O = Other

REG = HMDC/Pinelands Exemption

Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Coastal Permit: A permit or an authorization issued under this chapter pursuant to CAFRA, the Wetlands Act of 1970, N.J.S.A. 13:9A-1 et seq., or the Waterfront Development Law, N.J.S.A. 12:5-3.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway, floodplain or riparian zone in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

Proposed Amendment to the Mercer County Water Quality Management Plan

Public Notice

Institute for Advanced Study

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Mercer County Water Quality Management (WQM) Plan. This amendment proposal, submitted on behalf of the Institute for Advanced Study, would expand the sewer service area (SSA) of the Stony Brook Regional Sewerage Authority's (SBRSA) River Road Sewage Treatment Plant (STP) by a net amount of 1.18 acres. This amendment proposal would add 3.54 acres that are not in the presently adopted sewer service area and remove 2.36 acres from the presently adopted sewer service area for a net increase of 1.18 acres. The SSA to be removed will revert to the Individual Subsurface Sewage Disposal Systems of 2,000 gpd or less (septic area) designation. The proposed project site is located in Princeton Borough, Mercer County on a portion of Block 11201/Lot 1 which is west of the intersection of Springdale Road and West Drive. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA's are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that a portion of the site is identified as Rank 3 Barred Owl habitat in Landscape Project version 3.1.

In September 2010 the Department received a Habitat Suitability Determination application (State Threatened Raptor Survey) (HSD), prepared by Ecolsciences Inc. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department reviewed the HSD and in a February 23, 2011 letter to IAS stated that "...the information submitted by the applicant is not sufficient to make a biological finding that the Institute Woods property is not a component of a suitable habitat patch for the barred owl. The associated forest patch is of sufficient size to support barred owls and features a field verified forest community consistent with documented suitable habitat described in available literature. Therefore, we cannot support a recommendation that the subject site be included in the sewer service area."

Subsequent to these findings, the applicant presented to the Department that fact that storm damage had occurred to the habitat complex on the property during the fall and winter of 2013. Based on this new

information, a site investigation was conducted by Department personnel in April of 2014. The results of this field inspection showed that portions of the forested area originally proposed for exclusion from the sewer service area had sustained severe blow-down damage that has subtracted from the level of suitability of the barred owl resting or roosting onsite. Given these new conditions, the applicant proposed that certain portions of the site be placed under a conservation easement to reflect the best remaining habitat on the site and ensure its protection moving forward.

Based on the habitat conditions observed during the April site investigation the proposed exclusion areas serve to preserve a majority of the most suitable remaining habitat on the subject site. Barred owls have large home ranges and the combination of pine stand occurring offsite in combination with the amount preserved on the subject site ensure that this important characteristic to the overall suitability of the forest complex for the Barred Owl is maintained.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Freshwater Wetlands Letter of Interpretation – Line Verification File No. 1110-08-0004.1 FWW080001 (LOI) was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands or transition areas within the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

The proposed project site is located on a parcel of property containing delineated wetlands. The SBRSA's Stony Brook Interceptor, Millstone Interceptor, Millstone Force Main and South Brunswick Pumping station that would serve the SBRSA service area was funded under the federal construction grant program administered under Section 201 of the Federal Clean Water Act. The SBRSA is subject to a federal Environmentally Sensitive Area (ESA) grant condition included in the grant agreement executed between the MTMUA and United States Environmental Protection Agency (USEPA) under project number C34-400-02. This ESA grant condition prohibits any sewer connections to federally funded facilities from any sewage generating structure located on a parcel of property containing wetlands and floodplains unless a mapping revision or a waiver is obtained.

As indicated above, the wetlands areas as delineated based on a Department issued LOI have not been included in the proposed SSA. Pre-existing grant conditions and requirements are unaffected by adoption of this amendment and compliance is required. Compliance with this grant condition can only occur if and

when an applicant requesting sewer service for any development located within Block 11201, Lot 1 has obtained a USEPA mapping revision or waiver. Such mapping revisions and waivers are only issued through a formal request by the grantee, which is the SBRSA for this location. The request by the grantee must include the submission of a wetlands verification from a Department issued LOI confirming that environmentally sensitive areas will not be impacted if sewer conveyance systems are constructed to serve the proposed development. Since, prior to any Department and/or SBRSA approvals for the extension of sewer infrastructure to serve any proposed development will require a USEPA mapping revision or waiver issued at the request of the grantee, the provisions at N.J.A.C. 7:15-5.24(d)1 have been satisfied.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the SBRSA STP (NJ0031119) is permitted to discharge up to 13.06 Million Gallons per Day (MGD) of treated wastewater to the Atlantic Ocean. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the SBRSA STP was calculated to be 9.07 MGD.

Water supply for the proposed project site will be provided by New Jersey American Water Raritan System (NJAWRS) (PWSID No. 2004002). The NJAWRS is a public water system that withdraws water from the Raritan and Millstone Rivers. The location of the diversion is the Raritan-Millstone Water Treatment Plant in Bridgewater and the Canal Road Treatment Plant in Franklin Township. The NJAWRS is currently allocated 6,761.5 million gallons per month (MGM) and has a water supply surplus of 979.264 MGM established by Water Allocation Permit No. 5033 and 5020X.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Princeton Borough has an adopted stormwater management ordinance (No 2007-07); see N.J.A.C. 7:8-4. Princeton Borough is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. In accordance with N.J.A.C. 7:15-5.25(h)5, the proposed project site is not located in a riparian zone.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following:

compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Mercer County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

A public hearing, as required by Mercer County's adopted amendment procedures, will be held by the Mercer County Department of Planning for the proposed amendment on December 9, 2015, at 9:00 A.M. in the McDade Administration Building, Freeholder Meeting Room 211, 640 South Broad Street, Trenton, NJ.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with a copy sent to the Secretary, Mercer County Planning Board, P O Box 8068, Trenton, NJ 08650-0068 and to Mr. Todd Terhune, Scarinci Hollenbeck, 1100 Valley Brook Avenue P O Box 790, Lyndhurst, NJ 07071-0790. All comments should reference Program Interest No. 435452, Activity No. AMD150005 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the Department, the Mercer County Planning Board and the Mercer County Executive in reviewing the amendment request.

