O = Other

REG = HMDC/Pinelands Exemption

Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway or floodplain in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

Department of Environmental Protection
Partnership Proposal Request
2015 NOAA Regional Coastal Resiliency Grants Program

Overview

The New Jersey Department of Environmental Protection (DEP) is seeking partners for project proposals in response to the US Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), 2015 Regional Coastal Resiliency Grants Program.

Grant Program

NOAA recently announced the Regional Coastal Resiliency Grants Program which will support regional approaches to activities that build resilience of coastal regions, communities, and economic sectors to the negative impacts from extreme weather events, climate hazards, and changing ocean conditions. It will support planning for or implementation of measures that mitigate the impacts of environmental events and conditions on overall resilience, including economic and environmental resilience. Projects that are funded will result in improved information for decision makers and actions that reduce risk, accelerate recovery, and promote adaptation to changing social, economic, and environmental conditions.

NOAA is expected to award \$5 million in grants to organizations that advance resilience strategies in plans for land and ocean use, disaster preparedness, environmental restoration, hazard mitigation, or in other regional, state, or community plans.

Additional information on the federal RFP can be found at <http://www.coast.noaa.gov/resilience-grant/>.

DEP Request for Partners

DEP is seeking partners to collaborate on a proposal in response to the 2015 NOAA Regional Coastal Resiliency Grants Program with the following objectives:

- To create a framework for regional resilience efforts, building on the NJ Coastal Management Program's ongoing planning projects, and to further the development of decision-making tools (including but not limited to risk analysis standards and cost-benefit analysis) needed to support long-term integration of resiliency into decision-making;
- To work with a set of local entities at a regional level to test and deploy new and enhanced decision-support tools through scenario planning;
- To share outcomes with decision-makers at the local, regional, and state-level across the country.

Eligible partners are: nonprofit organizations; private (for profit) entities; institutions of higher education; state, territorial, tribal, local governments as defined at 2 C.F.R. § 200.64, which includes counties, municipalities, and cities; and regional organizations.

DEP is seeking to develop a team of the following types of partners to collaborate on the proposal:

- 1) Technical partners to help identify and develop risk analysis standards and appropriate cost-benefit analysis methodologies, and apply those standards and methodologies during scenario planning activities;
- 2) Planning partners to facilitate, and provide planning support during scenario planning activities; and
- 3) Local partners, such as municipalities, counties, and regional entities, where the project team will complete planning scenarios, using risk analysis standards and cost-benefit analysis. Local partners must be located within one or more of New Jersey's 239 coastal municipalities (within the CAFRA area, or tidally flowed). The list of tidally flowed municipalities may be found at <http://www.nj.gov/dep/cmp/access/mpamunis.htm>.

Applicants for partnership on the DEP proposal must meet one or more of the following descriptions:

- 1) Qualified individuals and organizations capable of carrying out technically sound and feasible activities consistent with the objectives above, and/or
- 2) Local entities with the demonstrated ability to support and/or participate in scenario-planning activities, and/or integrate project outcomes into local programs and policies. Such local entities include, but are not limited to counties, multi-municipal groups, local government agencies, local watershed groups, and communities' leaders.

Project partners must be prepared to begin implementation by November 2015 and complete all required tasks within three (3) years of grant award.

Partners on projects selected for funding shall be required to comply with all applicable federal, state, and local laws, rules, regulations and policies set forth therein and, as appropriate, enter into a contractual agreement with DEP.

Partner Statement of Qualifications Requirements

Statement of Qualifications Deadline

In order to be considered for partnership with DEP, a Statement of Qualifications that includes the items outlined below must be submitted to the following address no later than 5:00 PM on July 1, 2015 (postmarked, or stamped "received" if hand delivered):

Statement of Qualifications Delivery Location

Attention: Elizabeth Semple
New Jersey Department of Environmental Protection
Office of Coastal and Land Use Planning
401 East State Street, 7th Floor
PO Box 420, Mail Code 401-07C
Trenton, New Jersey 08625-0420
Re: 2015 Regional Coastal Resiliency Grants Program

Statement of Qualifications and Preliminary Proposal Submission and Format

Three (3) hard copies and one (1) electronic copy of a complete statement of qualifications for grant partnership must be submitted. The electronic copy should be emailed to NJCZM@dep.nj.gov with a subject heading of the "<Partner's name/organization> - 2015 NOAA Regional Coastal Resiliency Grants Program".

The Statement of Qualifications and Preliminary Proposal should be no more than three (3) pages, single-spaced, using twelve (12)-point Times New Roman font. The only appendices or supplemental information that will be considered are resumes/CVs and examples of applicable projects/activities that demonstrate expertise.

