General Application Milestone Codes

Application Approved	F = Complete for Filing	P = Permit Decision Date
Application Denied	H = Public Hearing Date	R = Complete for Review
Application Withdrawal	I = Additional Information Requested	T = Additional Information Received
A= Approved	IS = Issued	W= Withdrawn
C = Cancelled	L = Legal Appeal of Permit Decision	
D= Denied	M = Permit Modification	

Specific Decision Application Codes

O = Other

REG = HMDC/Pinlands Exemption

Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Coastal Permit: A permit or an authorization issued under this chapter pursuant to CAFRA, the Wetlands Act of 1970, N.J.S.A. 13:9A-1 et seq., or the Waterfront Development Law, N.J.S.A. 12:5-3.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway, floodplain or riparian zone in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan
Amendment Applications Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, C.203 (amended by P.L. 2013, c.188.) directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:
Colleen Kokas, Director
Office of Water Resource Management Coordination
Mail Code 401-02A
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below:

**NEW JERSERY ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION**

Proposed Amendment to the Lower Raritan/Middlesex County Water Quality Management Plan

Public Notice:

Metuchen/South River/North Brunswick Sewer Service Area

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Lower Raritan/Middlesex County Water Quality Management (WQM) Plan. This amendment proposal, entitled “Metuchen/South River/North Brunswick Sewer Service Area”, submitted by the Middlesex County Planning Office on behalf of the Middlesex County Board of Chosen Freeholders, would expand the Middlesex County Utilities Authority (MCUA) sewer service area (SSA) to add 4 separate sites totaling 46 acres to the MCUA sewer service area. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L. 2013, c.188. This preliminary notice represents the Department’s determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

The four properties are located in the following municipalities in Middlesex County: Metuchen Borough (Site 1) - portions of the following lots: Block 37/ Lots 5.12, 5.22, 16.02, 16.03, 17.01, 17.02, 20, Block 37.01/Lot 16, Block 38/Lot 1, Block 39/Lot 40; South River Borough (Site 2) - Block 49/Lots 1.01, 2 (portion), Block 68/Lot 1 (portion), Block 77.01/Lot 1 (portion), Block 83/Lot 1 (portion); North Brunswick Township (Site 3) - Block 148/Lot 114.01 (portion) and (Site 4) - Block 262/Lot 108. The proposed sewer service area additions are: 5.10 acres (Site 1), 14.23 acres (Site 2), 23.96 acres (Site 3) and 2.97 acres (Site 4). Sites 1-3 were reviewed prior to the adoption (on March 11, 2015) of the Middlesex County Future Wastewater Service Area (FWSA) map amendment but could not be included upon adoption because that would have constituted a substantive change to the amendment that was publicly noticed. All sites are currently vacant, with the exception of Site 4, which has one single family home on the property. There are no development proposals for any of the sites at this time. P.L. 2013, c.188 allows the Department review amendments to a WQMP to allow for the inclusion of land in a sewer service area, where the amendment does not propose a specific project or activity.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESA’s) have been assessed to determine what areas of the proposed project sites are appropriate for inclusion in SSA’s. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESA’s are not included in the proposed SSA except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in

proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of Sites 1 and 4 has determined that no threatened or endangered species habitat exist on either site.

Review of Site 2 has determined that a portion is identified as Rank 3 habitat for the following species in Landscape Project version 3.1: Yellow Crowned Night Heron and Great Blue Heron. However, the habitat area located on this site is a small, isolated patch that is less than 25 acres. It therefore does not meet the criteria for exclusion from the proposed SSA pursuant to N.J.A.C. 7:15-5.24(b)1.

Review of Site 3 determined that a portion is identified as Rank 3 habitat for the following species in Landscape Project version 3.1: Wood Turtle, Wood Thrush and Great Blue Heron. In June 2013 the Department received a Habitat Suitability Determination application (HSD). The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26 which describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department concurred with the application's finding that the site was not suitable habitat for the species identified in the Landscape Project mapping.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The review has determined that no Natural Heritage Priority Sites exist on any of the sites.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waterways and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters exist on any of the sites.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of Site 4 has determined that no wetlands are on the site. For Site 1 in accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File # 1210-13-0001.1 FWW130001 was provided, confirming the extent of wetlands and transition areas on the site. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of both the mapped wetlands and associated 50-foot transition areas from the proposed SSA.

