Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway or floodplain in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Special Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan
Amendment Applications pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Division of Coastal and Land Use Planning, has received or adopted the following Water Quality Management (WQM) Plan site specific amendment proposals, and has pursuant to P.L. 2011, c.203. This legislation modifies some aspects of the WQM Planning Program for a period of up to two years. P.L. 2013, c.188 directs the NJDEP to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the WQM Planning rules at N.J.A.C. 7:15. Pursuant to the provisions of the WQM Planning rules at N.J.A.C. 7:15-3.4, notices of amendment proposals and the NJDEP's subsequent final actions are to be published in the New Jersey Register (NJR). In accordance with P.L. 2011, c.203, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the NJDEP Bulletin.

Notice of site specific amendment proposals or adoptions that qualify for review under P.L. 2011, c.203 are individually provided below.

**Water Quality Management Plan Amendments
DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF COASTAL & LAND USE PLANNING
ADOPTED AMENDMENT TO THE Tri-County Water Quality Management Plan (WQMP)
Public Notice**

Take notice that on **January 15, 2014** , pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Tri-County WQMP was adopted by the Department of Environmental Protection (Department). This amendment provides for the construction of 35 four bedroom residential units to be located on Block 86, Lot 8 in Deptford Township, Gloucester County. The total project area is 44.63 acres. The Kentshire residential development will encompass a total of 17.67 acres. The projected wastewater flow from the adopted residential development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 10,500 gallons per day (gpd) and will be treated by the GCUA Wastewater Treatment Plant (NJ0024686). Potable water for the proposed residential development will be provided for by the Deptford Township Municipal Utility Authority (MUA) WAP070001 which has adequate capacity.

This amendment proposal was noticed in the New Bulletin on October 16, 2013 and no comments were received during the public comment period.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan
Amendment Applications pursuant to P.L.2011, c.203**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Coastal and Land Use Planning, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, c.203 which was enacted on January 17, 2012. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2011, c.203 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2011, c.203, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 20,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

**Site Specific Amendment Proposals for Changes in Sewer Service Area
ENVIRONMENTAL PROTECTION
DIVISION OF COASTAL AND LAND USE PLANNING**

Proposed Amendment to the Tri-County Water Quality Management Plan

Public Notice

Take notice that pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., the Water Quality Management (WQM) Planning rules, N.J.A.C. 7:15, and P.L. 2011, c. 203, the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management (WQM) Plan. This amendment proposal, submitted by Mansfield Township, Burlington County, would modify the Mansfield Township Wastewater Management Plan (WMP) to expand the Mansfield Farms Sewage Treatment Plant (STP) sewer service area (SSA) by 61.09 acres on Block 3, Lots 5.01 and 10.01, and Block 4, Lots 6.01 and 7, in Mansfield Township, Burlington County. The Northern Mansfield STP currently serves this area; therefore, the amendment proposes to transfer the designated sewer service for this area from the Northern Mansfield STP to the Mansfield Farms STP. The Mansfield Farms STP operates under New Jersey Pollutant Discharge Elimination System (NJPDES) permit number NJ0108120.

Adoption of the proposed amendment would allow for the construction of a proposed commercial development consisting of a 365,535 square foot (sq. ft.) retail commercial building, four restaurants with 1,072 total seats, one gas station with eight filling stations, an 80 seat fast food restaurant, a 4,769 sq. ft. mini market, four retention basins, and 2,095 parking spaces. The proposed project site, located on Block 3, Lots 5.01 and 10.01, and Block 4, Lots 6.01 and

7, in Mansfield Township, is bisected by Route 206 and is currently used as agricultural hay fields. The total projected wastewater flow, calculated in accordance with N.J.A.C. 7:14A-23.3, is 76,750 gallons per day (gpd).

Originally, a proposed 700,000 sq. ft. retail development was to be served at this location by a new 70,000 gpd on-site discharge to groundwater treatment plant as proposed in the Mansfield Township WMP, which was adopted on November 20, 2012. See 45 N.J.R. 57(b). The site was designated in the WMP as the Northern Mansfield Service Area. It was discovered through testing and analyses that an on-site disposal system would be substantially limited in hydraulic capacity due to soil quality, and, thus, the development would require an alternative wastewater disposal location. An evaluation of alternative locations determined that the Mansfield Farms STP SSA was a viable wastewater disposal alternative for Northern Mansfield. As a result, this amendment proposal would transfer the previously adopted Northern Mansfield Service Area to the Mansfield Farms SSA.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2011, c.203.