Partnership Statement of Qualifications

All statements of qualifications for partnerships with DEP must include the following information:

- Partner organization's name, including contact person's name, address, phone number, fax number, and e-mail address;
- Description of the partner's expertise and experience consistent with the proposal objectives. Said expertise may include, but not be limited to, technical proficiency, local knowledge and efficacy, and communication capability. Applicants should include resumes of key staff.
- Applicants may include examples of completed projects/activities that demonstrate appropriate expertise;
- Description of those likely tasks partner can lead or support;
- Date of statement of qualifications.

Partner Selection

Partnership statements of qualification will be reviewed and evaluated based on completeness, and the required information identified above. DEP will select partners based on expertise, experience, and demonstration of other funding/in-kind service and any other relevant contributions.

The applicant's demonstration that they possess the resources and ability necessary to perform the proposed tasks and the capability to provide the deliverables will be considered. If the applicant has previously received grant funding from DEP, regardless of funding source, past and current performance under the applicable grant agreement(s) will be taken into consideration. Timeliness, cooperation with Department staff and partners, and goal achievement will all factor into this evaluation.

This NOAA Grant program requires non-Federal matching funds and/or in-kind services valued at a minimum of 1/3 of total project costs. Partners that can contribute non-Federal matching funds and in-kind services will be prioritized.

This NOAA Grant program requires that awardees employ a regional approach that results in improved ability of multiple coastal jurisdictions. Partners with the demonstrated ability to perform and implement land use planning on a regional basis will be prioritized.

Local partners that apply as a regional group, or that already exist as a regional group/entity, will be prioritized.

Technical and planning partners with offices within the State of New Jersey or with close proximity (50 miles) will be prioritized.

Selected partners will be contacted in writing with DEP's interest in partnering on grant applications by July 10, 2015.

Limitation of Liability

In no event will DEP be responsible for statement of qualification preparation costs if this program is canceled or if proposals are not selected. Publication of this announcement does not obligate DEP to select any applicants, award a grant, or fund any specific project.

For additional information, contact NJCZM@dep.nj.gov or at 609-984-0058.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE OF INTENT TO SETTLEMENT
COASTAL GENERAL PERMIT # 8
FRESHWATER WETLANDS GENERAL PERMIT # 6**

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to enter into a Settlement Agreement that would authorize via the issuance of a Coastal General Permit # 8 and a Freshwater Wetlands General Permit # 6 the filling of 0.098 acre of isolated wetlands for the construction of a single family home and septic system under the Coastal Area Facilities Review Act (N.J.S.A. 13:19) and the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B). The project is located at the property known as Lots 5 & 6, Block 829, Township of Upper, Cape May, New Jersey. The project is as shown on the site plan entitled: "NJDEP Settlement Plan, Proposed Single Family Dwelling, Block 829, Lots 5 & 6, Strathmere, Upper Township, N.J." dated July 23, 2010, last revised April 16, 2015 as prepared by Matthew V. Ecker.

IN THE MATTER OF: Estate of Rita Schiavo
 File # 0511-08-0007.1APL 080001
 Randolph Avenue
 Township of Upper, Cape May County, New Jersey
 Block 829, Lots 5 & 6

Comments regarding this settlement or requests for information regarding this action should be sent to: Shorefront Region Section Chief, Division of Land Use Regulation, NJDEP, Mail Code 501-02A PO Box 420 Trenton, NJ 08625-0420, or by e-mail care of chris.dolphin@dep.state.nj.us, or the office may be reached by telephone: (609) 777-0454. Comments must be received by NJDEP within 30 days of this publication, or by July 17, 2015.

**OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION
NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
Adopted Amendment to the Tri-County Water Quality Management Plan (WQMP)
Public Notice**

Take notice that **June 4, 2015**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Tri-County WQMP was adopted by the Department of Environmental Protection (Department). This amendment, submitted by Marathon Engineering and Environmental Services on behalf of Krysta Enterprises expands the sewer service area (SSA) of the Elmwood Avenue Wastewater Treatment Plant (NJPDES Permit # NJ0024031) to include portions of Block 14, Lot 3, in Evesham Township, Burlington County. This amendment is named "Winding Brook Development" and is assigned Program Interest No. 435433, Activity No. AMD140009. This amendment updates the Evesham Municipal Utilities Authority Wastewater Management Plan as well as the Burlington County Future Wastewater Service Area map.

This adopted amendment has been reviewed in accordance with the Water Quality Management Planning rules, N.J.A.C. 7:15-1 et seq and Section 6(h) of P.L. 2011 c. 203 as amended and supplemented by P.L. 2013, c. 188, which allows for a WQMP amendment that does not proposed a specific project or activity and delineates as SSA a parcel, not to exceed 100 acres in size, that had been previously included in a formerly adopted SSA, provided it can be

demonstrated with the use of updated or more accurate information that the parcel complies with the regulatory criteria for the delineation of a SSA established at N.J.A.C. 7:15-5.24.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the adopted SSA. Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESAs are not included in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, C1 special water resource protection areas are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) - (h). Sharps Run, classified as a FW2-NT waterbody runs along the northern order of this parcel, however it is not a classified C1 or its tributary.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation, L.O.I. # 0300-06-0004.1 (FWW140001) was submitted, which re-delineates wetlands identified onsite, and these areas are not included in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.24(c), lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not included in the SSA. The project site is not in a coastal planning area.