For Site 2 in accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File #1223-04-0001.1 FWW080001 was provided, confirming the extent of wetlands and transition areas on the site. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of both the mapped wetlands and associated 50-foot transition areas from the proposed SSA. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016.

For Site 3 in accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File #1215-05-0007.1 FWW050001 was provided, confirming the extent of wetlands and transition areas on the site. The wetlands area located on this site are small, non-contiguous areas of less than 25 acres. They therefore do not meet the criteria for exclusion from the proposed SSA pursuant to N.J.A.C. 7:15-5.24(b)1. One small wetlands area on the southeast corner of the site will remain excluded from the proposed SSA. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed sites.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project sites.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of a site is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the MCUA sewage treatment plant (NJ0020141) is permitted to discharge up to 147 Million Gallons per Day (MGD) of treated wastewater to the Raritan River. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the MCUA sewage treatment plant was calculated to be 105.61 MGD.

In accordance with N.J.A.C. 7:15-5.25(h)3, the water supply need of a site is to be evaluated. However, P.L. 2013, c.188 allows the Department to review amendments to a WQMP that allow for the inclusion of land in a sewer service area, where the amendment does not propose a specific project or activity. For Site 1, Metuchen Borough is served by the Middlesex Water Company (PWSID No. 1225001). Middlesex Water Company has diversion privileges set by Water Allocation Permits 5293 and 5294, with additional bulk purchases, for a total supply of 2,051.960 million gallons per month (MGM) and 21,160 million gallons per year (MGY). Middlesex Water Company currently has a water supply surplus of 141.350 MGM and 1,781.793 MGY. For Site 2, South River Borough is served by the South River Borough Water Department (PWSID No. 1223001). South River Borough Water Department currently has diversion privileges of 56 MGM and 238.424 MGY set by Water Allocation Permit 5171. South River Borough Water Department also purchases water (29.45 MGM and 346.75 MGY) from East Brunswick Township, however the contracts for water sold to other systems by the East Brunswick Water Utility have not been approved by the Department's Bureau of Water Allocation and Well Permitting. Therefore, the water purchased by the South River Borough Water Department from the East Brunswick Water Utility cannot be credited towards South River Borough Water Department's Firm Capacity, available monthly and yearly limits. As such, the South River Borough Water Department currently has a Firm Capacity deficit of 0.028 MGD and a yearly water deficit of 166.657 MGY. The Department and East Brunswick are currently in discussions pertaining to this matter. For Sites 3 and 4, North Brunswick Township is served by the North Brunswick Water Department (PWSID No. 1215001). The North Brunswick Water Department does not have its own water allocation limits rather, it has a water supply contract with the New Jersey Water Supply Authority (NJWSA) totaling 248 MGM and 2,920 MGY. North Brunswick Water Department currently has a water supply surplus of 12.046 MGM and 716.940 MGY.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information, a review and determination of compliance with

the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Metuchen Borough, South River Borough, and North Brunswick Township have adopted stormwater management ordinances (No.'s 2005-18, 2007-17, Chapter 205 Article 37, respectively); see N.J.A.C. 7:8-4. These municipalities are also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)5i-vii. For Site 1, a riparian zone of a Bound Brook tributary has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for the Bound Brook Tributary, which is designated FW2-NT, is 50 feet. There are no riparian zones located on Sites 2, 3, and 4.