In accordance with N.J.A.C. 7:15-5.24(b)1 to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in the proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) through (h). Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in the proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) through (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, the Department has determined there are no special water resource protection areas along Category One waters on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) through (h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation, L.O.I. # 0318-02-0005.1 FWW080001, issued by the Department's Division of Land Use Regulation (DLUR) on October 31, 2008, was submitted to the Department, confirming the presence and boundaries of ordinary and intermediate resource value wetlands, requiring a 50-foot buffer. The 50 foot buffer is depicted on the site plans submitted with the proposed amendment. In compliance with the LOI, the proposed SSA excludes both the mapped wetlands and associated 50-foot buffer. This L.O.I. remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2015.

In accordance with N.J.A.C. 5.25(h)1, the future needs of the sewer service area were evaluated to determine whether sufficient capacity exists at the Mansfield Farms STP to serve the proposed project.

Improvements to the Mansfield Farms STP (including but not limited to an increase in its treatment capacity and collection system improvements) will need to be made to ensure that it will be able to adequately serve the proposed project. This will require a modification to the Plant's NJPDES permit that will allow it to accept the additional wastewater flow. In addition, the New Jersey American Water Company will be required to submit a re-rating Treatment Works Approval application to the Department's Bureau of Construction and Connection Permits (BCCP) for the Plant to certify that it is able to meet the modified NJPDES permit limits at the higher permitted flow amount. BCCP may also require a Treatment Works Approval permit for other construction projects at the Plant in order to treat the proposed additional flow. A NJPDES application is expected to be submitted to the Department's Bureau of Nonpoint Pollution Control in 2 to 3 months.

Pursuant to P.L. 2011, c. 203, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a sewer service area (SSA) notwithstanding that existing treatment

works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to update a SSA may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Additional issues which may need to be addressed for any new or expanded wastewater treatment facility proposal include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

In accordance with N.J.A.C. 5.25(h)3, an analysis of the water supply needs of the project was performed. The proposed commercial development will be provided public water by New Jersey American Water Company's Mount Holly Water System (Public Water System I.D. #0323001) within an existing allocation utilizing the confined Middle Potomac Raritan Magothy aquifer. In accordance with N.J.A.C. 7:15-5.25(h)3, a comparison of the water demand calculated for the proposed project and the remaining firm water capacity of the Mount Holly Water System shows that the existing Mount Holly Water System has the available capacity to supply water to the proposed development. The location of the diversion is located at Route 206 and Mansfield Road East, and the water allocation permit number is 5378. A December 12, 2012, letter from the Department's Bureau of Water Allocation and Well Permitting directs the New Jersey American Water Company to provide sufficient water to meet the water supply requirements of the lots listed above for the proposed site in accordance with condition 5 of a 1997 Stipulation of Settlement entered into by New Jersey American Water Company, Mount Holly Water Company, and the Department.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Mansfield Township has adopted stormwater management ordinance (2008-5) which comply with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 5.25(h)5, riparian zones have been identified on the proposed project site as it is bordered to the north and south by Crystal Creek (FW2-NT) and its tributaries. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for Crystal Creek is 50 feet. A Flood Hazard Area and Riparian Zone Verification (0318-02-0005.2) was obtained from the Department's Division of Land Use Regulation (DLUR) on March 5, 2009, and site plans submitted with the proposed amendment depict 150 foot riparian buffers. Mansfield Township has adopted Ordinance No. 2012-3 to satisfy the Riparian Corridor Analysis and to ensure the protection of the riparian corridors along all perennial and intermittent streams. As required, the adopted ordinance establishes and protects Water Resource/Buffer Conservation Zones (stream corridor buffer) adjacent to New Jersey Surface Water Quality Standards designated waters (excluding man-made) and regulates development within those zones. In accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by applying a 150 foot buffer to the applicable portions of Crystal Creek, the adoption of Ordinance 2012-3, and the exclusion of the buffer area from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, new disturbance in areas with a steep slope is not permitted. There are no steep slopes on the proposed project site.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any other Federal, State, County or municipal review agency with jurisdiction over this project activity.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQM Plan. All information related to the WQM Plan, and the proposed amendment is located at the Department, Division of Coastal and Land Use Planning, P.O. Box 420, Mail Code 401-07C, 401 East State Street, Trenton, New Jersey 08625. The Department's file is available for inspection between 9:00 A.M. and 4:00 P.M., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Division of Land Use Planning at (609) 984-6888.