All other special restricted areas as defined at N.J.A.C. 7:15-5.24(d)1-4; areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains; and beaches, coastal high hazard areas, and dunes are not applicable to the adopted amendment's site location.

This amendment proposal was noticed in the New Jersey Bulletin on March 4, 2015 at Volume 39, Issue 5, and no comments were received during the comment period. The following affected entities consented to this amendment: Burlington County Board of Chosen Freeholders in Resolution 2015-00135 on March 15, 2015; Evesham Township in Resolution 98-2015 on April 7, 2015; and Evesham Municipal Utilities Authority in Resolution 2015-56 on April 1, 2015.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

SIGNED

**Notice Regarding Adoption of Site Specific Water Quality Management Plan Amendment Applications
Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Coastal and Land Use Planning, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188 which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice(s) of adoption of site specific amendment(s) for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION
Adopted Amendment to the Tri-County Water Quality Management Plan (WQMP)
Public Notice
Pinedge III**

Take notice that **June 4, 2015**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Tri-County WQMP was adopted by the Department of Environmental Protection (Department). This amendment proposal, submitted on behalf of Joseph Bernardino, Managing Member, PlanLand, LLC, expands the sewer service area (SSA) of the Delaware No. 1 Wastewater Pollution Control Facility (WPCF) to include portions of Block 2103, Lots 1, 2, and 3 and Block 2202, Lot 1 for the proposed development of 145 single family homes, located in Berlin Township, Camden County. The project is identified as "Pinedge III", Project Identification No. 435433, Activity No. AMD140006. This proposal would update the Camden County Municipal Utilities Authority (CCMUA) Wastewater Management Plan as well as the Tri-County WQMP.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules, N.J.A.C. 7:15-1 et seq. and P.L. 2011 c.203 as amended and supplemented by P.L. 2013 c.188. The proposal qualifies as a site specific amendment pursuant to Section 7 of P.L. 2013 c. 188.

Pursuant to P.L. 2011, c. 203, as amended by P.L. 2013, c. 188, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. However, in accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The proposed wastewater flow, as calculated in accordance with N.J.A.C. 7:14A-23.3 is 43,500 gallons per day (gpd). Currently, the Delaware No. 1 WPCF is permitted to discharge 80 million gallons per day (MGD) of treated wastewater to the Delaware River under NJDPES permit number NJ0026182. The average of the last twelve months of discharge monitoring data show that Delaware No. 1 WPCF has discharged an average daily flow of 55.65 MGD. The additional 0.0435 MGD of wastewater will not cause the wastewater generation potential of the expanded SSA to exceed the permitted capacity of the treatment facility.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Landscape Project has identified State Endangered timber rattlesnake habitat. A report submitted by the applicant's environmental consultant, Osprey Environmental indicates that "Based upon site inspections, areas of habitat suitable for this species were identified on the subject property. These areas included patches of upland second growth forested woodlands. However, the parcels surrounding the subject property are developed with a mixture of commercial/industrial and residential subdivisions. The developed areas do not provide suitable habitat for the snakes. Habitat would be limited within the area surrounding the subject parcel and possibly would not provide migratory pathways for the species to and from the subject property." The Department's Endangered and Nongame Species Program determine that the site is too landlocked to provide suitable snake habitat.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). A Natural Heritage database search request indicates rare plant life in the vicinity of the property and on the property; the endangered swamp-pink. The Department's Endangered and Nongame Species Program recommended applying wetland and riparian buffers to avoid the swamp-pink populations. Accordingly, and as described in further detail below, these buffers have been applied and are not included in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.25(h)5i, riparian zones shall be protected. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. Kettle Run, a FW2-NT stream runs west to east on the southern-most part of this property. Flood Hazard Area Verification Approval, File No.: 0406-02-0001.1 FHA130001 has been obtained. The approved mapping entitled "Pinedge III, BK 2202, Lot 1 and BK 2103, Lots 1, 2, and 3, Situate Berlin Township, Camden County, New Jersey" prepared by Land Dimensions Engineering, dated August 2013, last revised May 5, 2014, shows wetland and flood hazard areas, and designates a 150 foot riparian protection buffer from the top of bank along both sides of Kettle Run Creek and its unnamed tributary. The riparian width is due to the Department's determination that the critically dependent on regulated water (CDW) species are present on the site and within one linear mile downstream from the site as measured along the length of the regulated water. The waterway and its associated 150 buffer are removed from the adopted SSA.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, freshwater wetlands Letter of Interpretation (LOI) #0406-02-0001.1-FWW100001 (June 26, 2012) was submitted. The LOI determines that there are freshwater wetlands and wetland buffers present on the property and these are detailed on a plan entitled “Outbound Survey, Wetland Flag Location & Topography Check, Block 2202, Lot 1 & Block 2103, Lots 1.01, 1.02, & 1.03, Berlin, NJ”, prepared by B&B Hi-Tech Solutions, LLC, dated June 7, 2008, last revised April 3, 2012. The wetlands identified along with associated buffers are not included in the adopted SSA.