In order to satisfy the Riparian Corridor Analysis, Metuchen Borough has adopted Ordinance No. 2011-04 to ensure the protection of the riparian corridors along all perennial and intermittent streams. The adopted ordinance establishes and protects Water Resource/Buffer Conservation Zones ("stream corridor buffer") adjacent to New Jersey Surface Water Quality Standards designated waters (excluding man-made) and regulates development within those zones. The stream corridor buffers vary in width depending upon the water body's classification in the Surface Water Quality Standards at N.J.A.C. 7:9B-1.15. The provisions at N.J.A.C. 7:15-5.25(h)5i, have been satisfied for Site 1 by the exclusion of the riparian corridor and associated 50 foot buffer of the Bound Brook Tributary from the proposed SSA and the adoption of Ordinance 2011-04.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject sites.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Lower Raritan/Middlesex County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Middlesex County Planning Department, 40 Livingston Avenue, New Brunswick, New Jersey 08901, and the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-07A, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

A **public hearing** will be held by Middlesex County on the proposed WQM Plan amendment. The public hearing will be on November 24, 2015 at 5:30 pm, in the Freeholders' Public Meeting Room, 1st Floor, of the Middlesex County Administration Building located on John F. Kennedy Square and Bayard Street, New Brunswick, New Jersey.

Interested persons may submit written comments on the amendment to WQM Program Docket, Office of Water Resources Management Coordination, at the Department address cited above with a copy sent to Ms. Mirah Becker of the Middlesex County Planning Department at the County address cited above. All comments should reference Program Interest No. 435463, Activity No. AMD150001 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the County Board of Chosen Freeholders in reviewing the amendment request. If the amendment is adopted by Middlesex County, the Department must review the amendment prior to final adoption. The comments received in reply to this notice and to the public hearing will also be considered by the Department during its review.

Proposed Amendment to the Tri-County Water Quality Management Plan

Public Notice: Margolis Warehouse

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management (WQM) Plan. This amendment proposal, entitled "Margolis Warehouse", submitted on behalf of Avis Realty and Re-Development LLC, would modify the Mansfield Township Wastewater Management Plan (WMP) to expand the Burlington City Sewage Treatment Plant (STP) sewer service area (SSA) by 94.61 acres on Block 47.01, Lots 3.02, 9.01, 9.02, 11 and 12, in Mansfield Township, Burlington County. This site is currently identified in the WMP as a discharge to groundwater service (SSA) area for 30,813 gallons per day (gpd). This site was originally approved for a proposed warehouse to be served by an on-site discharge to groundwater treatment plant in the WMP, which was adopted by the Department on November 20, 2012 (see January 7, 2013 New Jersey Register, 45 N.J.R. 57(b)). This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

Adoption of this proposed amendment would allow for the construction of a 1,852,738 sq. ft. warehouse distribution facility which would include 92,637 sq. ft. of office space. The proposed project site is located west of the New Jersey Turnpike, east of Interstate 295 and north of Florence Road (Route 656).

Marketing analysis after the prior amendment determined that the current economic development of the project site was better suited for E-Commerce type warehouse distribution which includes a higher number of employees than the traditional warehouse distribution facility that was originally approved. The increase in the number of employees for E-Commerce facilities requires a greater amount of sewer capacity. The proposed project would employ 4,429 warehouse employees. The approved 30,813 gpd for on-site discharge to groundwater treatment plant would limit the opportunity to provide E-Commerce type use on the proposed project site. An evaluation of wastewater alternatives determined that the City of Burlington Wastewater Treatment Plant was a viable wastewater disposal alternative for the Margolis Warehouse facility.

