General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**Notice Regarding Adoption of Site Specific Water Quality Management Plan Amendment
Applications pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Coastal and Land Use Planning, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188 which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notices of adoption of site specific amendments for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

**ENVIRONMENTAL PROTECTION
DIVISION OF COASTAL AND LAND USE PLANNING
Adopted Amendment to the Upper Delaware Water Quality Management Plan
Public Notice**

Hunterdon Medical Center

Take notice that on **May 7, 2014**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq. and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Upper Delaware WQMP was adopted by the Department of Environmental Protection (Department). This amendment, submitted on behalf of Mr. Christopher Sickels, Executive Director of the Hunterdon Medical Center, expands the sewer service area (SSA) of the Lambertville Municipal Utilities Authority (LMUA) Regional Environmental Pollution Control Facility (REPCF) to include Block 1002, Lot 29 in Lambertville City, Hunterdon County. The SSA expansion includes the proposed development a 75,000 square foot medical center. The LMUA REPCF discharges under NJDPES permit number NJ0020915 to the Delaware River.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the adopted SSA. ESAs evaluated include, but are not limited to: habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, riparian zones, wetlands, steep slopes, Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESAs are not included in the adopted SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas in the adopted SSA.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains are excluded from proposed SSAs. There are no prohibitions written into the Federal 201 grants awarded to LMUA REPCF (C-34-527-01) which affect extension of sewer infrastructure to the proposed development, however, there are outlined steps recommended to minimize harm to the environment in siting location and construction of sewer infrastructure.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The proposed wastewater flow, as calculated in accordance with N.J.A.C. 7:14A-23.3 is 7,500 gallons per day. Currently, LMUA REPCF is permitted to discharge 1.5 million gallons per day (MGD) of treated wastewater to the Delaware River. The average of the last twelve months of discharge monitoring data show that LMUA REPCF has discharged an average daily flow of 0.836 MGD. The additional 0.0075 MGD of wastewater will not cause the wastewater generation potential of the expanded SSA to exceed the permitted capacity of LMUA REPCF.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. The proposed project will be served by the public water supply provided by United Water Lambertville, which is currently permitted to allocate 30.4 million gallons per month (MGM) and has a water supply surplus of 14.7 MGM. The proposed water demand of the project is 0.0075 MGD or 0.120 MGM; therefore sufficient water supply is available to serve the proposed development within the existing water allocation permit.

Lambertville City has adopted a stormwater control ordinance (Ord. No. 2006-09) in accordance with N.J.A.C. 7:8. Consequently, the requirements of N.J.A.C. 7:15-5.25(h)4 for stormwater control have been satisfied. No portion of the proposed development on site is identified as within a riparian zone as established at N.J.A.C. 7:15-5.25(5) 5 or areas with a steep slope as required at N.J.A.C. 7:15-5.25(h)6.

This amendment proposal was noticed in the New Jersey Bulletin on January 8, 2014, Volume 38, Issue 1. No comments were received during the comment period.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors,

sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

Adopted Amendment to the Upper Delaware Water Quality Management Plan

**Public Notice
Lambertville Water Lofts**

Take notice that on **May 7, 2014**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Upper Delaware WQMP was adopted by the Department of Environmental Protection (Department).

This amendment, submitted on behalf of Mr. Dan Whitaker of Swan Creek Holding Co., LP, expands the sewer service area (SSA) of the Lambertville Municipal Utilities Authority (LMUA) Regional Environmental Pollution Control Facility (REPCF) to include Block 1043, Lot 2 in Lambertville City, Hunterdon County. The SSA expansion includes the proposed development of 45 long term one bedroom hotel units called the Lambertville Water Lofts. The LMUA REPCF discharges under NJDPES permit number NJ0020915 to the Delaware River.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the adopted SSA. ESAs evaluated include, but are not limited to: habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, riparian zones, wetlands, steep slopes, Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

These ESAs are not included in the adopted SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas in the adopted SSA.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains are excluded from adopted SSAs. There are no prohibitions written into the Federal 201 grants awarded to LMUA REPCF (C-34-527-01) which affect extension of sewer infrastructure to the proposed development, however, there are outlined steps recommended to minimize harm to the environment in siting location and construction of sewer infrastructure.

Specifically, there are no beaches, coastal high hazard areas, or dunes in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The proposed wastewater flow, as calculated in accordance with N.J.A.C. 7:14A-23.3 is 3,375 gallons per day. Currently, LMUA REPCF is permitted to discharge 1.5 million gallons per day (MGD) of treated wastewater to the Delaware River. The average of the last twelve months of discharge monitoring data show that LMUA REPCF has discharged an average daily flow of 0.836 MGD.