Interested persons may submit written comments on the proposed amendment to the WQM Program Docket, Watershed Management Program, at the Department address cited above. A copy of the comments should be sent to Mr. David Smith, Project Manager, Natural Systems Utilities, 2 Clerico Lane – Building 1, Hillsborough, NJ 08844. All comments must be submitted within 30 days following publication of this notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice for up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the comment period extension is necessary. These requests must be submitted within 30 days of this notice to the WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

SIGNED

Elizabeth Semple, Manager
Office of Coastal and Land Use Planning
Department of Environmental Protection

1/16/14
Date

ENVIRONMENTAL PROTECTION
OFFICE OF COASTAL AND LAND USE PLANNING
**Adopted Amendment to the Monmouth County Water Quality Management Plan
Public Notice**

Take notice that on _____, pursuant to the provisions of the New Jersey Water Quality Planning Act (WQPA), N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules at N.J.A.C. 7:15-3.4, the New Jersey Department of Environmental Protection (Department) adopted an amendment to the Monmouth County Water Quality Management (WQM) Plan. This amendment, entitled “Riverside Center”, submitted on behalf of XXXIII Associates/Riverside Center, LLC, designates a 46.8 acre portion of Block 18, Lot 2.02 in Millstone Township, Monmouth County as a discharge to groundwater service area (SSA) of 19,999 gallons per day (gpd) to be served by on-site septic systems to serve a proposed 9 lot major subdivision. The subject property, located on the northern side of Route 33 about 1,000 feet east of the intersection with Jamesburg-Perrineville Road, totals 57.43 acres. 10.94 acres of the property are wetlands, wetlands buffers, and flood plain that will not be developed. Therefore, the proposed SSA would be 46.8 acres in order to accommodate the entire proposed development of 9 lots which would each range in size from 2.5 to 13.5 acres.

This application has been reviewed in accordance with the Water Quality Management Planning rules that set the environmental standards to be applied to an amendment at N.J.A.C. 7:15-5.18, N.J.A.C. 7:15-5.24 and N.J.A.C. 7:15-5.25.

Pursuant to P.L. 2011, c. 203, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed, however, in accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The proposed wastewater flow, as calculated in accordance with N.J.A.C. 7:9A-7.4 is 19,999 gpd. The proposed project will be required to meet the 10 parts per million (ppm) nitrate dilution requirement for the New Jersey Pollutant Discharge Elimination System (NJPDES) permit that will allow for wastewater disposal via a new discharge to groundwater. A 19 acre portion of the neighboring Block 8, Lot 8.01 in Monroe Township, Middlesex County will be used for dilution purposes in order to meet the above referenced nitrate dilution requirement.

Provisions of the above referenced NJPDES permit require the permittee to give written notification to the Department of any planned physical or operational alterations or additions to the permitted facility when the alteration is expected to result in a significant change in the permittee's discharge and/or residuals use or disposal practices; as well as notify the Department prior to any changes in ownership that require the transfer of the NJPDES permit. These requirements are specified in the NJPDES rules at N.J.A.C. 7:14A-4.2, and N.J.A.C. 7:14A- 6.7; and N.J.A.C. 7:14A-16.2, respectively.

As outlined at N.J.A.C. 7:15-5.24, sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes. Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These areas are not included in the SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened) , 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

A Riparian zone has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for the Millstone River which is designated FW2-NT, is 50 feet. An April 26, 2006 Stream Encroachment Jurisdictional Flood Hazard Area Control Act letter from the Department's Division of Land Use Regulation states that a stream encroachment permit is not required as no grading is proposed in the floodplain.

In order to satisfy the Riparian Corridor Analysis, Millstone Township has adopted Ordinance No. 10-18 to satisfy the Riparian Corridor Analysis and to ensure the protection of the riparian corridors along all perennial and intermittent streams. As required, the adopted ordinance establishes and protects Water Resource/Buffer Conservation Zones ("stream corridor buffer") adjacent to New Jersey Surface Water Quality Standards designated waters (excluding man-made) and regulates development within those zones. The stream corridor buffers vary in width depending upon the water body's classification in the Surface Water Quality Standards at N.J.A.C. 7:9B-1.15. To become compliant, and in accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by applying the 50 foot buffer to the applicable portions of the Millstone River, the adoption of Ordinance 10-18 and exclusion of the buffer area from the SSA.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation, L.O.I. # 0000-02-0039.3, issued by the Department on January 23, 2009 was submitted to the Department, confirming the presence and boundaries of ordinary and intermediate resource value wetlands, requiring a 50-foot buffer. The applicant has also received a Freshwater Wetlands General Permit No 11Water Quality Certification and Transition Area Waiver Averaging Plan (0000-02-0039.2 FWW070001 GP11 and FWW070004 TW1) on August 12, 2010. A Grant of Conservation Restriction/Easement for the transition area and adjacent wetland dated November 3, 2010 for the property was recorded with the Monmouth County Clerk's office on

November 8, 2010. In compliance with the LOI, the SSA excludes both the mapped wetlands and associated 50-foot buffer.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by 9 individual wells which withdraw water from the Englishtown and Upper Potomac-Raritan-Magothy Aquifers. A water use analysis indicates that based on the wastewater design flow, a water use registration will be sufficient for the project unless significant amounts of water will be needed for a use that will not discharge to the wastewater system, i.e. irrigation. All wells that are installed must be constructed in accordance with N.J.A.C. 7:9D-2 et. seq.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2011, c. 203 directs there be a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Millstone Township has adopted stormwater management ordinance (No.14 APR) which comply with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

This amendment proposal was noticed in the Department Bulletin on November 6, 2013, Volume 37 Issue 21, pages 7-9, and no comments were received during the comment period.

Additional issues which may need to be addressed for any new or expanded wastewater treatment facility proposal include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

SIGNED

Elizabeth Semple, Acting Director
Office of Coastal & Land Use Planning
Department of Environmental Protection

1/16/14

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation and Waste Management, proposes to issue the following New Jersey Pollutant Discharge Elimination System permit actions in accordance with N.J.S.A. 58:10A-1 et seq. and N.J.A.C. 7:14A-1 et seq.

The permit action prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection may be requested through the Open Public Records Act. Details are online at www.nj.gov/dep/opra, or call (609) 341-3121. Appointments for inspection of the NJPDES file only or requests for a copy of the draft document (at a nominal charge) may be made by calling Central File at (609) 292-0400.

Comments on the draft document or a request that the Department holds a non-adversarial public hearing must be submitted in writing to the person specified below and shall be postmarked within 30 days of the date of this public notice. All persons, including the applicant, who believe that any condition set forth in this document is inappropriate, must raise all reasonable issues and submit all arguments and factual materials supporting their position by the close of the public comment period. Any request for a hearing shall state the nature of the issues to be raised. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period shall automatically be extended to the close of the public hearing.

The Department will consider and respond to all significant and timely comments. The applicant and each person who has submitted written comments will receive notice of Department's final decision.

Written comments should be submitted to:

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Approximately 125,000 gallons per day of wastewater from various processes is being discharged to LSA. The process wastewater is pretreated prior to discharge. The pretreatment system consists of screening, equalization, dissolved air flotation and skimming processes.
MONMOUTH CNTY RECLAMATION CENTER NJ0051608 SIU	6000 Asbury Ave Tinton Falls, NJ 07753 Monmouth County	Nilesh Naik Bureau of Pretreatment and Residuals (609)633-3823	NEPTUNE TWP MUA SEWER AUTH STP	Significant Indirect User(SIU)Revoke & Reissue Permit Action The applicant operates an existing landfill near the junction of Asbury Avenue and Shafto Road. The applicant is proposing to construct leachate pretreatment system that will treat up to 150,000 gallons per day (gpd) of leachate and discharge the treated leachate with approximately 15,000 gpd of sanitary wastewater to TNSA.
ROXBURY TOWNSHIP NJ0022675 DSW Major	1 Ajax Ter Water Pollution Control Plant Roxbury Twp., NJ 07876 Morris County	Rachael Pepe Bureau of Surface Water Permitting (609)292-4860	Lamington River FW2-NT(C1) Lamington River	Surface Water Renewal Permit Action This is a renewal for an existing facility which discharges treated, domestic wastewater into the Lamington River, classified as FW2-NT (C1) waters. The Lamington River is a tributary to the Raritan River. The existing facility has a NJPDES flow value of 2.0 million gallons per day (MGD) and an average of 1.76 MGD. The sanitary wastewater is treated through an aerated grit chamber, primary clarifiers, an aerated equalization basin, 4 rotating biological contactors, aluminum chloride addition, 2 secondary clarifiers, chlorine disinfection, post aeration and dechlorination.
SANDY POINT MOBILE HOME PARK NJ0068331 DGW	5 Wild Way Jefferson Twp., NJ 07849 Morris County	Gregory Chin Bureau of Nonpoint Pollution Control (609)633-7021	Glacial Drift II-A	Ground Water Renewal Permit Action The facility includes a total of 39 two-bedroom single wide mobile homes, 22 two-bedroom double wide mobile homes, 1 two-bedroom single family unit and 2 one-bedroom single family units. The 3 single family units discharge to individual septic systems. The discharge of sanitary wastewater from the mobile homes is to a wastewater treatment plant. The treatment plant treats wastewater to ground water quality standards, with the exception of fecal coliform, prior to disposal to 2 subsurface disposal beds.

KESSLER INS FOR REHAB WELKIND FACILITY NJ0099520 DGW	201 Pleasant Hill Rd Chester Twp., NJ 07930 Morris County	Gregory Chin Bureau of Nonpoint Pollution Control (609)633-7021	Glacial Drift II-A	Ground Water Renewal Permit Action Kessler Institute is an existing 72-bed facility, which provides outpatient and in-patient services for victims of multiple sclerosis. Sanitary wastewater generated from the facility is collected and treated from an on-site wastewater treatment plant having a design capacity of 17,000 gallons per day (GPD). The wastewater is run through a series of clarifiers and settling tanks before being discharged to disposal beds. The facility maintains five (5) down gradient monitoring wells, one (1) up gradient ground water monitoring well, and four (4) piezometers to ensure compliance with GWQS and the conditions of this permit.
VIKING YACHT CO NJ0106780 DGW NJ0106780 DST	5738 Rte. 9 New Gretna, NJ 08224 Burlington County	Gregory Chin Bureau of Nonpoint Pollution Control (609)633-7021	Glacial Drift Bass River II-A SE1(C1) Mullica River (GSP bridge to Turtle Ck)	Consolidated Renewal Permit Action This is a renewal permit for Viking Yachts who primarily engages in luxury boat manufacture and maintenance under SIC code 3732. They currently have an SPPP but no DCP. This renewal includes requirements for a DCP, with monitoring and design criteria. This permit authorizes the discharge of stormwater to surface and ground waters of the State, and sanitary water to ground waters of the State.
COUNTRY OAKS NJ0108928 DGW	Gold Mine Rd Mount Olive Twp., NJ 07828 Morris County	Gregory Chin Bureau of Nonpoint Pollution Control (609)633-7021	Crystalline Rocks II-A	Ground Water Renewal Permit Action Hidden Meadows Residential Development is a 168 single family home development with a sanitary sewage design flow of 50,400 gpd. Wastewater is treated prior to being discharged to subsurface disposal beds and residuals are managed at an approved residuals management facility.
NJPDES MASTER GENERAL PERMIT PROGRAM INTEREST NJ0142051 DGW	401 E State St Trenton, NJ 08625 Mercer County	Ron Bannister Bureau of Nonpoint Pollution Control (609)633-7021		Ground Water Master General Permit Renewal Renewal, with no changes, of the Lined Surface Impoundment Master General Permit.
OAKLAND CROSS ROADS NJ0167631 DGW	West Oakland Ave Oakland, NJ 07436 Bergen County	Gregory Chin Bureau of Nonpoint Pollution Control (609)633-7021	Feltville Formation II-A	Ground Water Renewal Permit Action A new commercial development discharging a total of 7,870 gpd of sanitary to four (4) subsurface disposal systems. Two (2) of the four systems will employ Fixed Activated Sludge Treatment (FAST) denitrification systems to provide pre-treatment of the sanitary wastewater.
PSE&G FORMER HOBOKEN GAS WORKS NJ0220906 SIU	1200 Clinton St Hoboken, NJ 07030 Hudson County	Nilesh Naik Bureau of Pretreatment and Residuals (609)633-3823	NORTH HUDSON SEWERAGE AUTH WWTP	Significant Indirect User (SIU) New Permit Action The construction activities at this site will generate approximately 72,000 gallons per day of contaminated water. The applicant has proposed to install pretreatment system comprised of equalization, settling, oil/water separator, activated carbon, organophilic clay absorber, and bag filters. The treated water will then be discharged to NHSA-ASWTP for further treatment.

The following minor modifications and administrative permit revocations were recently issued. These actions are listed for informational purposes only and are not open for public comment.