In accordance with N.J.A.C. 7:15-5.24(c), lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not included in the SSA. The project site is not in a coastal planning area.

Pursuant to N.J.A.C. 7:15-5.24(d), special restricted areas including areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains, in addition to special restricted areas of designated beaches, coastal high hazard areas, and dunes are not included in the SSA. CCMUA received a federal grant with conditions under Environmental Protection Agency (EPA) project number C-34-708-02 for District I as well as C-340524-03. Specifically, the grant condition prohibits sewer connections from new development in wetlands and floodplains. To comply with Section 5.24(d), the applicant submitted a USEPA waiver approval letter, dated December 29, 2014, which indicates that the project will not impact wetlands or the flood hazard area, and grants a partial waiver of the grant condition for this project, as wetlands and wetland transitional areas still remain throughout the site. A sewer connection restriction remains in effect for the wetlands onsite, and any modification to the project resulting in disturbance to wetlands will require a resubmittal of the waiver request to the USEPA for a revised determination. Again, as stated above, wetlands and their associated buffers are not included in the proposed SSA. Additionally, there are no designated beaches, coastal high hazard areas, or dunes onsite.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water would be provided by Berlin Borough Water Department which holds PWSID #4050001, is allocated 94.2 MGM, and currently has a water supply surplus of 16.418 MGM. Pursuant to N.J.A.C. 5:21-5.3, Table 5.1, the daily residential water demand for a four-bedroom home is 395 gpd, therefore the total water demand for 145 four-bedroom homes is 57,275 gpd or 0.057275 MGD or 1.71825 MGM. The projected water demand of 1.71825 MGM is within the 16.418 MGM water supply surplus available from Berlin Borough Water Department. This area is within Critical Area 2, which is an area of critical water supply concern; therefore the applicant was instructed by the Department to request consent from the water department for this proposal. As established at N.J.A.C. 7:15-3.4(g)4iii, consents are required to be sent to the Department within 60 days of receipt of the request for consent by the applicant. Although the Berlin Borough Water Department received the request for consent with copy of the public notice by certified mail on March 5, 2015, they did not respond within the established timeframe, therefore the conditions of N.J.A.C. 7:15-3.4(g)4iii are satisfied.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity’s stormwater management is to be evaluated. However, P.L. 2011, c. 203 as amended by P.L. 2013, C. 188, directs there be a presumption that an engineered subdivision or site plan is not required. Compliance with this standard shall be demonstrated by submission of an adopted stormwater management plan and ordinance that conform with the requirements of N.J.A.C. 7:8. The project is in compliance with this standard, as Berlin Township has adopted stormwater control ordinance #2006-14, which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

This amendment proposal was noticed in the New Jersey Bulletin on March 4, 2015 at Volume 39, Issue 5, and no comments were received during the comment period. Berlin Township Council consented to this amendment in Resolution 2015-100 on March 23, 2015.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

**Notice Regarding Adoption of Site Specific Water Quality Management Plan Amendment Applications
Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Coastal and Land Use Planning, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188 which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice(s) of adoption of site specific amendment(s) for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION
Adopted Amendment to the Upper Raritan Water Quality Management Plan
Public Notice
Old Church Road Subdivision**

Take notice that on **June 4, 2015** the New Jersey Department of Environmental Protection (Department) has adopted an amendment to the Upper Raritan Water Quality Management (WQM) Plan. This amendment titled, “Old Church Road Subdivision”, submitted on behalf of PK Environmental, would expand the sewer service area (SSA) of the Somerset Raritan Valley Sewerage Authority treatment facility in order to serve a proposed project consisting of a 9-lot residential subdivision that would generate a sewage flow of 2,700 gallons per day located in Warren Township, Somerset County on Block 96, Lot 20.

This amendment has been reviewed in accordance with the Water Quality Management Planning rules that set the environmental standards to be applied to an amendment at N.J.A.C. 7:15-5.18, N.J.A.C. 7:15-5.24 and N.J.A.C. 7:15-5.25, as modified by P.L. 2011, c. 203 and P.L. 2013, c. 188.

This adopted amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15, as modified by P.L. 2011, c. 203 and P.L. 2013, c. 188. This preliminary notice represents the Department’s determination that the adopted amendment is in compliance with the regulatory criteria.

