This permit action removes MW-1. The project consists of a 32,010 sq. ft. office building and two 30’ x 89’ disposal beds with dosing tanks to handle the proposed 4000 gpd of sanitary wastewater. The existing site contains warehousing for building materials and 3 individual septic systems for each warehouse. The proposed septic systems will be independent of the existing warehouses.
Significant Indirect User (SIU) Renewal Permit Action
The facility is an existing metal finisher, SIC Code 3479, and discharges an average of about 500 gallons daily of industrial process wastewater. Wastewater is pretreated by hydroxide precipitation.

Surface Water New Permit Action
This authorization is for a new discharger. The facility will discharge treated landfill leachate to an unnamed tributary of Drake's Brook. The facility is estimated to discharge 0.04 million gallons per day.

The following minor modifications and administrative permit revocations were recently issued. These actions are listed for informational purposes only and are not open for public comment.