The proposed onsite discharge to groundwater treatment plant that is designated in the WMP to serve this property was never built, therefore, the amendment proposes to transfer the adopted sewer service for this property from the onsite treatment plant (as specified in the WMP) to the Burlington City STP. This proposal would reduce the identified SSA from that which was previously adopted. The portion of the SSA not being transferred will revert to the Individual Subsurface Sewage Disposal Systems of 2,000 gpd or less (septic area) designation. The Burlington City STP operates under New Jersey Pollutant Discharge Elimination System (NJPDES) permit number NJ0024660. The connection to the Burlington City STP will require the construction of a new force main from the proposed project site to Columbus Road in Burlington City which will be owned and maintained by Mansfield Township. The force main will be restricted from any new connections to it along its proposed route within Florence and Burlington Townships.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESA's are not included in the proposed SSA except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification Reissuance File No. 0318-05-0001.1 FWW050001 was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. Freshwater Wetlands General Permits No's 6, 7, 10A, and 11 (File No.'s 0318-05-0001.1 FWW130001-130003) have been approved by the Department, confirming that the extent of wetlands and transition area are accurately delineated on the proposed project activity site and confirming that the proposed project meets the requirements for approval to disturb regulated areas pursuant to N.J.A.C. 7:7A-4.3, 5.11, 6.2 and 13.1.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed project site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the Burlington City STP (NJ0024660) is permitted to discharge up to 2.7 Million Gallons per Day (MGD). Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the Burlington City STP was calculated to be 1.77 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 119,989 gallons per day (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by New Jersey American Water Mount Holly (NJAWMH) (PWSID No. 0323001). NJAWMH is a public water system which withdraws water from the Middle Potomac, Raritan, Magothy aquifer. NJAWMH has available water supply limits of 346.140 Million Gallons per Month (MGM) and 2,735.887 Million Gallons per Year (MGY) established by Water Allocation Permits No.'s 5025X and 5378 along with a bulk purchase agreement with New Jersey American Water – Western Division. NJAWMH currently has a water supply surplus of 98.135 MGM and 702.142 MGY. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 5.69 MGM; therefore sufficient water supply is currently available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Mansfield Township has an adopted stormwater management ordinance (No. 2008-5); see N.J.A.C. 7:8-4. Mansfield Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are to be protected. A riparian zone of a Crafts Creek tributary, as well as the main stem has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for this section of Crafts Creek and its tributary, which are designated FW2-NT, is 150 feet due to the presence of acid producing soils. A Stream Encroachment Permit File No. 0318-05-0001.1 FHA070001 was provided. This permit grants permission to establish stream encroachment lines and to construct nine stormwater basins and a bridge crossing. Issuance of this permit is the Department's determination that the proposed project meets the requirements for approval to disturb regulated areas pursuant to N.J.A.C. 7:13-11. No SSA is proposed within the riparian buffer.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. Although there are steep slopes on portions of the above referenced lots, the provisions of N.J.A.C. 7:15-5.25(h)6 have been satisfied by the exclusion of these areas from the proposed SSA.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above with a copy sent to Mr. Andrew French, French & Parrello Associates, 1800 Route 34 – Suite 101, Wall, NJ 07719. All comments should reference Program Interest No. 435433, Activity No. AMD150003 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435433, Activity No. AMD150003 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held,

the public comment period in this notice shall be extended to close 15 days after the public hearing

Proposed Amendment to the Lower Raritan/Middlesex County Water Quality Management Plan

Public Notice: Morris Companies

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Lower Raritan/Middlesex County Water Quality Management (WQM) Plan. This amendment proposal, entitled “The Morris Companies”, submitted on behalf of the Trenton Road Corporation, would expand the Middlesex County Utilities Authority (MCUA) sewage treatment plant (STP) sewer service area (SSA) by approximately 16 acres. The proposed amendment site is located in Monroe Township on a portion of Block 82, Lot 3.01 east of Cranbury South River Road (Route 535) and north of Brown’s Corner Road (Route 522). This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department’s determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA’s are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that a portion of the site is identified as Rank 3 Wood Turtle habitat in Landscape Project version 3.1.

On November 27, 2013, the Department received a Habitat Suitability Determination application (HSD), prepared by Trident Environmental Consultants. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department concurred with the application’s finding that the proposed project site was far enough away from core stream habitat that the value of the property as a wandering habitat is minimal.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA’s, except as provided

under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File No. 1200-05-0003.1 FWW050001 (LOI) was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands or transition areas within the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

The proposed project site is located on a parcel of property containing delineated wetlands. The Monroe Township Municipal Utilities Authority's (MTMUA) Manalapan Brook Interceptor that would serve this proposal was funded under the federal construction grant program administered under Section 201 of the Federal Clean Water Act. The MTMUA is subject to a federal Environmentally Sensitive Area (ESA) grant condition included in the grant agreement executed between the MTMUA and United States Environmental Protection Agency (USEPA) under project number C34-423-01. This ESA grant condition prohibits any sewer connections to federally funded facilities from any sewage generating structure located on a parcel of property containing wetlands and floodplains unless a mapping revision or a waiver is obtained.