In accordance with N.J.A.C. 7:15-5.24(b), environmentally sensitive areas have been assessed to determine what areas are appropriately included in the proposed sewer service area. Pursuant to N.J.A.C. 7:15-5.24, environmentally sensitive areas are defined as contiguous areas of 25 acres or larger, alone or in combination, consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands. These environmentally sensitive areas are not included in the proposed sewer service area except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species (Landscape Project), version 3.1. A review of the Landscape Project indicated that the project location is identified as threatened and endangered species habitat for the wood turtle, red-headed woodpecker, great blue heron, and cooper’s hawk. However, pursuant to N.J.A.C. 7:15-5.26, a habitat suitability determination was performed by the Department which found that the current conditions at this project location are not suitable for the aforementioned species.

In accordance with N.J.A.C. 7:15-5.24(b)2 through 4, (c) and (d), no portion of the proposed SSA for the development on site is identified as within a Natural Heritage Priority Site, a special water resource protection area along a Category One water, wetlands or associated buffer, coastal planning area, coastal resource, or an environmentally sensitive area limited by Federal 201 grant restrictions. These environmentally sensitive areas are not included in the proposed sewer service area except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)4, to determine areas designated as wetlands, the Department utilized the Department’s “Wetlands 2007” map. There are no wetlands present within the boundaries of the proposed sewer service area or in the transitional zone of 150 feet. Further, pursuant to N.J.A.C. 7:15-5.24(e)2 a Letter of Interpretation was completed and the wetland boundaries depicted in the application are accurate.

In accordance with N.J.A.C. 7:15-5.25(h)1, a build-out analysis was conducted to identify future projected flow for all new proposed wastewater generating structures and/or activities. Application of the appropriate criteria at N.J.A.C. 7:14A-23.3 for these various new wastewater generating activities results in a projected wastewater flow of 2,700 gpd. Currently the Somerset Raritan Valley Sewage Authority (SRVSA) is permitted to discharge 24.3 million gallons per day (MGD) of treated wastewater to the Raritan River under NJPDES permit number NJ0024864. The average of the last twelve months of discharge monitoring data shows that SRVSA has an average daily discharge of 15.74 MGD. The additional 0.0027 MGD wastewater that will be generated from this amendment will not cause the SRVA to exceed its permitted capacity.

In accordance with N.J.A.C. 7:15-5.25(h)3, the Department evaluated the water supply availability for the proposed project. New Jersey American Water has a water supply allocation of 6761.500 MGM with a surplus of 979.265 MGM (as of February 2015). The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 132,525 GPM; therefore sufficient water supply is available to serve the proposed development within the existing water allocation permit.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)4, the Department confirmed that the Township of Warren Somerset County, New Jersey has adopted a stormwater control ordinance (Ord. #15-10B) in accordance with N.J.A.C. 7:8. Therefore, a review for compliance with the Stormwater Management rules is required to be conducted under the township's authority. Consequently, the requirements of N.J.A.C. 7:15-5.25(g)1 for stormwater control have been satisfied.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)5, the Department has confirmed that no new development is proposed with a riparian zone as required at N.J.A.C. 7:15-5.25(g)2.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)6, the Department has confirmed that no portion of the proposed development is located within a steep slope as required at N.J.A.C. 7:15-5.25(g)6.

The adopted amendment was noticed in both the Department Bulletin (Volume 39 Issue 7, pages 12-14) and The Star Ledger on April 1, 2015. Comments and statements of non-consent on this amendment were received from Somerset County Planning Board on May 19, 2015, Mr. Walter C. Lane provided comments and statements of objection to this amendment and are summarized below with the Department's responses.

Comment: The Somerset County Planning Board will not endorse this amendment at this time. The County feels that this amendment is inconsistent with the Warren Township Open Space/Conservation Plan Element and the Somerset County Investment Framework Map as this parcel has been identified as a proposed open space and conservation area as well as a "Priority Preservation Investment Area".

Response: The Department has contacted the County and both the Department and the County acknowledges that there are inconsistencies with the Township's and County's Master Plans. Further, the County has agreed that their plan is only a broad brush and will work with the Township to address inconsistencies pertaining to this amendment.

This adopted amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

**NOTICE REGARDING ADOPTION OF SITE SPECIFIC WATER QUALITY MANAGEMENT PLAN
AMENDMENT APPLICATIONS PURSUANT TO P.L.2013, C.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Coastal and Land Use Planning, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188 which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice(s) of adoption of site specific amendment(s) for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION
Adopted Amendment to the Upper Raritan Water Quality Management Plan
Public Notice
Old Church Road Subdivision**

Take notice that on **June 4, 2015** the New Jersey Department of Environmental Protection (Department) has adopted an amendment to the Upper Raritan Water Quality Management (WQM) Plan. This amendment titled, "Old Church Road Subdivision", submitted on behalf of PK Environmental, would expand the sewer service area (SSA) of the Somerset Raritan Valley Sewerage Authority treatment facility in order to serve a proposed project consisting of a 9-lot residential subdivision that would generate a sewage flow of 2,700 gallons per day located in Warren Township, Somerset County on Block 96, Lot 20.