Interested persons may request in writing that the Department hold a nonadversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of this notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing

Trenton, New Jersey 08625-0420**

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan
Amendment Applications Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, C.203 (amended by P.L. 2013, c.188.) directs the Department to accept and process certain site specific amendment proposals despite the absence of a

wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:

Colleen Kokas, Director
Office of Water Resource Management Coordination
Mail Code 401-02A
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below:

OFFICE OF WATER RESOURCES MANAGEMENT (WRM) COORDINATION

Proposed Amendment to the Tri-County Water Quality Management Plan

Public Notice:

Elk Township

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management Plan (WQMP). This amendment, entitled "Elk Township", submitted by Churchill Consulting Engineers on behalf of Gloucester County, proposes the following: Expansion of the Gloucester County Utilities Authority (GCUA) Wastewater Treatment Plant (WTP) sewer service area (SSA) to include Future Wastewater Service Area (FWSA) identified on the Gloucester County Non-Consolidated District FWSA map of Elk Township; to expand the GCUA WTP SSA to include new SSA from the Non-Consolidated District; and to increase the GCUA WTP SSA in the Consolidated District. All proposed changes to the GCUA STP SSA are located in

Elk Township, Gloucester County. This amendment proposal would update the Elk Township Wastewater Management Plan (WMP), the GCUA Consolidated District WMP, the Gloucester County Non-Consolidated District FWSA map, as well as the Tri-County WQMP.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011 c.203 as amended and supplemented by P.L. 2013 c.188. This proposal includes multiple site specific amendments which all individually comply with Section 6 of P.L. 2013 c. 188 and with the regulatory criteria established at N.J.A.C. 7:15-5.24.

Non-Consolidated District FWSA to be transferred to the GCUA WTP SSA includes the following:

- The Aura Elementary School, located on Block 33, Lots 12.01, 18, and 19, currently holds NJPDES DGW Permit number NJ0075990. The school received Treatment Works Approval #01-0307 which allowed connection to GCUA WTP, and all though it has not yet connected to GCUA WTP, the school plans to do so in the future. Therefore, the GCUA WTP SSA is proposed to be expanded by 13 acres to include these parcels.
- The Carpenter House, located on Block 67, Lot 3, currently holds NJDPES DGW Permit number NJ0105201, however plans to connect to GCUA WTP in the future. The GCUA WTP SSA is proposed to be expanded by 1.8 acres to include the Carpenter House.
- Silvergate Development, Phase 2, includes proposed residential development on Block 68, Lots 7.01, 7.02 and Block 63, Lot 2.02 and expands GCUA WTP SSA by 97 acres.
- Silvergate Development, Phase 4, includes proposed residential development on Block 62, Lot 3.01 and expands GCUA WTP SSA by 35 acres.
- Silvergate Development, Phases 5 and 7, include proposed commercial development on Block 174, Lot 1, Block 52, Lot 12.02, and Block 53, Lot 1 and expand GCUA WTP SSA by 62 acres.
- Silvergate Development, Phase 6 Town Center, includes Block 170, Lots 14 and 18 and Block 171, Lot 9, that are each in the Consolidated and Non-Consolidated Districts. The portions of these lots that are in the Non-Consolidated District are proposed to be transferred to the Consolidated District and expand the GCUA WTP SSA by approximately 24 acres.
- Twenty-seven developed and two undeveloped parcels on Block 31, Lot 1; Block 34, Lots 1.03, 3, 6 – 9, Block 54, Lots 23, 25, 26.02, 27 – 29, 31; Block 55, Lots 6 – 12; Block 170, Lots 16, 17, 20; and Block 172, Lots 1.01, 1.02, 1.03, 2, 5 expand the GCUA WTP SSA by approximately 65 acres.

New SSA from the Non-Consolidated District to expand GCUA WTP SSA:

- The addition of the remainder of Block 62, Lot 3.01 would add 8.2 acres to the GCUA WTP SSA.
- The addition of the Municipal owned property on Block 62, Lot 3.03 would add 19.7 acres to the GCUA WTP SSA.
- The addition of Block 34, Lot 1.04 would add 0.5 acres to the GCUA WTP SSA.

Expansion of GCUA WTP SSA in the Consolidated District:

- Wetlands as identified in Department mapping that are currently removed from the GCUA WTP SSA are proposed to be included in the SSA in accordance with N.J.A.C. 7:15-5.24. The addition of Block 65, Lots 1, 5; Block 139, Lots 1.02, 103, 4, 5; Block 140, Lots 3 – 8; Block 141, Lots 4.01, 5; Block 147, Lots 1 – 3; Block 148, Lots 1 – 3, 4.01, 4.02; Block 149, Lots 1, 3, 4, 5.01, 5.02, 6; Block 150, Lots 1, 2; Block 151, Lots 1 – 3; Block 155, Lots 3 – 5; Block 156, Lots 1 – 6; Block 157, Lots 2, 4.01, 4.02, 5; Block 158, Lots 2 – 4; Block 159, Lots 3 – 5; Block 160, Lot 3; Block 165, Lot 1; Block 166, Lot 1, Block 168, Lots 1, 2, 3.02, 3.03; Block 169, Lots 1 – 7, 11 would add approximately 33 acres to the GCUA WTP SSA.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the proposed amendment are appropriate for inclusion in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One special water resource protection areas, and wetlands, alone or in combination.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Block 33, Lot 12.01, which is owned by Aura Elementary School, contains grassland bird habitat as per Landscape Project mapping, however the area is actively mowed and utilized for recreation, therefore deemed unsuitable habitat.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation (LOI) # 0804-03-0003.5 was provided, confirming the extent of wetlands on Block 68, Lot 7.02, which is part of Silvergate Development Phase 2. The proposed SSA on this parcel excludes wetland areas as delineated in the LOI. LOI # 0804-03-0003.2 was provided confirming the extend of wetlands on Block 170, Lots 14 and 18, which are part of Silvergate Development Phase 6 Town Center. The proposed SSA on these parcels excludes the wetlands as delineated in the LOI that are contiguous with the Still Run tributary. Wetlands identified in Department mapping that are currently removed from the GCUA WTP SSA are proposed to be re-included in the SSA in accordance with N.J.A.C. 7:15-5.24, as these isolated wetlands are less than 25 acres and not contiguous to any other ESAs. This change would add SSA to Block 65, Lots 1, 5; Block 139, Lots 1.02, 103, 4, 5; Block 140, Lots 3 – 8; Block 141, Lots 4.01, 5; Block 147, Lots 1 – 3; Block 148, Lots 1 – 3, 4.01, 4.02; Block 149, Lots 1, 3, 4, 5.01, 5.02, 6; Block 150, Lots 1, 2; Block 151, Lots 1 – 3; Block 155, Lots 3 – 5; Block 156, Lots 1 – 6; Block 157, Lots 2, 4.01, 4.02, 5; Block 158, Lots 2 – 4; Block 159, Lots 3 – 5; Block 160, Lot 3; Block 165, Lot 1; Block 166, Lot 1, Block 168, Lots 1, 2, 3.02, 3.03; and Block 169, Lots 1 – 7, 11.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed project sites.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes in the proposed SSA.

Pursuant to P.L. 2011, c. 203, as amended and supplemented by P.L. 2013, c. 188, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule at N.J.A.C. 7:15 regardless of whether capacity has been fully assessed.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQMP. All information related to the WQMP and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 984-3665.

Interested persons may submit written comments on the proposed amendment to WQMP Program Docket, at the Department address cited above with a copy sent to Alexander Churchill, Churchill Consulting Engineers, 344 North Route 73, Berlin, N.J. 08009. All comments should reference Program Interest No. 435433, Activity No. AMD150005 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435433, Activity No. AMD150005 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQMP Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**Proposed Amendment to the Tri-County Water Quality Management Plan
Public Notice:**

Willingboro Lakes Park

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management Plan (WQMP). This amendment proposal, submitted by the Burlington Department of Resource Conservation on behalf of the Burlington County Board of Chosen Freeholders, would reduce the sewer service area (SSA) of the Willingboro Municipal Utilities Authority (MUA) Water Pollution Control Facility (WPCF) by approximately 0.18 acres. The reduction of SSA is caused by removing the currently adopted SSA on Block

13, Lot 2.01, in Willingboro Township, Burlington County, and moving it to different location on the same parcel, which is adjacent to existing sewer infrastructure. Burlington County was recently awarded a State Green Acres park development grant to develop “Willingboro Lakes Park”, which will include visitor restroom facilities. The County has anticipated that the SSA will include the future restroom facilities for park visitors. This amendment would update the Willingboro MUA Wastewater Management Plan, the Burlington County Future Wastewater Service Area map, and the Tri-County WQMP.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011 c.203 as amended and supplemented by P.L. 2013 c.188. This proposal qualifies as a site specific amendment pursuant to Section 7 of P.L. 2013, c.188 and is in compliance with the regulatory criteria established at N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas are appropriate for inclusion in the proposed SSA. ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. State Endangered Bald Eagle habitat has been identified on site, however the Department has determined, based on the most recent available data and field knowledge of the site by the Department’s Bald Eagle experts, that even though the area proposed for SSA falls within the Bald Eagle nest buffer, due to intervening development this portion of the nest buffer is not considered to be suitable habitat.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, special water resource protection areas along Category One waters and their tributaries established under the Stormwater Management rules, N.J.A.C. 7:8 are not to be included in the SSA, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Category One waterways or their tributaries are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). There are no wetlands in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(c), lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not included in the SSA. The project site is not in a coastal planning area.

In accordance with N.J.A.C. 7:15-5.24(d), special restricted areas including areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and

floodplains, in addition to special restricted areas of designated beaches, coastal high hazard areas, and dunes are not included in the SSA. These restricted areas are not applicable here.

Pursuant to P.L. 2011 c.203, as amended and supplemented by P.L. 2013 c.188, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule at N.J.A.C. 7:15 regardless of whether capacity has been fully assessed. However, in accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. This project would not add additional planned wastewater flow to the Willingboro MUA WPCF as the previously adopted SSA is being removed from one portion of the parcel and proposed in a different location within the same parcel, which is a more suitable location.

In accordance with N.J.A.C. 7:15-5.25(h)3, the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the Willingboro MUA which holds PWSID No. 0338001, is allocated 310 million gallons per month (MGM), and has a water supply surplus of 99.55 MGM. As the proposed SSA is being moved from one portion of the parcel to another, and the proposed use of the SSA not changing, the need for water is not increasing. There is sufficient water supply available.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2011, c. 203 as amended by P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Compliance with this standard shall be demonstrated by submission of an adopted stormwater management plan and ordinance that conform with the requirements of N.J.A.C. 7:8. The project is in compliance with this standard, as Willingboro Township has adopted stormwater control ordinance #2007-05, which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8. The County and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development.

In accordance with N.J.A.C. 7:15-5.25(h)5i, riparian zones shall be protected. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. There are no riparian zones on this site.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQMP. All information related to the WQMP and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 984-3665.

Interested persons may submit written comments on the proposed amendment to WQMP Program Docket, at the Department address cited above with a copy sent to Ms. Gina Berg, Water Resources Coordinator, Burlington County Department of Resource Conservation, 624 Pemberton Browns Mills Road, Pemberton, N. J. 08068. All comments should reference Program Interest No. 435433, Activity No. AMD150006 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435433, Activity No. AMD150006 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQMP Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**Proposed Amendment to the Upper Delaware Water Quality Management Plan
Public Notice:**

Sustainable Aquaculture Systems, Inc.