As indicated above, the wetlands areas as delineated based on a Department issued LOI have not been included in the proposed SSA. Pre-existing grant conditions and requirements are unaffected by adoption of this amendment and compliance is required. Compliance with this grant condition can only occur if and when an applicant requesting sewer service for any development located within Block 82, Lot 3.01 has obtained a USEPA mapping revision or waiver. Such mapping revisions and waivers are only issued through a formal request by the grantee, which is the MTMUA for this location. The request by the grantee must include the submission of a wetlands verification from a Department issued LOI confirming that environmentally sensitive areas will not be impacted if sewer conveyance systems are constructed to serve the proposed development. Since, prior to any Department and/or MTMUA approvals for the extension of sewer infrastructure to serve any proposed development will require a USEPA mapping revision or waiver issued at the request of the grantee, the provisions at N.J.A.C. 7:15-5.24(d)1 have been satisfied.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the MCUA STP (NJ0020141) is permitted to discharge up to 147 Million Gallons per Day (MGD). Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the MCUA STP was calculated to be 101.69 MGD.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need of a site is to be evaluated. However, P.L. 2013, c.188 allows the Department to review amendments to a WQMP to allow for the inclusion of land in a sewer service area, where the amendment does not propose a specific project or activity. Without such information a review and determination of compliance with the water supply evaluation is not possible. Water supply for the site will be provided by the Monroe Township Utility Department (MTUD) (PWSID No. 1213002). MTUD is a public water system which withdraws water from the Upper and Middle Potomac Raritan Magothy aquifers. The MTUD has diversion privileges set by Water Allocation Permit No. 5048 for a total supply of 374.67 Million Gallons per Month (MGM) and currently has a water supply surplus of 57.795 MGM.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Monroe Township has an adopted stormwater management ordinances (No.'s 011 2006-38, 05 2007-021); see N.J.A.C. 7:8-4. Monroe Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, proposed development disturbance is not be located in riparian zones except as provided under N.J.A.C. 7:15-5.25(h)i–vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. No riparian zones are located on the proposed project site.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Lower Raritan/Middlesex County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Middlesex County Planning Department, 40 Livingston Avenue, New Brunswick, New Jersey 08901, and the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Middlesex County Planning Department at (732) 745-3016 or the Office of Water Resources Management Coordination at (609) 777-4349.

A **public hearing** will be held by Middlesex County on the proposed WQM Plan amendment. The public hearing will be on November 24, 2015 at 5:30 p.m., in the Freeholders' Public Meeting Room, 1st Floor, of the Middlesex County Administration Building located on John F. Kennedy Square and Bayard Street, New Brunswick, New Jersey.

Interested persons may submit written comments on the amendment to WQM Program Docket, Office of Water Resources Management Coordination, at the Department address cited above with a copy sent to Ms. Mirah Becker of the Middlesex County Planning Department at the County address cited above. All comments should reference Program Interest No. 435463, Activity No. AMD150002 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the County Board of Chosen Freeholders in reviewing the amendment request. If the amendment is approved by Middlesex County, the Department must review the amendment prior to final adoption. The comments received in reply to this notice and to the public hearing will also be considered by the Department during its review.

**Proposed Amendment to the Sussex County Water Quality Management Plan
Public Notice:**

Sussex County Municipal Utilities Authority - Solid Waste Facility

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Sussex County Water Quality Management (WQM) Plan. This proposed amendment (Public Interest No. 435459; Activity No. AMD150001) will also modify the Sussex County Wastewater Management Plan (WMP) and the Sussex County, Future Wastewater Service Area (FWSA) Map 3 to include approximately 97.4 acres within the Sussex County Municipal Utilities Authority's (SCMUA) Solid Waste Facility as sewer service area (SSA) of the the SCMUA Upper Wallkill Water Pollution Control Facility (WPCF). The SCUMA Solid Waste Facility, located on Block 14, Lots 33.05, 34, 37 and 38.01 in Lafayette Township, Sussex County is situated at the intersection of State Routes 94 and 15 in Lafayette Township.

Currently, SCMUA operates both the Upper Wallkill WPCF (NJPDES No. NJ0053350) and the Solid Waste Facility. As regulated under Department Significant Indirect User permit (#NJ0103811) since February 2003, up to approximately 35,000 gallons per day (gpd) of leachate, accumulated from the landfill leachate collection system and a Class "A" recycling facility, is stored in two tanks and hauled, on a periodic basis, via tanker trucks to SCMUA's Upper Wallkill WPCF for final treatment and disposal. The SCMUA's Upper Wallkill WPCF is located approximately six miles to the north in Hardyston Township. At this time, less than 2,000 gpd of sanitary wastewater, generated from the Solid

Waste Facility offices and maintenance buildings, is discharged to an onsite individual subsurface sewage disposal (septic) system.

The proposed expansion of the Upper Wallkill WPCF SSA would encompass approximately 97.4 acre of disturbed area within the Solid Waste Facility property related to the landfill operations that generate leachate, from both the existing and future solid waste containment cells, the recycling facility and the sanitary waste from the maintenance and office buildings. This proposed amendment would also allow for the construction of associated treatment works, including a pump station and force main, for the conveyance of all generated wastewater directly to the Upper Wallkill WPCF.

The SCMUA Upper Wallkill WPCF NJPDES permit includes stage flow of 2.5 million gallons per day (MGD) and 3.0 MGD to be discharged to surface water. Presently, the average of the monthly average flow as reported on the Department's most recent discharge monitoring reports for the period of May 2014 to April 2015 indicate that this facility is discharging an average of 1.3 MGD of wastewater. As up to 35,000 gpd from the existing leachate collection system is currently transported and treated at the SCMUA Upper Wallkill WPCF this flow volume is accounted for as part of the WPCF existing wastewater flow. Subsequently, no expansion to the Upper Wallkill WPCF is anticipated as a result of this proposed amendment.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15-5.24 and 5.25(h) and Public Law (P.L.) 2011, c.203 as amended and supplemented by P.L. 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24(b), environmentally sensitive areas have been assessed to determine what areas are appropriately included in the proposed SSA. Pursuant to N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) are defined as contiguous areas of 25 acres or larger, alone or in combination, consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas (riparian buffer), and wetlands. As described below, the Department determined that inclusion of the 97.4 acres of new expanded SSA within the SCUMA Solid Waste Facility is compliant with N.J.A.C. 7:15-5.24(b).

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Landscape Project version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e)-(h). The Department determined no threatened or endangered species habitat or other priority species habitats were identified on the SCUMA Solid Waste Facility property.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). A site review of the SCUMA Solid Waste Facility property determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, Category One (C1) riparian buffer areas are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). The Department

determined no classified C1 water bodies exist within the location of the SSA proposed as part of this amendment.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not proposed as SSA as part of this proposed amendment. In addition, no portions of the site are identified as within a riparian zone as established at N.J.A.C. 7:15-5.25(g)2-5 nor are identified as areas with a steep slope as required at N.J.A.C. 7:15-5.25(g)6.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that define and prohibit the extension of sewers into specific ESAs are not applicable to this proposed amendment. Furthermore, all other ESA as defined at N.J.A.C. 7:15-5.24(c)1-3; lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not applicable to this proposed amendment location nor are any ESA as defined at N.J.A.C. 7:15-5.24(d)1-4; beaches, coastal high hazards area or dunes as defined under N.J.A.C.7:7E.

The Department has determined that, as all operations at the SCUMA Solid Waste Facility are monitored and/or regulated for compliance with the applicable stormwater management regulations and the proposed wastewater conveyance infrastructure would be installed under state or County roadways or right of ways, these activity are not major development that would create or increase impervious surfaces as defined under N.J.A.C. 7:8. Consequently, the requirements of N.J.A.C. 7:15-5.25(g)1 for stormwater control do not apply as part of this proposed amendment.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.”

This notice is being given to inform the public that a plan amendment has been proposed for the Sussex County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Sussex County Department of Engineering and Planning, Division of Planning, Sussex County Administration Center, One Spring Street, Newton, New Jersey 07860; and the Department’s Office of Water Resource Management (WRM) Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department’s file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents at one of the above locations may be arranged by calling either the Office of WRM Coordination at (609) 777-4349 or the Sussex County Department of Engineering and Planning at (973) 579-0500.