This amendment has been reviewed in accordance with the Water Quality Management Planning rules that set the environmental standards to be applied to an amendment at N.J.A.C. 7:15-5.18, N.J.A.C. 7:15-5.24 and N.J.A.C. 7:15-5.25, as modified by P.L. 2011, c. 203 and P.L. 2013, c. 188.

This adopted amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15, as modified by P.L. 2011, c. 203 and P.L. 2013, c. 188. This preliminary notice represents the Department's determination that the adopted amendment is in compliance with the regulatory criteria.

In accordance with N.J.A.C. 7:15-5.24(b), environmentally sensitive areas have been assessed to determine what areas are appropriately included in the proposed sewer service area. Pursuant to N.J.A.C. 7:15-5.24, environmentally sensitive areas are defined as contiguous areas of 25 acres or larger, alone or in combination, consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands. These environmentally sensitive areas are not included in the proposed sewer service area except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species (Landscape Project), version 3.1. A review of the Landscape Project indicated that the project location is identified as threatened and endangered species habitat for the wood turtle, red-headed woodpecker, great blue heron, and cooper's hawk. However, pursuant to N.J.A.C. 7:15-5.26, a habitat suitability determination was performed by the Department which found that the current conditions at this project location are not suitable for the aforementioned species.

In accordance with N.J.A.C. 7:15-5.24(b)2 through 4, (c) and (d), no portion of the proposed SSA for the development on site is identified as within a Natural Heritage Priority Site, a special water resource protection area along a Category One water, wetlands or associated buffer, coastal planning area, coastal resource, or an environmentally sensitive area limited by Federal 201 grant restrictions. These environmentally sensitive areas are not included in the proposed sewer service area except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)4, to determine areas designated as wetlands, the Department utilized the Department's "Wetlands 2007" map. There are no wetlands present within the boundaries of the proposed sewer service area or in the transitional zone of 150 feet. Further, pursuant to N.J.A.C. 7:15-5.24(e)2 a Letter of Interpretation was completed and the wetland boundaries depicted in the application are accurate.

In accordance with N.J.A.C. 7:15-5.25(h)1, a build-out analysis was conducted to identify future projected flow for all new proposed wastewater generating structures and/or activities. Application of the appropriate criteria at N.J.A.C. 7:14A-23.3 for these various new wastewater generating activities results in a projected wastewater flow of 2,700 gpd. Currently the Somerset Raritan Valley Sewage Authority (SRVSA) is permitted to discharge 24.3 million gallons per day (MGD) of treated wastewater to the Raritan River under NJPDES permit number NJ0024864. The average of the last twelve months of discharge monitoring data shows that SRVSA has an average daily discharge of 15.74 MGD. The additional 0.0027 MGD wastewater that will be generated from this amendment will not cause the SRVA to exceed its permitted capacity.

In accordance with N.J.A.C. 7:15-5.25(h)3, the Department evaluated the water supply availability for the proposed project. New Jersey American Water has a water supply allocation of 6761.500 MGM with a surplus of 979.265 MGM (as of February 2015). The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 132,525 GPM; therefore sufficient water supply is available to serve the proposed development within the existing water allocation permit.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)4, the Department confirmed that the Township of Warren Somerset County, New Jersey has adopted a stormwater control ordinance (Ord. #15-10B) in accordance with N.J.A.C. 7:8. Therefore, a review for compliance with the Stormwater Management rules is required to be conducted under the township's authority. Consequently, the requirements of N.J.A.C. 7:15-5.25(g)1 for stormwater control have been satisfied.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)5, the Department has confirmed that no new development is proposed with a riparian zone as required at N.J.A.C. 7:15-5.25(g)2.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)6, the Department has confirmed that no portion of the proposed development is located within a steep slope as required at N.J.A.C. 7:15-5.25(g)6.

The adopted amendment was noticed in both the Department Bulletin (Volume 39 Issue 7, pages 12-14) and The Star Ledger on April 1, 2015. Comments and statements of non-consent on this amendment were received from Somerset County Planning Board on May 19, 2015, Mr. Walter C. Lane provided comments and statements of objection to this amendment and are summarized below with the Department's responses.

Comment: The Somerset County Planning Board will not endorse this amendment at this time. The County feels that this amendment is inconsistent with the Warren Township Open Space/Conservation Plan Element and the Somerset

County Investment Framework Map as this parcel has been identified as a proposed open space and conservation area as well as a "Priority Preservation Investment Area".

Response: The Department has contacted the County and both the Department and the County acknowledges that there are inconsistencies with the Township's and County's Master Plans. Further, the County has agreed that their plan is only a broad brush and will work with the Township to address inconsistencies pertaining to this amendment.