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Upper Delaware Water Quality Management Plan (WQM) Plan. The amendment would modify the Hunterdon County Wastewater Management Plan including the Future Wastewater Service Area Map. This amendment proposal, submitted on behalf of Sustainable Aquaculture Systems, Inc., would identify a new discharge to groundwater sewer service area (SSA) of approximately 6.4 acres on a portion of Lots 21 and 23 of Block 49, in Franklin Township, Hunterdon County. The SSA would accommodate a development proposed by Sustainable Aquaculture Systems, consisting of indoor fish and plant production facilities, as well as a research facility, and other site improvements, in all totaling 205,000 square feet in area and employing 80 individuals. Wastewater planning flows were projected based on the criteria at N.J.A.C. 7:14A-23.3 and amount to a total of 18,000 gallons per day (GPD) – 2,000 GPD sanitary wastewater and 16,000 GPD process wastewater. The sanitary wastewater is proposed to be discharged to three on-site septic systems. The process wastewater is proposed to be treated by an on-site system and discharged to groundwater via a subsurface disposal system. The project will require a NJPDES groundwater discharge permit.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESA's) have been assessed to determine what areas of the proposed project site are appropriate for inclusion in the SSA. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that T&E species habitat are located both on site and within a portion of the requested SSA. However, pursuant to N.J.A.C. 7:15-5.25(e), the applicant has submitted a request to the Department for a Habitat Suitability Determination. In response to that request, the Department, based in part on a site visit conducted on July 7, 2015, has concluded the following: 1) the site falls within the likely home range of T&E species; 2) some of the on/off site freshwater wetlands feature habitat characteristics consistent with that supporting T&E species; 3) portions of the easterly extension of the footprint of proposed SSA contain a portion of the buffers associated with the aforementioned freshwater wetlands; 4) the buffer areas represent edge areas of T&E habitat; and 5) the remaining majority of the footprint of proposed SSA does not provide suitable habitat for T&E. As such, it is believed that the buffer area within the easterly portion of the footprint of proposed SSA is not critical to survival of T&E species and that sufficient protection will be provided to onsite habitat features through the requirements of the Freshwater Wetlands Protection Act.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands within the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed project site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required. Review did not reveal any Federal 201 grant limitations applicable to the site.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Upper Delaware WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 984-3665.

Interested persons may submit written comments on the proposed amendment to WQMP Program Docket, at the Department address cited above with a copy sent to Jens Riedel, PE of Natural Systems Utilities, 2 Clerico Lane, Hillsborough, New Jersey 08884. All comments should reference Program Interest No. 435437, Activity No. AMD150001 and must be submitted within 30 days of the date of this published notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

**Proposed Amendment to the Monmouth County Water Quality Management Plan
Public Notice:**

Friendship Circle

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Monmouth County Water Quality Management (WQM) Plan. This amendment proposal, submitted on behalf of Friendship Circle would expand the sewer service area of the Western Monmouth Utilities Authority (WMUA) Sewage Treatment Plant (STP) by 5.92 acres to allow for the construction of a quasi-public non-profit facility which would provide recreational opportunities for children with special needs and young adults. The proposed project site is located in Marlboro Township, Monmouth County on a portion of Block 172/Lots 27 & 29 which is southeast of the intersection of Texas Road and Spring Valley Road. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA's are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Freshwater Wetlands Letter of Interpretation Reissuance File No. 1328-04-0002.1 FWW090001 (LOI) was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands within the proposed SSA as per the LOI delineation..

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the Pine Brook Treatment Plant (NJ0023728) is permitted to discharge up to 8.8 Million Gallons per day (MGD) of treated wastewater to the Pine Brook. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the Pine Brook Treatment Plant was calculated to be 7.9 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 4,500 gallons per day (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need of a site is to be evaluated. Water supply for the proposed project will be provided by the Marlboro Township Municipal Utilities Authority (MTMUA) which holds PWSID 1328002. The MTMUA is a public water system that withdraws water from the Farrington Aquifer. The location of the diversion is at the intersection of Tennent Road and Route 18. MTMUA is currently allocated 337 million gallons per month (MGM) and has a water supply surplus of 83.667 MGM established by Water Allocation Permit No. 5055. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 0.209 MGM.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Marlboro Township has an adopted stormwater management ordinance (No. 2006-21); see N.J.A.C. 7:8-4. Marlboro Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. A riparian zone of Deep Run (FW2-NT) has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The provisions at N.J.A.C. 7:15-5.25(h)5i, have been satisfied by the exclusion of the riparian corridor and associated 50 foot buffer to the Deep Run from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. Although there are steep slopes on a portion of Lot 29, the provisions of N.J.A.C. 7:15-5.25(h)6 have been satisfied by the exclusion of these areas from the proposed SSA.

The proposed project site is located within Marlboro Township's Land Conservation zone. As such, the proposed project is not a permitted use as defined in chapter 220-47 of the Marlboro Township zoning code. The applicant had applied to the Marlboro Township Board of Adjustment for a use variance. As of the date of this notice, the meeting for the review of the application for a variance is scheduled for October 27th and the Board's decision will be reviewed by the Monmouth County Department of Planning at their November 4th Amendment Review Committee meeting. The outcome from each of these meetings will be evaluated by the Department in determining whether to proceed with this amendment to adoption.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Monmouth County WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Monmouth County Planning Board, Hall of Records Annex, One East Main Street, Freehold, New Jersey 07728 and the Department, Office of Water Resources Management Planning, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Planning at (609) 777-4349.

Interested persons may submit written comments on the amendment to WQM Program Docket, Office of Water Resources Management Planning, at the Department address cited above with copies sent to Ms.

Linda Brennen, Monmouth County Division of Planning at the address cited above and to Ms. Lorali Totten, Crest Engineering Associates, 100 Rike Drive, Millstone, NJ 08535. All comments should reference Program Interest No. 435462, Activity No. AMD150003 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Proposed Amendment to the Tri-County Water Quality Management Plan

Public Notice:

TOFAMO Medford

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management Plan (WQMP). This amendment proposal, submitted by Leah Fury Bruder on behalf of the TOFAMO Land Corporation, would increase the sewer service area (SSA) of the Medford Township Wastewater Treatment Plant by approximately 44 acres on Block 403, Lots 2 and 7 in Medford Township, Burlington County. This amendment proposal is named "TOFAMO Medford" and would update the Medford Township Wastewater Management Plan, the Burlington County Future Wastewater Service Area map, and the Tri-County WQMP.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011 c.203 as amended and supplemented by P.L. 2013 c.188. This proposal qualifies as a site specific amendment pursuant to Section 6 of P.L. 2013, c.188 and is in compliance with the regulatory criteria established at N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESAs) have been assessed to determine what areas are appropriate for inclusion in the proposed SSA. ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e)-(h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. No threatened and/or endangered species are identified within the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, special water resource protection areas along Category One waters and their tributaries established under the Stormwater Management rules, N.J.A.C. 7:8 are not to be included in the SSA, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Category One waterways or their tributaries are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)–(h). The subject parcels were included in a previously adopted SSA, however, the Burlington County FWSA map removed the parcels due to the identification of wetlands using Department Wetlands mapping. In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation, L.O.I. # 0320-09-0002.1 was submitted, which accurately delineates the wetlands on site, and these areas are not included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(c), lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not included in the SSA. The project site is not in a coastal planning area.

In accordance with N.J.A.C. 7:15-5.24(d), special restricted areas including areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains, in addition to special restricted areas of designated beaches, coastal high hazard areas, and dunes are not included in the SSA. These restricted areas are not applicable here.

Pursuant to P.L. 2011 c.203, as amended and supplemented by P.L. 2013 c.188, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule at N.J.A.C. 7:15 regardless of whether capacity has been fully assessed. However, in accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The applicant has projected two build-out scenarios: if the proposed SSA was to be fully developed with retail and/or office uses, using the current zoning, Highway Management Commercial, the maximum projected wastewater flow, as calculated in accordance with N.J.A.C. 7:14A-23.3 would be 36,000 gallons per day (gpd); TOFAMO intends to work with Medford Township to establish new zoning to permit mixed-use and/or inclusionary residential development on the property. In accordance with N.J.A.C. 7:14A-23.3, the maximum flow for the anticipated development of 95 single family homes within the proposed SSA would yield 28,500 gpd.

In accordance with N.J.A.C. 7:15-5.25(h)3, the water supply need for the proposed project has been evaluated. Water supply for the proposed development would be provided by the Medford Township MUA which holds PWSID No. 320001, is allocated 115.6 million gallons per month (MGM), and has a water supply surplus of 13.646 MGM. Future development would not require modification of the existing water allocation permit as there is sufficient water supply available.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2011, c. 203 as amended by P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Compliance with this standard shall be demonstrated by submission of an adopted stormwater management plan and ordinance that conform with the requirements of N.J.A.C. 7:8. The project is in compliance with this standard, as Medford Township has adopted stormwater control ordinance #2010-31, which complies with the performance standards of the Stormwater Management

Rules at N.J.A.C. 7:8. The County and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development.

In accordance with N.J.A.C. 7:15-5.25(h)5i, riparian zones shall be protected. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. A 50-foot buffer has been applied to Sharps Run identified onsite, and this riparian zone has been removed from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQMP. All information related to the WQMP and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 984-3665.

Interested persons may submit written comments on the proposed amendment to WQMP Program Docket, at the Department address cited above with a copy sent to Leah Fury, TOFAMO Land Corporation, 203 Taunton Boulevard, Medford, N.J. 08055. All comments should reference Program Interest No. 435433, Activity No. AMD150007 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435433, Activity No. AMD150007 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQMP Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Proposed Amendment to the Lower Raritan/Middlesex County Water Quality Management Plan

Public Notice:

Tyler Village

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Lower Raritan/Middlesex County Water Quality Management (WQM) Plan. This amendment proposal, entitled “Tyler Village”, submitted on behalf of Tyler Properties LLC, would expand the Middlesex County Utilities Authority (MCUA) Sewage Treatment Plant (STP) sewer service area (SSA) by 18 acres to allow for the construction of 65 two-bedroom apartments and 35 three-bedroom apartments. The proposed amendment site is located in South Plainfield Borough on a portion of Block 467, Lot 21 at the intersection of Tyler Place and New Brunswick Avenue. The entire proposed development is for 460 apartments and 10,000 sq. ft. of retail space, however, 360 of these apartments and all of the retail space are in the presently adopted SSA and are not the subject of this proposed amendment. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department’s determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service area due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA’s are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA’s, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification Reissuance File # 1222-04-0002.1 FWW040001 was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands or transition areas within the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed project site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant

conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the MCUA STP (NJ0020141) is permitted to discharge up to 147 Million Gallons per Day (MGD). Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the MCUA STP was calculated to be 101.69 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 25,125 gallons per day (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project is to be evaluated. Water supply for the proposed development will be provided by the New Jersey American Water Company-Raritan System (NJAWRS) (PWSID No. 2004002). NJAWRS is a public water system which withdraws water from the Raritan River, Millstone River and Delaware and Raritan canal. The NJAWRS has diversion privileges set by Water Allocation Permit No. 5033 for a total supply of 6761.5 Million Gallons per Month (MGM) and currently has a water supply surplus of 979.264 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 1.94 MGM.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. South Plainfield Borough has an adopted stormwater management ordinance (No. 1731); see N.J.A.C. 7:8-4. South Plainfield Borough is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. A riparian zone of a Bound Brook tributary (FW2-NT) has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The provisions at N.J.A.C. 7:15-5.25(h)5i, have been satisfied by the exclusion of the riparian corridor and associated 50 foot buffer of the Bound Brook Tributary from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact

locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Lower Raritan/Middlesex County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Middlesex County Planning Department, 75 Bayard Street – 5th Floor, New Brunswick, New Jersey 08901, and the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Middlesex County Planning Department at (732) 745-3016 or the Office of Water Resources Management Coordination at (609) 777-4349.

A **public hearing** will be held by Middlesex County on the proposed WQM Plan amendment. The public hearing will be on December 7 at 5:30 p.m. in the Freeholders' Public Meeting Room, 1st Floor, of the Middlesex County Administration Building located on John F. Kennedy Square and Bayard Street, New Brunswick, New Jersey.

Interested persons may submit written comments on the amendment to WQM Program Docket, Office of Water Resources Management Coordination, at the Department address cited above with a copy sent to Ms. Mirah Becker of the Middlesex County Planning Department at the County address cited above and to Mr. Julius Szalay, Menlo Engineering Associates, 261 Cleveland Avenue, Highland Park, NJ 08904. All comments should reference Program Interest No. 435463, Activity No. AMD150004 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the County Board of Chosen Freeholders in reviewing the amendment request. If the amendment is adopted by Middlesex County, the Department must review the amendment prior to final adoption. The comments received in reply to this notice and to the public hearing will also be considered by the Department during its review.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing

Proposed Amendment to the Lower Raritan/Middlesex County Water Quality Management Plan

Public Notice:

Middlesex Energy Center LLC

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Lower Raritan/Middlesex County Water Quality Management (WQM) Plan. This amendment proposal, submitted on behalf of Middlesex Energy Center LLC, would expand the sewer service area (SSA) of the Middlesex County Utilities Authority (MCUA) Sewage Treatment Plant (STP) by 8.19 acres to serve a proposed combined cycle power plant. The proposed project

site is located in Sayreville Borough, Middlesex County on portions of: (Block 57.02/Lot 1; Block 57.04/Lot 1; and Block 57.05/Lot 1) now known as Block 58, Lot 9, which is west of Jernee Mill Road (Route 675) and east of the South River. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA's are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that a portion of the site is identified as Rank 4 Yellow Crowned Night Heron and Bald Eagle habitat in Landscape Project version 3.1.

In August, 2015, the Department received a Habitat Suitability Determination application (HSD), prepared by Maser Consulting. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department determined that only a small portion of this area falls within the bald eagle foraging model based on the Department's further review of resource mapping for the site. These areas of suitable habitat have not been included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation – Line Verification File No. 1219-08-0004.1 FWW080001 (LOI) was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval received an extension to August 25, 2019 File No. 1219-08-0004.1 FWW140001.. The wetlands areas located on this site are small, non-contiguous areas of less than 25 acres. They therefore do not meet the criteria for exclusion from the proposed SSA pursuant to N.J.A.C. 7:15-5.24(b)1.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the MCUA sewage treatment plant (NJ0020141) is permitted to discharge up to 147 Million Gallons per Day (MGD) of treated wastewater to the Raritan River. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the MCUA sewage treatment plant was calculated to be 105.61 MGD. The projected wastewater flow for the proposed project, calculated in accordance with N.J.A.C. 7:14A-23.3 is 1.47 MGD.

Water supply for the proposed project will be provided by Borough of Sayreville Water Department, stormwater collected on site, and reclaimed water from MCUA. The Borough of Sayreville Water Department is a public water system that withdraws water from the Potomac Raritan Magothy aquifer. The location of the diversion is on Bordentown Avenue. The Borough of Sayreville Water Department is currently allocated 427 million gallons per month (MGM) and has a water supply surplus of 132.324 MGM established by Water Allocation Permit No. 5313. It is estimated that between 1.47 MGD and 5.2 MGD of reclaimed water (“grey water”) will be purchased from MCUA. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 0.469 MGM.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity’s stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Sayreville Borough has an adopted stormwater management ordinance (No. 957-06); see N.J.A.C. 7:8-4. Sayreville Borough is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones of Pond Creek (FW2-NT/SE1) and Duck Creek (FW2-NT/SE1) have been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body’s classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer widths for these sections of the Pond and Duck Creeks is 150 feet due to the potential presence of acid producing soils. The provisions at N.J.A.C. 7:15-5.25(h)5i, have been satisfied by the exclusion of the riparian corridor and associated 150 foot buffer to the Pond and Duck Creeks from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Lower Raritan/Middlesex County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Middlesex County Planning Department, 75 Bayard Street – 5th Floor, New Brunswick, New Jersey 08901, and the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Middlesex County Planning Department at (732) 745-3016 or the Office of Water Resources Management Coordination at (609) 777-4349.

A **public hearing** will be held by Middlesex County on the proposed WQM Plan amendment. The public hearing will be on December 7, 2015 at 5:30 p.m., in the Freeholders' Public Meeting Room, 1st Floor, of the new Middlesex County Administration Building located on John F. Kennedy Square and Bayard Street, New Brunswick, New Jersey.

Interested persons may submit written comments on the amendment to WQM Program Docket, Office of Water Resources Management Coordination, at the Department address cited above with a copy sent to Ms. Mirah Becker of the Middlesex County Planning Department at the County address cited above and to Ms. Susan Brasefield, Maser Consulting, 331 Newman Springs Road – Suite 203, Red Bank, NJ 07701. All comments should reference Program Interest No. 435463, Activity No. AMD150005 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the Middlesex County Board of Chosen Freeholders in reviewing the amendment request. The comments received in reply to this notice and to the public hearing will also be considered by the Department during its review.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Propose Amendment to the Northeast Water Quality Management Plan

Public Notice:

Avon at Denville

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Northeast Water Quality Management (WQM) Plan. This amendment proposal, submitted on behalf of AvonBay Communities, Inc., would expand the sewer service area (SSA) of the Rockaway Valley Regional Sewerage Authority (RVRSA) to include approximately 18 acres on portions of Block 40001, Lot 4, and Block 40203, Lot 1, within Denville Township, Morris County. This proposed amendment (Program Interest No.: 435442; Activity No.: AMD140001) would provide for a proposed 19 residential units subdivision with each unit to be constructed on an individual lot.

This application has been reviewed in accordance with the Water Quality Management Planning rules that set the environmental standards to be applied to an amendment at N.J.A.C. 7:15-5.18, N.J.A.C. 7:15-5.24 and N.J.A.C. 7:15-5.25(h), and Public Law (P.L.) 2011, c.203 as amended and supplemented by P.L. 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25(h).

In accordance with N.J.A.C. 7:15-5.24 environmentally sensitive areas (ESAs) are assessed to determine what areas of the property are appropriate for inclusion in the proposed SSA. Environmentally sensitive areas are defined based on a composite geographic information systems (GIS) analysis, as any contiguous area of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination, and are required to be excluded from the SSA. As describe below, the Department determined that inclusion of the 18 acres as SSA within the 42 acre site is compliant with N.J.A.C. 7:15-5.24(b).

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Landscape Project version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e)-(h). A review of the Landscape Project Maps determined that the site location was identified as potential Rank 5 Forest Habitat for Indiana Bat.

As a result of the above, pursuant to N.J.A.C. 7:15 5.26(a) the applicant submitted a Habitat Suitability Determination (HSD) application to refute the presumption that the parcel was in fact suitable and critical habitat for the identified species. A review of the HSD application and site investigation conducted by the Department's Endangered and Nongame Species Program determined that, based upon the proposed site plan for the 19 lot subdivision, site disturbance would be minimized to the maximum extent practicable. The Department concluded that the resulting 18 acre footprint of development within the 42 acre property would not adversely impact the suitability of the habitat of the local population of the species. In addition, as the habitat is designated for the Indiana Bat, a Ranked 5 U.S. Fish and Wildlife Endangered Species, a tree clearing timing restriction from April 1 through Nov. 15 will be imposed as part of any Department issued wetland permitting approvals. As a result of this finding, the Department determined that this analysis has been satisfied.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). A site review of the property determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, Category One (C1) special water resource protection areas are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). The Department determined no classified C1 water bodies exist on or near the property. In addition, no portion of the proposed development on site is identified as within a riparian zone as established at N.J.A.C. 7:15-5.25(g)2-5.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not proposed as SSA except as provided pursuant to N.J.A.C. 7:15-5.24(e)2. As such, a Letter of Interpretation (LOI), file No. 1408-08-0006.1, verified the presence and extent of the regulated wetlands and associated transmittal buffers located within on Block 40001, Lot 4, and Block 40203, Lot 1. With the exception of one wetland on the property, classified as Intermittent Resource Value, referenced on the approved LOI as B1-B11, all other wetlands on the property are identified as isolated wetland pockets and potential vernal pools. Based on the LOI, the combined delineated wetlands would be less than 25 acres in total area and not contiguous to any larger offsite wetland complex of 25 acres or more. Therefore, the delineated onsite wetlands are not an environmental feature as defined at N.J.A.C. 7:15-5.24(b) and have not been excluded from the proposed SSA.

As part of this proposed amendment, delineated isolated wetlands on the proposed project property are within the 18 acres proposed as SSA. As a result, contingent upon final site plan subdivision approval, these isolated wetlands which may be impacted or distributed due to the proposed project activity. Nonetheless, in accordance with N.J.A.C. 7:7A, any disturbance or fill to these wetlands will require wetland permitting approval from the Department.

All other ESA as defined at N.J.A.C. 7:15-5.24(c) 1-3; lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not applicable to this proposed amendment location nor are any ESA as defined at N.J.A.C. 7:15-5.24(d)1-4; beaches, coastal high hazards area or dunes as defined under N.J.A.C.7:7E.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that define and prohibit the extension of sewers into specific ESAs are applicable to this proposed amendment. The RVRSA Federal 201 Grant (#C-389-06), Findings of No Significant Impact (FONSI), dated June 23, 1984, defines the specific ESA's as "mapped wetlands in accordance with the National Wetlands Inventory Maps" and/or areas within "the 100 year flood-plain (flood hazard area (FHA)) as defined by the federal Department of Housing and Urban Development". As described above, wetlands are included as part the proposed SSA however this site is not within mapped FHA.

Furthermore, as noted as text on the adopted Morris County FWSA map which states: "Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities) which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required". Compliance of this condition can only occur if and when an applicant requesting sewer service for any development on the subject property has obtained a USEPA grant mapping waiver. Such waivers are only issued through a formal request through the grantee (RVRSA). This request must include the submission of wetlands verification via a Department LOI and/or permits approving any wetland impacts if sewer conveyance systems are constructed to serve development. In addition, prior to any Department and/or RVRSA approvals for the extension of sewer infrastructure to serve any proposed development, the USEPA mapping waiver must first be issued. As the USEPA mapping waiver must be requested and issued before the grantee can serve the development, the stated grant condition will be satisfied at that time.

Denville Township, Morris County, New Jersey has adopted "Land Use Ordinance Chapter XIX, Sub-Chapter No.§19-4.16, which contains stormwater control and design measures. The Department has determined that this sub-chapter/ordinance complies with the water quality and quantity standards in

accordance with N.J.A.C. 7:8. Consequently, the requirements of N.J.A.C. 7:15-5.25(g)1 for stormwater control have been satisfied.

N.J.A.C. 7:15-5.25(h)6 does not permit new disturbance in areas with a gradient equal to or greater than 20 percent (20%), except as provided by N.J.A.C. 7:15-5.25(g)ii. As identified on the submitted site plans, the project proposes minimal disturbance of steep slopes with a gradient of equal to or greater than 20%. In accordance with N.J.A.C. 7:15-5.25(g)ii new disturbance located in areas of steep slopes can occur if it is necessary prevent extraordinary hardship peculiar to the property and not created by the property owner, and/or to provide an environmental benefit. To that effect, as part of this proposed amendment, the applicant supplemented their application with additional information to demonstrate that the steep slope disturbance meets these hardship exceptions.

To demonstrate that the hardship was peculiar to the property and not created by the property owner, the applicant indicated that the proposed disturbance is mainly for centralized roadways to gain access to the 19 units within the development on the 42 acres property. The applicant noted that, as the project property is constrained by the onsite steep slopes and wetlands, the final alignment for the access roads to the proposed new lots to the greatest extent possible, minimizes disturbance to these areas, while providing for the remaining undeveloped area left undisturbed. The undeveloped portions of the site area include undisturbed wooded area and several potential vernal pools that would maintain potential Indiana Bat habitat, identified species of concern.

Furthermore, any final site plan approval will required to meet Denville Township's Land Use Ordinance Chapter XIX, Sub-Chapter No. 19-4.508 which regulates development within steep slopes, defined as greater than or equal to fifteen percent (15%). This ordinance allows for disturbance within steep slope gradient between 20% and 30%, however, up to only 30 percent of the total area of theses steep slopes onsite can be impacted.

In addition, the Department has determined that prior to the adoption of the updated Morris Country Future Sewer Service Area Mapping; this site was originally identified as within approved SSA. Therefore, as it appears that the applicant acquired the property with the intentions to develop the parcel within the site constraints; as permissible under the residential zoning and applicable land use ordinances. As part of the amendment, only 18 acres within the 42 acre site has been proposed as SSA so that the proposed disturbances within these steep slopes were necessary in order to maintain the majority of the property as undeveloped open space providing potential habitat for the identified Indiana Bat.

Based on the above, the Department determined that the proposed minimum disturbance within the steep slopes was necessary to avoid additional ESA impacts due to the constraints peculiar to the site preventing a hardship, not created by the property owner while potentially creating an environmental benefit. As a result, the Department concurred that the proposed disturbance within these steep slopes necessary pursuant to N.J.A.C. 7:15-5.25(g)ii.

In accordance with N.J.A.C. 7:15-5.25(h)3, the Department evaluated the water supply availability for the proposed project. Potable water to the proposed development is to be supplied by the Denville Township Water Department (PWSID #1408007) which has an identified available surplus capacity of approximately 22 million gallons per month. Therefore, the Department determined there is sufficient water supply available within the existing water allocation permit to serve the proposed new on-site development. The proposed project is located within the Highlands Planning Area. In accordance N.J.A.C 7:15-3.10 the Department shall not approve a WQM Plan amendment for a project proposed in the Highlands Planning Area without first seeking comments from the Highlands Council (Council). To this end, the applicant was directed by the Department to provide the Council a copy of the proposed amendment application and all supporting documentation with a cover letter formally requesting a review of the amendment proposal and to provide the Department with recommendations, if any.

In response to the request for recommendations, the Department received correspondence from the Council dated February 3, 2015 indicating that the proposed project is located in a HUC-14 subwatershed identified in the Highlands Regional Master Plan (RMP) as having a water supply deficit. The Council calculated that the increased water demand would exacerbate the deficit of net water availability as an additional consumptive use. Therefore, the Council deemed the proposed project inconsistent with policies of the RMP. To address the water supply deficit, as required by the RMP, the proposed project would need to develop a plan to mitigate the projected consumptive loss by a factor of 125%.

Based on the proposed wastewater flow projections for the 19 new residential units facilities any mitigation target as calculated by Council will be required to resolve this RMP inconsistency. In addition, in accordance Section 10 of Executive Order 114, (September, 5, 2008), this proposed amendment cannot be adopted until such time that a mitigation and/or water conversation plan addressing the projected consumptive loss has been deemed acceptable by the Council.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.”

This notice is being given to inform the public that a plan amendment has been proposed for the Northeast WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management (WRM) Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625. The Department’s file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of WRM Coordination at (609) 777-4349.

Interested persons may submit written comments on the amendment to WQM Program Docket, at the Department address cited above with a copy sent to Eric Keller, P.E., Executive Vice President, Omland Engineering Associates, Inc., 54 Horsehill Road, Cedar Knolls, New Jersey 07927. All written comments should reference Program Interest No. 435442; Activity No.: AMD140001 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. Any written requests should reference the Program Interest and Activity numbers cited above and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this public notice to WQM Program Docket at the Department address cited above. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

New Jersey Department of Environmental Protection
Land Use Management
Division of Coastal and Land Use Planning

**Notice of Public Comment Period Regarding submission of
Municipal Public Access Plans**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Division of Coastal and Land Use Planning, has received the following application(s) for NJDEP approval of a Municipal Public Access Plan requesting approval in accordance with N.J.A.C. 7:7E (the Coastal Zone Management Rules).

The public comment period on these applications begins on the date of publication of this notice and will close thirty (30) calendar days later. Any interested person may raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. A copy of these plans can be found at <http://www.state.nj.us/dep/cmp/access/mpaplandraft.htm>.

NJDEP will consider all timely submitted comments. The applicant and each person who submitted written comments will receive notice of NJDEP's final determination.

Written comments should be submitted to:

Narrative	
	The existing 36 inch CM pipe from Passaic Avenue leading to the out fall at Passaic River, West of the intersection of Passaic Avenue and Bergen Avenue, Kearny, NJ, has corroded and collapsing creating fox holes and a very dangerous condition in the Kearny Archery Range. Hence for pedestrian safety, the 36 inch culvert pipe has to be replaced. Replacing the CM pipe is also net environmental benefit as it will reduce the soil under the Kearny Archery Range to flow to the Passaic River.

DIVISION OF WATER QUALITY
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Pilar Patterson, Chief