Interested persons may submit written comments on the amendment to WQM Program Docket, at the Department address cited above with a copy sent to Ms. Alice Brees, Sussex County Department of Engineering and Planning, at the address cited above. All written comments should reference Program Interest No.: 435459 and Activity No.: AMD150001 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. Any written requests should reference Program Interest No.: 435459; Activity No.: AMD150001 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the addresses cited above for the Department and to the Sussex County Department of Engineering and Planning at their address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE OF FINAL SETTLEMENT
FRESHWATER WETLANDS GENERAL PERMITS AND TRANSITION AREA WAIVERS**

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to enter into a Final Settlement Agreement that would result in the issuance of freshwater wetlands general permits 2 and 10A and a transition area waiver – averaging plan to allow for the development of two single family homes on Block 7000, Lots 23.02 and 23.03 in Moorestown Township, Burlington County, New Jersey. The project is as shown on the site plan entitled: “Plan of Averaged Wetlands Transition Line, Block 7000, Lot 23.03, Moorestown Township, Burlington County, N.J.,” prepared by William H. Nicholson Associates, P.A. and dated September 20, 2002, last revised June 9, 2011. This proposed Final Settlement Agreement is being considered under the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B-1 et seq.).

Notice of the final permit decision will appear in the DEP Bulletin under the section entitled “Division of Land Use Regulation.”

IN THE MATTER OF: Angela DiPaolo, Alfred DiPaolo & Rita Georgetti
File No.: 0322-03-0003.1 (APL080001)
Block: 7000 Lots: 23.02 & 23.03
Moorestown Township, Burlington County

Comments regarding this settlement or requests for information regarding this action should be sent to: Wetlands Region Supervisor, Division of Land Use Regulation, NJ DEP, Mail Code 501-02A, P.O. Box 420, Trenton, NJ 08625-0420, or by email at ryan.anderson@dep.nj.gov, or the office may be reached by telephone: (609) 633-2289. Comments must be received within 30 days of this publication, or by November 19, 2015.

Notice of the Department’s intent to initiate a reconsideration of application of substantive standards under N.J.A.C. 7:7A-17.1 of the Freshwater Wetlands Protection Act Rules and N.J.A.C. 7:7-19 of the Coastal Zone Management Rules and to provide a 15 day comment period as provided in N.J.A.C. 7:7A-17.1(j) and N.J.A.C. 7:7-19.2(i).

Reconsideration of application of substantive standards is being initiated for:

Steven & Trudy Jeffries
410 Dock Road
Block: 4, Lots: 52 & 52.01
Eagleswood Township, Ocean County
Freshwater Wetlands Application No. 1508-08-0004.1 FWW110001
CAFRA Permit Application No. 1508-08-0004.1 CAF110001

On January 18, 2012 and March 9, 2012, the Department denied a CAFRA General Permit and Freshwater Wetlands Individual Permit, respectively, on the above property for the construction of single-family home along with associated improvements. The Department has begun to reassess the strict application of the freshwater wetland and coastal zone management regulations and will determine if construction of a single family dwelling may occur in accordance with the amelioration rules under the Freshwater Wetlands regulations pursuant to N.J.A.C. 7:7A-17.1 and the Coastal Zone Management regulations pursuant to N.J.A.C. 7:7-19.1.

A 15-day public comment period shall commence upon the publication of the October 7, 2015 DEP bulletin. Comments may be sent to:

Freshwater Wetlands Supervisor,
Division of Land Use Regulation,
Bureau of Coastal Regulation
NJDEP, Mail Code 501-02A PO Box 420
Trenton, NJ 08625-0420,
by e-mail care of ryan.anderson@dep.nj.gov.
The office may be reached by telephone: (609) 777-0454.

A preliminary analysis of the reconsideration of application of substantive standards may be obtained by contacting the above. A copy of the notice shall be sent to those agencies and individuals identified at N.J.A.C. 7:7A-17.1(j) and N.J.A.C. 7:7-19.2(i).

New Jersey Department of Environmental Protection
Land Use Management
Office of Coastal and Land Use Planning

The New Jersey Department of Environmental Protection, Office of Coastal and Land Use Planning, has reviewed the Municipal Public Access Plan Application(s) listed below in accordance with the requirements of N.J.A.C. 7:7E (the Coastal Zone Management Rules) and issued the indicated determinations.