This adopted amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

**NOTICE OF PUBLIC COMMENT PERIOD REGARDING SITE SPECIFIC WATER QUALITY
MANAGEMENT PLAN AMENDMENT APPLICATIONS PURSUANT TO P.L. 2013, C.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resources Management Coordination, has received the following Water Quality Management (WQM) Plan site specific amendment request pursuant to P.L. 2013, c.188 which was enacted on January 16, 2014. This legislation modifies some aspects of the WQM Planning Program for a period of up to two years. P.L. 2013, c.188 directs the NJDEP to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the WQM Planning rules at N.J.A.C. 7:15. In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the NJDEP bulletin.

Notice of site specific amendment proposals that qualify for review under P.L. 2013, c.188 are provided below.

**WATER QUALITY MANAGEMENT PLAN AMENDMENT PROPOSALS
ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION**

**PROPOSED AMENDMENT TO THE OCEAN COUNTY WATER QUALITY MANAGEMENT PLAN
PUBLIC NOTICE**

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Ocean County Water Quality Management (WQM) Plan. This amendment proposal, entitled "Congregate Care Center", submitted on behalf of Hovcare of Brick, would expand the Ocean County

Utilities Authority sewer service area (SSA) by 6.82 acres. The proposed project site is located in Lakewood Township, Ocean County on Block 1587/Lot 1. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

As outlined at N.J.A.C. 7:15-5.24(a), sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These areas are not included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the proposed project site has determined that a portion was identified as Rank 3 habitat for the following species in Landscape Project version 3.1: Snowy Egret, Glossy Ibis, Tri Colored Heron, Black Crowned Night Heron, Little Blue Heron, and Great Blue Heron.

On April 1, 2013 the Department received a Habitat Suitability Determination application (HSD), prepared by Trident Environmental Consultants. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department concurred with the application's finding that the site was too fragmented and disturbed to provide suitable breeding habitat for the species of concern and that forging opportunities for all species were non-existent due to the disturbed nature of the onsite stream corridor and overall lack of suitable prey species.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waterways and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined there are no special water resource protection areas along Category One waters on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File # 1514-05-0002.1, FWW050001 re-issued by the Department on June 29, 2005 was submitted to the Department, confirming that the extent of wetlands and transition area are accurately delineated on the proposed project activity site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of both the mapped wetlands and associated 50-foot buffer areas from the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the adopted SSA either where local mapped information exists delineating these areas, or through a narrative description where mapping does not exist, except as provided under N.J.A.C. 7:15-5.24(f)1. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of these amendments.

In accordance with N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. None of those special restricted areas are applicable here. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The Department has determined that the OCUA Northern Wastewater Pollution Control Facility has adequate available capacity to treat the proposed wastewater flow from the lot should it be developed in accordance with existing zoning regulations. Currently the OCUA Northern WPCF (NJ0028142) is permitted to discharge up to 32 Million Gallons per day (MGD) of treated wastewater to the Atlantic Ocean. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the OCUA Northern WPCF was calculated to be 22.67 MGD.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for any proposed development on the property will be provided by the Lakewood Township Municipal Utilities Authority which withdraws water from the Englishtown, Raritan, and Cohansey aquifers. The water allocation permit number is WAP100002. The existing water allocation permit will not require modification to serve the proposed project. It is currently permitted under PWSID No. 1514002 to allocate 200 million gallons per month (MGM) and has a water supply surplus of 21.307 MGM.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Lakewood Township has an adopted stormwater management ordinance (No.2006-22) which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. A riparian zone has been identified on the proposed project site as a tributary to the Long Causeway Branch (FW2-NT/SE1) and runs through the middle of the property. The required buffer width for Long Causeway Branch is 50 feet. In accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by applying a 50 foot buffer to the applicable portions of the Long Causeway Branch tributary, and the exclusion of the buffer area from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater

treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

This notice is being given to inform the public that a plan amendment has been proposed for the Ocean County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-02A, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with a copy sent to Mr. Brian Murphy, FWH Associates, 1856 Route 9, Toms River, NJ 08755. All comments must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment proposal.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

TRENTON, NEW JERSEY 08625-0420**

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan
Amendment Applications Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 20,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the

date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:

Colleen Kokas, Director
Office of Water Resource Management Coordination
Mail Code 401-02A
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below:

**Proposed Amendment to the Lower Delaware Water Quality Management Plan
Public Notice
Gateway Business Park**

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Lower Delaware Water Quality Management (WQM) Plan. This amendment, initiated by the Department, proposes to remove an environmentally sensitive area (ESA), specifically, bald eagle foraging habitat, from the sewer service area (SSA) on Block 29, Lot 6.10 in Oldmans Township, Salem County on a parcel that is part of the property referred to as “Gateway Business Park”. The ESA which is proposed for removal from the SSA is mapped as foraging habitat for bald eagle on the Department Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species (version 3.1).

The Department reviewed current conditions at adjacent parcels that are part of the Gateway Business Park, Block 29, Lots 6.02 and 6.09, acknowledging that several permits have been issued for both parcels, including Waterfront Development, Freshwater Wetlands and Flood Hazard Area permits for the proposed developments. These permits restrict construction in the ESAs and protect bald eagle foraging habitat identified onsite. As a result, the developments were designed outside of bald eagle foraging areas. In regards to Block 29, Lot 6.10, which is currently undeveloped, but slated for development, the Department has reviewed habitat records and land use data for bald eagle, and has determined that the removal of bald eagle foraging habitat based only on the habitat identified in the Department’s Landscape Project map is neither consistent with what would be approved by the Department’s Land Use Permitting program, nor is it sufficiently protective of the aforementioned habitat areas.

Therefore, this amendment proposes to assign the appropriate 300 foot buffer to the top of bank of Beaver Creek and remove this area from SSA on Lot 6.10. Removal of the bald eagle foraging habitat will ensure that approval of future development proposals would be contingent upon providing the same protections approved through the land use permitting process as witnessed on Block 29, Lots 6.02 and 6.09 for bald eagle foraging habitat.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

This notice is being given to inform the public that a plan amendment has been proposed for the Lower Delaware WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the amendment to WQM Program Docket, at the Department address cited above. All comments must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Public Notice of Proposed Permit Actions - 06/17/2015
(Division of Water Quality)

<u>Permit:</u> • Name • NJPDES No. • Type	<u>Facility Location:</u> • Address • County	<u>NJDEP:</u> • Case manager • Bureau • Phone No.	<u>Receiving Discharge:</u> • Stream or GW Formation or POTW • Stream or GW Classification • Watershed	<i>Executive Summary</i>
BUENA BOROUGH MUA NJ0021717 DSW Major	412 Plymouth Rd Buena, NJ 08326 Atlantic County	Magan Kanzaria Bureau of Surface Water Permitting (609)633-1169	Deep Run PL Great Egg Harbor R (Lk Lenape to HospBr)	Surface Water Renewal Permit Action This permit action is a renewal of an existing major permit for a municipal wastewater treatment plant. The facility discharges a permitted flow of 0.4 MGD of treated wastewater with industrial contribution into Deep Run.
JACKSON TOWNSHIP MUA NJ0062090 DGW	Maple Glen Stp Boxwood Dr Jackson Twp, NJ 08527 Ocean County	Keith Howell Bureau of Nonpoint Pollution Control (609)633-7021	Cohansey II-A	Ground Water Renewal Permit Action Jackson Township Municipal Utilities Authority has submitted a renewal NJPDES-DGW application for a Discharge to Ground Water permit. This facility is made up of 83 mobile homes which are serviced by an on-site treatment plant. The treatment plant handles residential wastewater through an on-site contact stabilization package treatment plant. Maximum design flow is 52,000gallons per day but is currentlt limited to 17,000 gallons per day discharge.
RIVERSIDE WATER RECLAMATION AUTHORITY NJ0022519 DSW Major	300 Monroe St Riverside, NJ 08075-0000 Burlington County	Ramanathan Asokan Bureau of Surface Water Permitting (609)292-4860	Rancocas Creek FW2-NT(C2) Rancocas Creek	Surface Water Renewal Permit Action This application is for a renewal of a NJPDES permit to discharge an average of 1.0 million gallons of treated domestic wastewater with industrial contribution. Treatment units consist of a bar screen, grit chambers,primary clarifiers, trickling filters, secondary clarifiers, nitrification tower, clarifloculators, upflow sand filters, and ultraviolet disinfection. DSN 001A discharges into the Rancocas Creek which is classified as FW2-NT waters. This existing facility is authorized to beneficially reuse the facility's effluent to irrigate the township's mulch composting yard and for street sweeping, sewer jetting, and vehicle washing operations.
SALEM CNTY SOLID WASTE COMPLEX NJ0062049 DST	52 Mckillip Rd Woodstown, NJ 08098 Salem County	Daniel Kuti Bureau of Nonpoint Pollution Control (609)633-7021	Mannington Creek FW2-NT(C2) Salem River (below 39d40m14s dam)	Stormwater Discharge Renewal Permit Action The Salem County Solid Waste Facility is a sanitary landfill located in of Alloway Township, which serves all of Salem County. Salaem may accept Solid Waste types 10, 13, 23, (except leaves), 25 and 27. In addition to the landfill, the facility includes a scale house, maintenance facility, convenience center, administrative offices, personnel building and leachate pumping and storage facilities. The Department intends to renew this permit and incorporate the changes requested under the proposed 2011 modification.

CHESTER POOL @ BLACK RIVER MIDDLE SCHOOL NJ0134201 DGW	Rt 513 Chester, NJ 07930 Morris County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609)633-7021	Crystalline Rocks II-A	Ground Water Renewal Permit Action The facility is an outdoor pool designed to handle up to 300 people per day, and is only used during the warmer months. Sanitary wastes are generated by a locker room, an administrative office, and a snack bar. Backwash from the pool is not discharged to the on-site disposal system, it is discharged to a temporary storage tank and hauled off-site.
