General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Public Notice

Take notice that the NJ Department of Environmental Protection and the NJ Environmental Infrastructure Trust are proposing to readopt N.J.A.C. 7:22 without change. The Financial Assistance Programs for Environmental Infrastructure Facilities rules were scheduled to expire on December 8, 2010. Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin and a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin only.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

PSEG Fossil Hudson Generating Station is an existing fossil fueled electric generating station (SIC code 4911) which uses coal, natural gas and fuel oil. The facility has two active fossil fuel-fired electric generating units. Units 1 and 2 are both steam-electric units. A third unit, Unit 3, a combustion turbine unit, was retired effective October 3, 2003.

This draft renewal permit proposes to authorize the intake of water from the Hackensack River as well as the discharge of wastewater through the discharge serial numbers (DSN) described below. The majority of water withdrawn through the permittee’s intake is used for once-through cooling purposes in the permittee’s operations and averages 592 million gallons per day. This permit also authorizes discharge through several other outfalls.

The direct discharges to the Hackensack River are as follows: DSN 361A discharges non-contact cooling water for Units 1 and 2, stormwater and effluent from the internal wastestreams and DSN WTPA; DSN 363A discharges non-contact cooling water from Unit 3; DSN 365A discharges auxiliary equipment non-contact cooling water from Unit 1 and stormwater; DSN 366A discharges auxiliary equipment non-contact cooling water from Unit 2, stormwater and Unit 2 emergency flood pump water. The internal monitoring points that discharge to DSN 361A are: DSN 61SA which discharges reverse osmosis reject water; DSN 61 PA which discharges stormwater from the North and South fly ash ponds; DSN 61RA which discharges stormwater from bottom ash storage area; and DSN WTPA which discharges treated process wastewater. The direct stormwater discharges to the Hackensack River are as follows: DSN 364A discharges stormwater, auxiliary equipment and No. 1 emergency flood pump; and DSN 367A, which is a newly permitted discharge, discharges stormwater from southern yard drains including the Back End Technology project and coal pile runoff.

This draft permit renewal also proposes to incorporate NJDEP’s determination with respect to a thermal variance from surface water quality standards for heat and temperature pursuant to Section 316(a) of the Federal Clean Water Act. Further, this draft renewal permit incorporates NJDEP’s determination pursuant to Section 316(b) of the Clean Water Act regarding the best technology available for the cooling water intake structures in accordance with best professional judgment.
This permit action is for a major modification to address the remediation of radiologically impacted groundwater on the western portion of the CBS facility. The groundwater remediation system will have a permitted flow of 0.029 MGD of treated wastewater.

This application is for a renewal of a NJPDES permit to discharge a permitted flow of 1.64 million gallons per day (MGD) of treated and disinfected domestic wastewater. This permit includes conditions for Reclaimed Water for Beneficial Reuse (RWBR).

The above named applicant has applied for a New Jersey Pollutant Discharge Elimination System (NJPDES) permit revocation and reissuance to the New Jersey Department of Environmental Protection (NJDEP), Bureau Nonpoint Pollution Control. The applicant is involved with the operations of a bulk commodities terminal under the Standard Industrial Classification (SIC) 4491. The proposed permit regulates stormwater discharges to the Newark Bay classified as SE3.

The New Jersey Department of Environmental Protection (NJDEP) proposes to issue the New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Surface Water (DSW) Master General Permit, NJ0178217, in accordance with N.J.A.C. 7:14A-1 et seq., and by authority of the Water Pollution Control Act at N.J.S.A. 58:10A-1 et seq., to authorize the applications of biological and chemical pesticides in water when such applications are made in, over, or near surface waters of the State. This general permit will regulate the following pesticide applications: nuisance insect control (i.e. mosquito and fly control), aquatic pest control (i.e. weeds, algae), aquatic nuisance animal control, aerial treatment of forest canopy, and treatment for aquatic agricultural activities. You can find the draft PGP on the Department’s website at http://www.nj.gov/dep/dwq/gp_surfacewater.htm under Surface Water General Permits.

The following minor modifications and administrative permit revocations were recently issued. These actions are listed for informational purposes only and are not open for public comment.