Municipal Public Access Plan	County	Determination	Date of Determination
Harrison Town	Hudson	Approved	October 1, 2015

In the case of a revocation, any person may request an adjudicatory hearing in accordance with N.J.A.C. 7:38-1.5 to contest a Department determination. Hearing requests shall be submitted within 30 days of this notice and should be sent to:

Office of Legal Affairs
Attention: Adjudicatory Hearing Requests
Department of Environmental Protection
P.O. Box 402
Trenton, New Jersey 08625-0402

With a copy sent to:

**NOTICE OF PUBLIC COMMENT PERIOD
SOLID WASTE FACILITY PERMIT RENEWAL AND MODIFICATION
BURLINGTON COUNTY LANDFILL
BURLINGTON COUNTY RESOURCE RECOVERY COMPLEX**

The New Jersey Department of Environmental Protection, Division of Solid and Hazardous Waste, hereby gives notice that it has tentatively approved a Solid Waste Facility Permit Renewal and Modification Application regarding the operation and expansion of the existing Burlington County Landfill.

The Application for renewal of the Solid Waste Facility Permit was submitted in accordance with the requirements established at N.J.A.C. 7:26-2. The facility is permitted to accept waste types ID 10 (Household, Commercial, and Institutional Wastes), ID 13 (Bulky Wastes), ID 13C (Construction and Demolition Waste), ID 23 (Vegetative Waste), ID 25 (Animal and Food Processing Waste), ID 27 (Dry Industrial Waste), and ID 27I (Waste Material consisting of Incinerator Ash or Ash Containing Waste).

The proposed vertical and horizontal expansion is designed to fill the wedge between the two existing landfills (Landfills No. 1 and No. 2) and increase the maximum elevation to 172 feet above mean sea level. The consolidation of the two landfills will result in a volumetric expansion of 3.36 million cubic yards. This is estimated to meet the County's solid waste disposal needs until approximately 2026.

The public comment period on the draft Permit action begins on the date of the publication of this notice and will close within thirty days of this publication. During this period, any interested person may submit written comments to the Department concerning the draft Permit action. Comments must be directed to:

Anthony Fontana, Chief
New Jersey Department of Environmental Protection
Division of Solid & Hazardous Waste

Bureau of Solid Waste Permitting
Mail Code 401-02C
401 E. State Street, P.O. Box 420
Trenton, New Jersey 08625-0420
(609) 292-9880

Upon written request of any interested party, which raises significant issues of fact relevant to the proposed agency action within thirty days of this publication, a public hearing will be scheduled regarding the proposed agency action.

The application and all other supporting documents, as well as the draft Solid Waste Facility Permit and Fact Sheet, are available for inspection at the above noted office of the Department's Division of Solid and Hazardous Waste. In addition, these documents were provided to the offices of the Clerks of the Townships of Florence and Mansfield and the office of the Clerk of Burlington County.

Anyone who would like to obtain copies of the draft Solid Waste Facility Permit and Fact Sheet for the facility should contact Mr. Ross M. Hull at the above address or at (609) 292-9880.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF COASTAL AND LAND USE COMPLIANCE AND ENFORCEMENT
NOTICE OF INTENT TO SETTLE A FRESHWATER WETLANDS VIOLATION**

PLEASE TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to settle an enforcement action pertaining to the below site and responsible party for violations of the Waterfront Development Act pursuant to N.J.A.C. 7:7-28.4.

IN THE MATTER OF: DAIBES ENTERPRISES INC
 Enforcement File # 0213-02-0003.2
 Block and Lot [21, 1] [22, 1]
 Edgewater Boro, Bergen County

Comments regarding this settlement or requests for a copy of the settlement should be sent to: Larry Baier, NJDEP Bureau of Coastal and Land Use Compliance and Enforcement, 401 East Sate Street, Mail Code 401-04C, PO Box 420, Trenton, New Jersey 08625 or via email at larry.baier@dep.nj.gov. Comments must be received by NJDEP within 30 days of this publication to be considered.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:
