarial public hearing must be submitted in writing to the person specified below and shall be postmarked within 30 days of the date of this public notice. All persons, including the applicant, who believe that any condition set forth in this document is inappropriate, must raise all reasonable issues and submit all arguments and factual materials supporting their position by the close of the public comment period. Any request for a hearing shall state the nature of the issues to be raised. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period shall automatically be extended to the close of the public hearing.

The Department will consider and respond to all significant and timely comments. The applicant and each person who has submitted written comments will receive notice of Department's final decision.

Written comments should be submitted to:

PUBLIC NOTICE {tc \l2 "**PUBLIC NOTICE**}

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin **and** a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin **only**.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

The Arthur Kill and Smith Creek are located within the Rahway River / Woodbridge Creek watershed. The Sewaren facility has a design flow capacity to discharge an average of 222 million gallons per day (MGD) through outfall discharge serial number (DSN) 501A. However, the station has historically been operating on an infrequent basis at less than a 10 % capacity factor; therefore discharge flows have been reduced. DSN 501A discharges whenever one or more circulating water pumps are in service. In addition an average of 2.88 MGD from the auxiliary cooling system is also discharged via this outfall, which is continuous discharge throughout the year.</p> <p>Based on Discharge Monitoring Report (DMR) data from June 2007 to June 2009, the existing facility discharged an average flow value of 72 MGD through DSN 501A, 0.01 MGD through DSN 502A and 0.12 MGD through DSN internal monitoring point WTPA.</p> <p>This draft renewal permit also proposes to incorporate NJDEP's determination with respect to the permittee's request for a thermal variance from surface water quality standards for heat and temperature pursuant to Section 316(a) of the Federal Water Pollution Control Act, 33 U.S.C. Section 1251 et seq. (Clean Water Act). Further, this draft renewal permit proposes to incorporate NJDEP's determination pursuant to Section 316(b) of the Clean Water Act regarding the best technology available for the cooling water intake structure to minimize adverse environmental impacts.</p> |

The facility has two active fossil fuel-fired electric generating units. Units 1 and 2 are both steam-electric units. A third unit, Unit 3, a combustion turbine unit, was retired effective October 3, 2003.</p> <p>This draft renewal permit proposes to authorize the intake of water from the Hackensack River as well as the discharge of wastewater through the discharge serial numbers (DSN) described below. The majority of water withdrawn through the permittee's intake is used for once-through cooling purposes in the permittee's operations and averages 592 million gallons per day. This permit also authorizes discharge through several other outfalls.</p> <p>The direct discharges to the Hackensack River are as follows: DSN 361A discharges non-contact cooling water for Units 1 and 2, stormwater and effluent from the internal wastestreams and DSN WTPA; DSN 363A discharges non-contact cooling water from Unit 3; DSN 365A discharges auxiliary equipment non-contact cooling water from Unit 1 and stormwater; DSN 366A discharges auxiliary equipment non-contact cooling water from Unit 2, stormwater and Unit 2 emergency flood pump water. The internal monitoring points that discharge to DSN 361A are: DSN 61SA which discharges reverse osmosis reject water; DSN 61 PA which discharges stormwater from the North and South fly ash ponds; DSN 61RA which discharges stormwater from bottom ash storage area; and DSN WTPA which discharges treated process wastewater. The direct stormwater discharges to the Hackensack River are as follows: DSN 364A discharges stormwater, auxiliary equipment and No. 1 emergency flood pump; and DSN 367A, which is a newly permitted discharge, discharges stormwater from southern yard drains including the Back End Technology project and coal pile runoff.</p> <p>This draft permit renewal also proposes to incorporate NJDEP's determination with respect to a thermal variance from surface water quality standards for heat and temperature pursuant to Section 316(a) of the Federal Clean Water Act. Further, this draft renewal permit incorporates NJDEP's determination pursuant to Section 316(b) of the Clean Water Act regarding the best technology available for the cooling water intake structures in accordance with best professional judgment.</p> |

Berkshire Valley Golf Course is a 18 hole golf course that will have a clubhouse, (snack bar, bathrooms and proshop) a maintenance building and a comfort station. The facility consists of an on-site wastewater treatment plant to treat sanitary wastewater generated by the clubhouse and maintenance building and the wastewater generated by comfort station will be managed by an on-site septic system.</p> <p>The on-site wastewater treatment plant serving the clubhouse and maintenance building will discharge sanitary wastewater to the ground waters of the State via a 5,082 sq. ft. subsurface disposal field. The septic system serving the comfort station will discharge sanitary wastewater to the ground waters of the State via a 2,100 sq. ft. subsurface disposal field. Although nitrification and de-nitrification will be provided by the treatment system, compliance with the Ground Water Quality Standards will be determined at two (2) downgradient ground water monitoring wells. Flow to the clubhouse disposal system shall be limited to 2,585 gpd and flow to the comfort station disposal field shall be limited to 900 gpd.</p> |

One impoundment is the original equalization basin and the other impoundment is part of the newer residuals handling process included in the Fall 2007 upgrade of the water treatment plant. These equalization basins normally operate in parallel. One can be removed from service for maintenance while the other remains in service. The filter backwash water is pumped from the equalization basins to the clarification process where the residuals handling process continues. The Haworth Filtration Plant produces approximately 700 tons of dried sludge per year. The sludge contains matter removed from the Oradell Reservoir intake water by the water treatment process. Aluminum hydroxide is a reaction product from the coagulation process utilizing aluminum sulfate and is also a major constituent of the settled solids. Residuals monitoring requirements and conditions are contained in NJPDES/DSW Permit No. NJ0051373.</p> |

Route 12 Business Park is a commercial warehouse/office development located on Route 12 West in Kingwood Township, Hunterdon County. The facility consists of eight (8) buildings totaling 194,000 ft². There will be 56,500 ft² of office space and 137,500 ft² of warehouse space. Their will be no food preparation or food service activities at this facility. The sanitary wastewater design flow for the facility will be 7,830 gallons per day (gpd) which includes a 20% factor of safety that will account for any future increase in the number of employees at the facility. The sanitary waste generated by the facility will be managed by an on-site wastewater treatment and recycling system and the wastewater will be discharged to the ground waters of the State via a 390 foot subsurface disposal trench.</p> <p>The sanitary waste from the facility will be managed by an on-site wastewater treatment and recycling system. The wastewater treatment system will provide sufficient treatment so that the effluent quality can achieve the Ground Water Quality Standards prior to discharge and the standards for Reclaimed Water for Beneficial Reuse (RWBR)-Public Access when necessary. The design flow for the facility will be 6,525 gpd plus a 20% factor of safety, or 7,830 gpd. Approximately 70% of the effluent will be recycled for toilet flush water at the facility and the other 30%, or 2,349 gpd will either be discharged to the subsurface disposal trench or used for landscape watering.</p> |

Notice of Public Comment Period Regarding Requests for Highlands Applicability and Water Quality Management Plan Consistency Determinations

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Bureau of Watershed Regulation, has received the following Highlands Applicability and Water Quality Management Plan Consistency Determination application(s) requesting the issuance of determinations in accordance with N.J.S.A. 13:20-1 et seq. Each application is described in the accompanying table.

All applications, prior to submittal for public notice, have been deemed administratively complete in accordance with N.J.A.C. 7:38-11.2(c)3 and the following agencies/persons have been notified by the applicant in accordance with the requirements under N.J.A.C. 7:38-9.2(b).

- i. The Municipal Clerk
- ii. The Highlands Council
- iii. The Municipal Environmental Commission (if one exists);
- iv. The Municipal Planning Board
- v. The Municipal Construction Official
- vi. The County Planning Board; and
- vii. The County Environmental Commission (if one exists)

Applications will be reviewed to determine whether the project proposal qualifies for the selected exemption and whether it is consistent with the applicable Water Quality Management Plan. Be advised, however, that the proposal will also be reviewed to determine whether it qualifies for an exemption other than the one specifically applied for.

The public notice has been prepared for these applications as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. An appointment to review the file pertinent to the listed proposals may be requested through the Open Public Records Act. Details are online at www.nj.gov/dep/opra, or call (609) 341-3121

The public comment period on these applications begins on the date of publication of this notice and will close thirty (30) calendar days later. Any interested person may raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period.

NJDEP will consider all timely submitted comments. The applicant and each person who submitted written comments will receive notice of NJDEP's final determination.

Written comments should be submitted to:
