O = Other

REG = HMDC/Pinelands Exemption

Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway or floodplain in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Special Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

DIVISION OF COASTAL AND LAND USE PLANNING**

**Proposed Amendment to the Upper Delaware Water Quality Management Plan
Public Notice**

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Upper Delaware Water Quality Management (WQM) Plan. This amendment, submitted on behalf of Mr. Dan Whitaker of Swan Creek Holding Co., LP, would expand the sewer service area (SSA) of the Lambertville Municipal Utilities Authority (LMUA) Regional Environmental Pollution Control Facility (REPCF) to include Block 1043, Lot 2 in Lambertville City, Hunterdon County. The SSA expansion would include the proposed development of 45 long term one bedroom hotel units called the Lambertville Water Lofts. The LMUA REPCF discharges under NJDPES permit number NJ0020915 to the Delaware River.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the proposed SSA. ESAs evaluated include, but are not limited to: habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, riparian zones, wetlands, steep slopes, Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESAs are not included in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Area in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains are excluded from proposed SSAs. There are no prohibitions written into the Federal 201 grants awarded to LMUA REPCF (C-34-527-01) which affect extension of sewer infrastructure to the proposed development, however, there are outlined steps recommended to minimize harm to the environment in siting location and construction of sewer infrastructure.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The proposed wastewater flow, as calculated in accordance with N.J.A.C. 7:14A-23.3 is 3,375 gallons per day. Currently, LMUA REPCF is permitted to discharge 1.5 million gallons per day (MGD) of treated wastewater to the Delaware River. The average of the last twelve months of discharge monitoring data show

that LMUA REPCF has discharged an average daily flow of 0.836 MGD. The additional 0.004 MGD of wastewater will not cause the wastewater generation potential of the expanded SSA to exceed the permitted capacity of LMUA REPCF.

In accordance with N.J.A.C. 7:15-5.25(h)³ the water supply need for the proposed project has been evaluated. The proposed project would be served by the public water supply provided by United Water Lambertville, which is currently permitted to allocate 30.4 million gallons per month (MGM) and has a water supply surplus of 14.7 MGM. The proposed water demand of the project is 0.004 MGD or 0.120 MGM; therefore sufficient water supply is available to serve the proposed development within the existing water allocation permit.

Lambertville City has adopted a stormwater control ordinance (Ord. No. 2006-09) in accordance with N.J.A.C. 7:8. Consequently, the requirements of N.J.A.C. 7:15-5.25(h)⁴ for stormwater control have been satisfied. No portion of the proposed development on site is identified as within a riparian zone as established at N.J.A.C. 7:15-5.25(5)⁵ or areas with a steep slope as required at N.J.A.C. 7:15-5.25(h)⁶.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

Approval of this amendment would not eliminate the need for any permits, approvals, or certifications required by any Federal, State, County, or municipal review agency with jurisdiction over any project/activity. Approval of this amendment does not provide any implied approval for any other aspects of any project or needed permits and approvals.

This notice is being given to inform the public that a plan amendment has been proposed for the Upper Delaware WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Department, Division of Coastal and Land Use Planning, P.O. Box 420, Mail Code 401-07C, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Division of Coastal and Land Use Planning at (609) 984-6888.

Interested persons may submit written comments on the amendment to WQM Program Docket, Division of Coastal and Land Use Planning, at the Department address cited above with a copy sent to Mr. Thomas Horn, Executive Director, Lambertville Municipal Utilities Authority, Lambert Lane Extended, P.O. Box 300, Lambertville, NJ 08530. All comments must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**PUBLIC NOTICE
ENVIRONMENTAL PROTECTION
DIVISION OF COASTAL AND LAND USE PLANNING**

Proposed Amendment to the Upper Delaware Water Quality Management Plan

Public Notice

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Upper Delaware Water Quality Management (WQM) Plan. This amendment, submitted on behalf of Mr. Christopher Sickels, Executive Director of the Hunterdon Medical Center, would expand the sewer service area (SSA) of the Lambertville Municipal Utilities Authority (LMUA) Regional Environmental Pollution Control Facility (REPCF) to include Block 1002, Lot 29 in Lambertville City, Hunterdon County. The SSA expansion would include the proposed development a 75,000 square foot medical center. The LMUA REPCF discharges under NJDPES permit number NJ0020915 to the Delaware River.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the proposed SSA. ESAs evaluated include, but are not limited to: habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, riparian zones, wetlands, steep slopes, Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESAs are not included in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Area in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains are excluded from proposed SSAs. There are no prohibitions written into the Federal 201 grants awarded to LMUA REPCF (C-34-527-01) which affect extension of sewer infrastructure to the proposed development, however, there are outlined steps recommended to minimize harm to the environment in siting location and construction of sewer infrastructure.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The proposed wastewater flow, as calculated in accordance with N.J.A.C. 7:14A-23.3 is 7,500 gallons per day. Currently, LMUA REPCF is permitted to discharge 1.5 million gallons per day (MGD) of treated

wastewater to the Delaware River. The average of the last twelve months of discharge monitoring data show that LMUA REPCF has discharged an average daily flow of 0.836 MGD. The additional 0.0075 MGD of wastewater will not cause the wastewater generation potential of the expanded SSA to exceed the permitted capacity of LMUA REPCF.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. The proposed project would be served by the public water supply provided by United Water Lambertville, which is currently permitted to allocate 30.4 million gallons per month (MGM) and has a water supply surplus of 14.7 MGM. The proposed water demand of the project is 0.0075 MGD or 0.120 MGM; therefore sufficient water supply is available to serve the proposed development within the existing water allocation permit.

Lambertville City has adopted a stormwater control ordinance (Ord. No. 2006-09) in accordance with N.J.A.C. 7:8. Consequently, the requirements of N.J.A.C. 7:15-5.25(h)4 for stormwater control have been satisfied. No portion of the proposed development on site is identified as within a riparian zone as established at N.J.A.C. 7:15-5.25(5) 5 or areas with a steep slope as required at N.J.A.C. 7:15-5.25(h)6.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

Approval of this amendment would not eliminate the need for any permits, approvals, or certifications required by any Federal, State, County, or municipal review agency with jurisdiction over any project/activity. Approval of this amendment does not provide any implied approval for any other aspects of any project or needed permits and approvals.

This notice is being given to inform the public that a plan amendment has been proposed for the Upper Delaware WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Department, Division of Coastal and Land Use Planning, P.O. Box 420, Mail Code 401-07C, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Division of Coastal and Land Use Planning at (609) 984-6888.

Interested persons may submit written comments on the amendment to WQM Program Docket, Division of Coastal and Land Use Planning, at the Department address cited above with a copy sent to Mr. Thomas Horn, Executive Director, Lambertville Municipal Utilities Authority, Lambert Lane Extended, P.O. Box 300, Lambertville, NJ 08530. All comments must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF COASTAL AND LAND USE PLANNING
Adopted Amendment to the Lower Delaware Water Quality Management Plan (WQMP)
Public Notice**

Take notice that on December 12, 2013 pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Lower Delaware WQMP was adopted by the Department of Environmental Protection (Department). This amendment, submitted on behalf of the Cumberland County Board of Chosen Freeholders, removes sewer service area (SSA) from the City of Millville Wastewater Treatment Plant (WTP) designation in the Lower Delaware WQMP and identifies SSA for the Cumberland County Fairgrounds on Block 4, Lot 1 in the City of Millville, Cumberland County. The subject property is bordered by Carmel Road (CR 608), Morias Avenue (CR 714), and Fairstand Road and totals approximately 65 acres.

Wastewater flow has been projected pursuant to N.J.A.C. 7:9A-7.4 to be a total of 9,390 gallons per day which discharge to 6 onsite existing septic systems. This amendment has been approved in accordance with P.L. 2011, c. 203, as a development or activity having a wastewater planning flow of greater than 8,000 gallons per day (gpd) and less than 20,000 gpd that results in a discharge to groundwater and meets the technical requirements for eligibility for a New Jersey Pollutant Discharge Elimination System (NJDPES) Discharge to Ground Water (DGW) permit issued pursuant to the "Water Pollution Control Act," P.L. 1997, c. 74 (C.58:10A-1 et seq.) and rules and regulations adopted pursuant thereto.

Pursuant to P.L. 2011, c. 203, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. However, in this case, the Department's Bureau of Nonpoint Source Pollution has determined that the Cumberland County Fairgrounds facility will be reviewed and processed as a NJPDES DGW T1 general permit. This general permit authorizes the discharge of sanitary sewage from facilities to a subsurface disposal (septic) system with a design volume in excess of 2,000 gpd and which was designed and approved in accordance with either N.J.A.C. 7:9A-1et seq. or its regulatory precursors prior to January 1, 1990. Therefore the existing wastewater generating facilities only are adopted as SSA. These facilities include the fair main entrance, main office, Sheriff/EMT office, the Community Display/Home Arts building, main grandstand restroom, 4H restroom/showers, the 4H, Big Johns, and open rented food booths with sinks, and campsite area and total approximately 0.8 acres.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the adopted SSA. ESAs evaluated include, but are not limited to: habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, riparian zones, wetlands, steep slopes, Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1)

special water resource protection areas, and wetlands, alone or in combination. These ESAs are not included in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in adopted SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.25(g)3, the riparian zone analysis shall be satisfied by the submission of up to date municipal riparian zone protection ordinance. In the absence of the municipal riparian zone ordinance, riparian zones as described at N.J.A.C. 7:15-5.25(g)2, are not to be included in the adopted SSA. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. No riparian zones have been identified on site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in adopted SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). No wetlands have been identified on site.

In accordance with N.J.A.C. 7:15-5.25(h)6, development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the project has been evaluated. The water at the existing fairgrounds is supplied from two private wells which have been in use since the 1970's and are located in the Maurice River watershed, withdrawing from the Kirkwood Cohansey Aquifer. As the Cumberland County fairgrounds utilize a discharge to groundwater within the Maurice River watershed, no significant depletive water loss would result within the region.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2011, c. 203 directs there be a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of the development. As such, the City of Millville has adopted up to date Stormwater Management Plan as evidenced by Resolution 13-2007.

This amendment proposal was noticed in the New Jersey Bulletin on November 6, 2013 at Volume 37 Issue 21, page 11 and no comments were received during the comment period. The City of Millville passed

Comments must be received by NJDEP within 30 days of this publication to be considered.

**New Jersey Department of Environmental Protection
Division of Water Quality
Bureau of Surface Water Permitting
PUBLIC NOTICE**

The New Jersey Department of Environmental Protection (NJDEP) is hereby giving Notice in accordance with N.J.A.C. 7:14A-15.10(d) of New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions for eight (8) permittees, a public hearing on those permits as well as a request for input on a related matter as described below.

The NJDEP proposes to renew the Bergen County Utilities Authority-Little Ferry Sewage Treatment Plant's individual Discharge to Surface Water (DSW) Category A Permit NJ0020028 as well as to incorporate updated Combined Sewer Overflow (CSO) permit requirements. Also, NJDEP proposes to issue individual CSO permits for communities in BCUA's sewer service area that have combined sewer outfalls. These communities are: Hackensack, Ridgefield Park and Fort Lee. The NJDEP proposes to revoke the authorization under the existing general CSO permit and issue an individual permit to Hackensack (NJ0108766) and Ridgefield Park (NJ0109118) to authorize discharges from their CSOs. The NJDEP also proposes to renew the existing individual CSO permit for Fort Lee (NJ0034517).

The NJDEP proposes to revoke and reissue North Bergen Township Municipal Utilities Authority-Woodcliff Sewage Treatment Plant's individual Discharge to Surface Water (DSW) Category A Permit NJ0029084 in order to incorporate updated CSO permit requirements. Also, NJDEP proposes to issue an individual CSO permit for Guttenberg (NJ0108715) since Guttenberg has a combined sewer outfall and is within North Bergen-Woodcliff's sewer service area. The NJDEP proposes to revoke Guttenberg's authorization under the existing general CSO permit and issue an individual permit to authorize discharges to from that CSO.

The NJDEP proposes to revoke and reissue the individual Discharge to Surface Water (DSW) Category A Permit for the North Hudson Sewer Authority-Adams Street Sewage Treatment Plant (NJ0026085), and proposes to redraft the renewal permit for the North Hudson Sewer Authority-West New York Sewage Treatment Plant (NJ0025321) as well as to incorporate updated CSO permit requirements.

The above actions are executed in accordance with N.J.A.C. 7:14A-1 et seq., and by authority of the Water Pollution Control Act at N.J.S.A. 58:10A-1 et seq., for the following discharges:

<u>Applicants</u>	<u>Facility</u>

North Hudson Sewerage Authority 1600 Adams Street Hoboken, NJ 07030	North Hudson Sewerage Authority – Adams Street Wastewater Treatment Plant 1600 Adams Street Hoboken, NJ 07030

Combined Sewer Overflows are discharges from Combined Sewer Systems (CSS). CSSs are sewers that were designed many decades ago to collect rainwater and snowmelt runoff, domestic sewage, and industrial wastewater in the same pipe. CSSs are no longer permitted in New Jersey for new communities, but many older cities in the State continue to operate existing CSSs. Most of the time, the CSSs transport all wastewater to a sewage treatment plant, where it is treated and then discharged to a water body. However, during periods of rainfall or snowmelt, the wastewater volume in a CSS can exceed the hydraulic capacity of the sewer system or treatment plant. For this reason, CSSs were designed to overflow during these periods and discharge excess wastewater directly from CSOs to nearby streams, rivers, or other water bodies prior to reaching the sewage treatment plant.

NJDEP has historically been regulating the majority of discharges from CSOs through authorizations under a Master General Permit NJ0105023 and others through individual permits, consistent with the National Policy for CSO Controls, N.J.A.C. 7:14A-11.12 Appendix C. NJDEP has determined that it is more appropriate to regulate all CSO discharges under individual permits in order to address the site-specific regulatory requirements of each of the permittees and to promote better coordination of a Long Term Control Plan (LTCP) among all permittees contributing to the hydraulically connected systems.

Bergen County Utilities Authority Little Ferry Sewage Treatment Plant

The existing facility discharges treated, disinfected, domestic wastewater with industrial contribution into the Hackensack River, classified as SE2(C2) waters. The Hackensack River is located within the NY/NJ Harbor. The existing facility has a NJPDES flow value of 94 million gallons per day (MGD) and currently discharges a monthly average flow of approximately 79.8 MGD. The loading effluent limitations proposed in this permit for CBOD5 and TSS from November thru April are based on a flow of 84.28 MGD, consistent with the NJPDES/permit modification dated March 25, 2005. All other loading limitations are based on a flow of 75 MGD.

Modification provisions as cited in the permit for monitoring frequency reduction may be initiated in accordance with the provisions set forth in Part IV of the permit and upon written notification from the Department.

Hackensack City CSOs

Hackensack City currently discharges combined sewage from two (2) active CSO outfalls which have solids/floatables removal equipment installed just prior to the discharge. These CSO outfalls discharge into the Hackensack River which is classified as SE1(C2) waters and are located within the NY/NJ Harbor.

Ridgefield Park Village CSOs

Ridgefield Park Village currently discharges combined sewage from six (6) active CSO outfalls which have solids/floatables removal equipment installed just prior to the discharge. These CSO outfalls discharge into the Hackensack River, which is classified as SE1(C2) waters, and Overpeck Brook, which is classified as SE2(C2) waters. Both are located within the NY/NJ Harbor.

Fort Lee Borough CSOs

Fort Lee Borough currently discharges combined sewage from two (2) active CSO outfalls which have solids/floatables removal equipment installed just prior to the discharge. These CSO outfalls discharge into the Hudson River which is classified as SE2(C2) waters and are located within the NY/NJ Harbor.

North Bergen Township Municipal Utilities Authority-Woodcliff

The existing facility discharges treated, disinfected, domestic wastewater with industrial contribution into the Hudson River, classified as SE2(C2) waters. The existing facility has a NJPDES flow value of 2.91 million gallons per day (MGD) and currently discharges a monthly average flow of approximately 3.14 MGD. This action proposes effluent limitations based on a flow of 2.91 MGD.

Modification provisions as cited in the permit for monitoring frequency reduction may be initiated in accordance with the provisions set forth in Part IV of the permit and upon written notification from the Department.

Guttenberg Town CSOs

Guttenberg Town currently discharges combined sewage from one (1) active CSO outfall which has solids/floatables removal equipment installed just prior to the discharge. This CSO outfall discharges into the Hudson River which is classified as SE2(C2) waters and is located within the NY/NJ Harbor.

North Hudson Sewerage Authority-River Road Wastewater Treatment Plant

The existing facility discharges treated, disinfected, domestic wastewater with industrial contribution into the Hudson River via outfall DSN001A. The Hudson River is classified as SE2(C2) waters and is located within the NY/NJ Harbor. The existing facility has a NJPDES permitted flow value of 10 million gallons per day (MGD) and currently discharges a monthly average flow of approximately 9.54 MGD. This action proposes effluent limitations based on a flow of 10 MGD. This individual permit also authorizes the NHSA- River Road WWTP to operate a combined sewer system (CSS) for the collection and conveyance of wastewater. The untreated wastewater from the CSS is discharged to the Hudson River classified as SE2(C2) via two (2) combined sewer overflow (CSO) points.

Modification provisions as cited in the permit for monitoring frequency reduction may be initiated in accordance with the provisions set forth in Part IV of the permit and upon written notification from the Department.

North Hudson Sewerage Authority-Adams Street Wastewater Treatment Plant

The existing facility discharges treated, disinfected, domestic wastewater with industrial contribution into the Hudson River via outfall DSN001A. The Hudson River is classified as SE2(C2) waters and is located within the NY/NJ Harbor. The existing facility has a NJPDES flow value of 20.8 million gallons per day (MGD) and currently discharges a monthly average flow of approximately 12.7 MGD. This action proposes effluent limitations based on a flow of 20.8 MGD. This individual permit also authorizes the NHSA-Adams Street to operate a combined sewer system (CSS) for the collection and conveyance of wastewater. The untreated wastewater from the CSS is discharged to the Hudson River classified as SE2(C2) via eight (8) combined sewer overflows.

Modification provisions as cited in the permit for monitoring frequency reduction may be initiated in accordance with the provisions set forth in Part IV of the permit and upon written notification from the Department.

These above mentioned draft NJPDES permit actions have been prepared for these facilities based on the administrative record filed at the NJDEP, 401 East State Street, Trenton, New Jersey 08625. Copies of the fact sheets which describe in more detail the principal facts and significant considerations examined during the preparation of the draft permit, and the draft permits are posted on NJDEP's website at <http://www.nj.gov/dep/dwq/cso.htm>. Draft documents are available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection and copies (for a nominal charge) may be requested through the Office of Record Access at (609) 341-3121 or www.nj.gov/dep/opra.

A non-adversarial public hearing has also been scheduled for these eight (8) permits on February 12, 2014, from 3:00 pm to 5:00 pm, or until the end of testimony (whichever comes first) at the City of Hackensack's City Council Chambers at 65 Central Avenue, Hackensack, NJ 07661.

Written comments on these proposals must be submitted in writing to Pilar Patterson, Chief, or Attention: Comments on Public Notice, specifically noted as comments on one or more of the eight(8) permits stated above, Division of Water Quality, Mail Code: 401-02B, Bureau of Surface Water Permitting, P.O. Box 420, Trenton, NJ 08625 by the close of the public comment period, which will close sixty calendar days after publication of this notice in the newspaper or the January 8, 2014 *DEP Bulletin*, whichever is later. All persons, including the applicant, who believe that any condition of this draft document is inappropriate or that the Department's decision to issue this draft document is inappropriate, must raise all reasonable arguments and factual grounds supporting their position, including all supporting materials, during the public comment period.

The NJDEP will respond to all significant and timely comments upon issuance of the final document. The permittee and each person who has submitted written comments, or oral comments at the public hearing, will receive notice of the Department's permit decision.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION

Notice of Public Comment Period for Request for Federal Consistency Determination

The requests for a Federal Consistency Determination for the projects listed below are reviewed under the Rules on Coastal Zone Management, N.J.A.C. 7:7E.

<u>COUNTY</u>	<u>MUNICIPALITY</u>	<u>PROJECT NUMBER</u>	<u>PROJECT LOCATION</u>	<u>APPLICANT NAME</u>

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF REMEDIATION MANAGEMENT AND
OPERATIONS ELEMENT**

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation and Waste Management, proposes to issue the following New Jersey Pollutant Discharge Elimination System permit actions in accordance with N.J.S.A. 58:10A-1 et seq. and N.J.A.C. 7:14A-1 et seq.

The permit action prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection may be requested through the Open Public Records Act. Details are online at www.nj.gov/dep/opra, or call (609) 341-3121. Appointments for inspection of the NJPDES file only or requests for a copy of the draft document (at a nominal charge) may be made by calling Central File at (609) 292-0400.

Comments on the draft document or a request that the Department holds a non-adversarial public hearing must be submitted in writing to the person specified below and shall be postmarked within 30 days of the date of this public notice. All persons, including the applicant, who believe that any condition set forth in this document is inappropriate, must raise all reasonable issues and submit all arguments and factual materials supporting their position by the close of the public comment period. Any request for a hearing shall state the nature of the issues to be raised. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period shall automatically be extended to the close of the public hearing.

The Department will consider and respond to all significant and timely comments. The applicant and each person who has submitted written comments will receive notice of Department's final decision.

Written comments should be submitted to:

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Notice of Public Comment Period Regarding Requests for Highlands Applicability and Water Quality Management Plan Consistency Determinations

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Division of Coastal and Land Use Planning, has received the following Highlands Applicability and Water Quality Management Plan Consistency Determination application(s) requesting the issuance of determinations in accordance with N.J.S.A. 13:20-1 et seq. Each application is described in the accompanying table.

All applications, prior to submittal for public notice, have been deemed administratively complete in accordance with N.J.A.C. 7:38-11.2(c)3 and the following agencies/persons have been notified by the applicant in accordance with the requirements under N.J.A.C. 7:38-9.2(b).

- i. The Municipal Clerk
- ii. The Highlands Council
- iii. The Municipal Environmental Commission (if one exists);
- iv. The Municipal Planning Board
- v. The Municipal Construction Official
- vi. The County Planning Board; and
- vii. The County Environmental Commission (if one exists)

Applications will be reviewed to determine whether the project proposal qualifies for the selected exemption and whether it is consistent with the applicable Water Quality Management Plan. Be advised, however, that the proposal will also be reviewed to determine whether it qualifies for an exemption other than the one specifically applied for.

The public notice has been prepared for these applications as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. An appointment to review the file pertinent to the listed proposals may be requested through the Open Public Records Act. Details are online at www.nj.gov/dep/opra, or call (609) 341-3121.

The public comment period on these applications begins on the date of publication of this notice and will close thirty (30) calendar days later. Any interested person may raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period.

NJDEP will consider all timely submitted comments. The applicant and each person who submitted written comments will receive notice of NJDEP's final determination.

Written comments should be submitted to:

Elizabeth Semple, Acting Director
Land Use Management
Division of Coastal and Land Use Planning
Mail Code 401-07C
